

The background features a dark green gradient on the right side, transitioning into a series of curved, overlapping lines in shades of teal and blue on the left. These lines create a sense of depth and movement, resembling a stylized landscape or a series of slices.

100 random slices

December the 30th, 2016 — Vasilis van Gemert

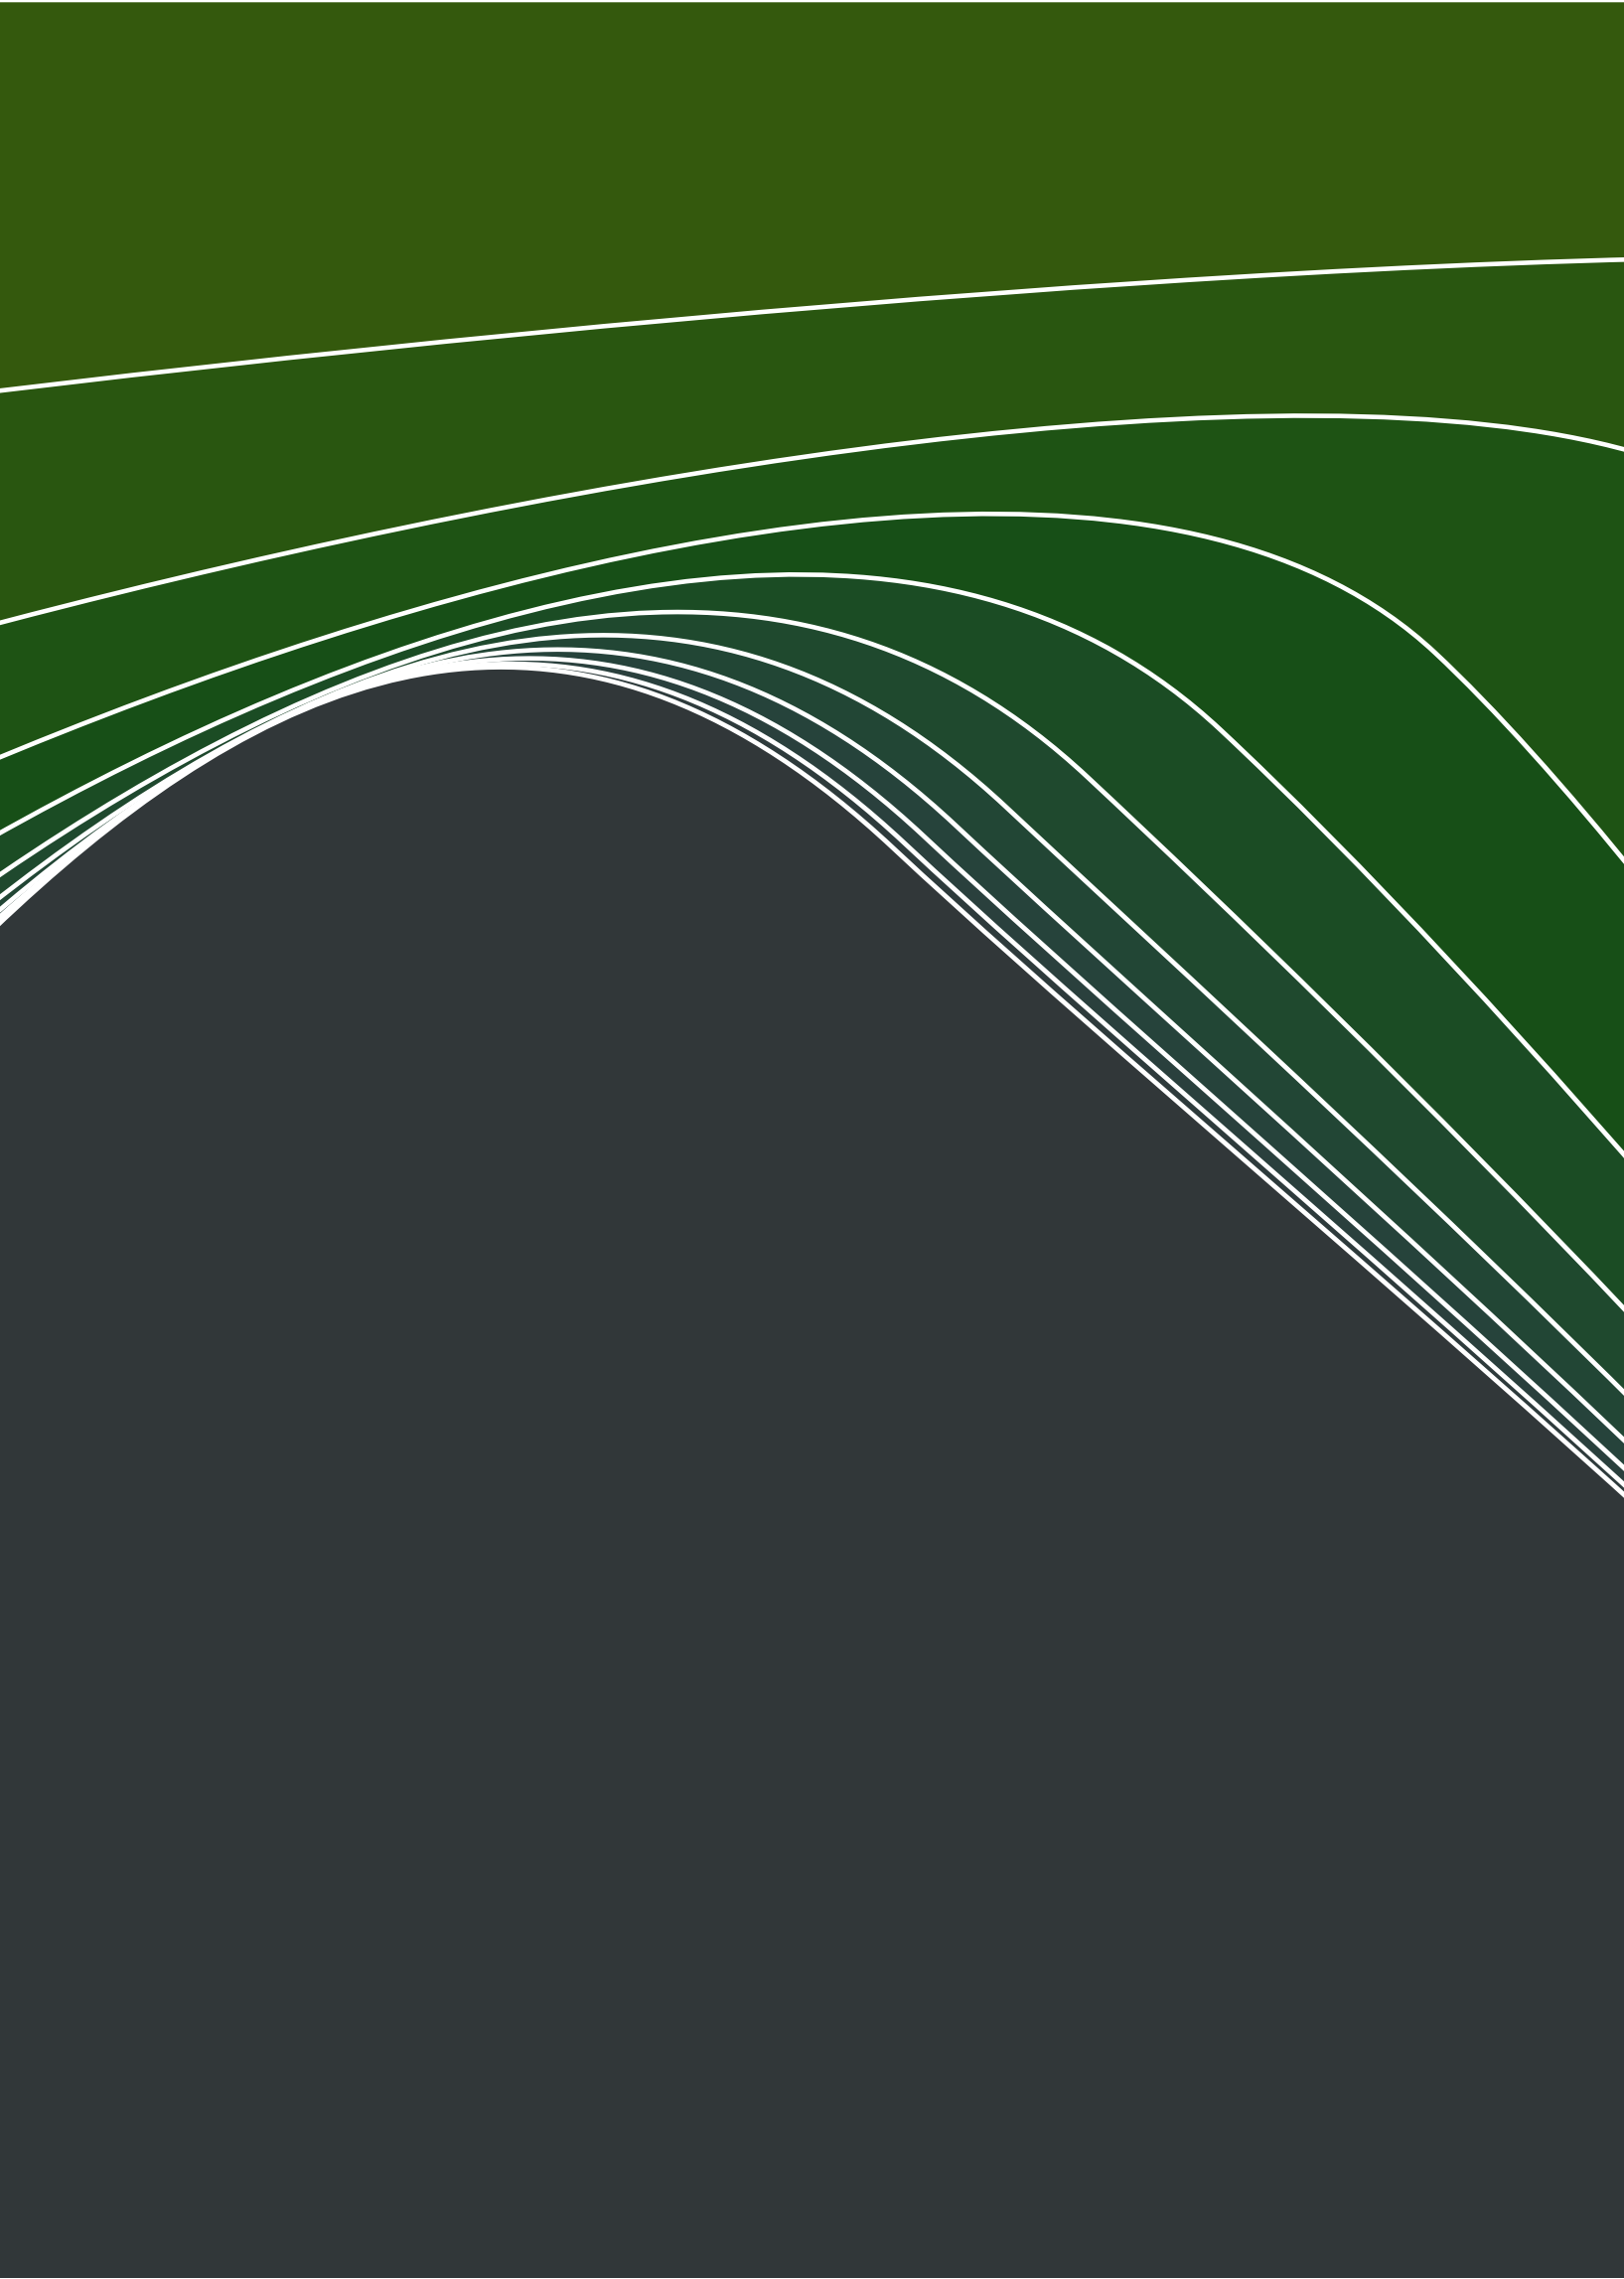

