

The background features a light purple gradient with several thin, white, curved lines that sweep across the page from the top left towards the right, creating a sense of motion and depth.

100 random slices

October the 27th, 2016 — Vasilis van Gemert

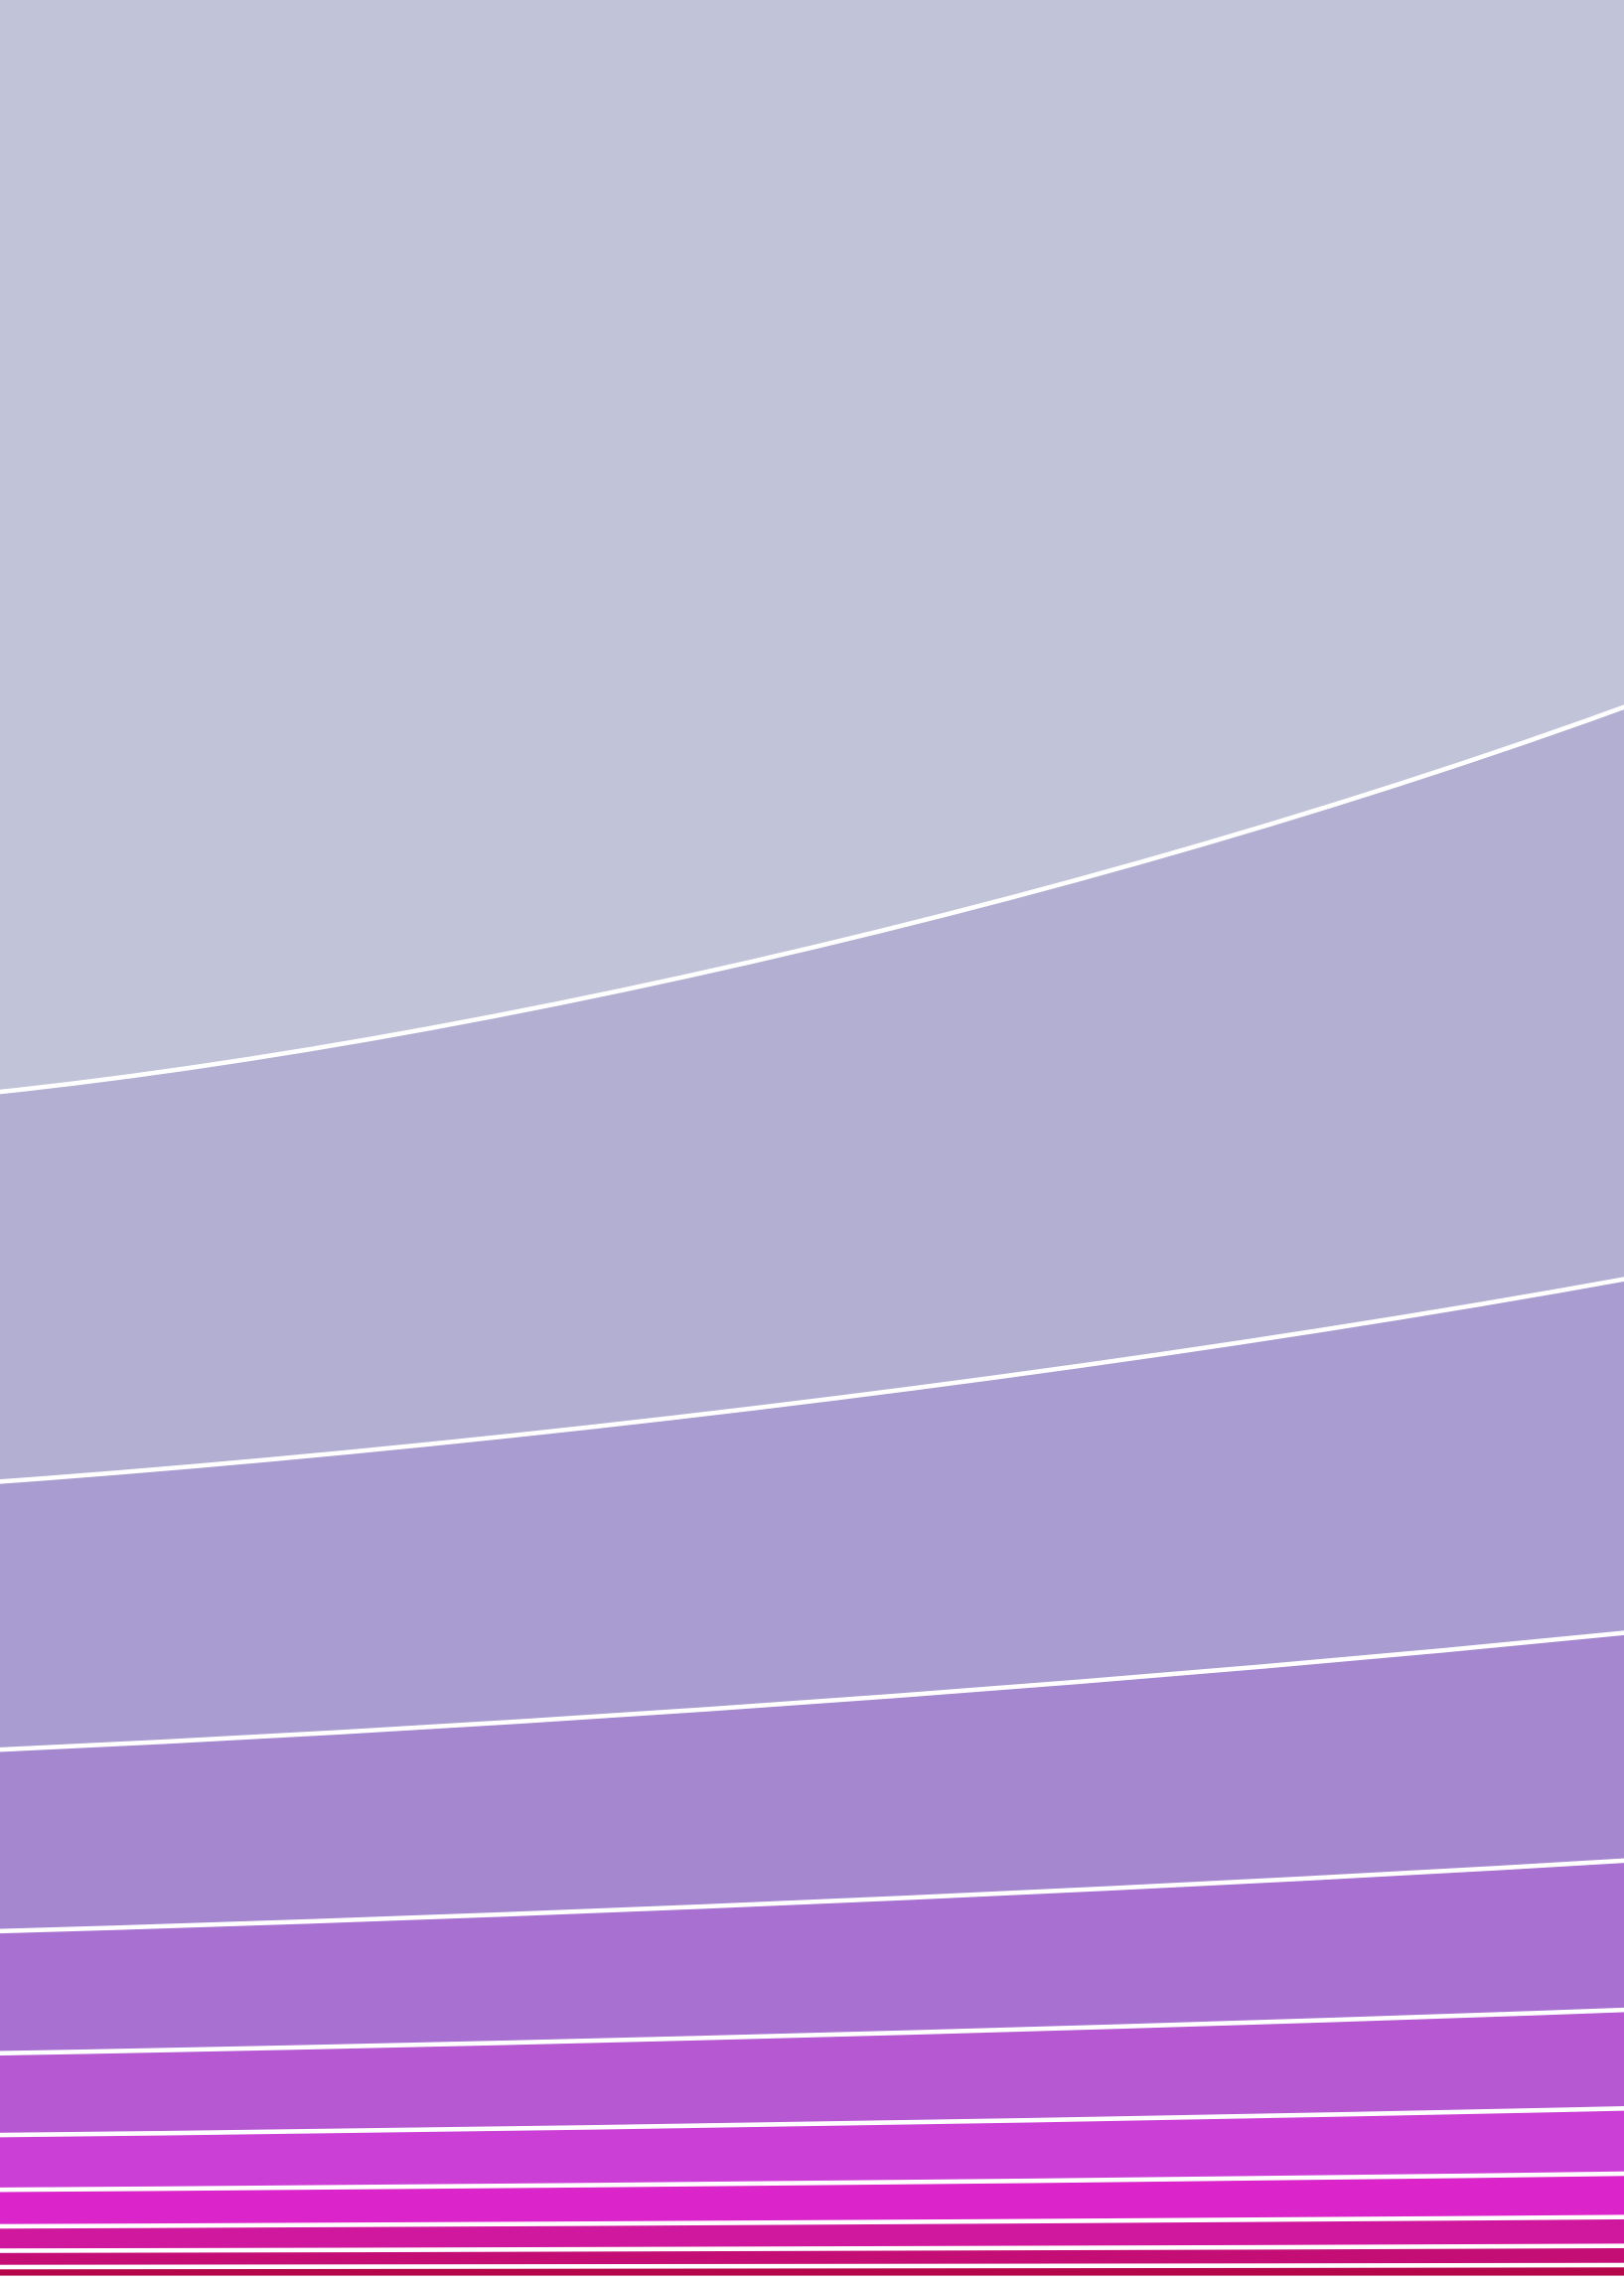

