1310.26 seconds.

1323.63 seconds.

1337 seconds.

On 24-04-2026, my server took snapshots, every 13.37 seconds, of this very slow animation of 10 circles. These circles slowly rotate, and turn into a square, and then back to a circle. They all move at different speeds. They all have a different random colour. They all animate with a different animation timing function. And they are all blended with the so called *difference blend mode*, which makes each snapshot even more random.

This animation can be enjoyed as a slow animation on <http://vvg.gr/nw> and it will probably trigger the ventilator in your computer. It might even crash. You are warned.

More books like this one, but generated on a different date, can be bought here: <https://vasilis.nl/shop/books/circles/>
