

The background features a color gradient from bright pink on the left to light blue on the right. Overlaid on this are several white, curved lines that sweep across the frame, creating a sense of motion and depth. A white rectangular box is positioned in the center-left area, containing the title and subtitle.

100 random slices

December the 6th, 2016 — Vasilis van Gemert

Every day my webserver generates a new book, filled with sliced blobs of a random colour that turn into rectangles in ten steps. The blobs might have a border, and this border, if it exists, is either black or white. The ten steps follow a certain ratio. This ratio is one of the twelve so called excellent orthogons: The Quadrat, the Hemidiagon, the Trion, the Quadriagon, the Biauron, the Penton, the Diagon, the Bipenton, the Hemiolion, the Auron, the Hecton, and the Doppelquadrat.

Created for Vasilis van Gemert — and you — by his webserver.