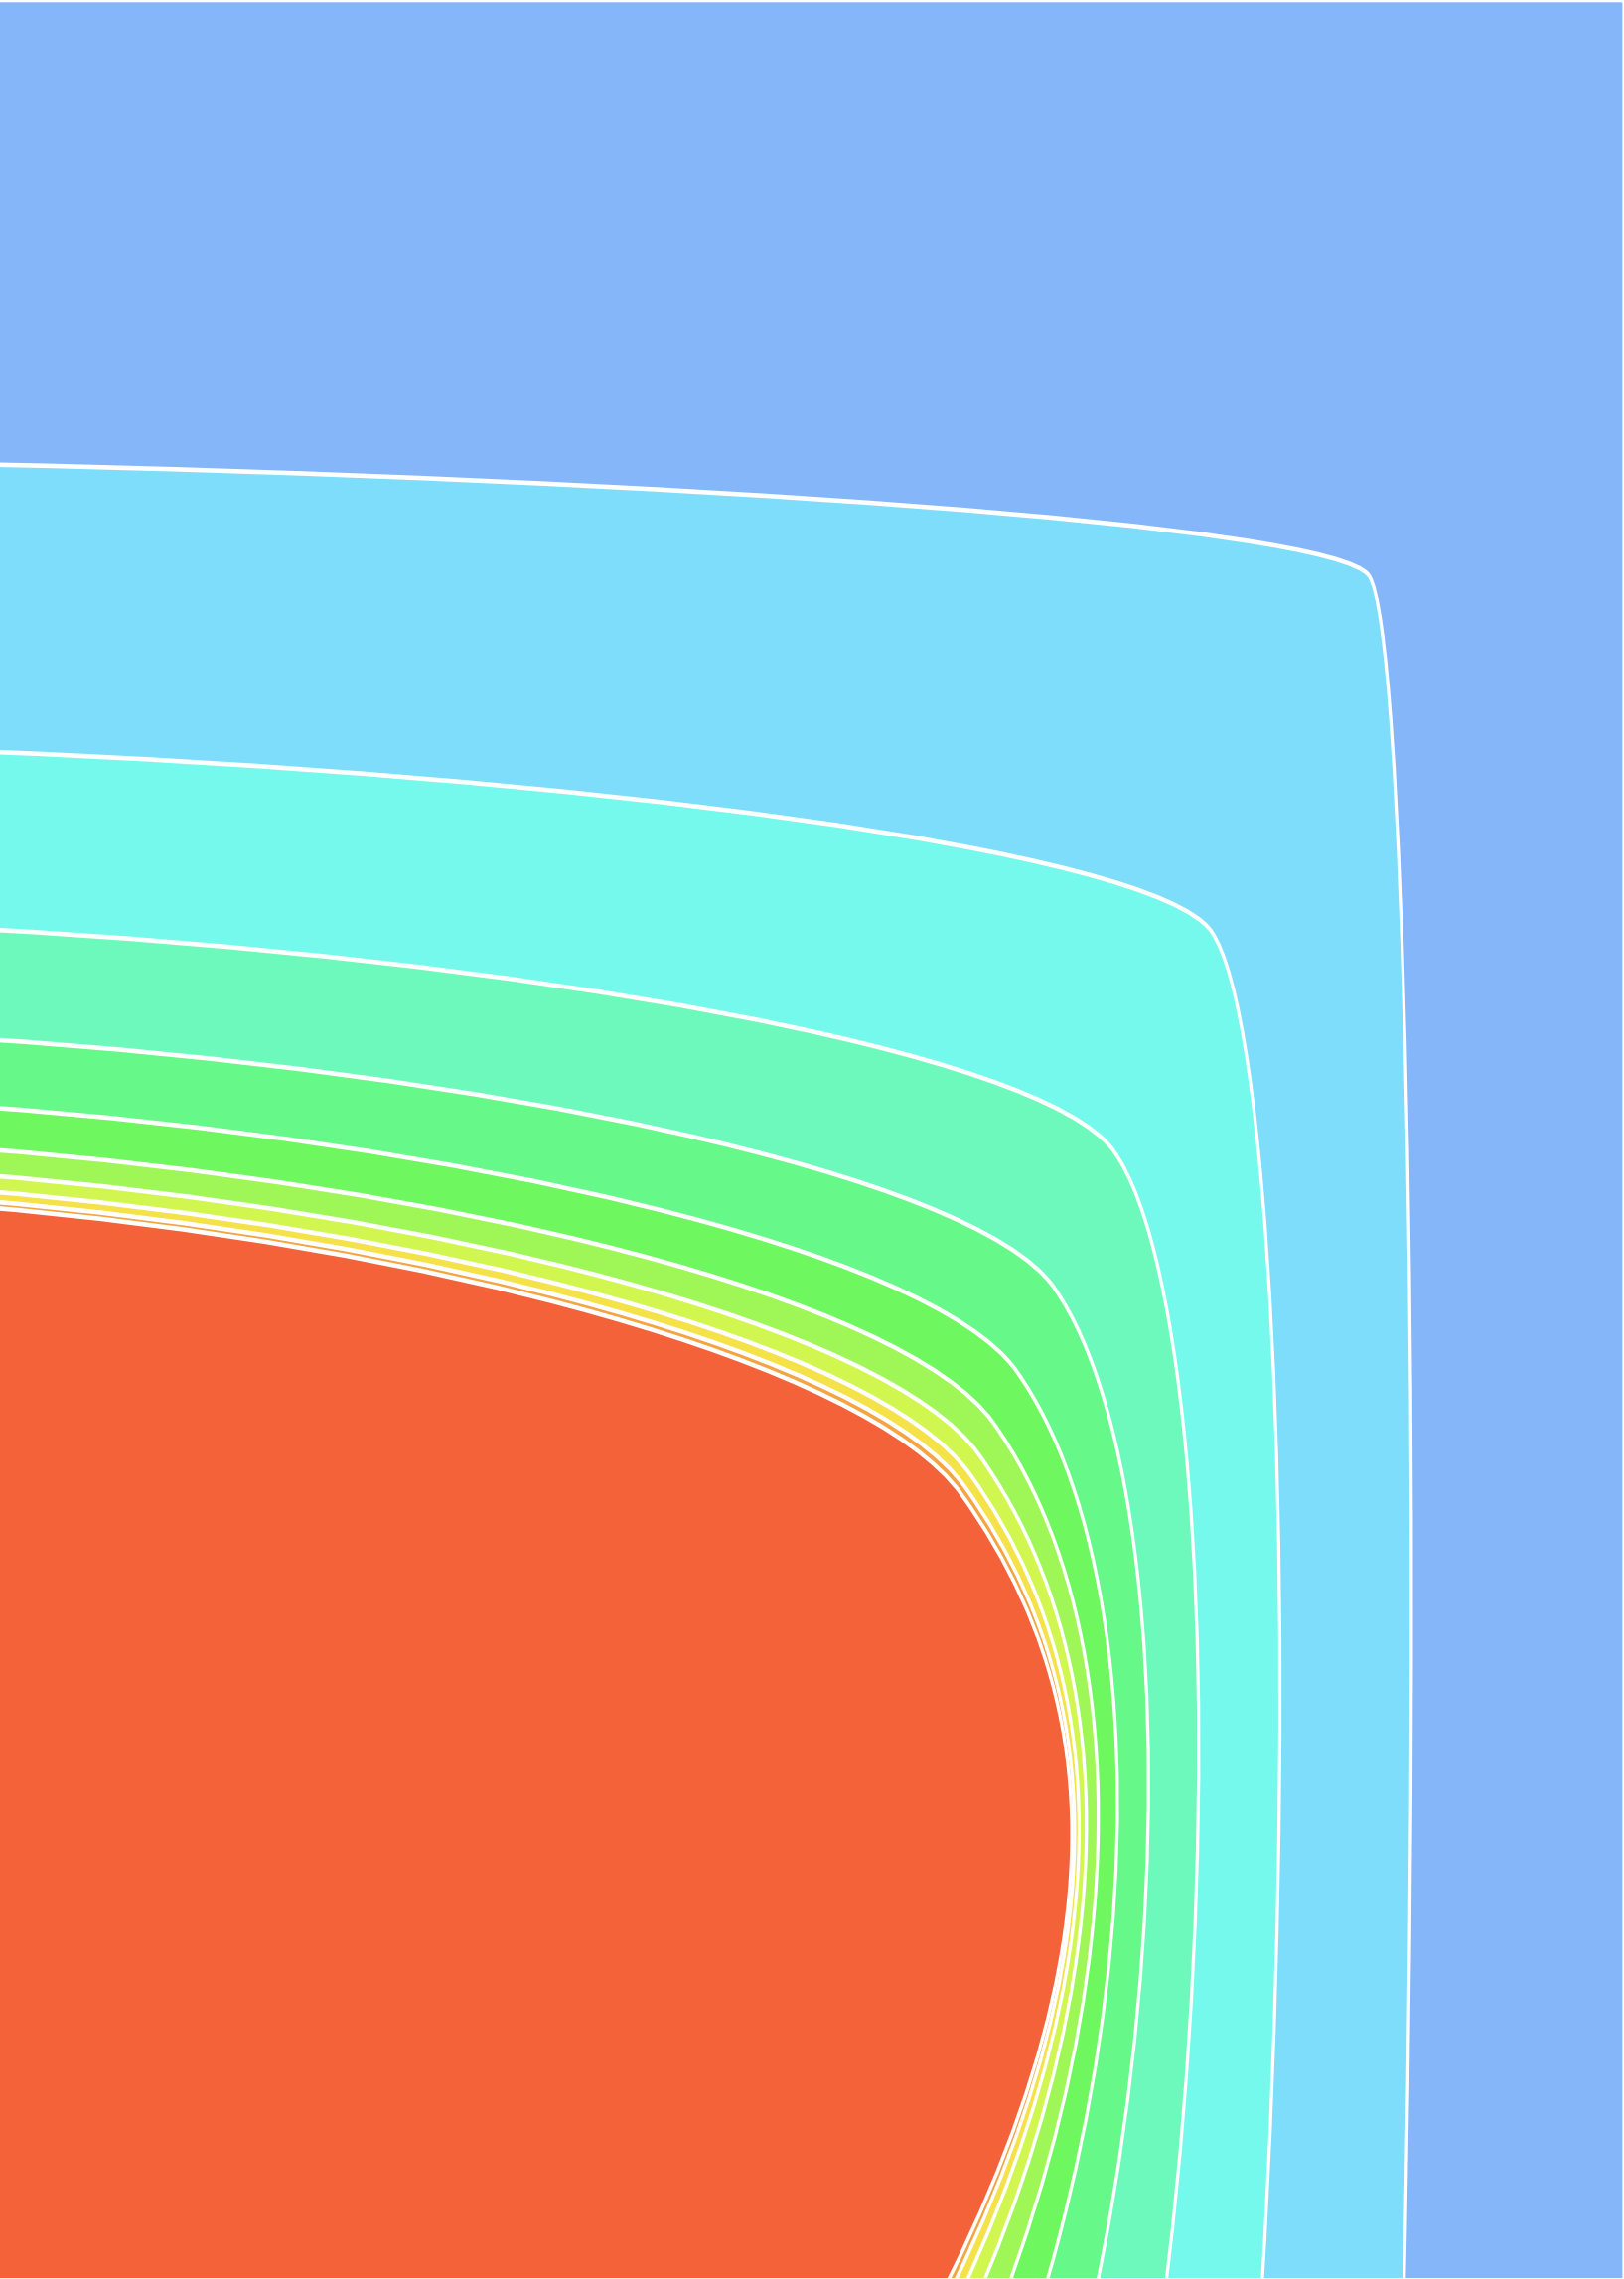

Every day my webserver generates a new book, filled with sliced blobs of a random colour that turn into rectangles in ten steps. The blobs might have a border, and this border, if it exists, is either black or white. The ten steps follow a certain ratio. This ratio is one of the twelve so called excellent orthogons: The Quadrat, the Hemidiagon, the Trion, the Quadriagon, the Biauron, the Penton, the Diagon, the Bipenton, the Hemiolion, the Auron, the Hecton, and the Doppelquadrat.

Created for Vasilis van Gemert — and you — by his webserver.
