

The background is a gradient of purple, transitioning from a dark purple on the left to a lighter purple on the right. Overlaid on this are several concentric, curved lines that create a sense of depth and movement, resembling a tunnel or a series of overlapping planes. The lines are black and vary in thickness, with some being more prominent than others.

# 100 random slices

October the 31st, 2016 — Vasilis van Gemert

Every day my webserver generates a new book, filled with sliced blobs of a random colour that turn into rectangles in ten steps. The blobs might have a border, and this border, if it exists, is either black or white. The ten steps follow a certain ratio. This ratio is one of the twelve so called excellent orthogons: The Quadrat, the Hemidiagon, the Trion, the Quadriagon, the Biauron, the Penton, the Diagon, the Bipenton, the Hemiolion, the Auron, the Hecton, and the Doppelquadrat.

Created for Vasilis van Gemert — and you — by his webserver.
