

The background is a dark green field with several white lines. On the left, there are several vertical lines of varying thicknesses. A large, thin white curve starts from the top right, loops back to the left, and then continues down and across the bottom. Another white line starts from the top left, loops back to the right, and then continues down and across the bottom. A white line starts from the top left, loops back to the right, and then continues down and across the bottom. A white line starts from the top left, loops back to the right, and then continues down and across the bottom.

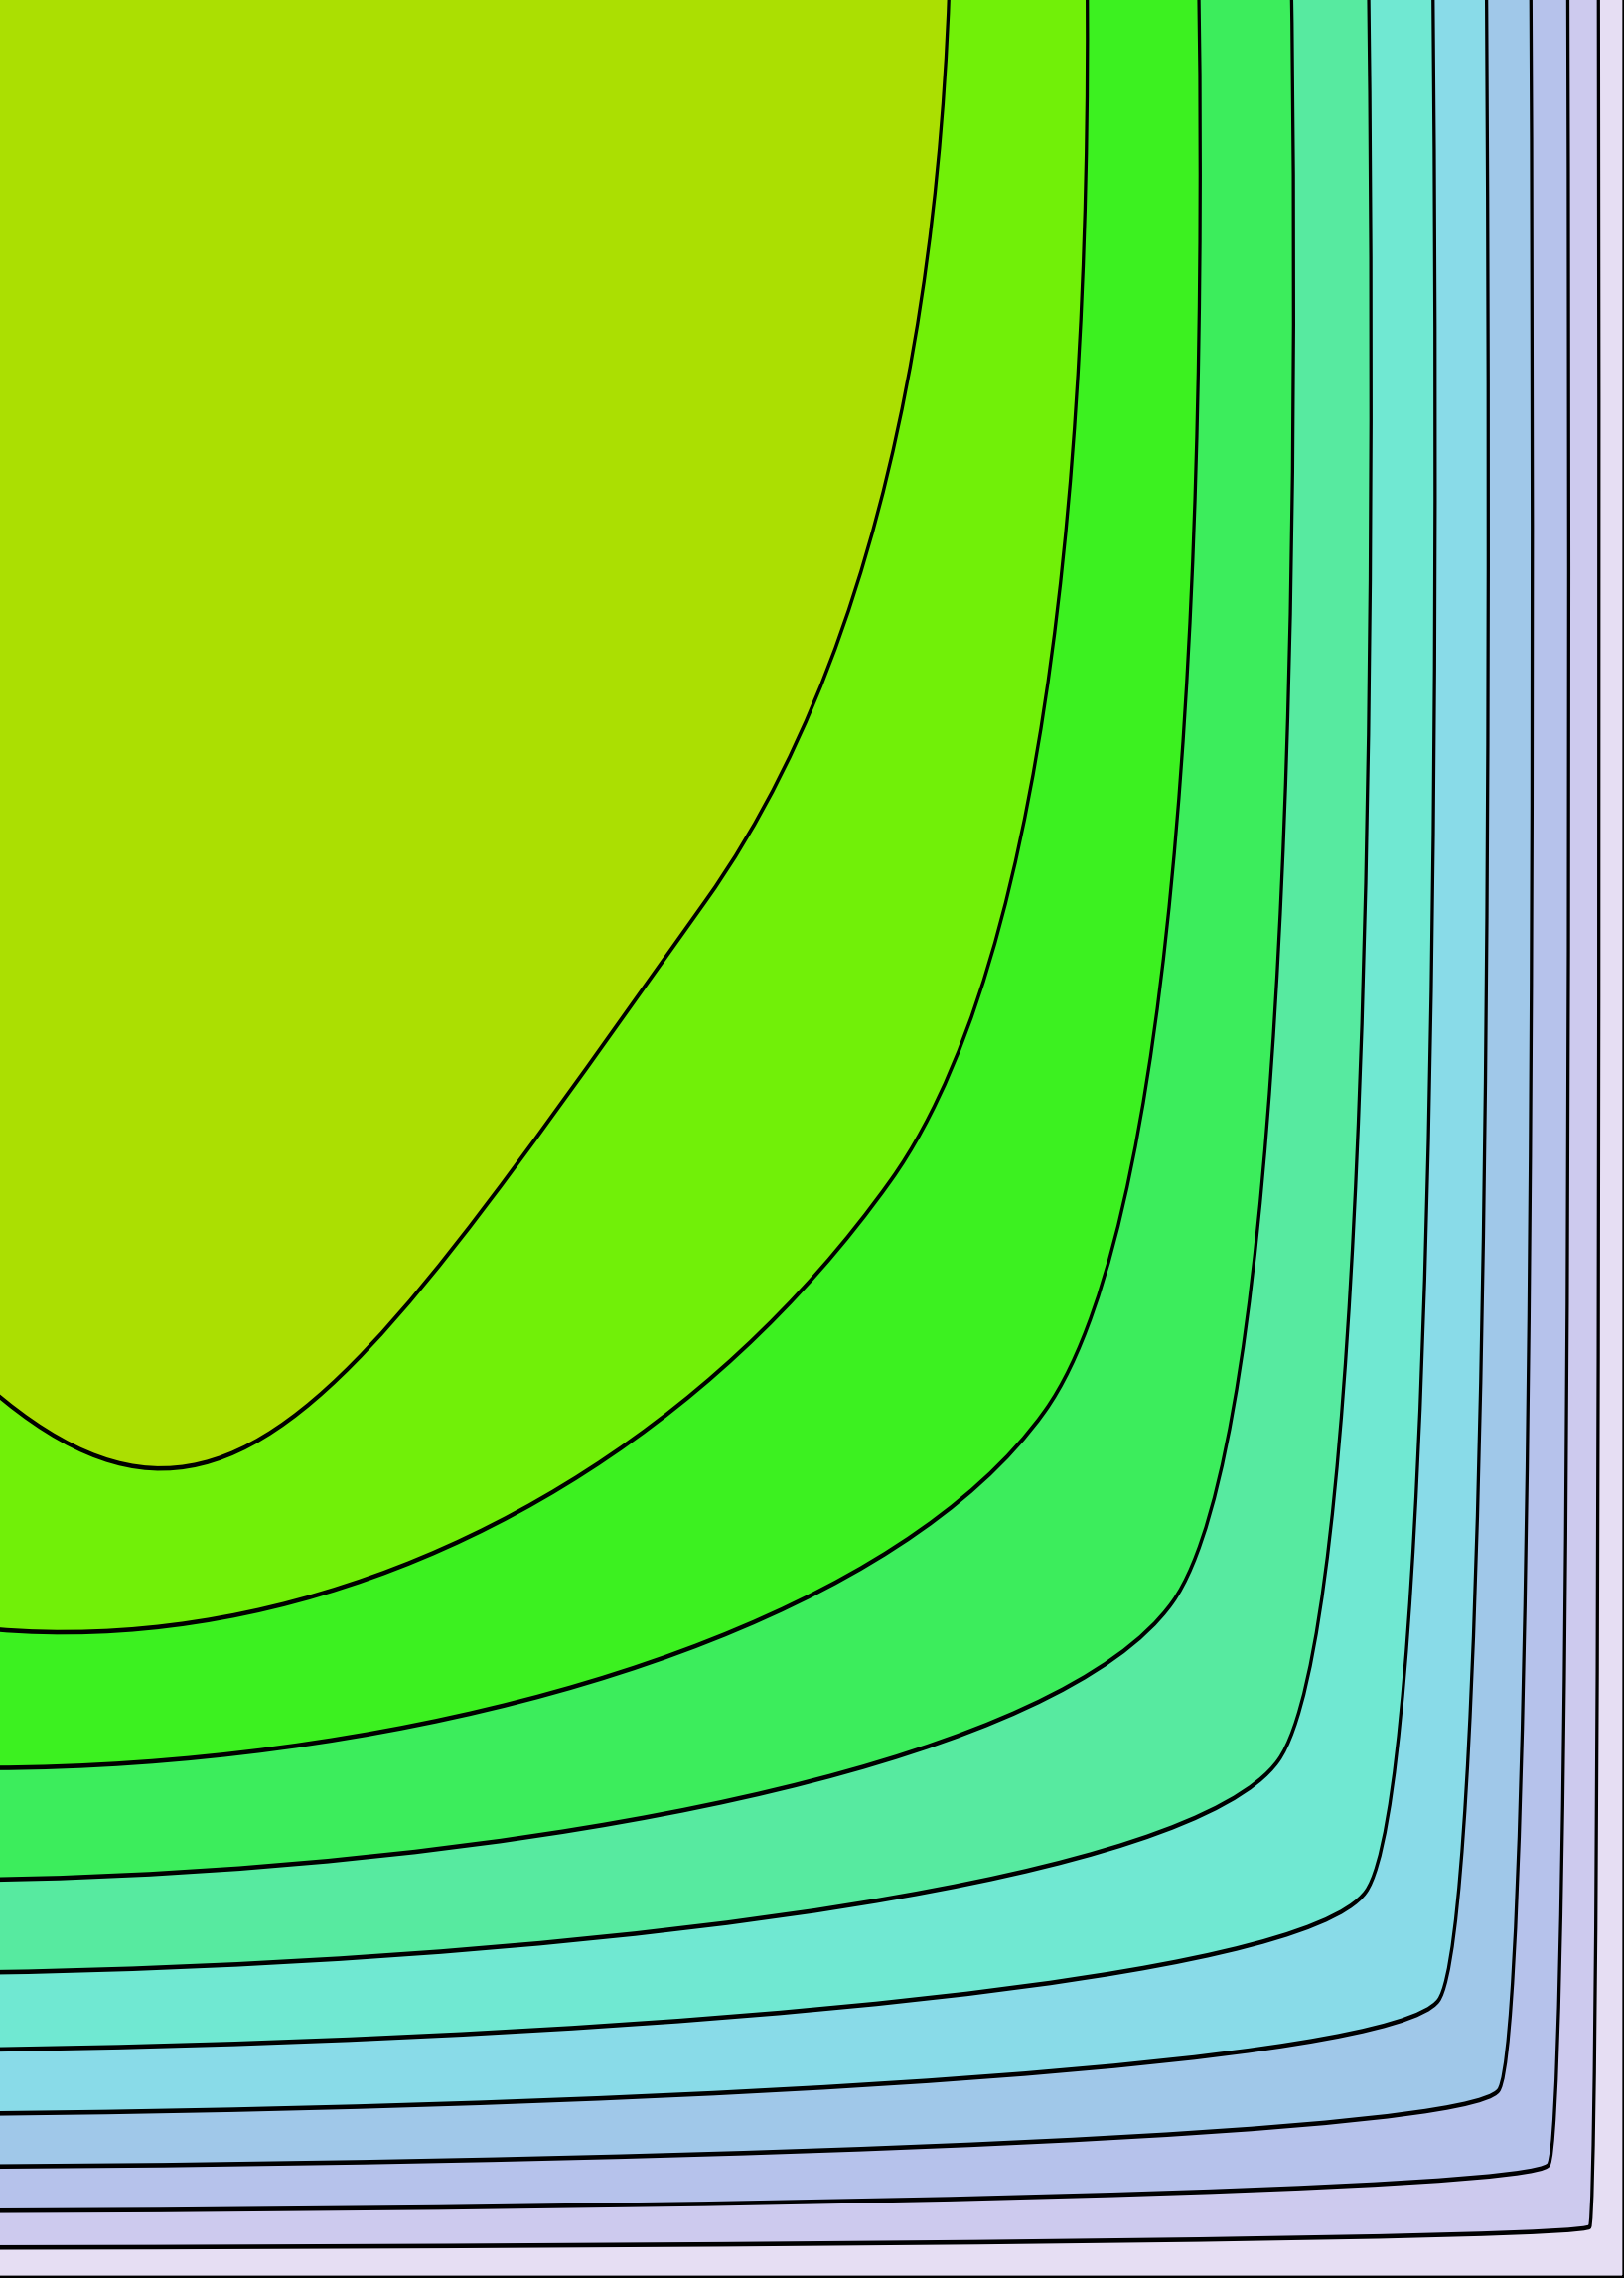

100 random slices

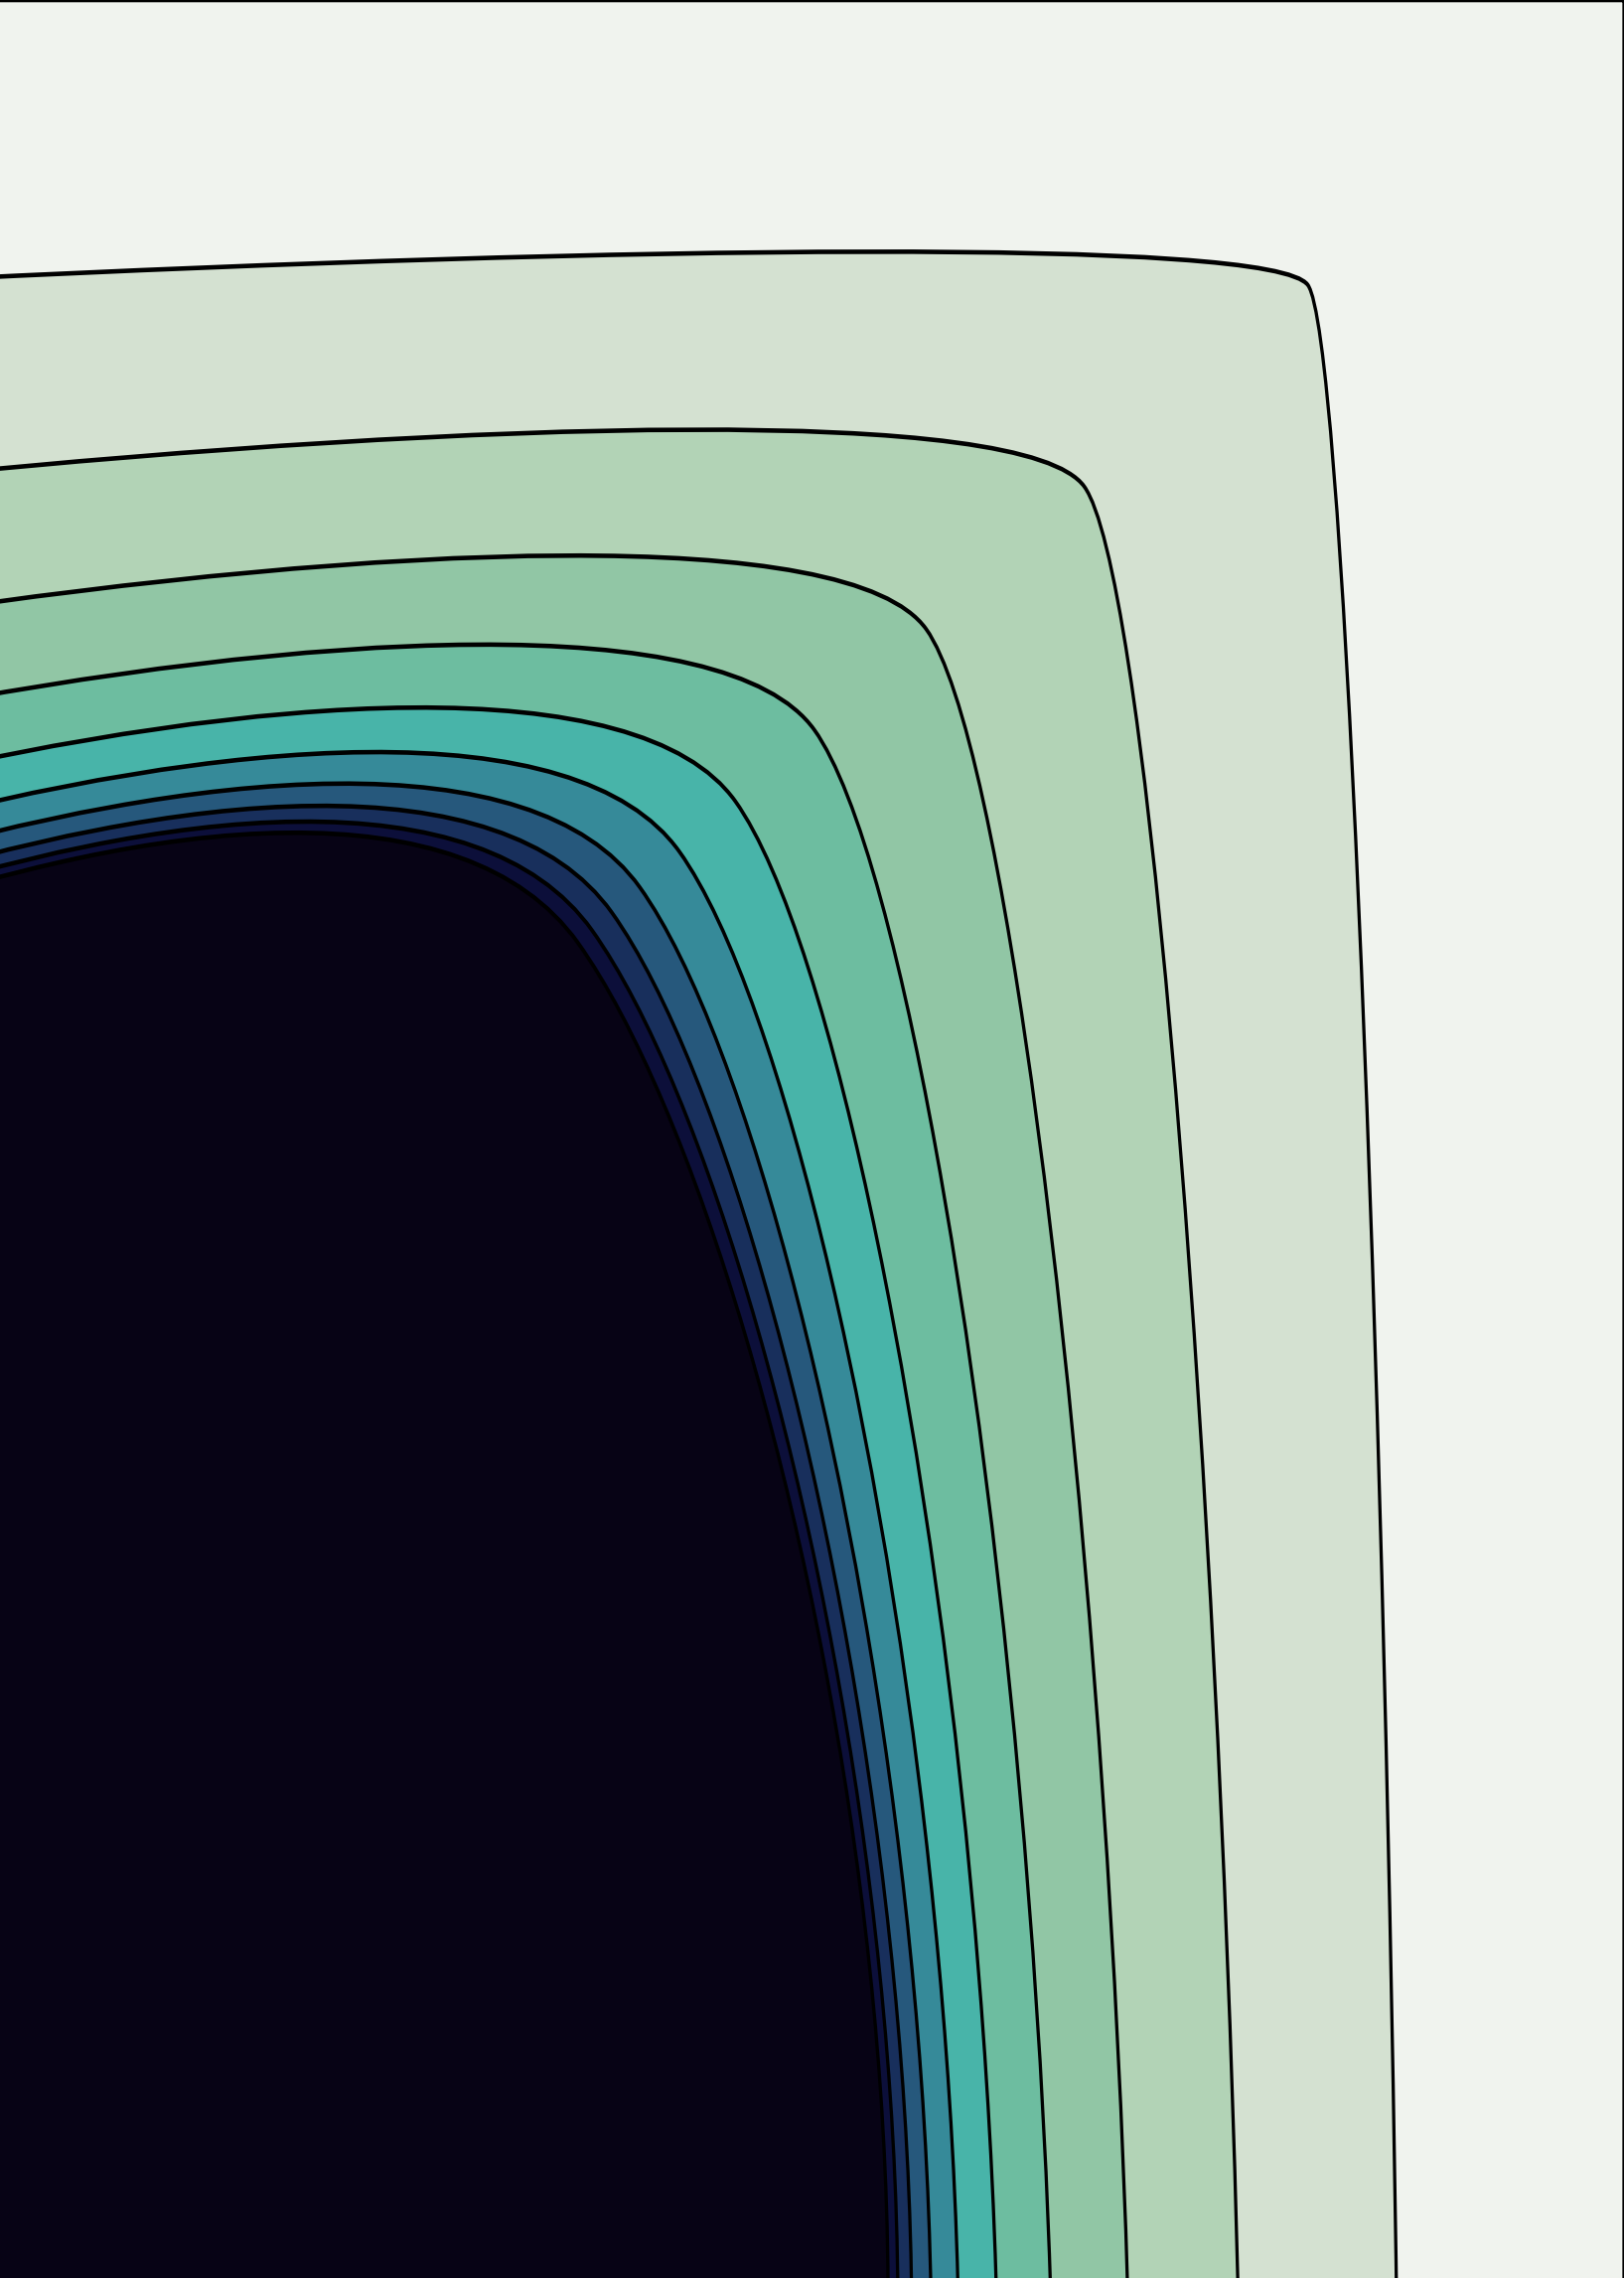

February the 10th, 2017 — Vasilis van Gemert