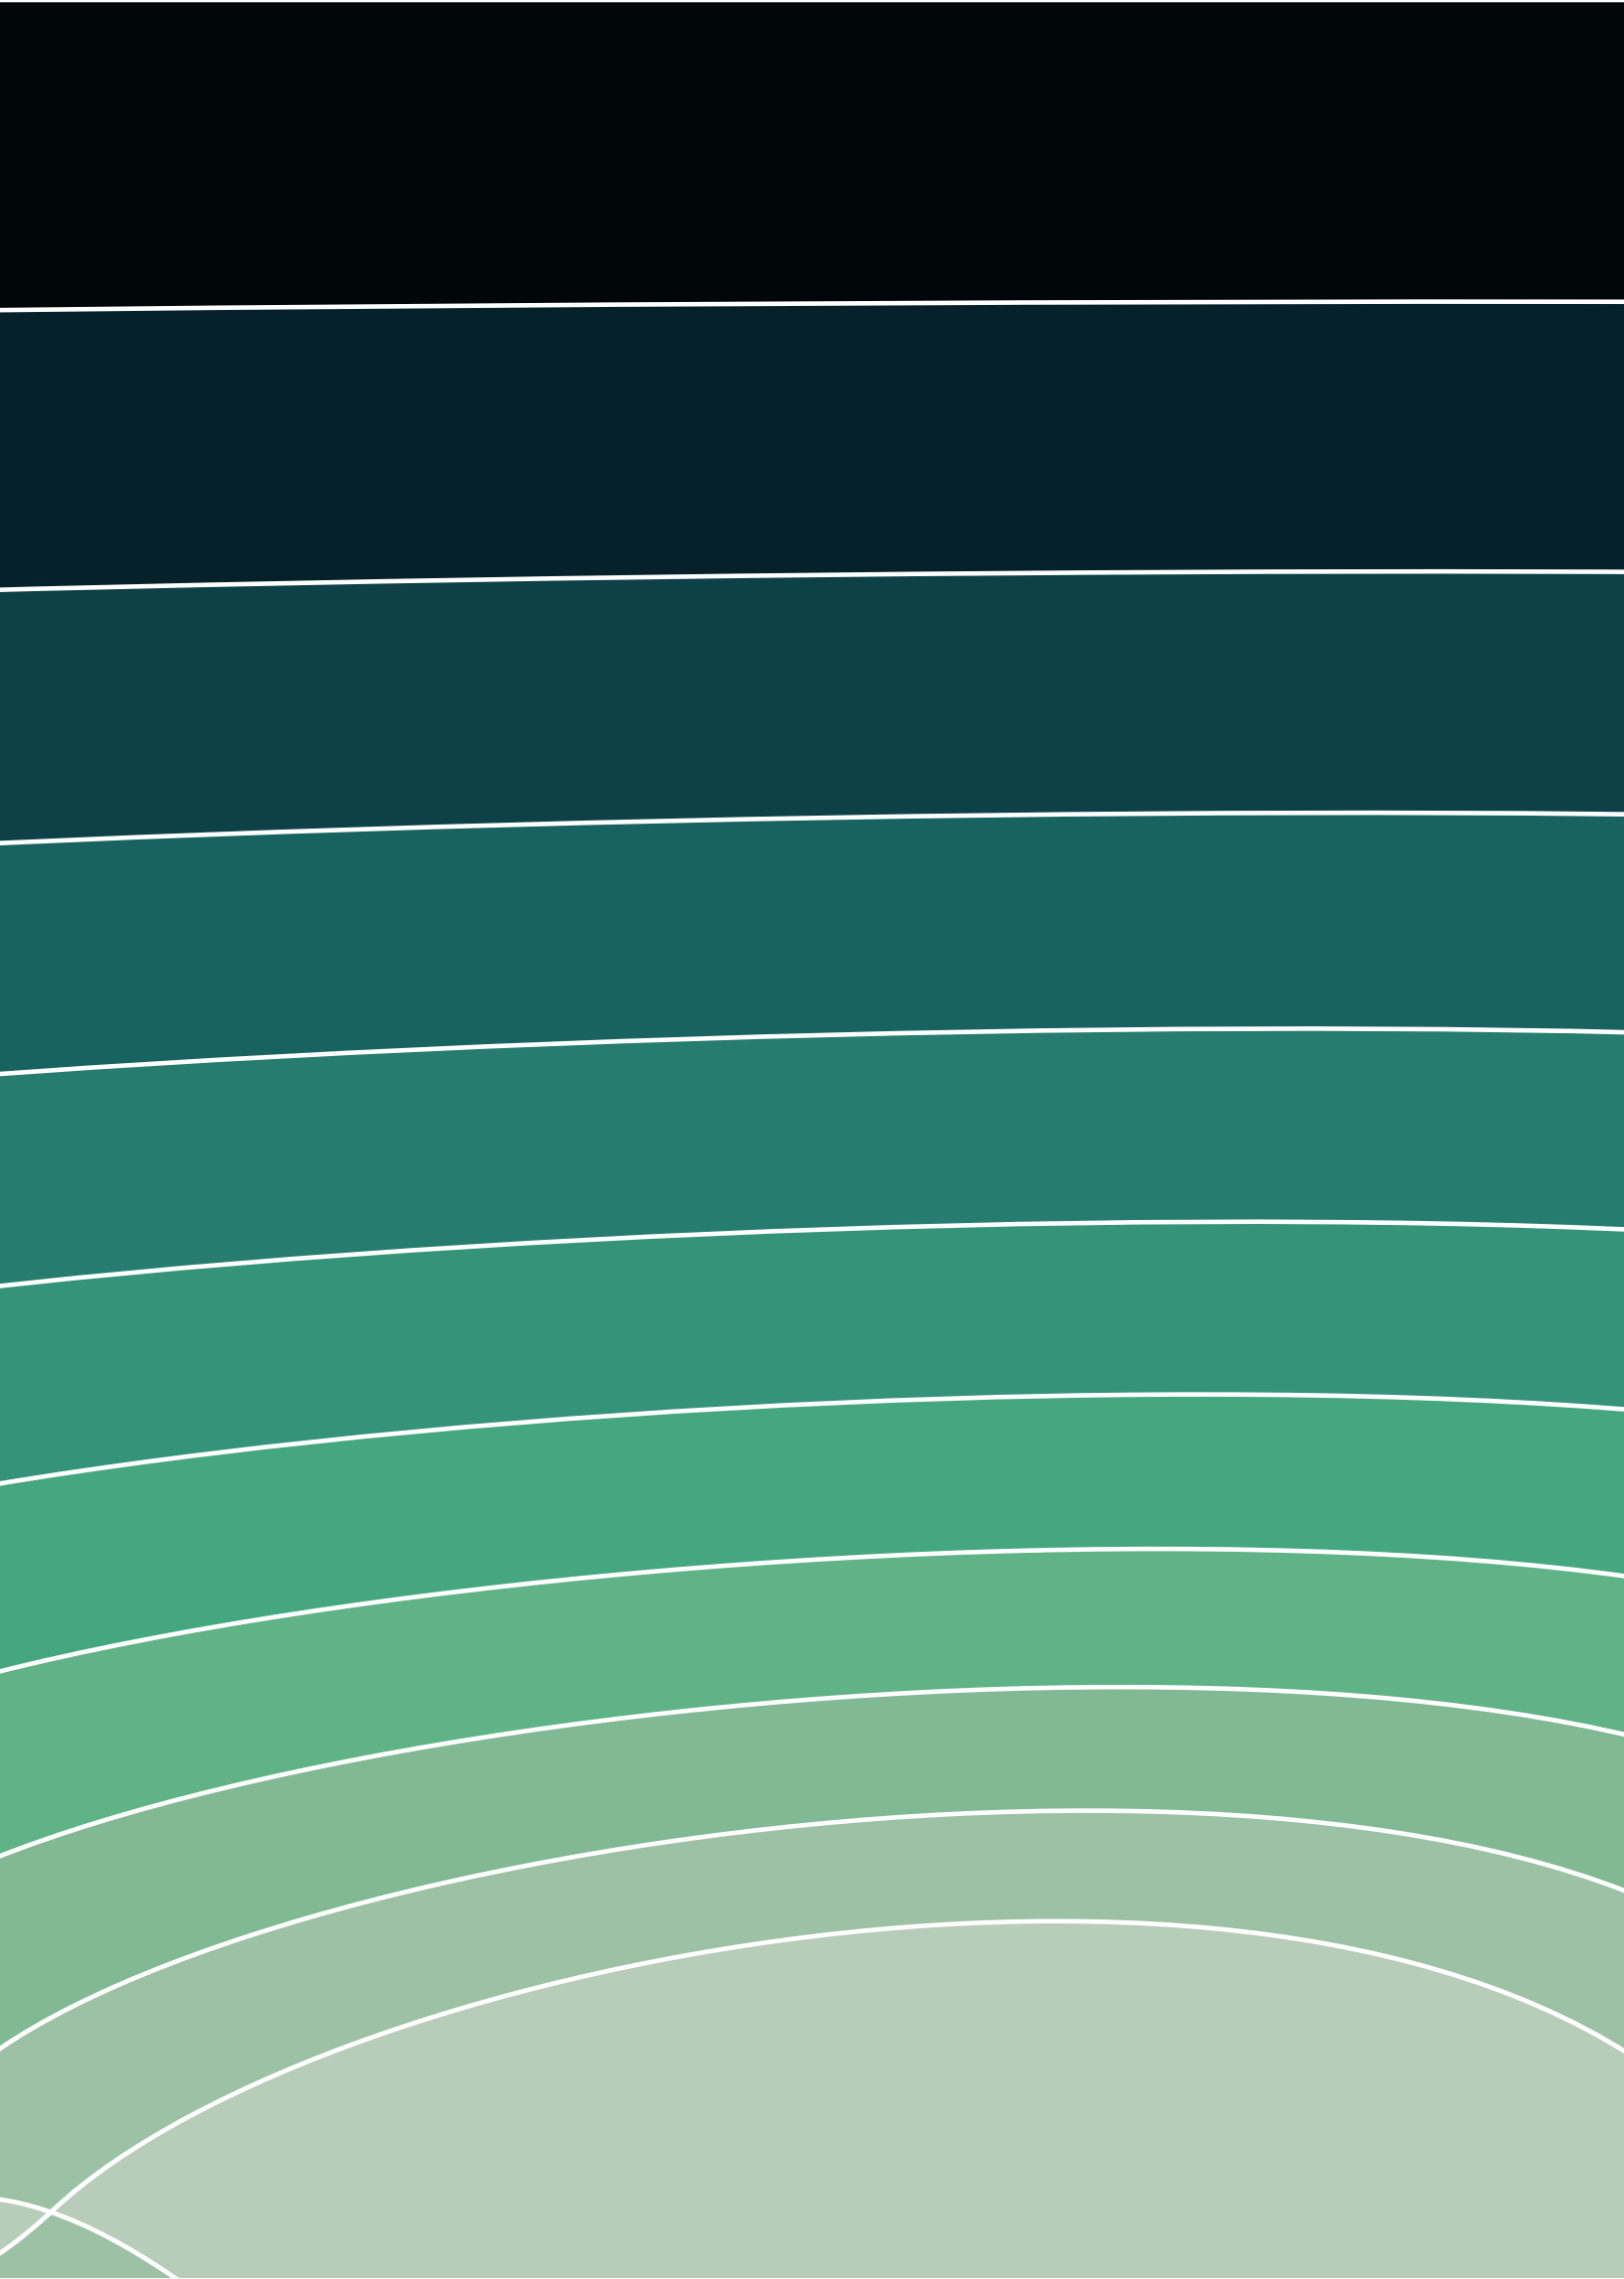

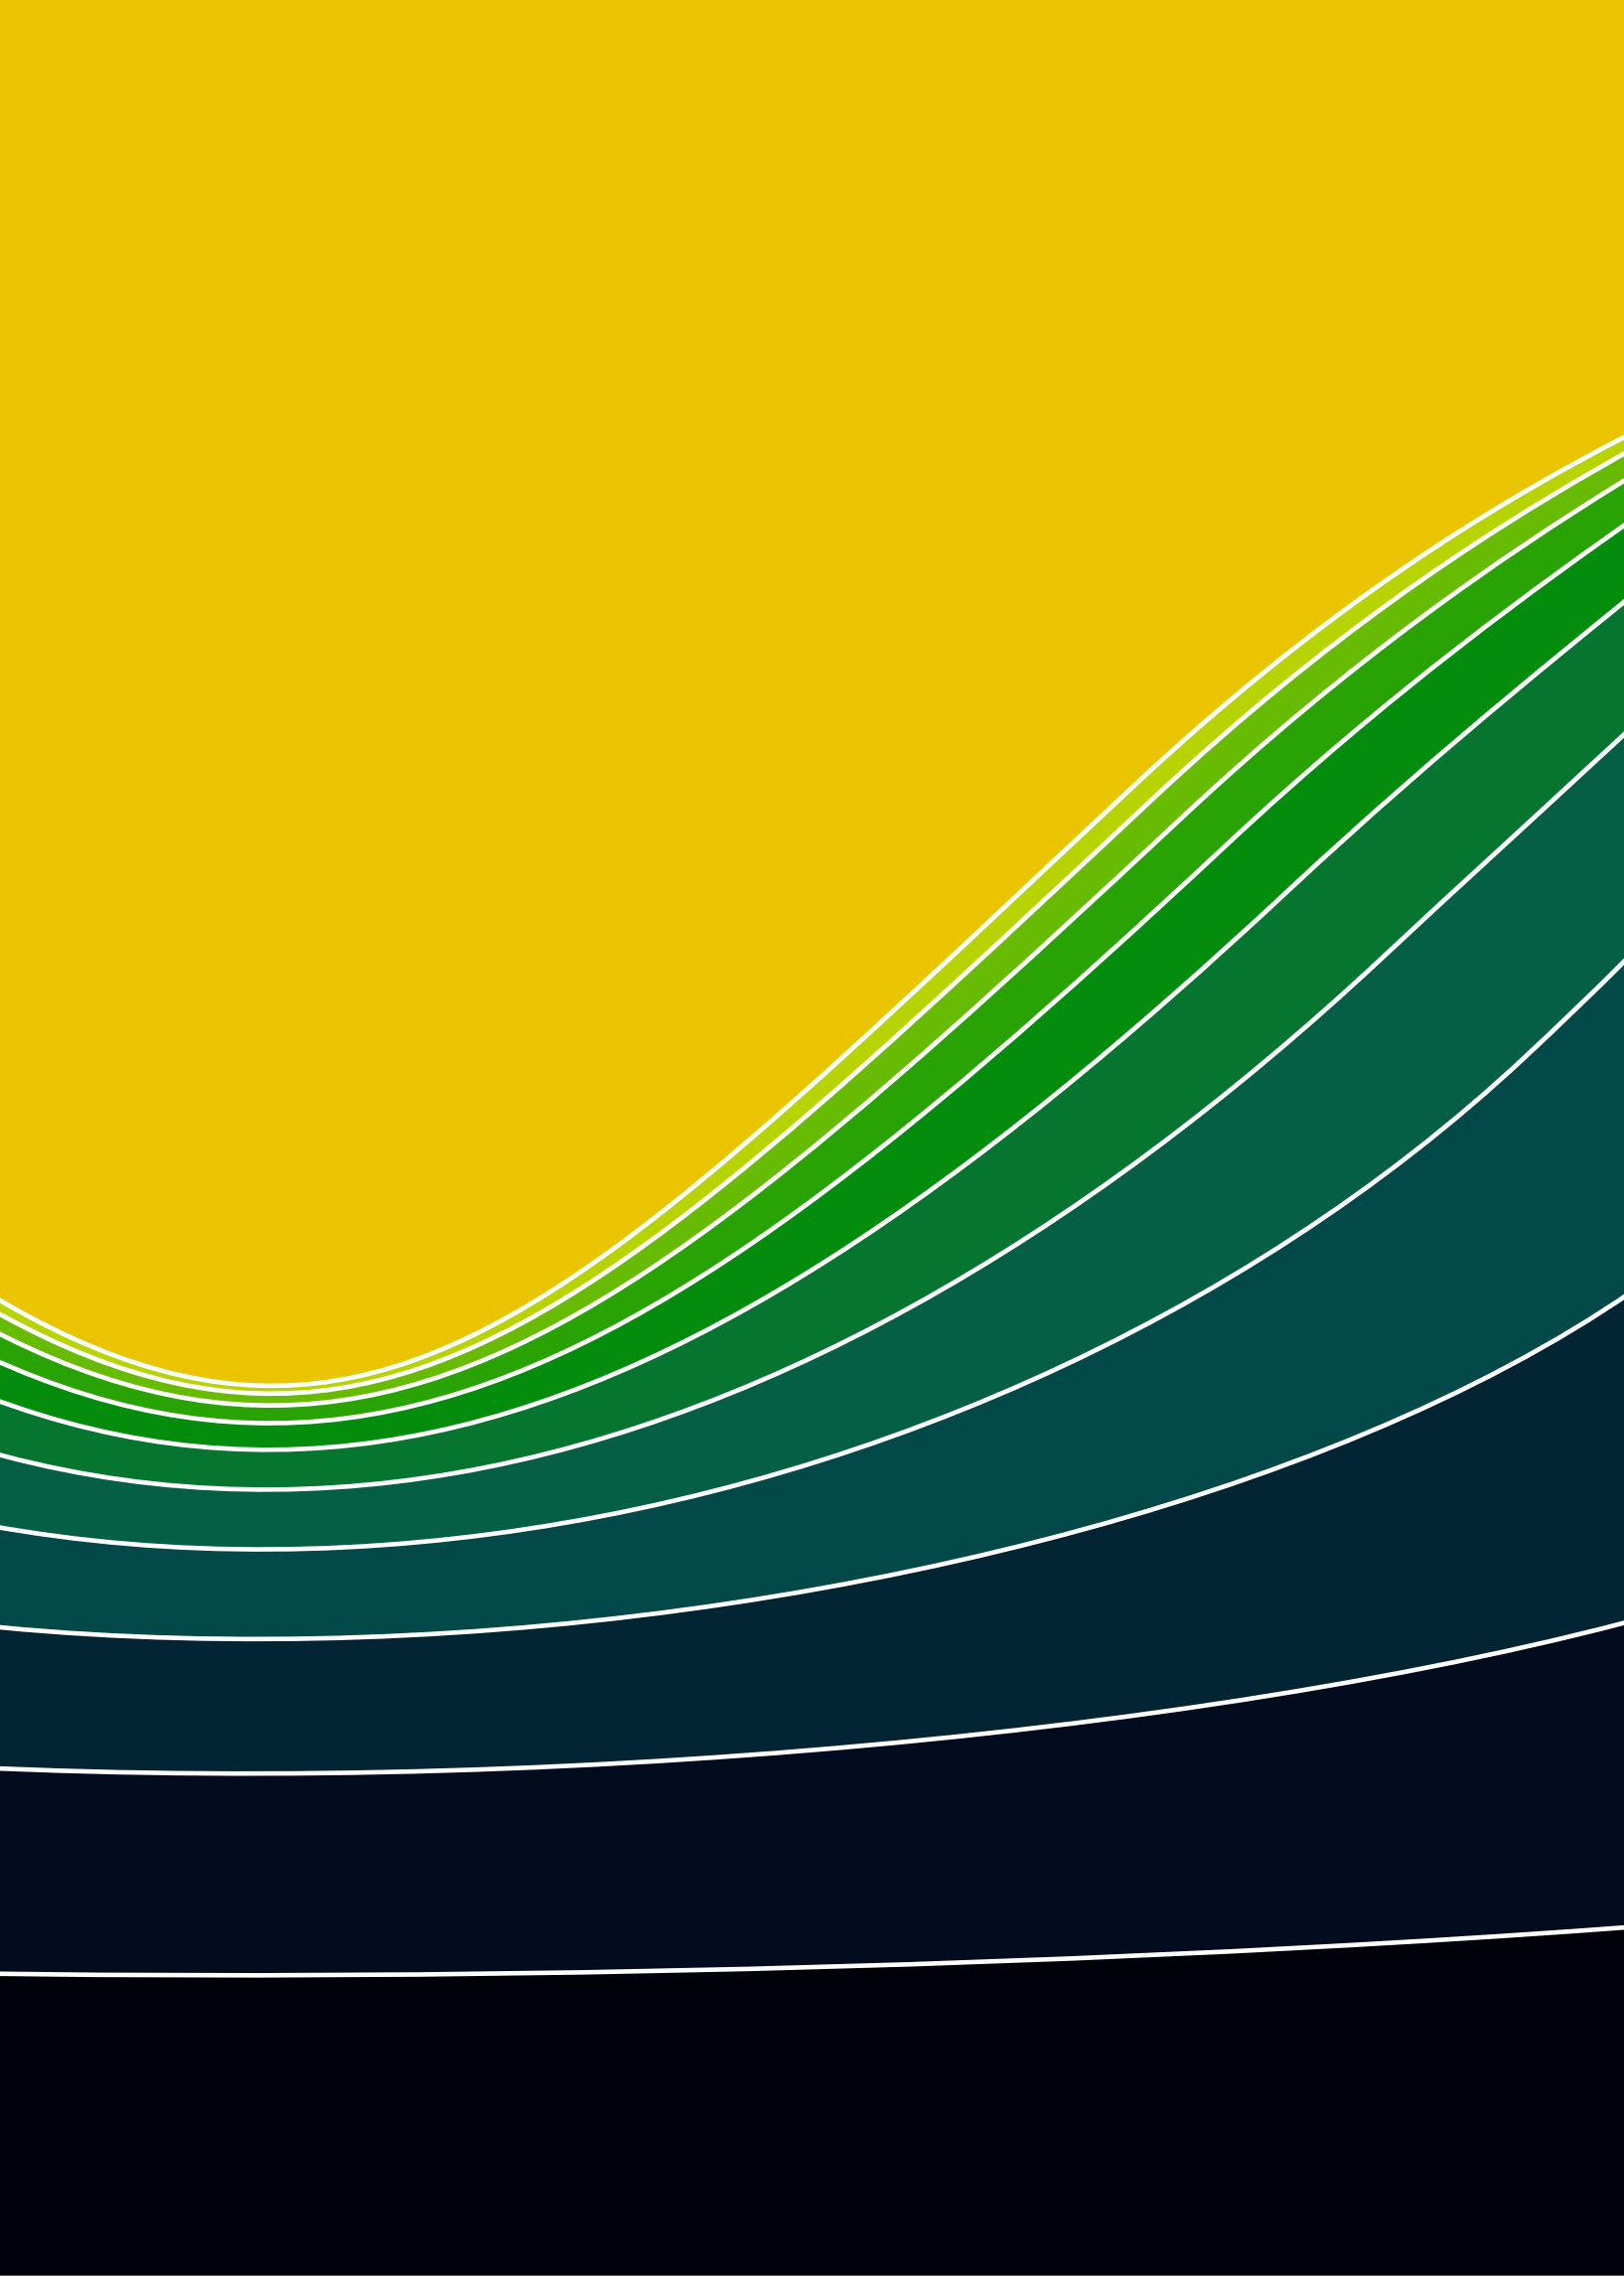

Every day my webserver generates a new book, filled with sliced blobs of a random colour that turn into rectangles in ten steps. The blobs might have a border, and this border, if it exists, is either black or white. The ten steps follow a certain ratio. This ratio is one of the twelve so called excellent orthogons: The Quadrat, the Hemidiagon, the Trion, the Quadriagon, the Biauron, the Penton, the Diagon, the Bipenton, the Hemiolion, the Auron, the Hecton, and the Doppelquadrat.

Created for Vasilis van Gemert — and you — by his webserver.
