I sent an enormous batch of images that my—
handwritten—algorithms had generated over
the years to my friend Daan Rongen. He passed
them through a GAN, a so called *generative
adversarial network*, a clever form of *machine
learning*. The next few days we marvelled at the
images it came up with. Some of the images that
his machine generated inspired me to write a
new algorithm—by hand—that generates these
pixel gradients you can find in this book.