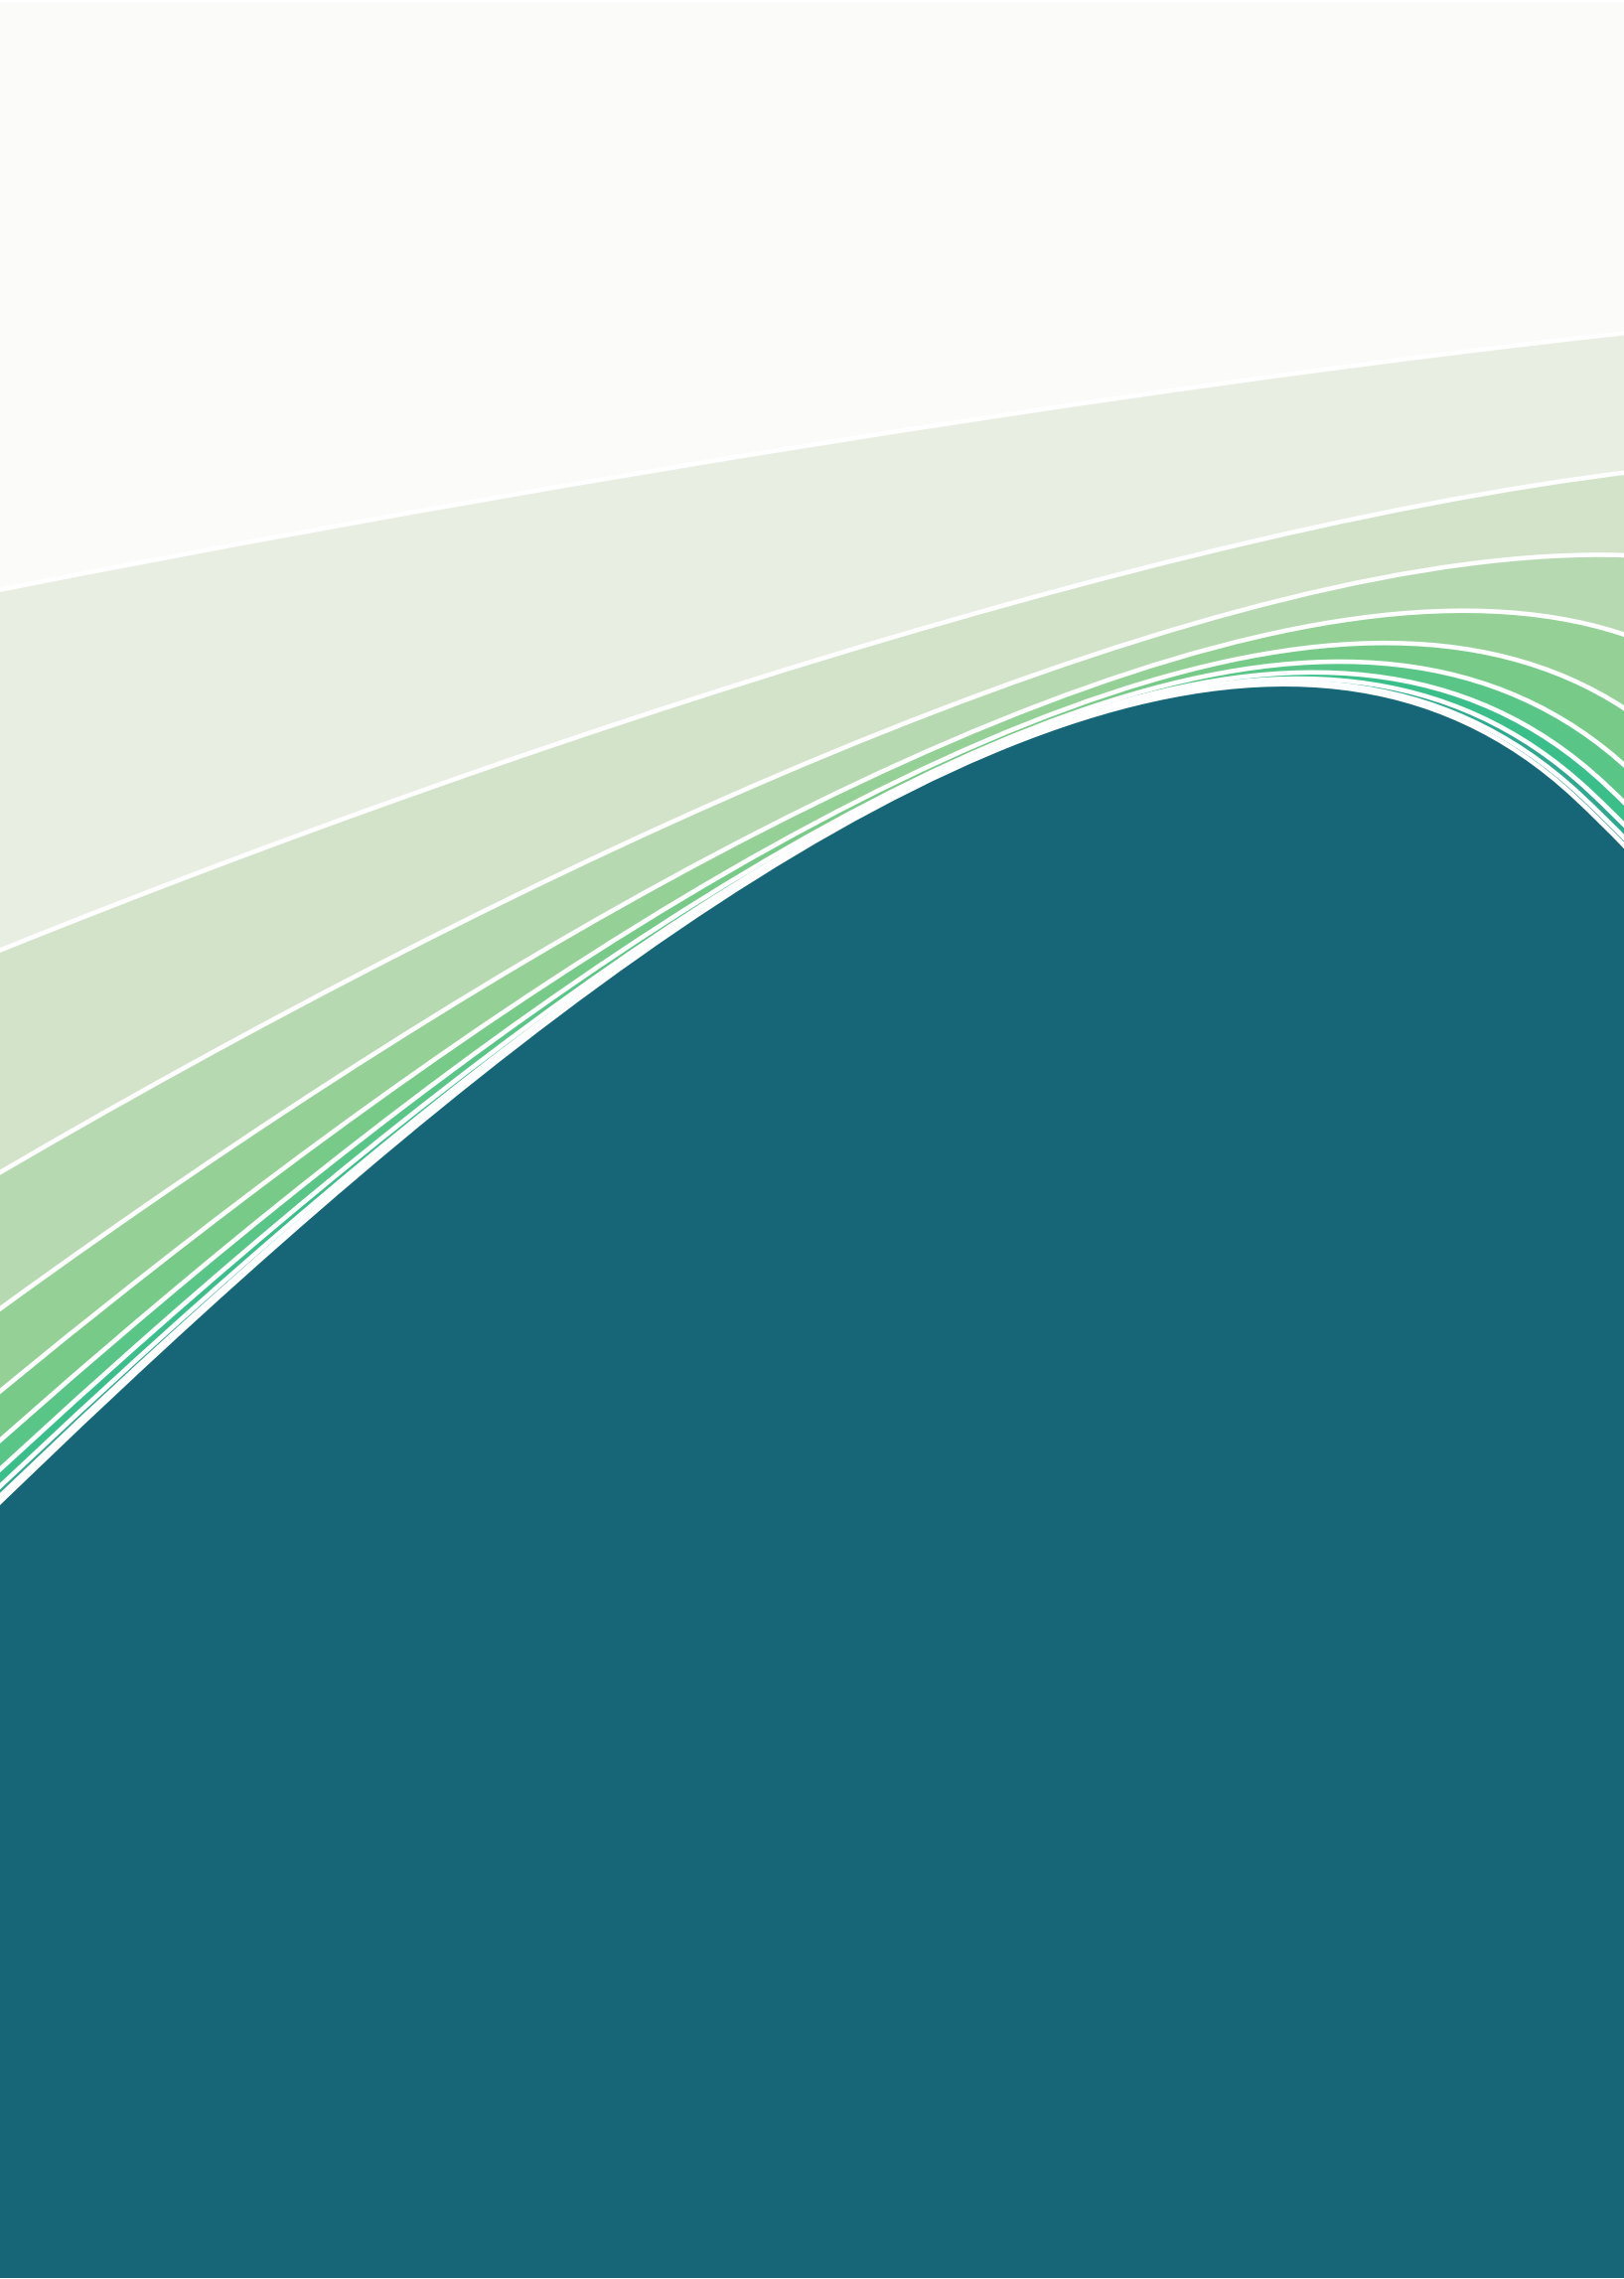

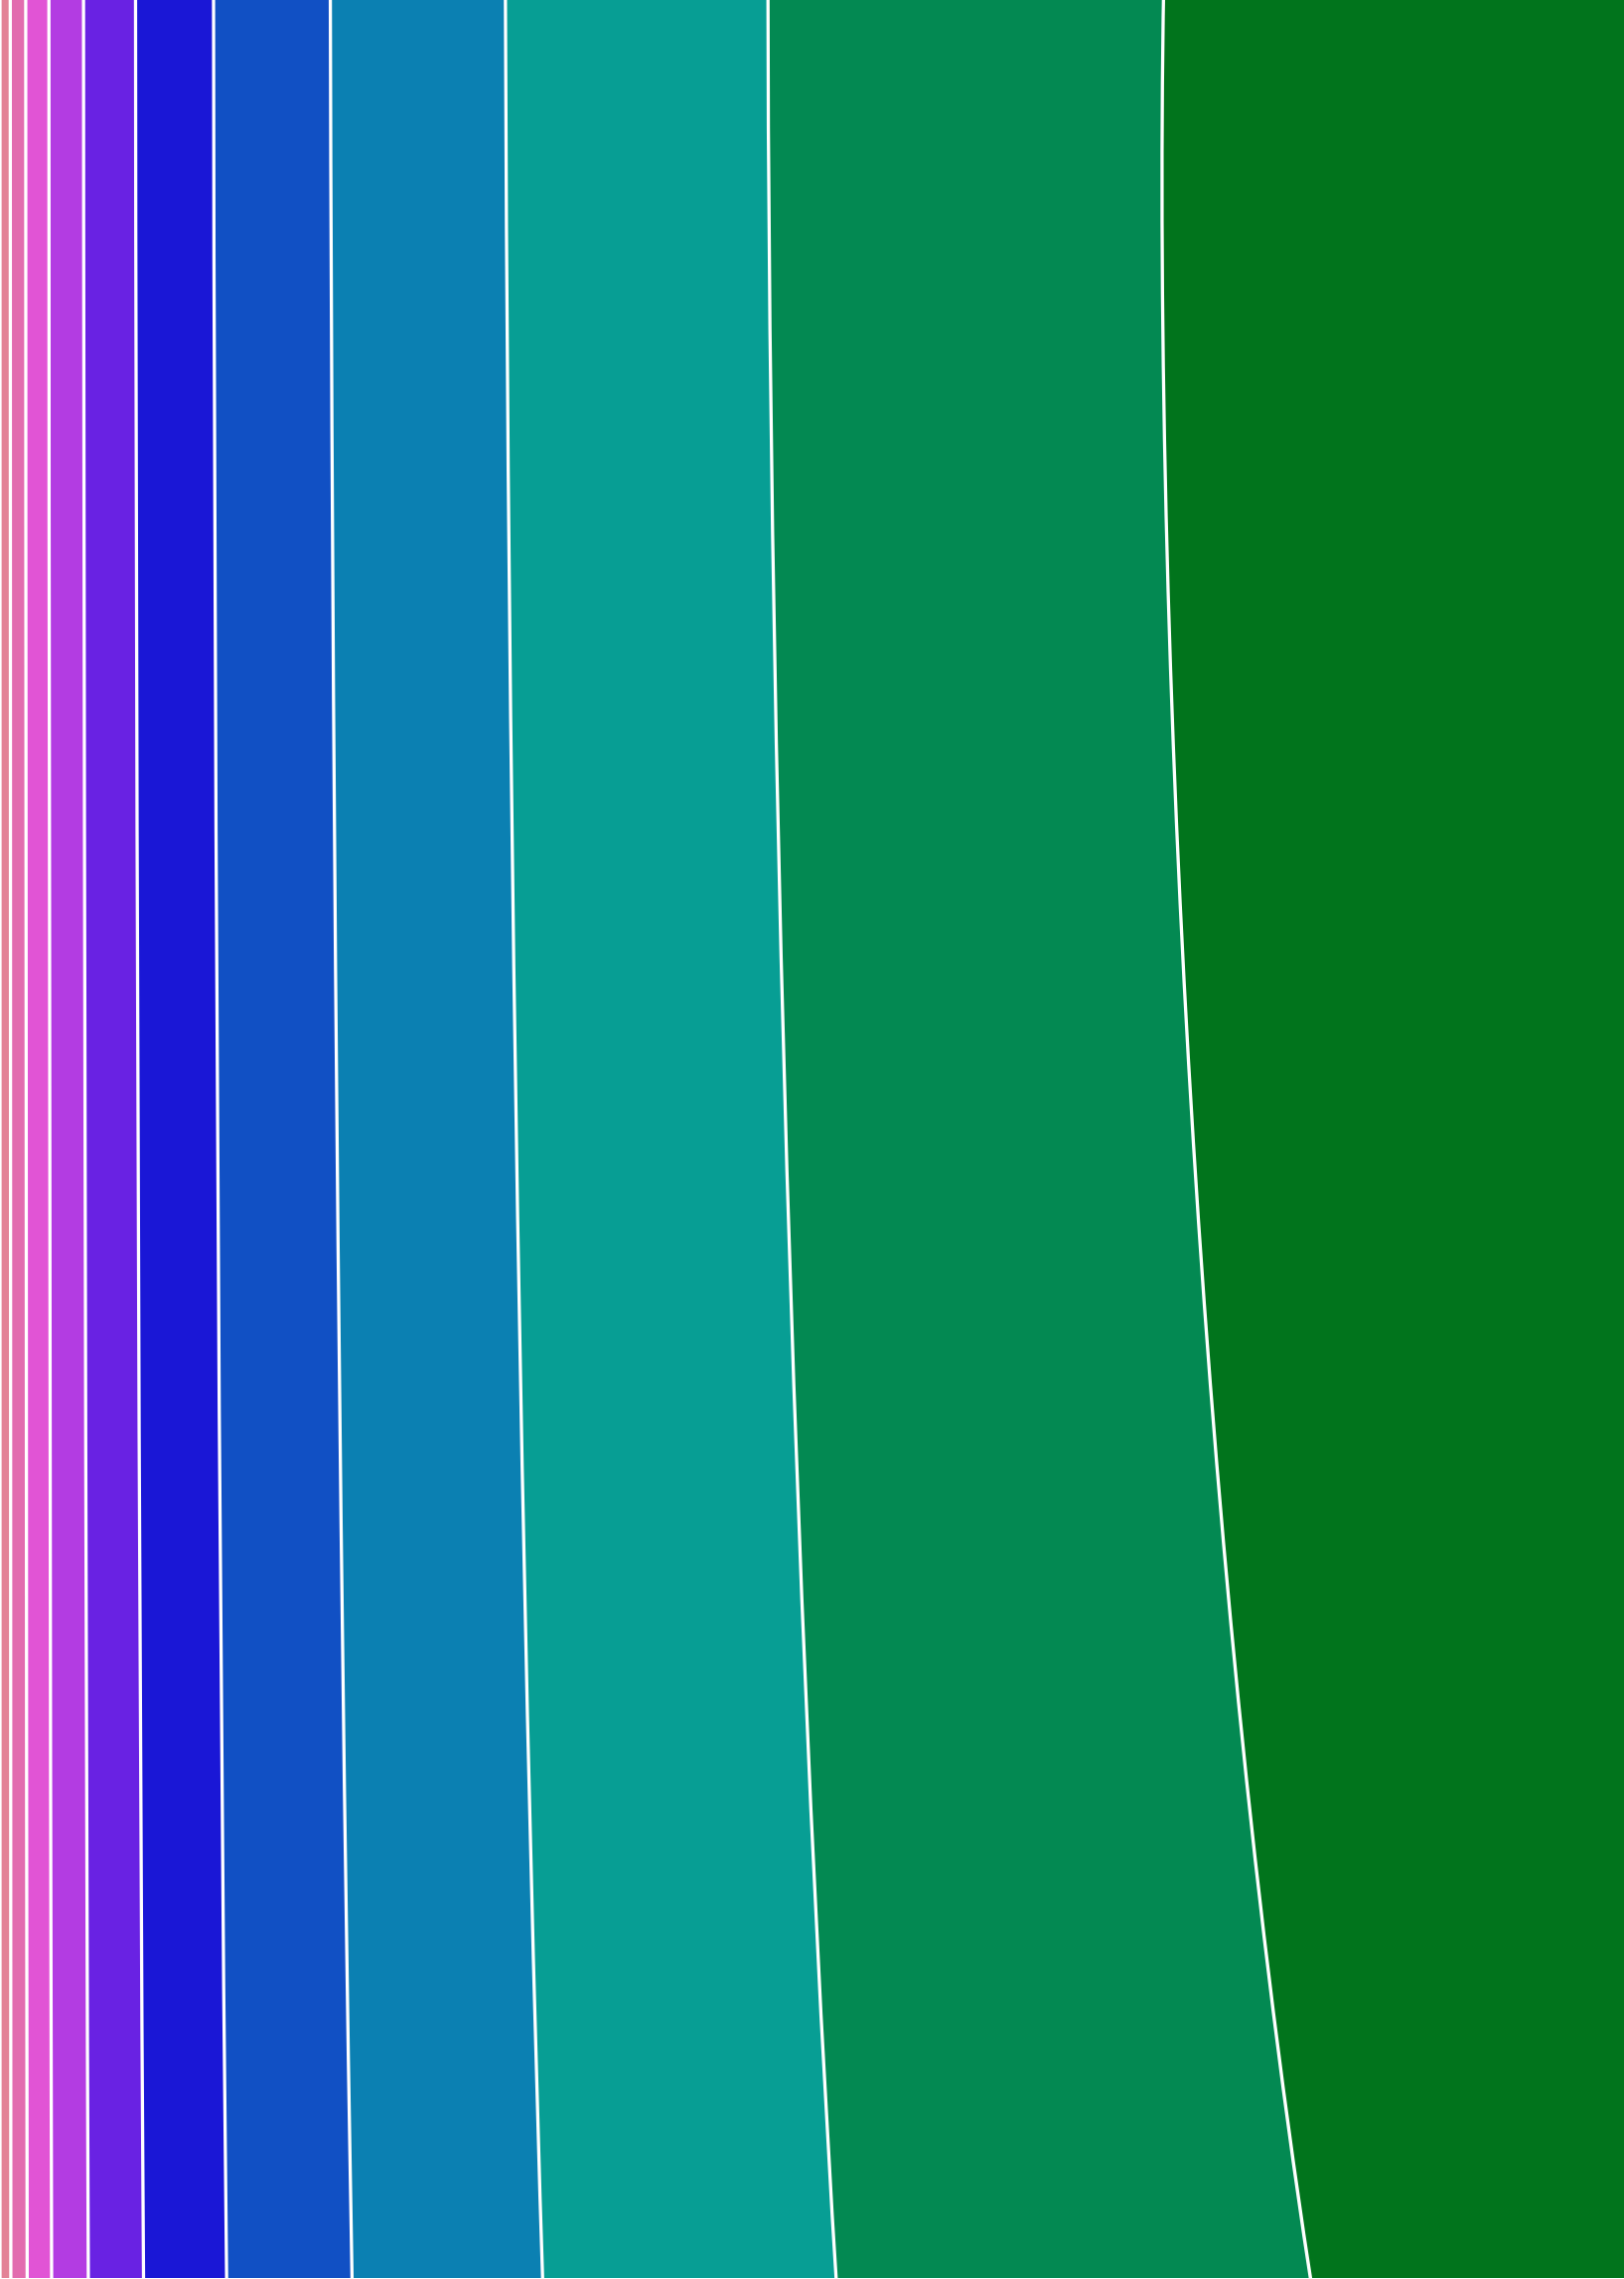

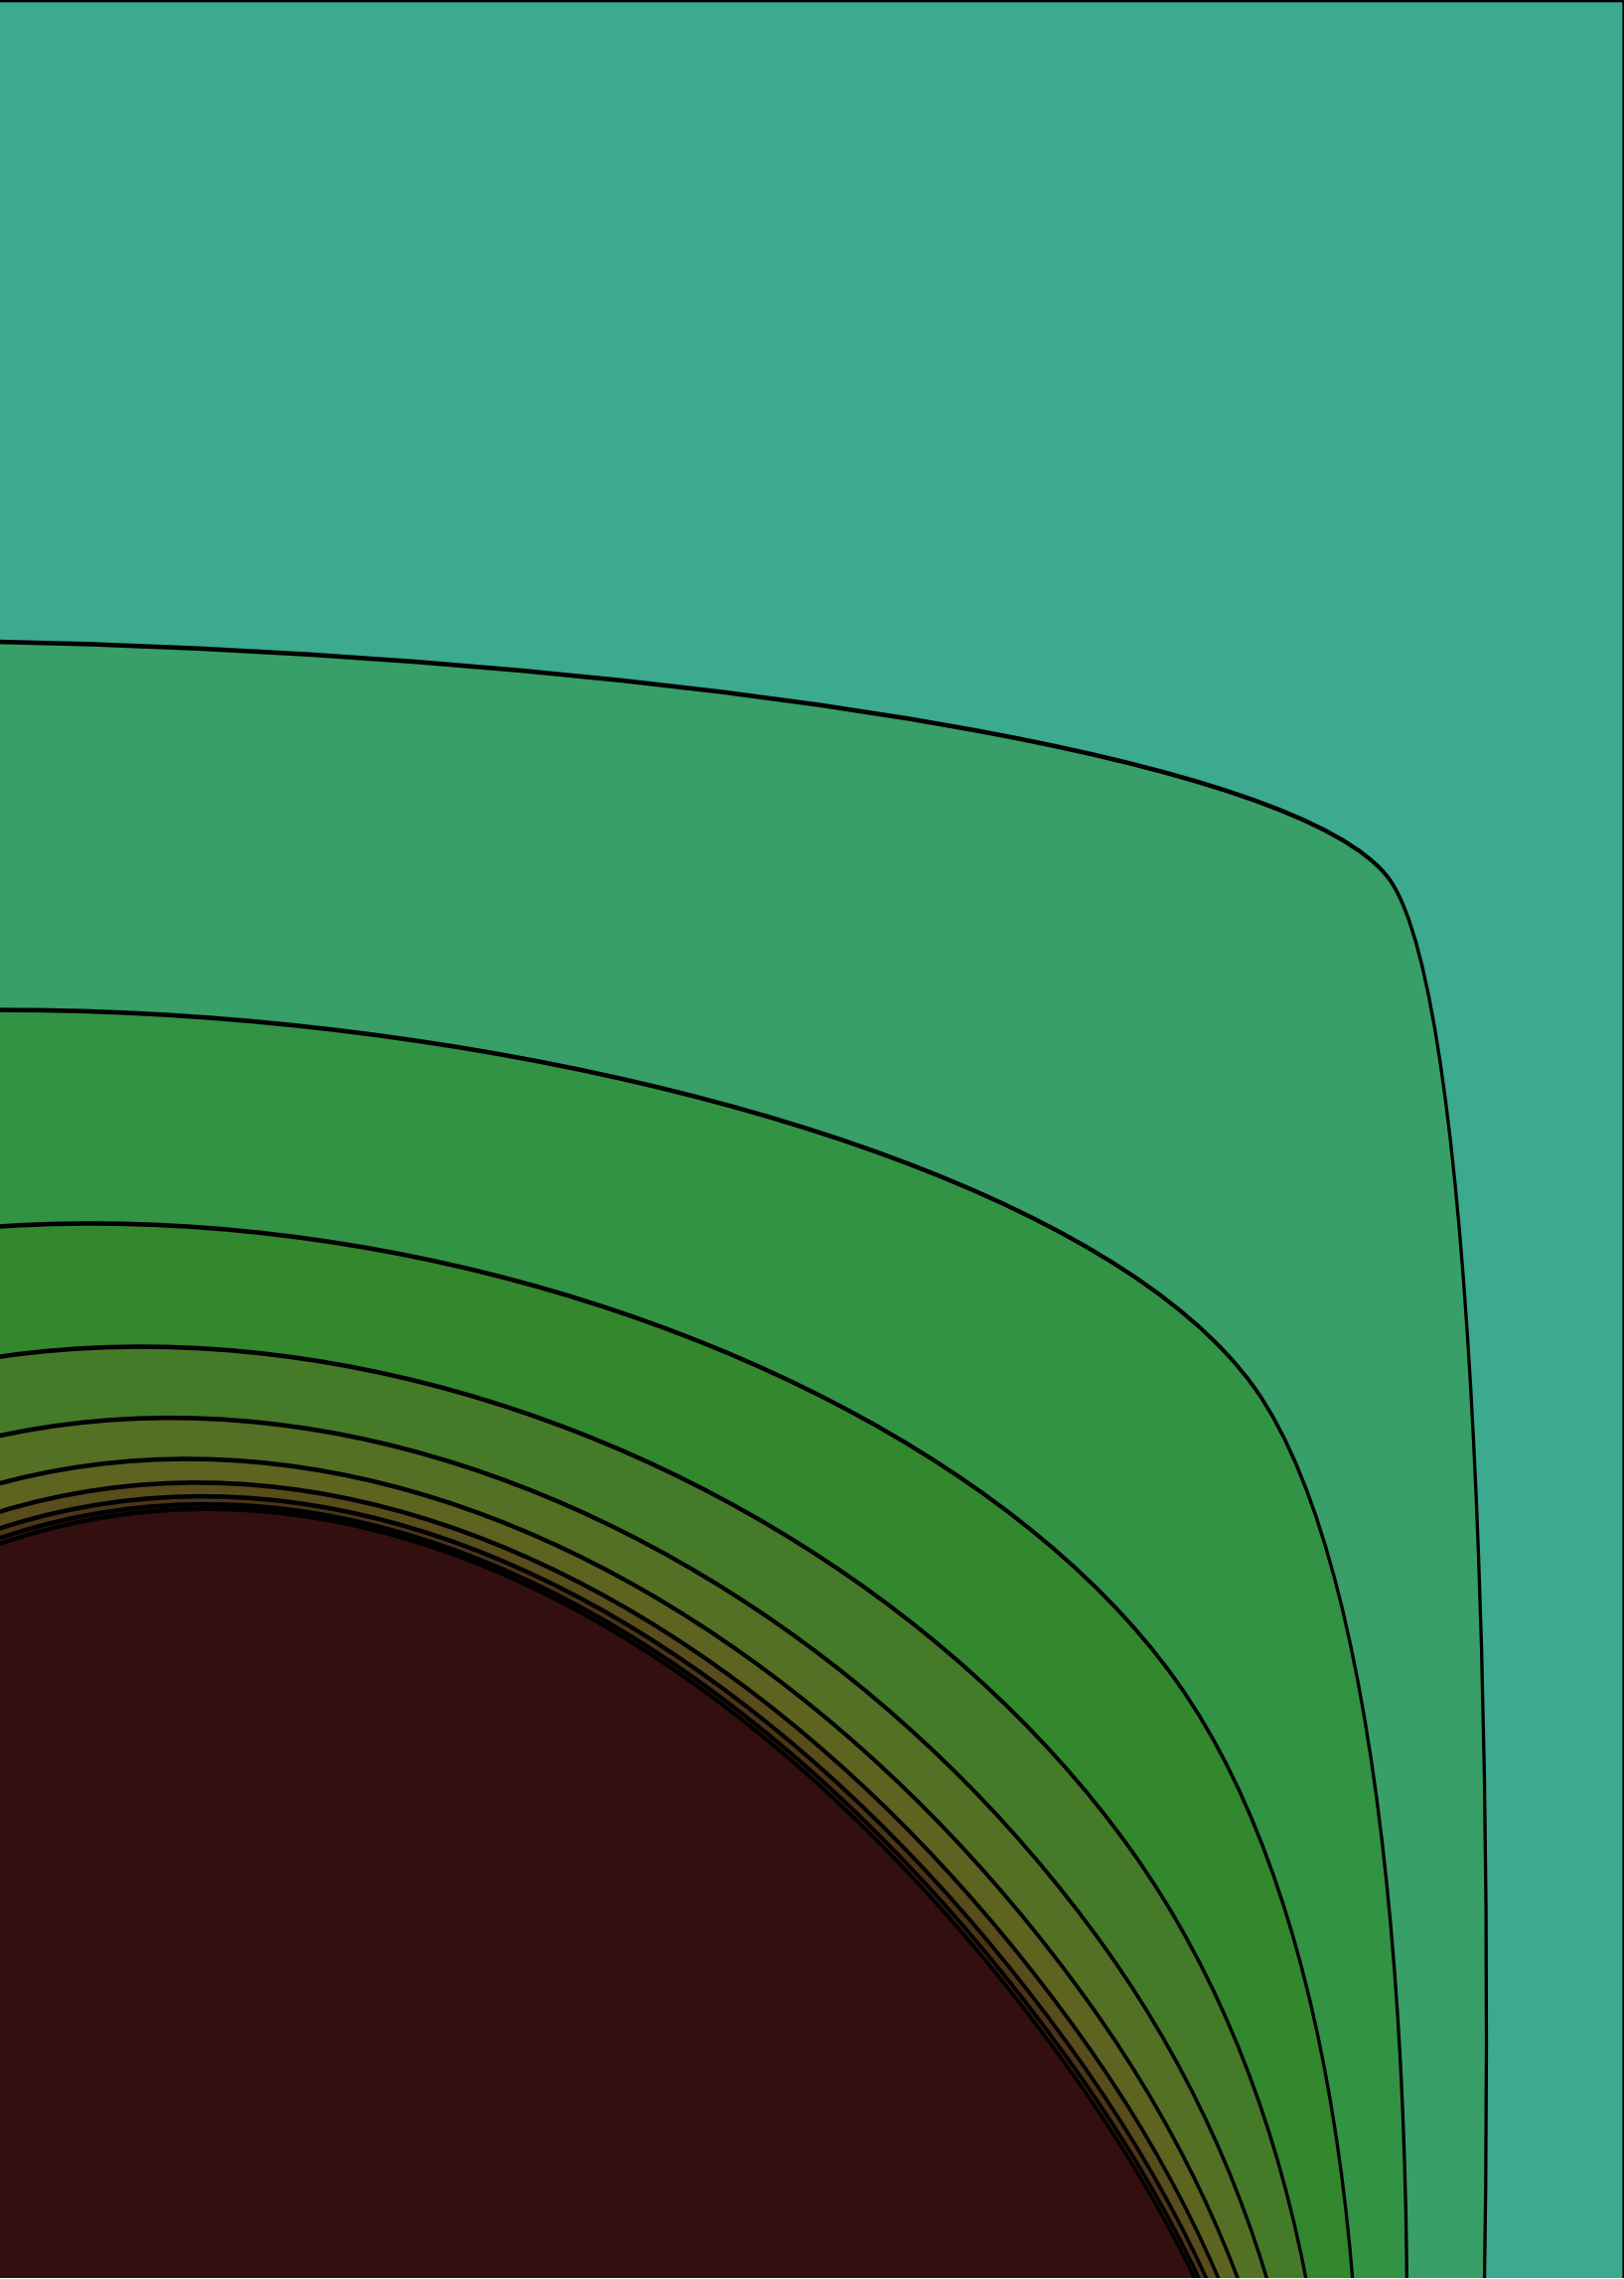

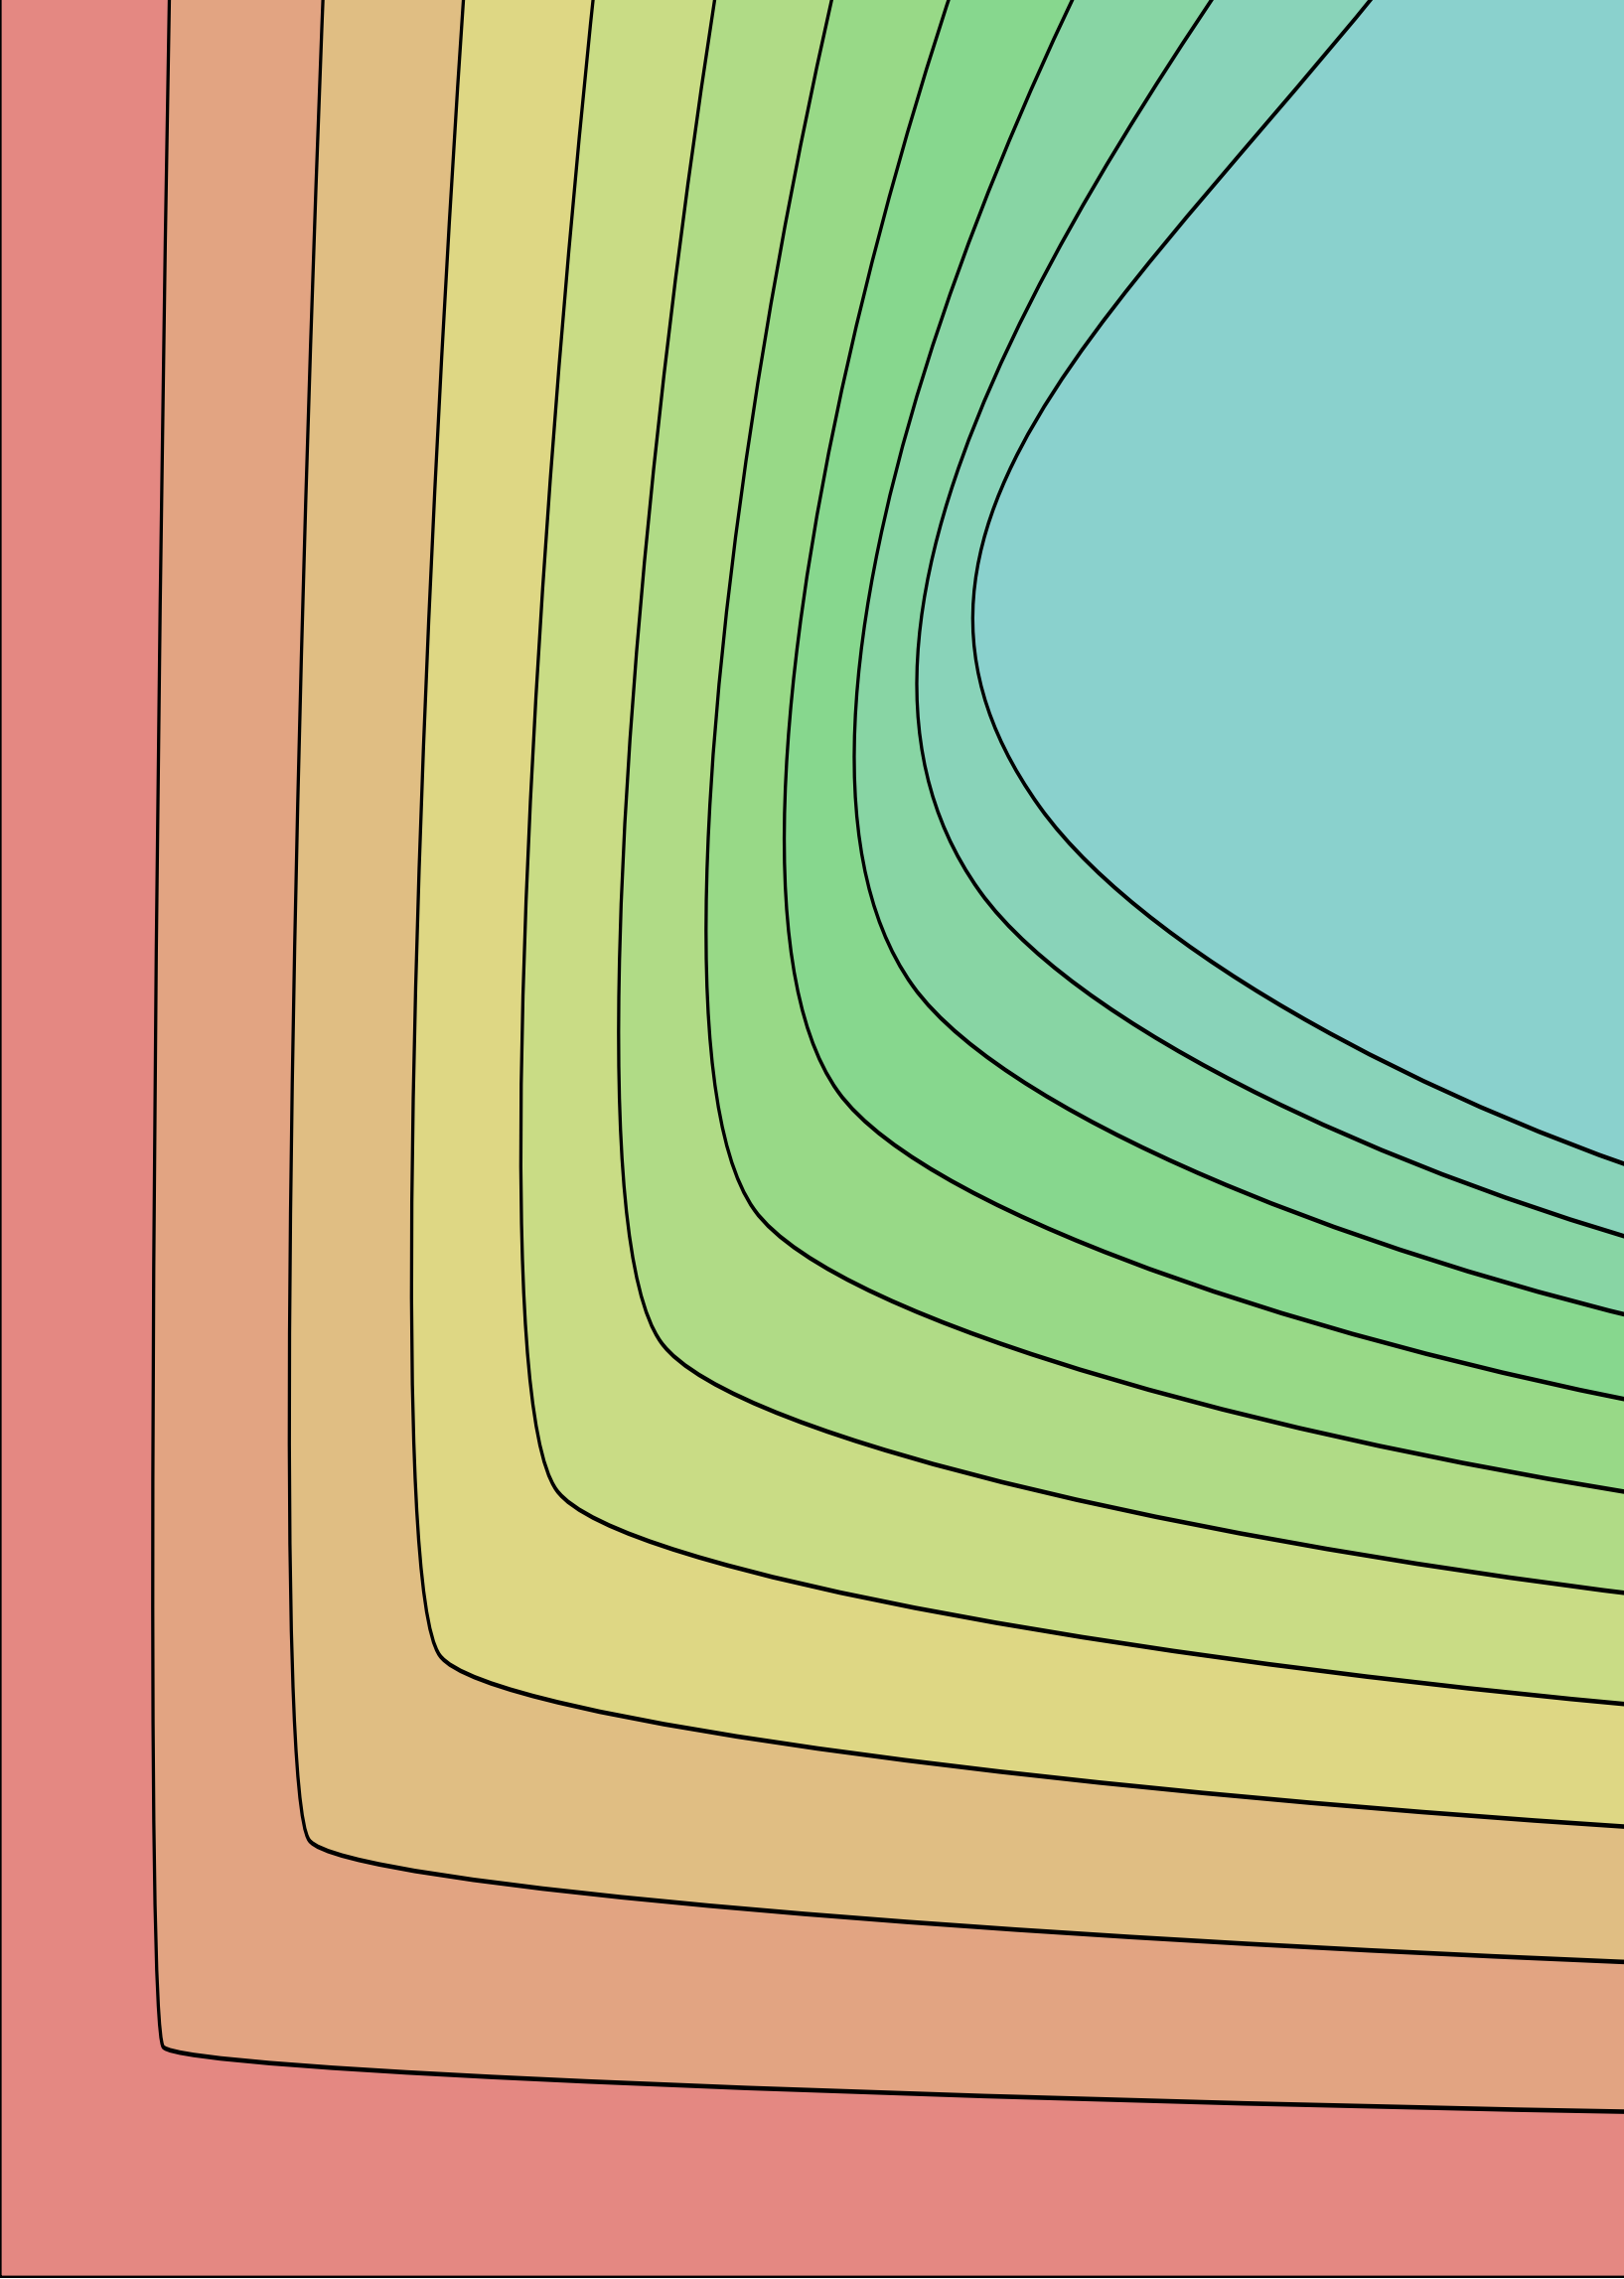

