

A decorative graphic on the left side of the page consists of several thin, curved lines that sweep from the top left towards the bottom right. The lines are filled with a gradient of green, starting from a light, almost white-green at the top and transitioning to a darker, forest green at the bottom. The lines are set against a solid, dark green background that covers the rest of the page.

100 random slices

January the 19th, 2017 — Vasilis van Gemert

Every day my webserver generates a new book, filled with sliced blobs of a random colour that turn into rectangles in ten steps. The blobs might have a border, and this border, if it exists, is either black or white. The ten steps follow a certain ratio. This ratio is one of the twelve so called excellent orthogons: The Quadrat, the Hemidiagon, the Trion, the Quadriagon, the Biauron, the Penton, the Diagon, the Bipenton, the Hemiolion, the Auron, the Hecton, and the Doppelquadrat.

Created for Vasilis van Gemert — and you — by his webserver.
