

The background is a solid dark green color. On the left side, there is a series of white, curved lines that form a large, open, U-shaped or bowl-like structure. These lines are of varying thickness and curve, creating a sense of depth and movement. The lines start from the top left and curve downwards and then back up towards the right, eventually fading into the green background.

100 random slices

November the 21st, 2016 — Vasilis van Gemert

Every day my webserver generates a new book, filled with sliced blobs of a random colour that turn into rectangles in ten steps. The blobs might have a border, and this border, if it exists, is either black or white. The ten steps follow a certain ratio. This ratio is one of the twelve so called excellent orthogons: The Quadrat, the Hemidiagon, the Trion, the Quadriagon, the Biauron, the Penton, the Diagon, the Bipenton, the Hemiolion, the Auron, the Hecton, and the Doppelquadrat.

Created for Vasilis van Gemert — and you — by his webserver.