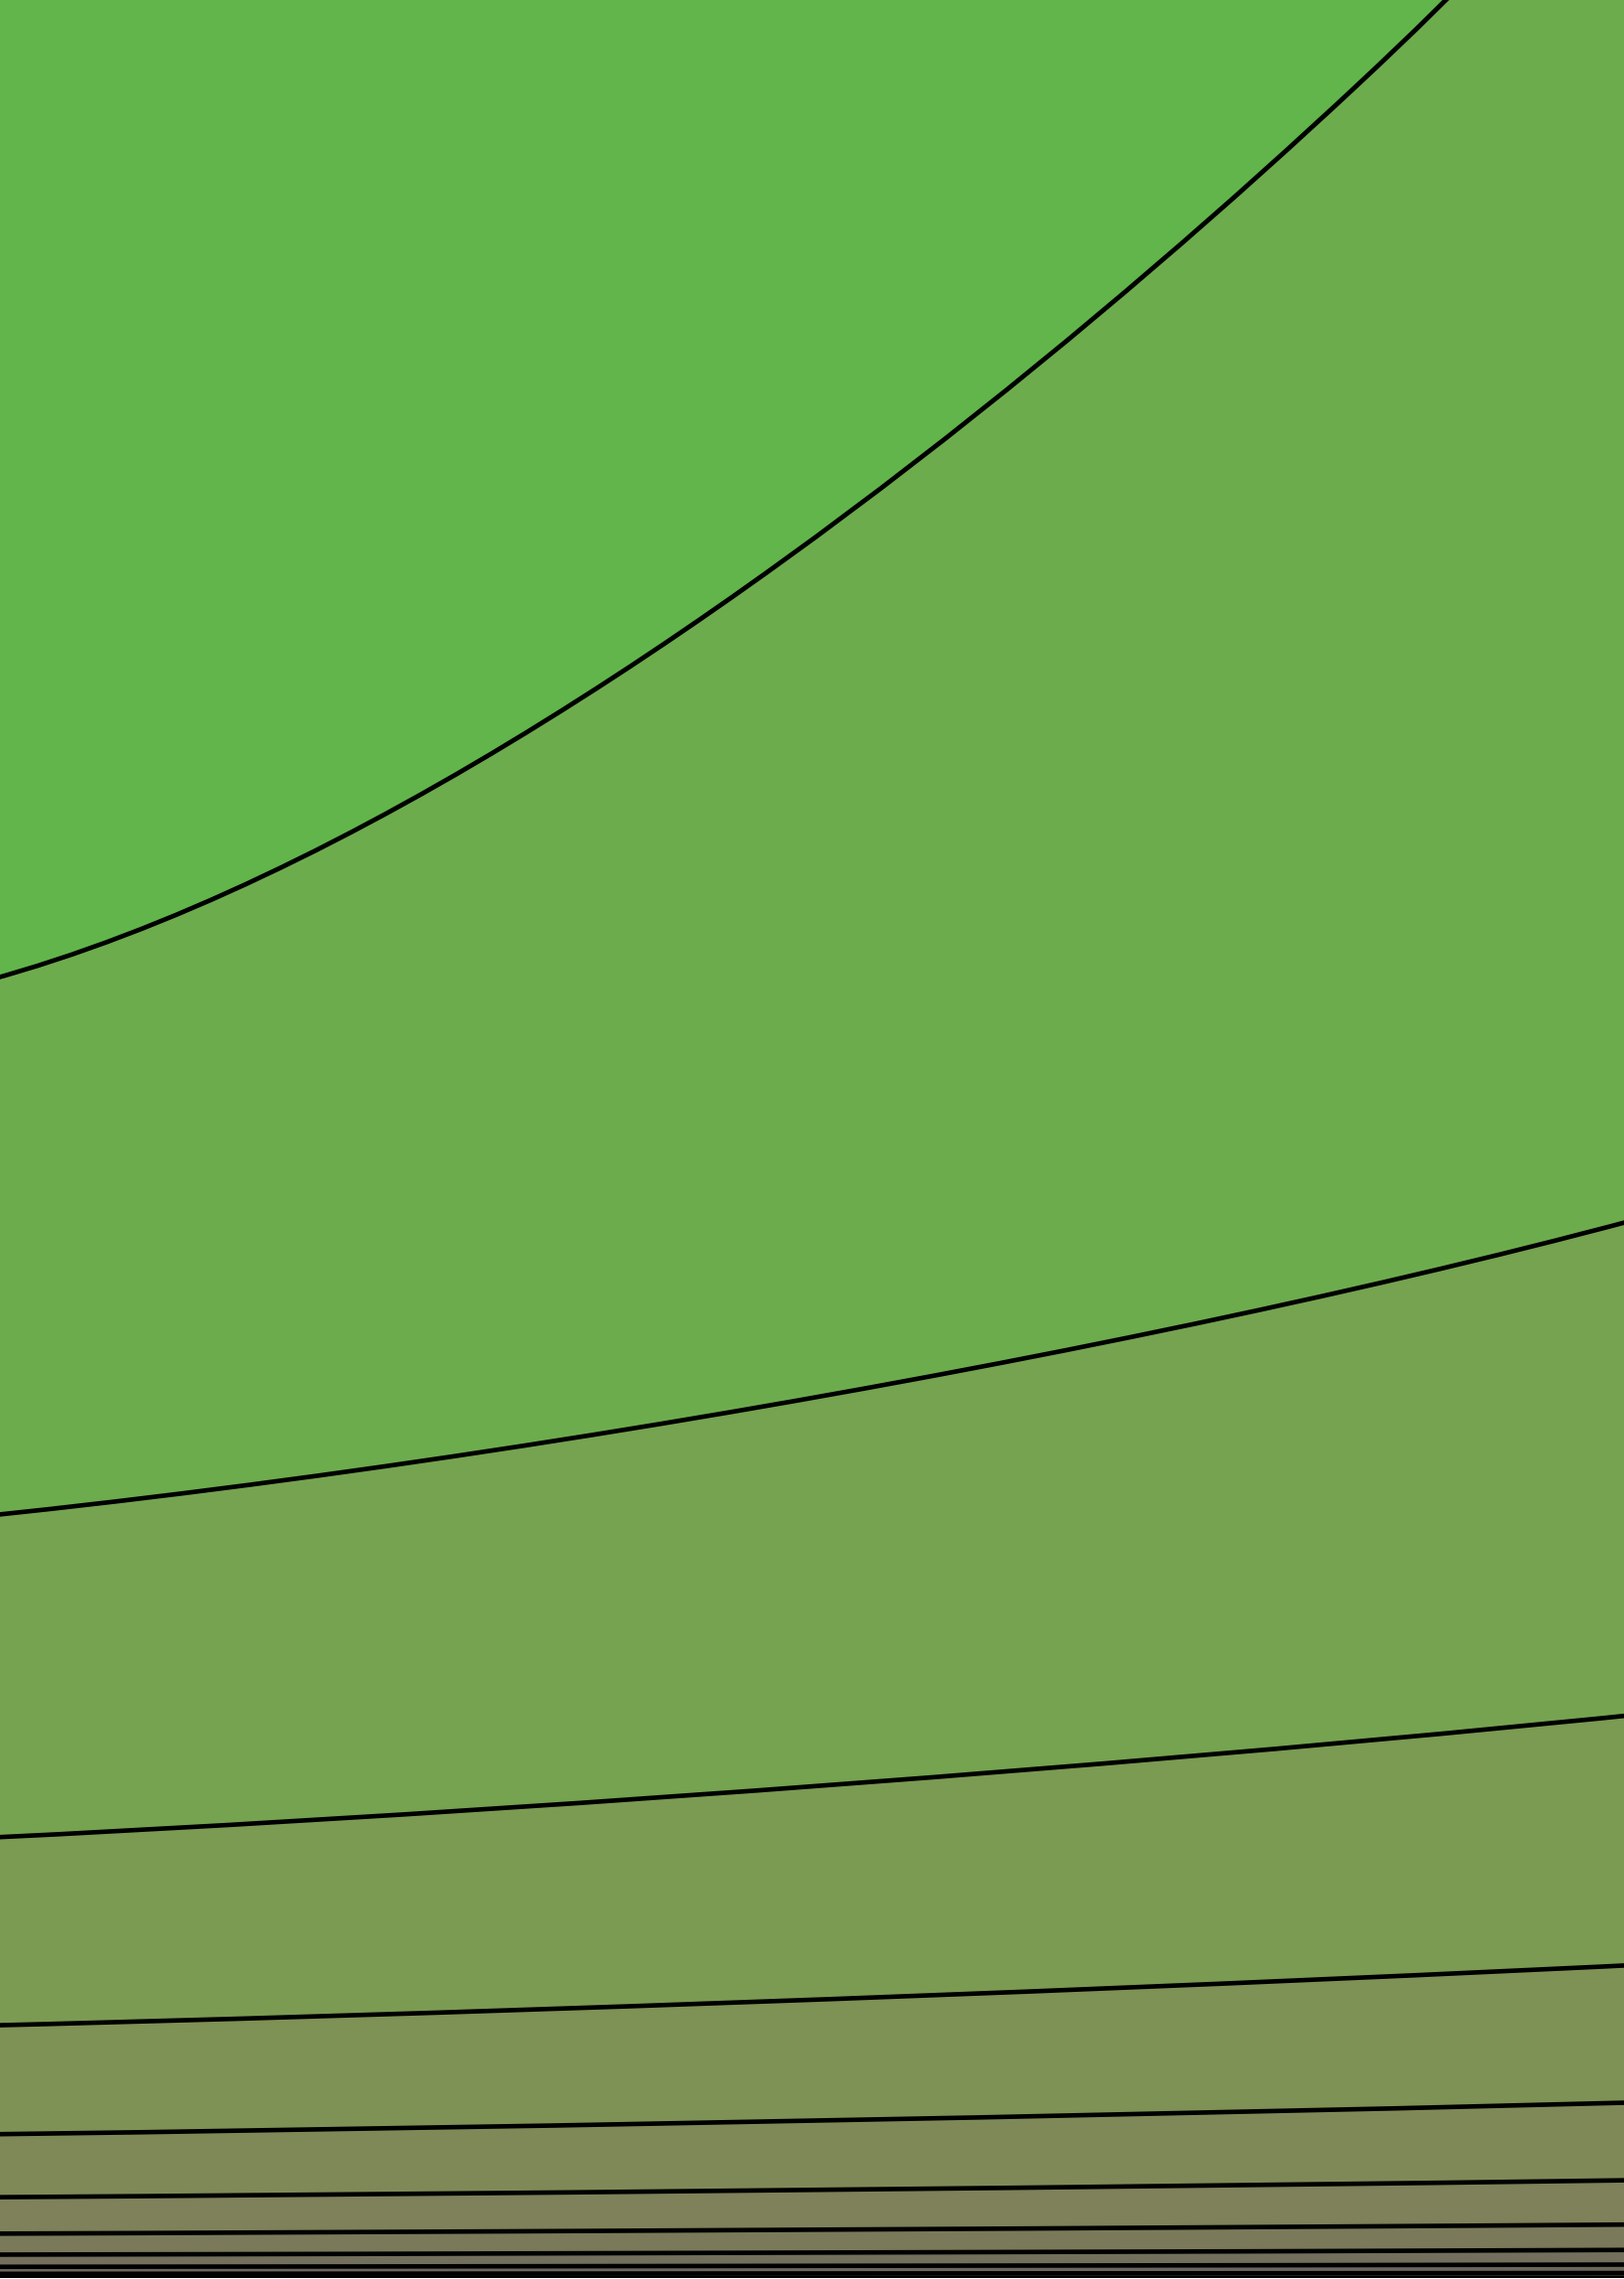

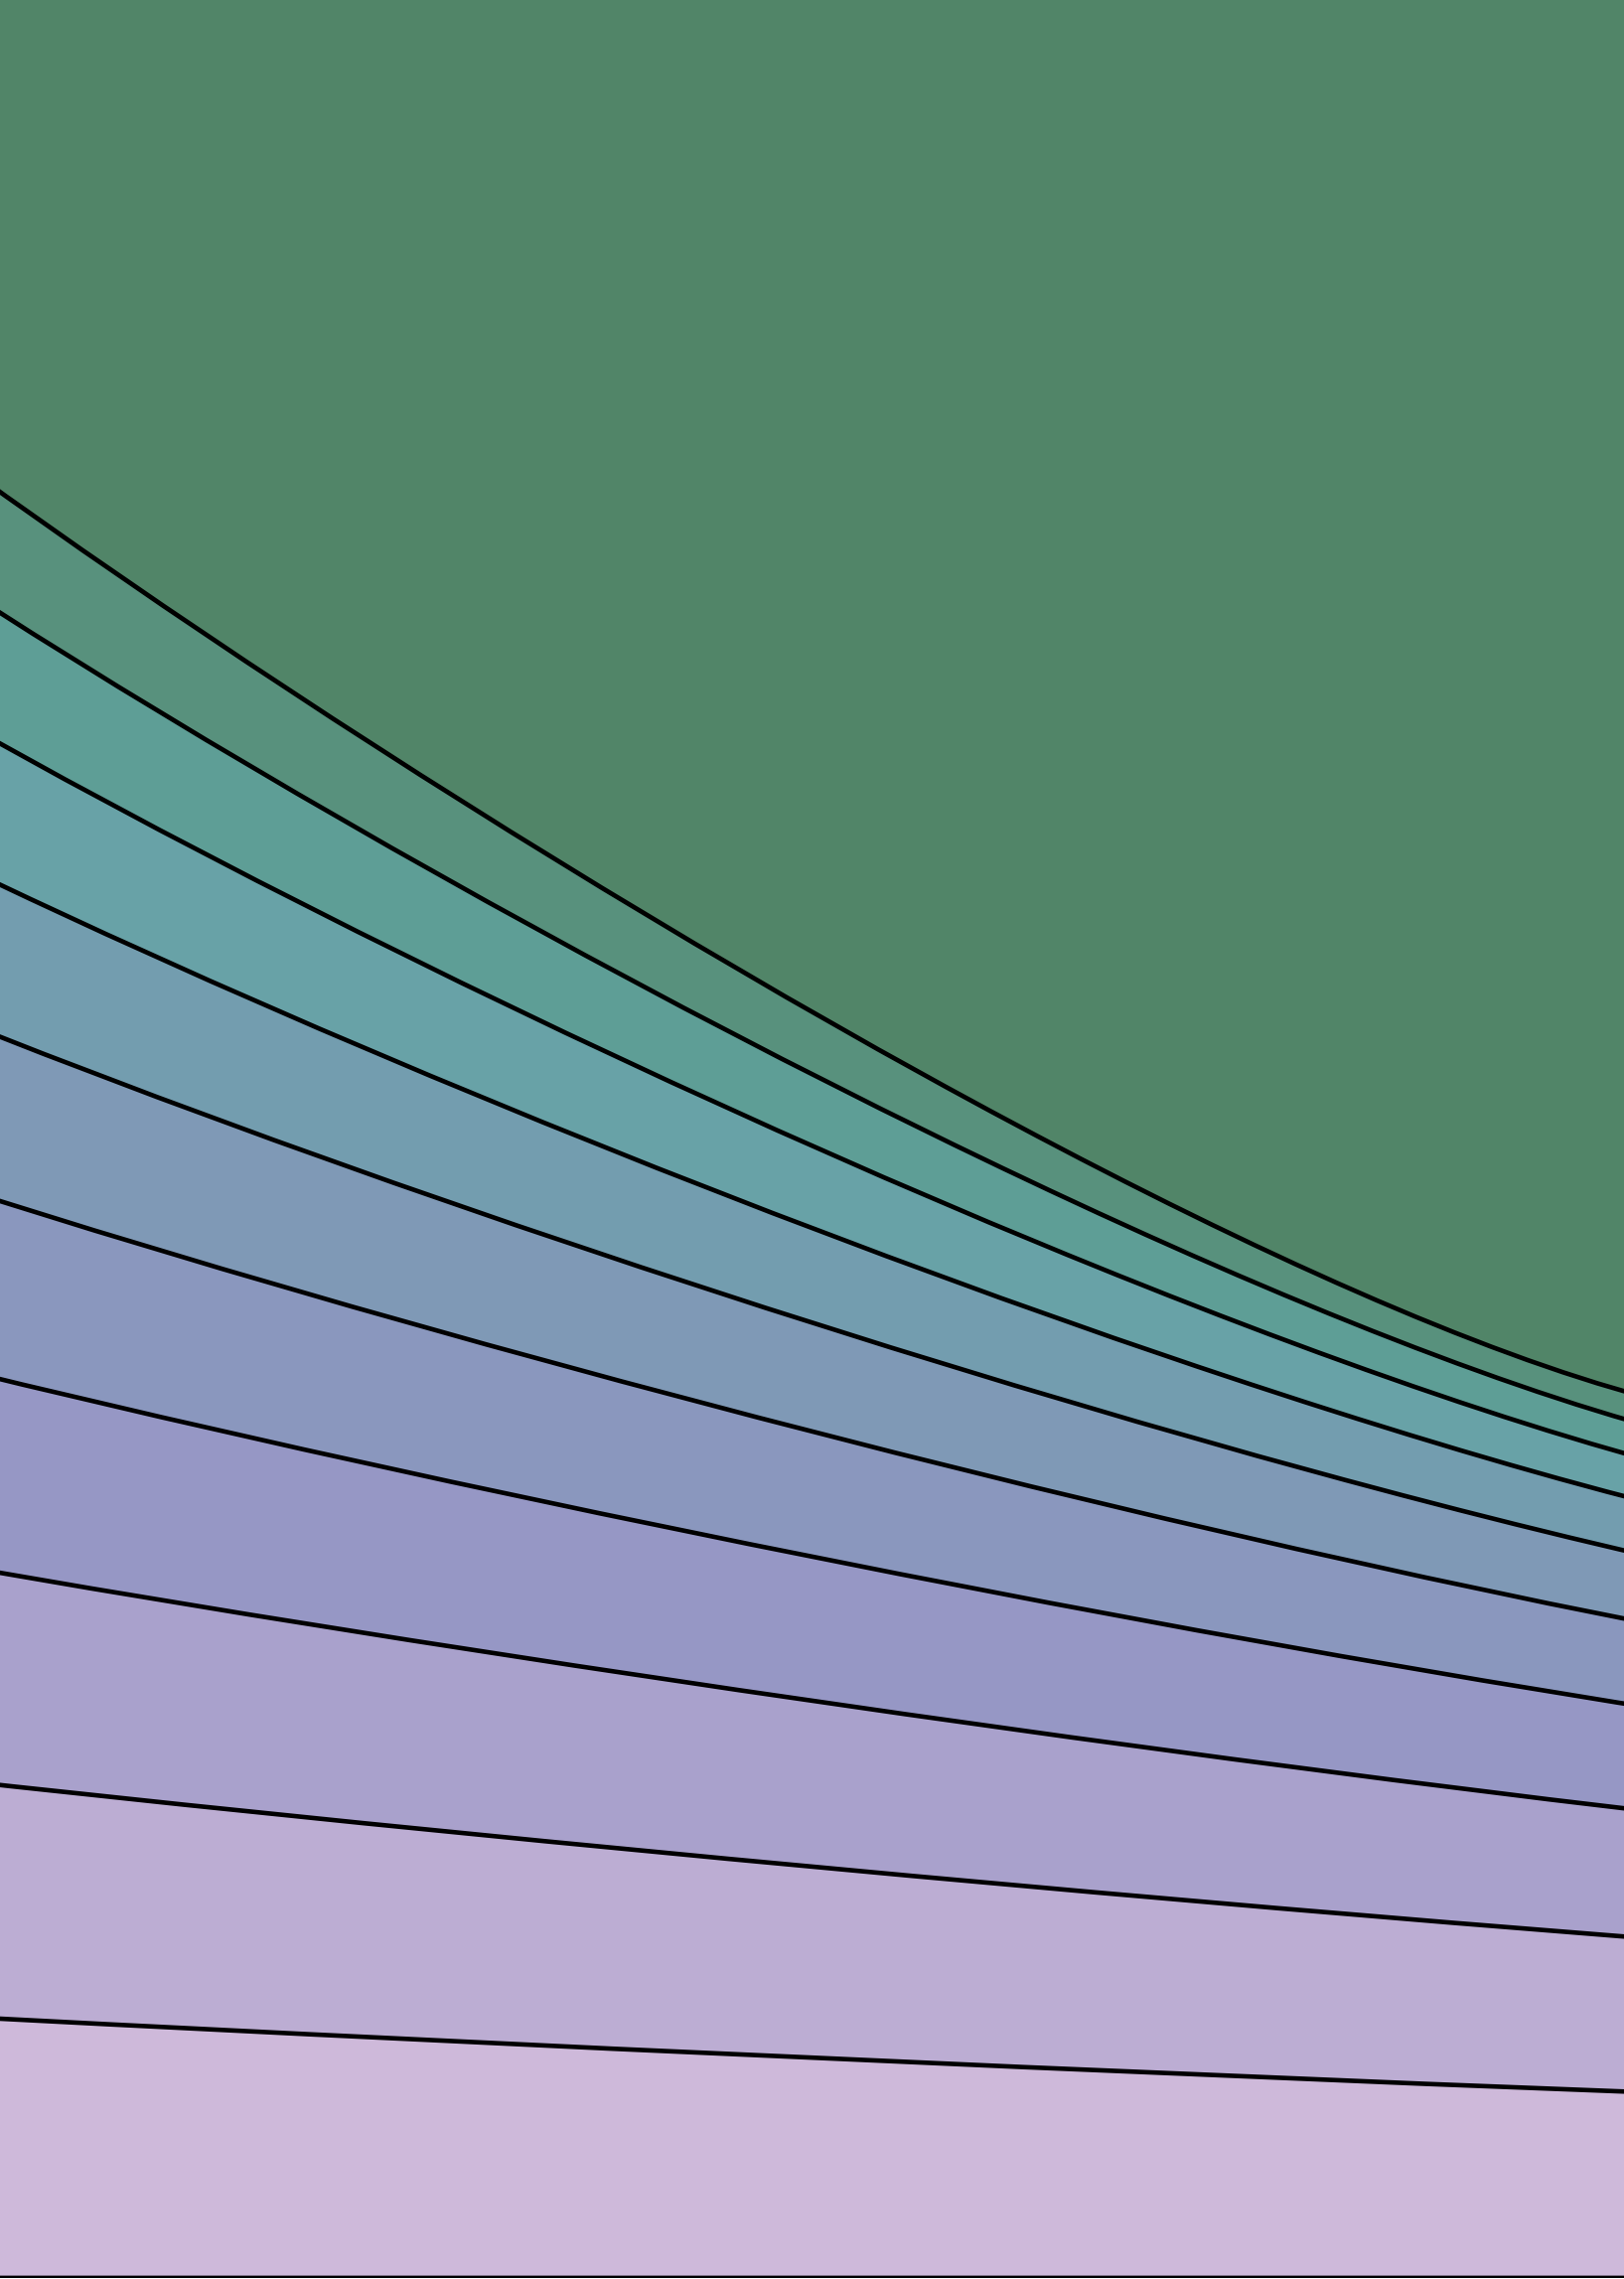

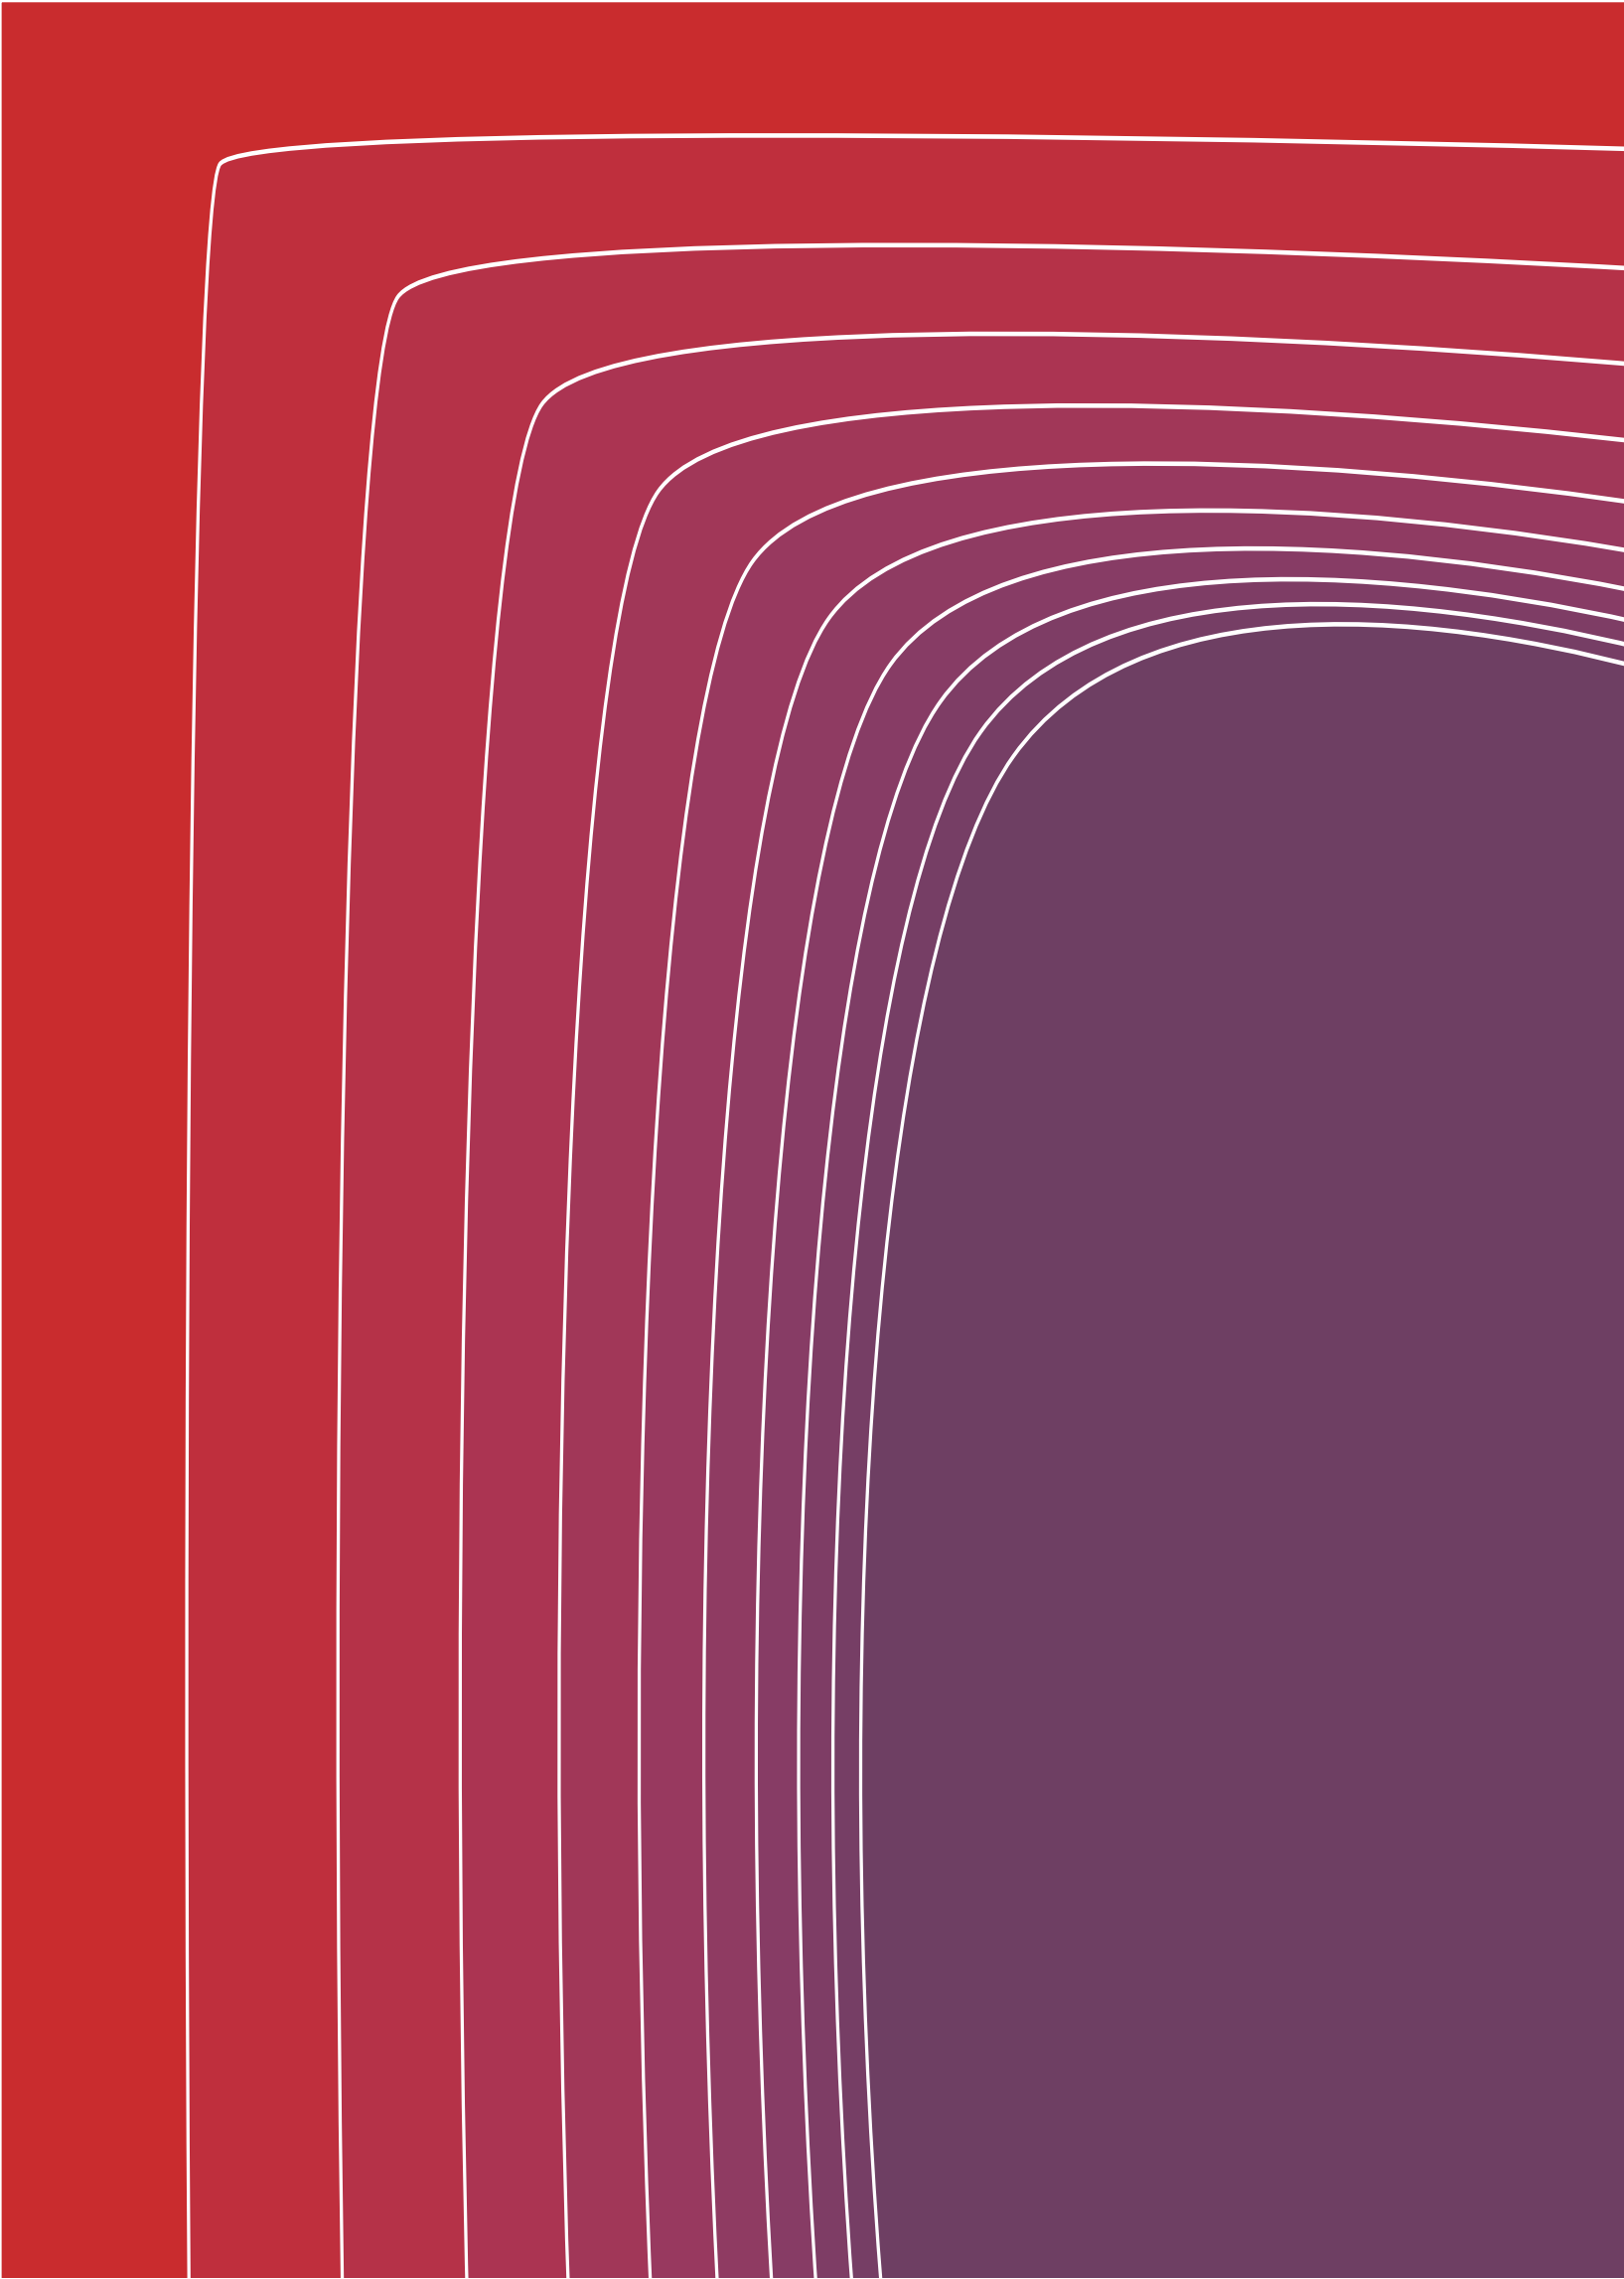

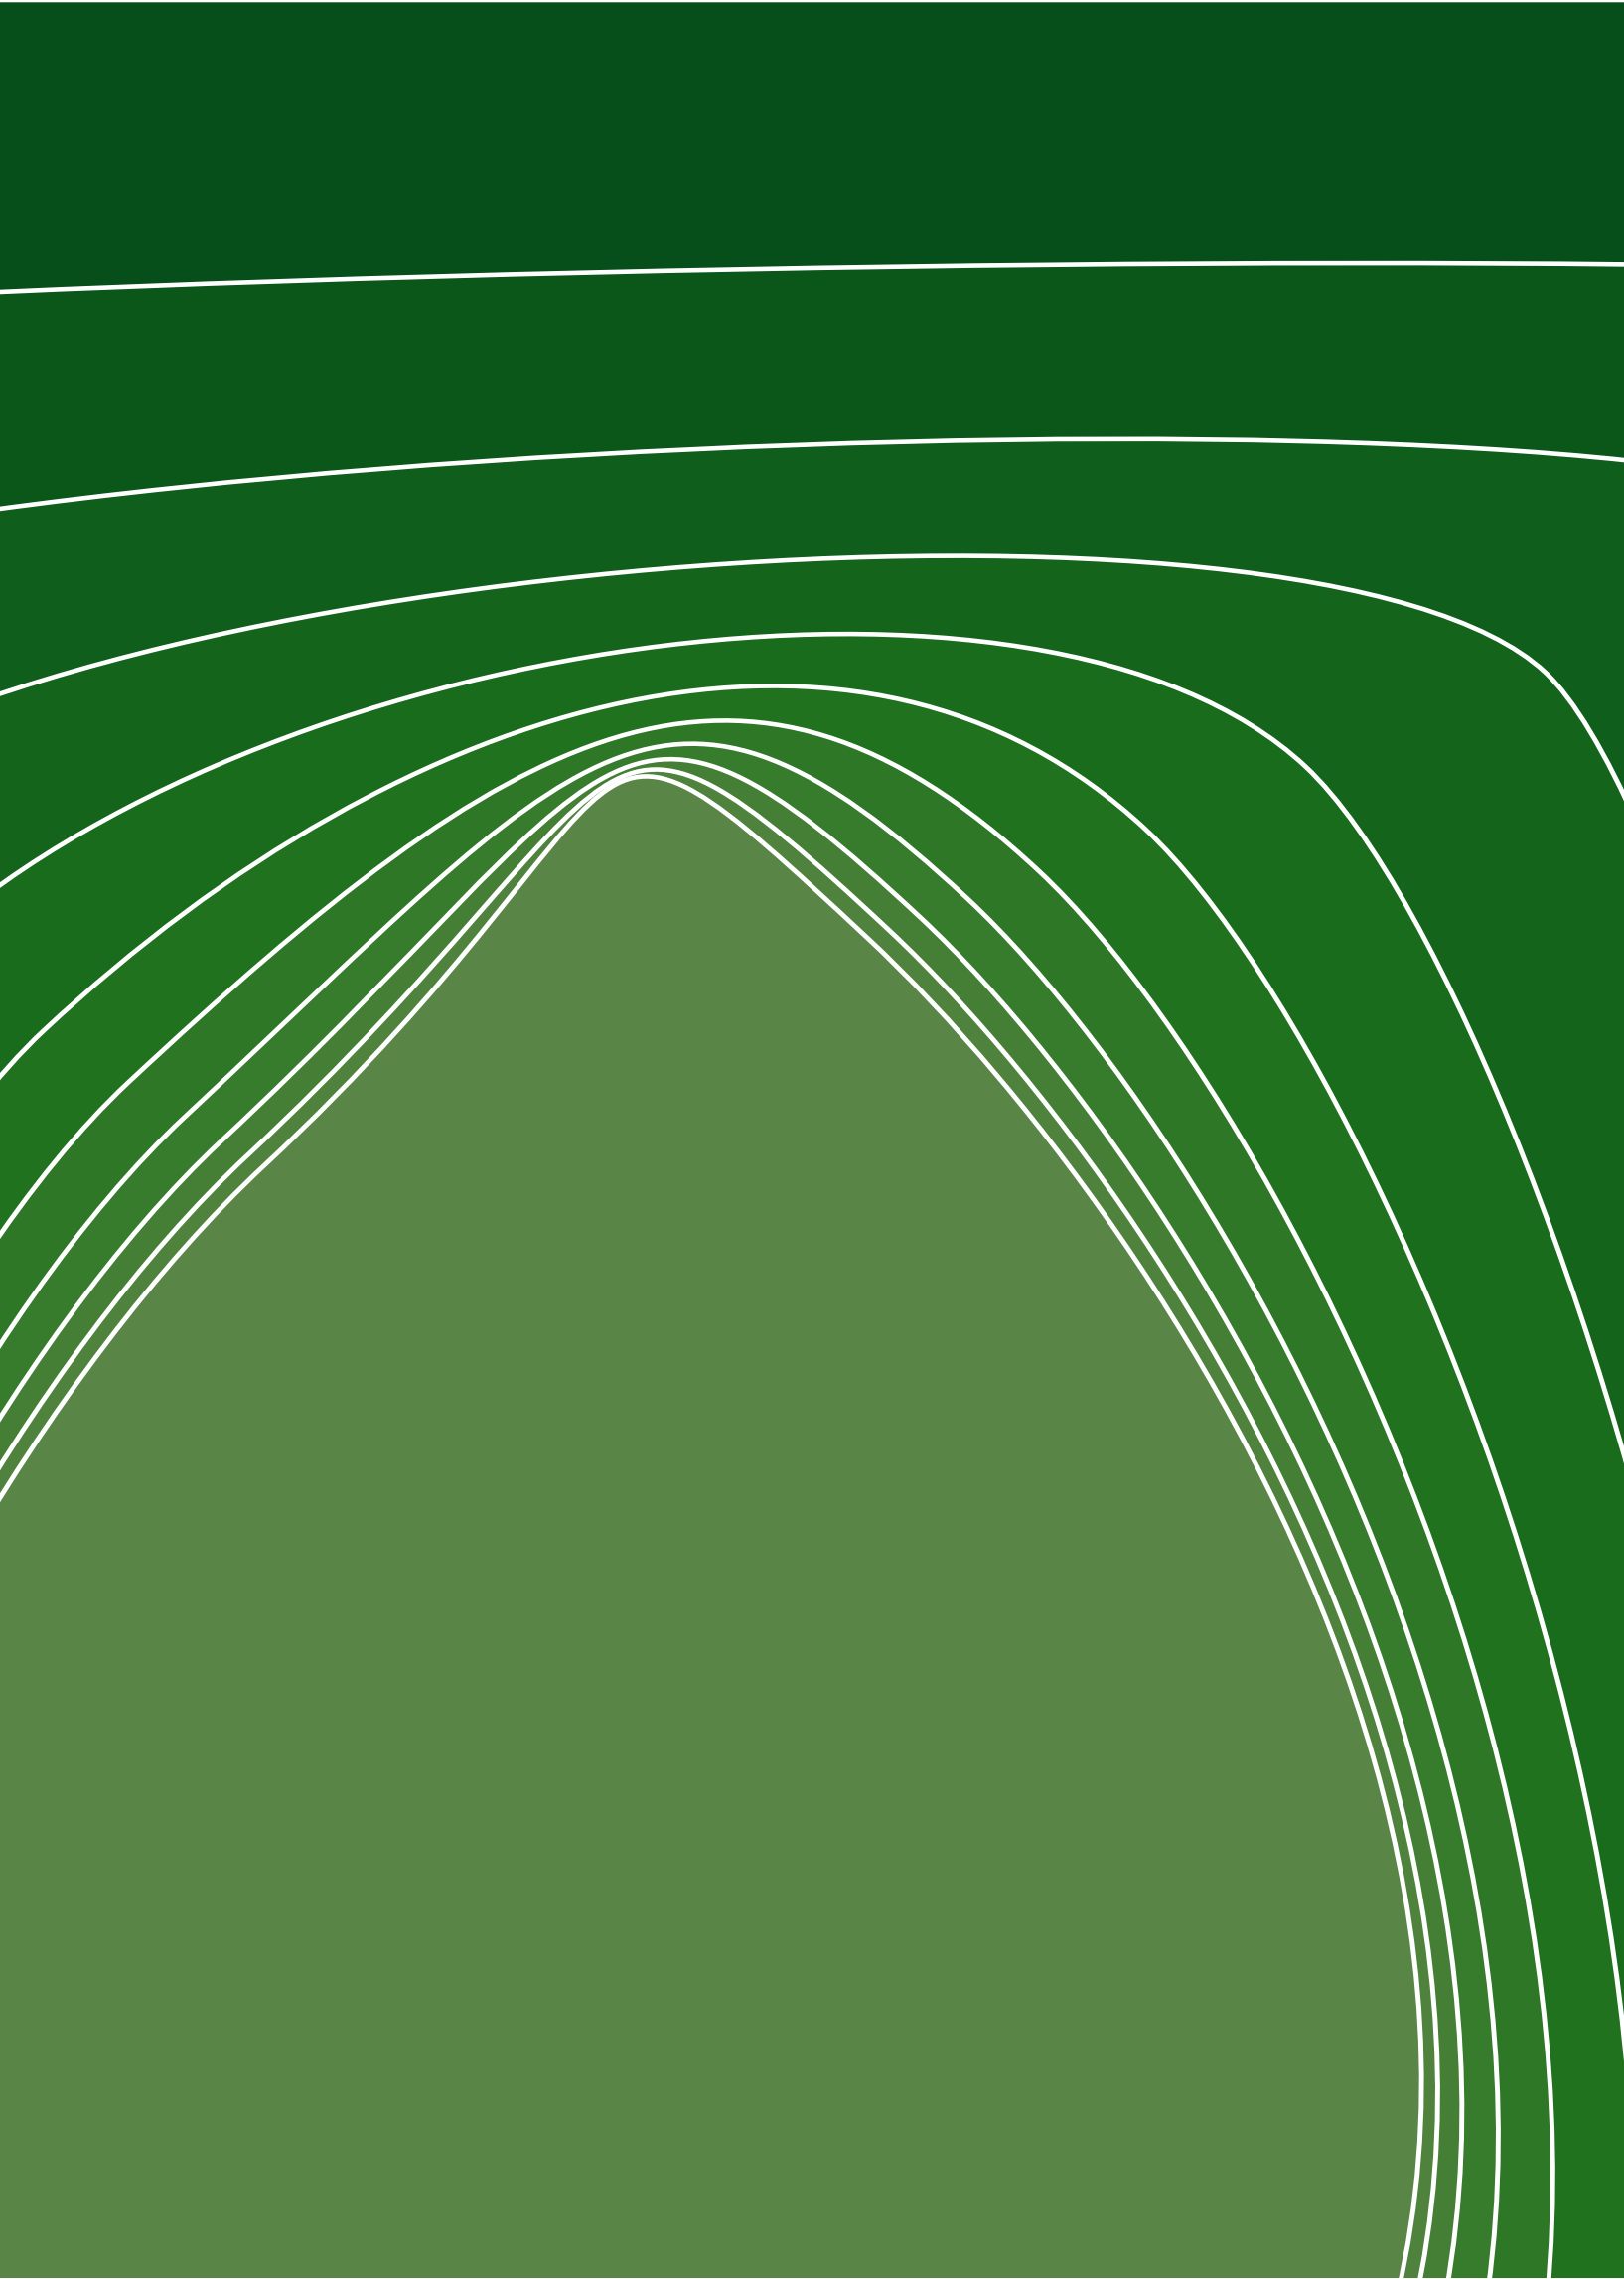

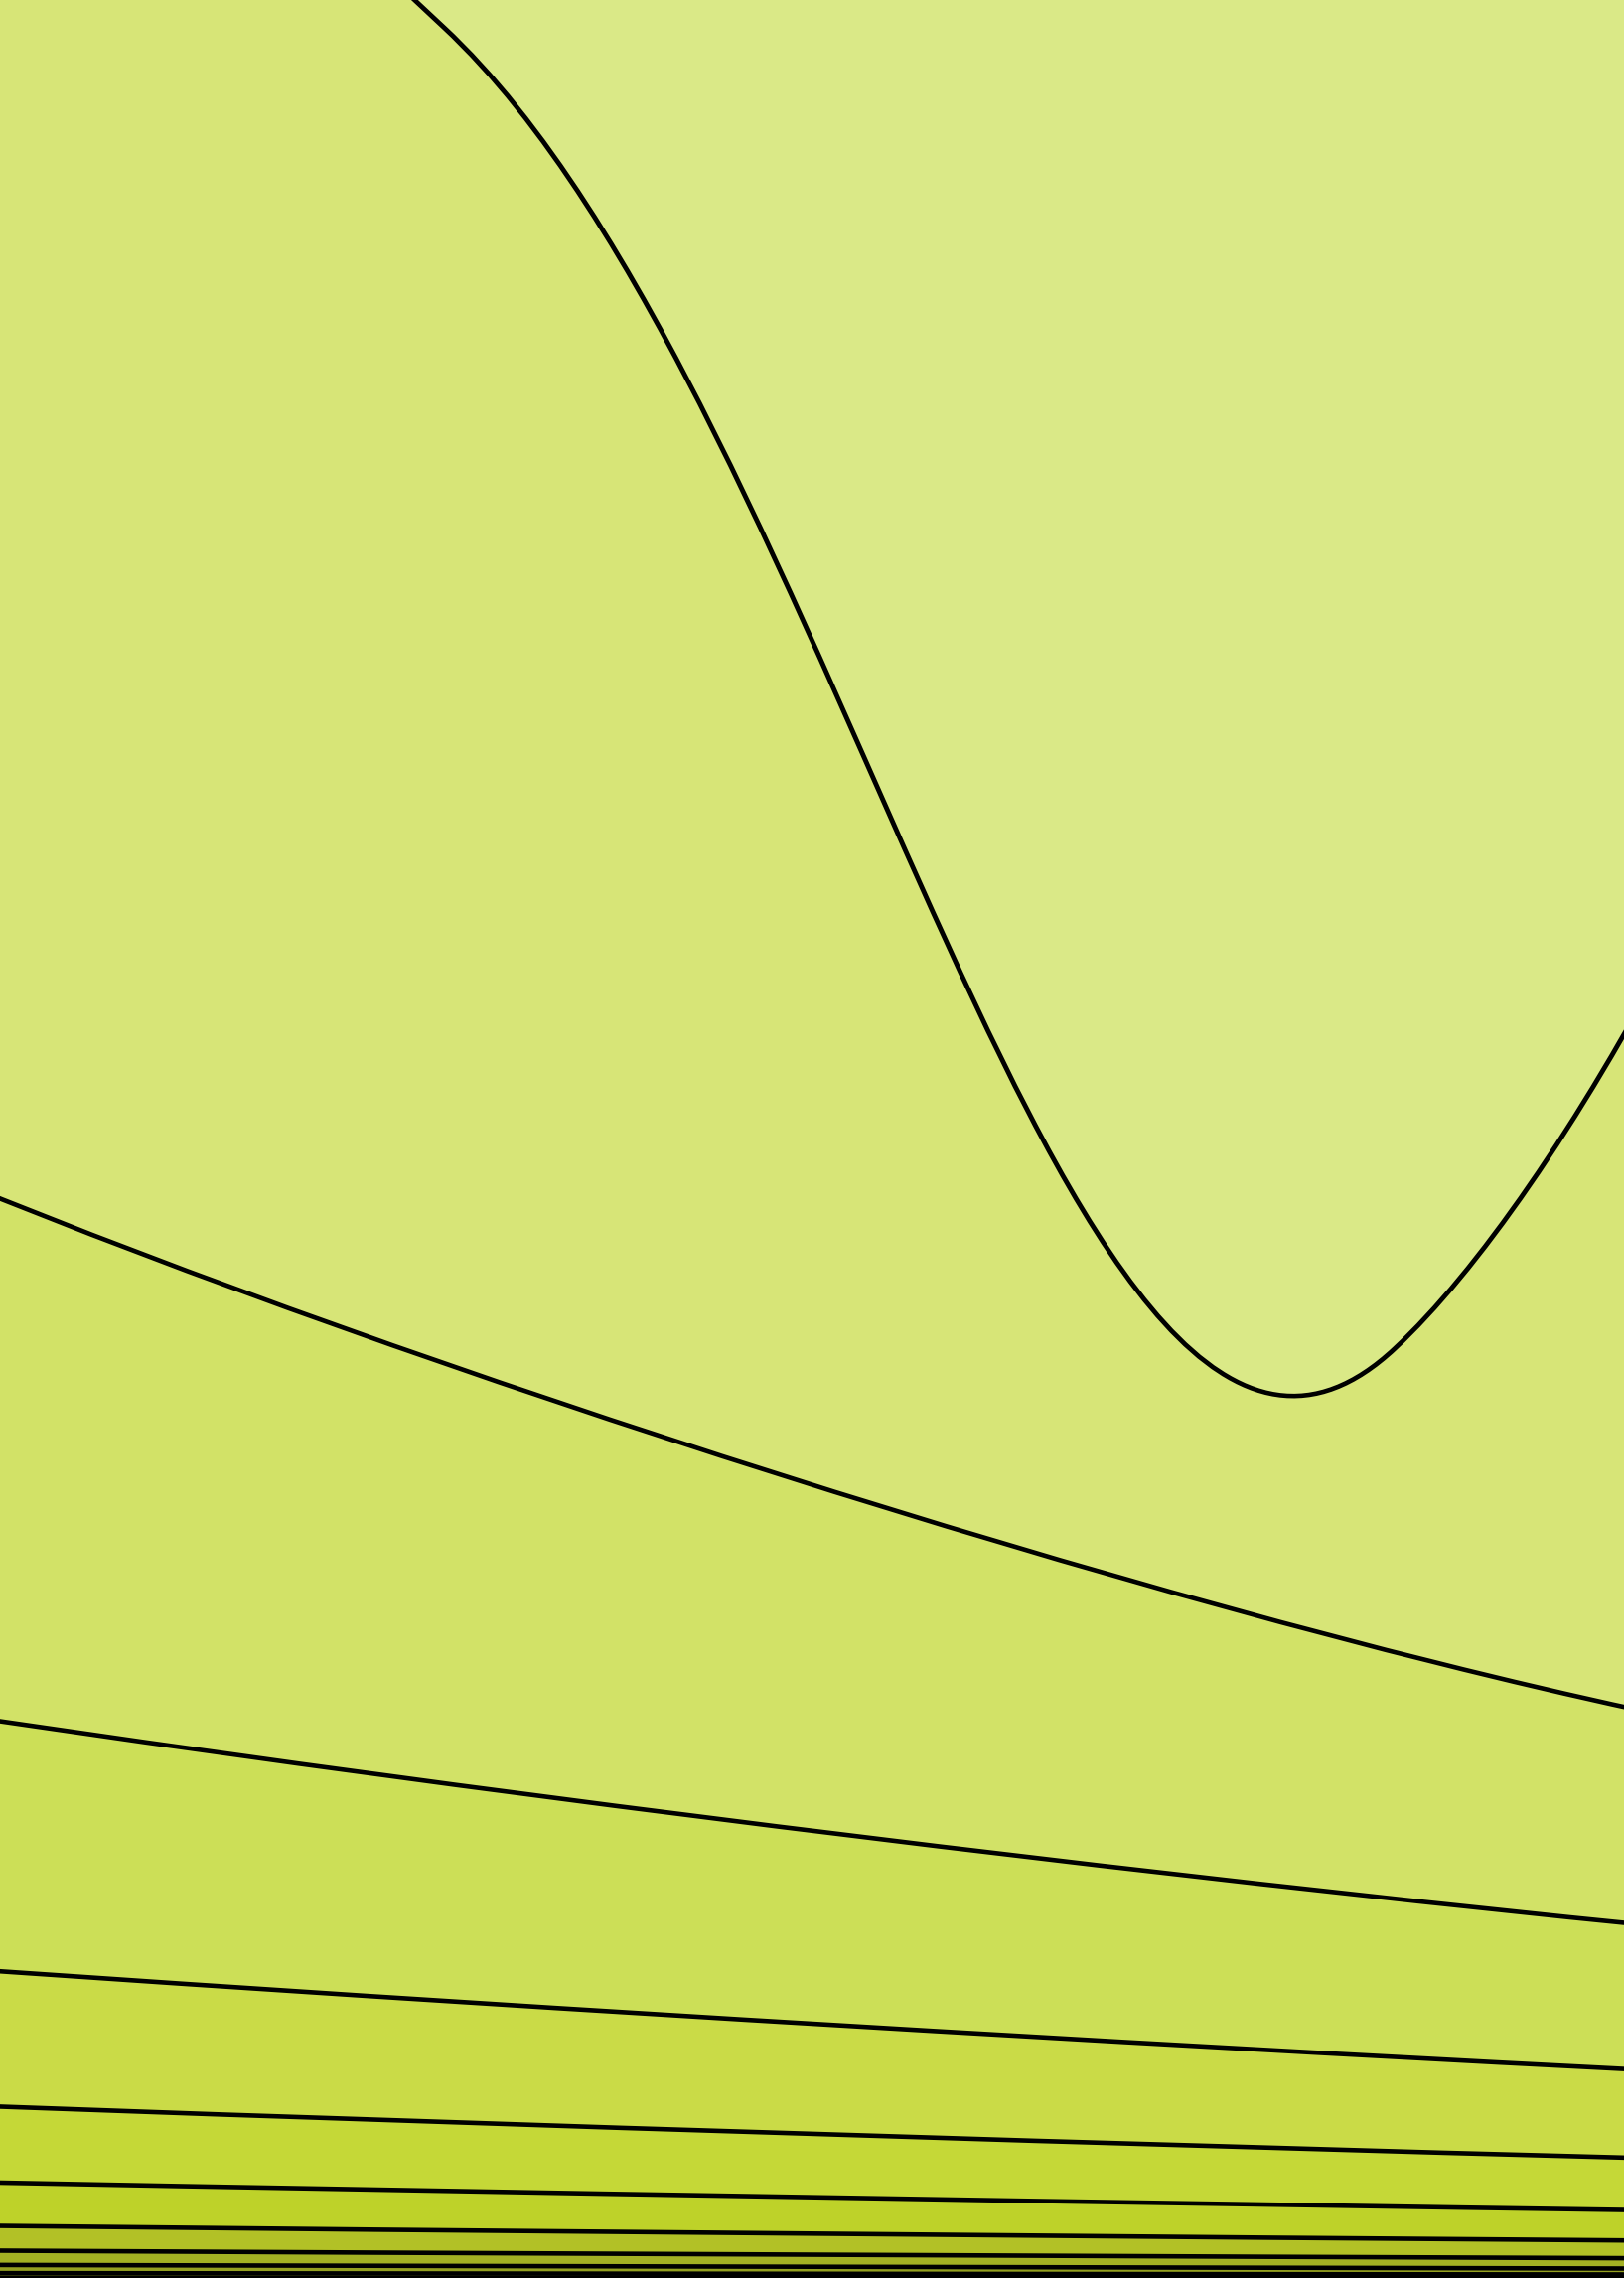

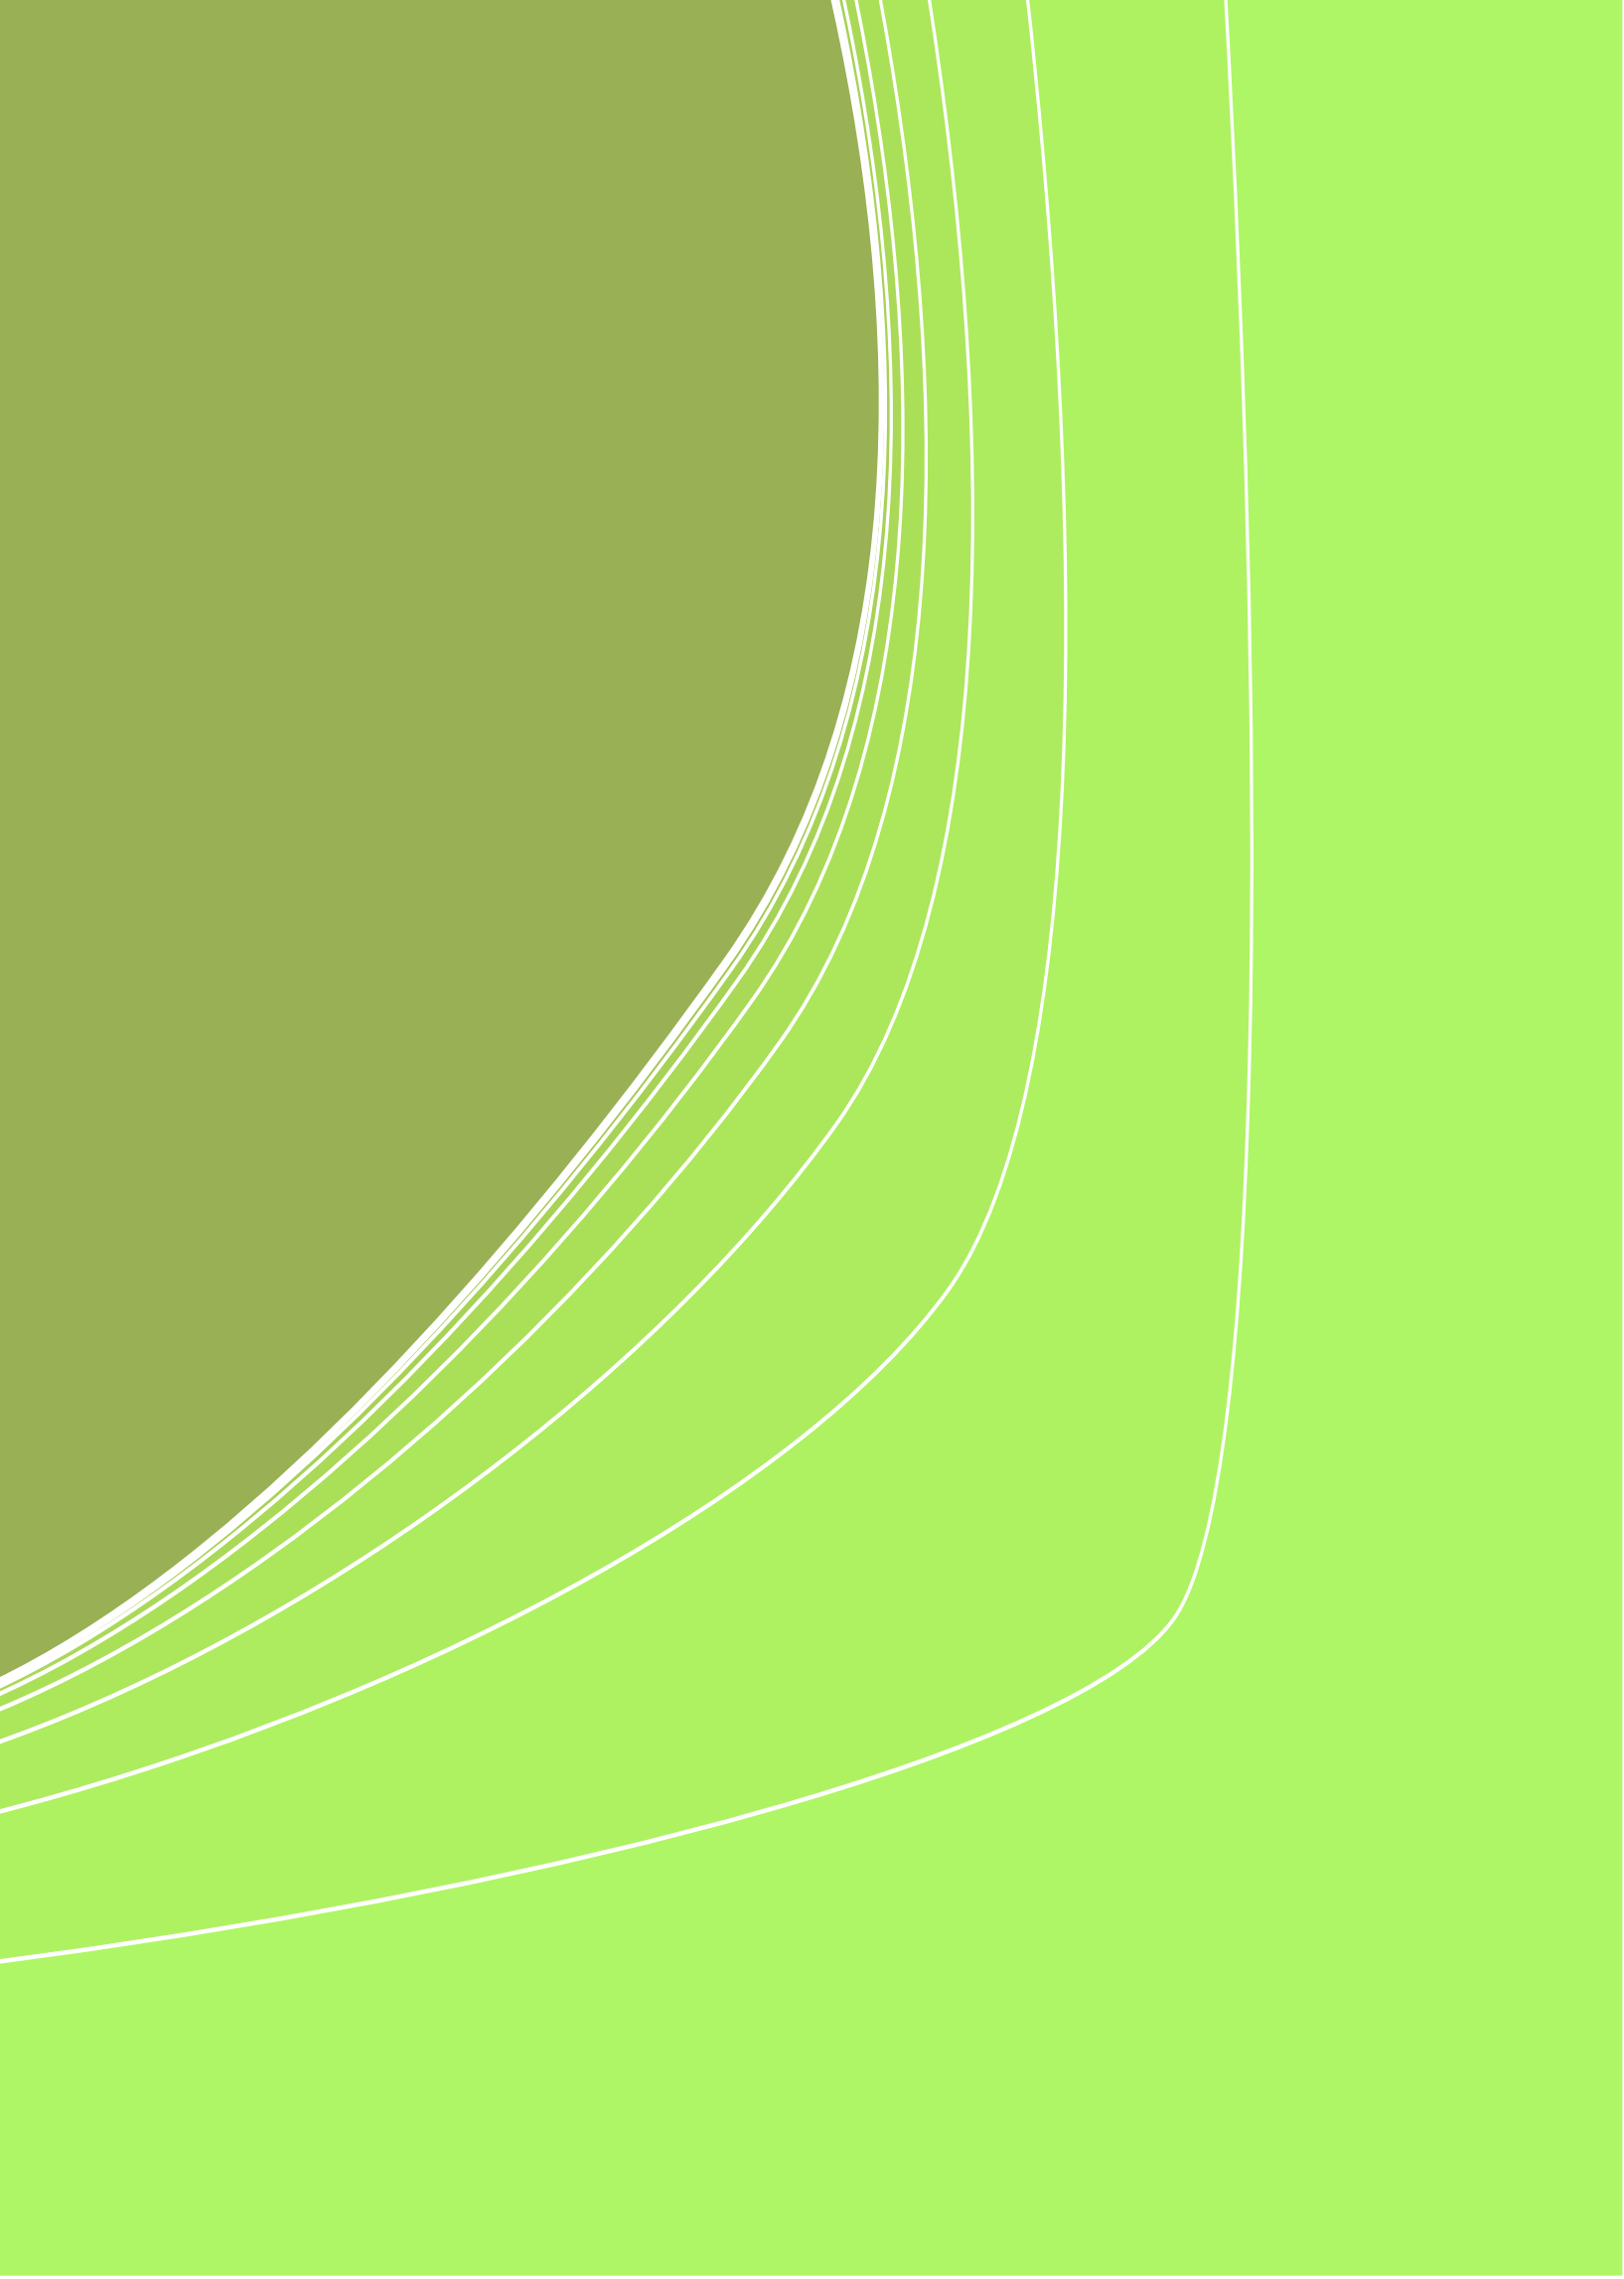

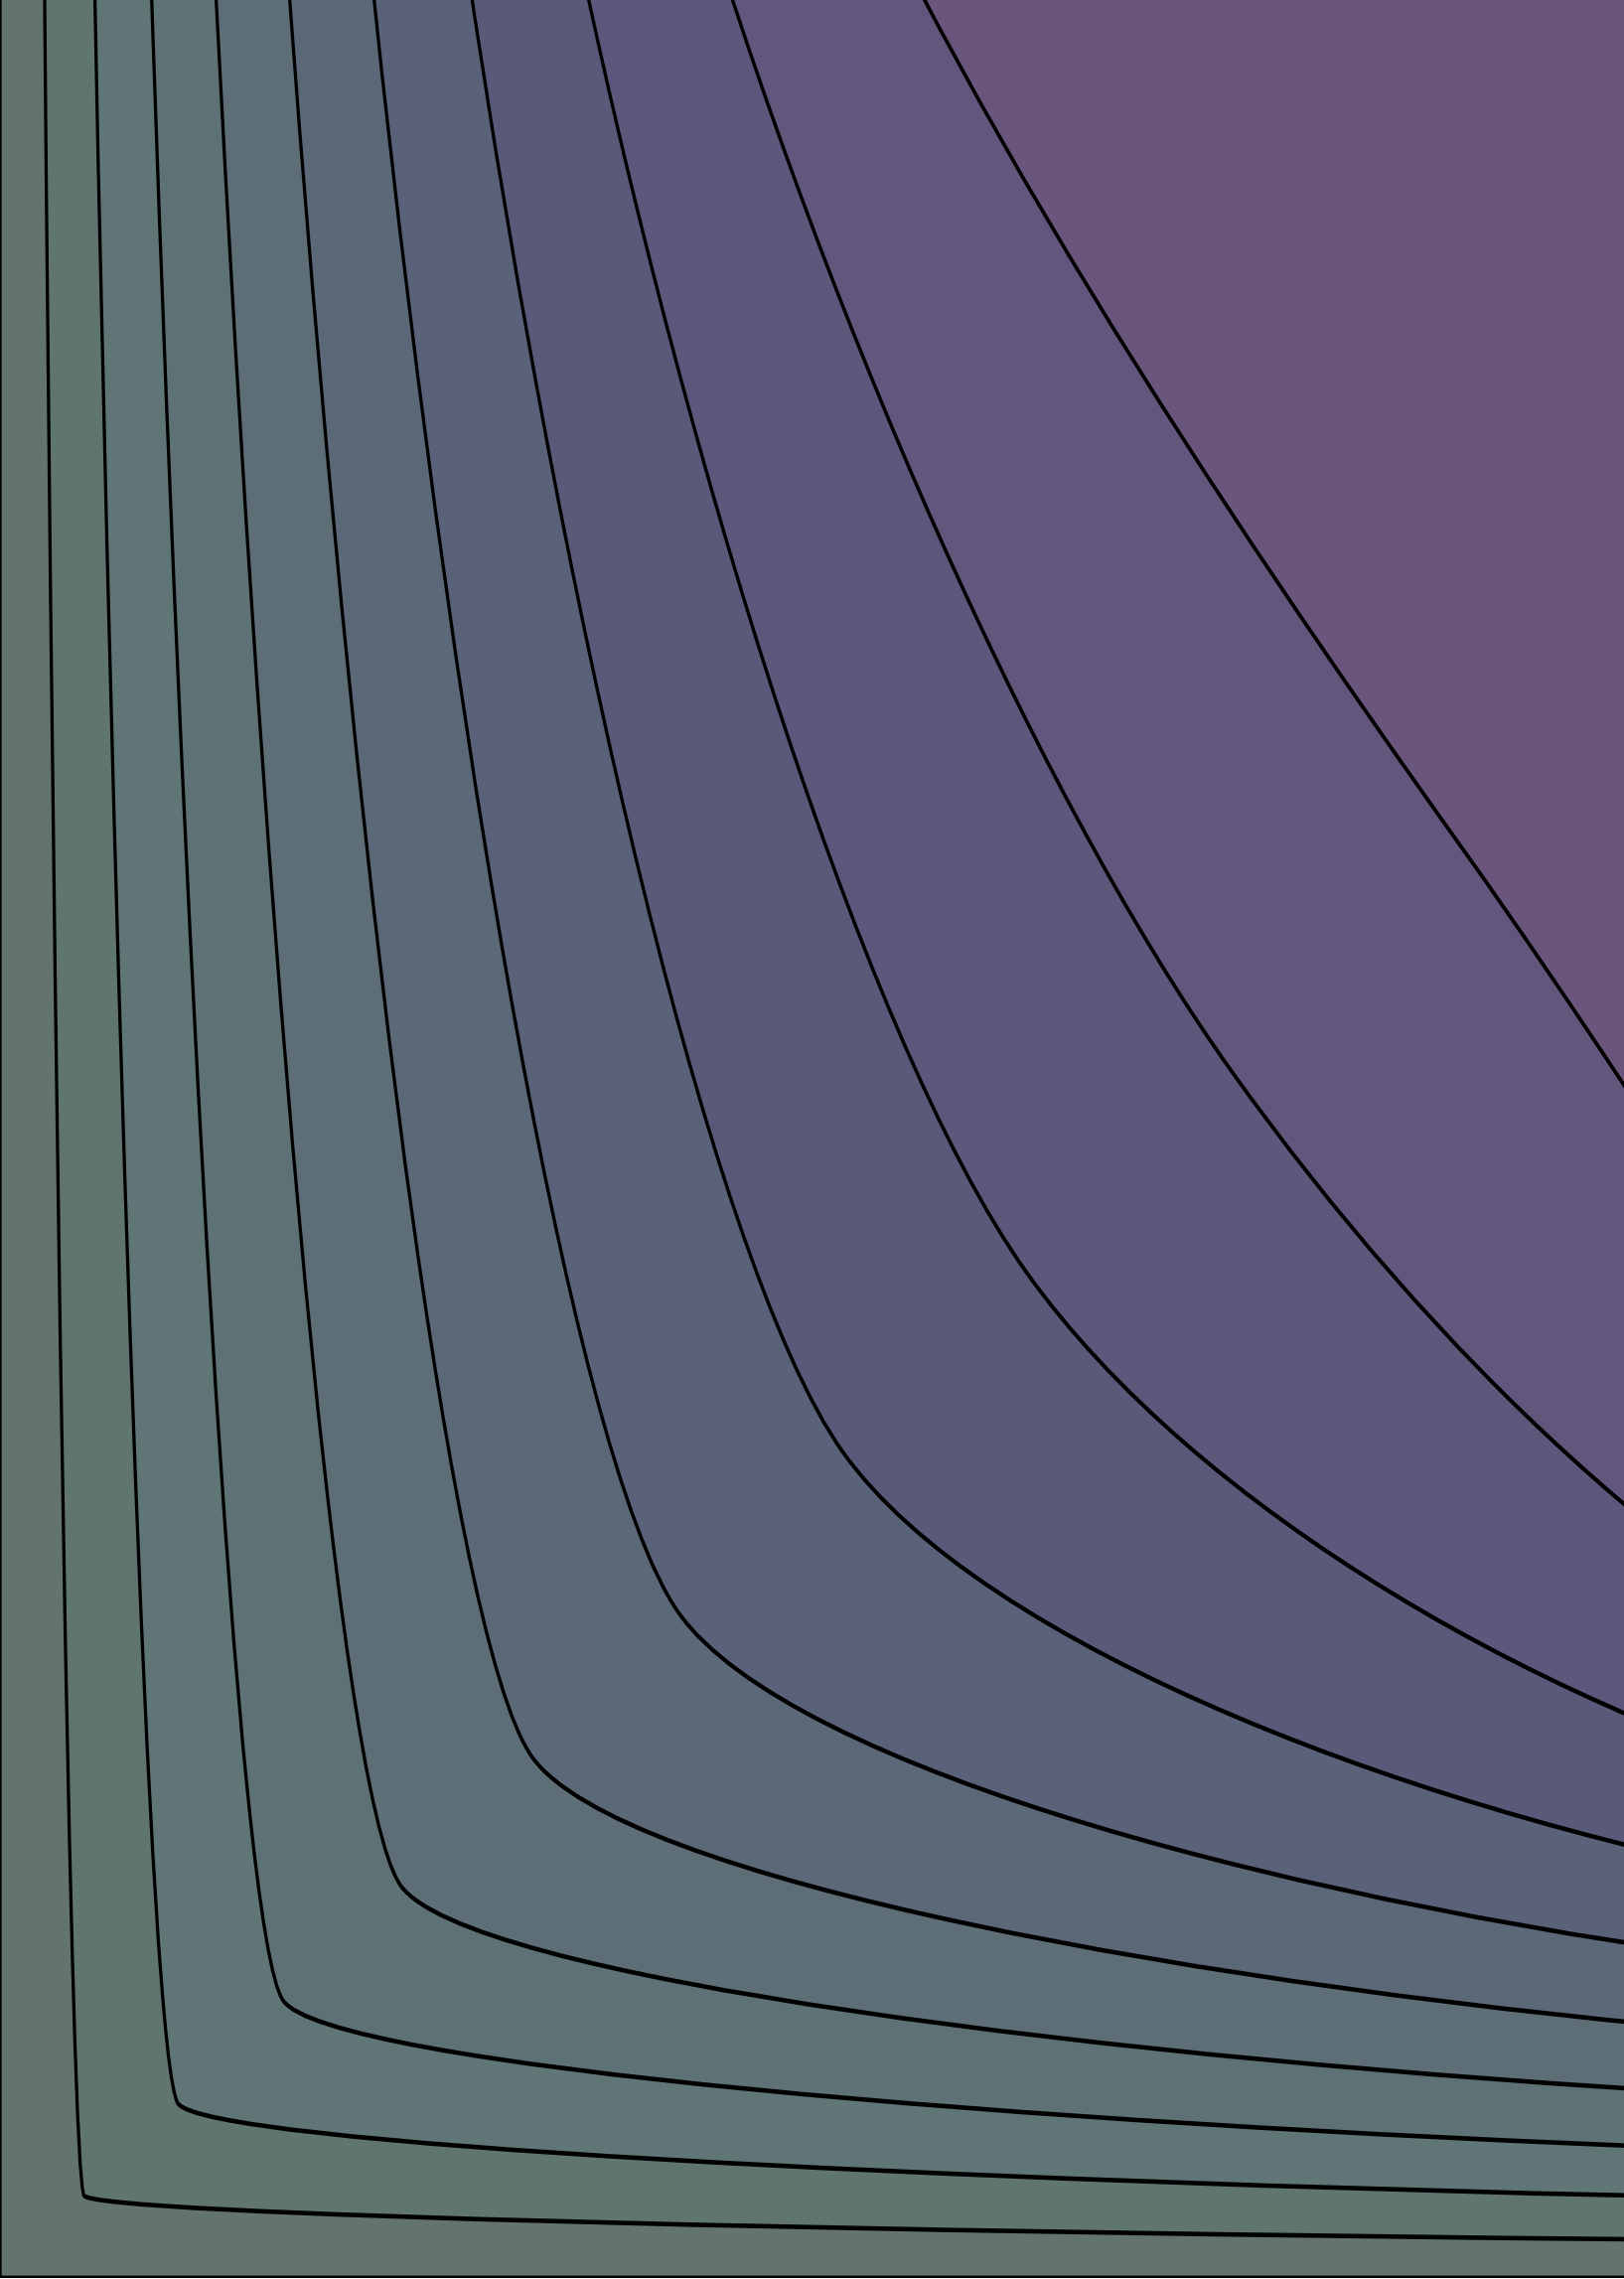

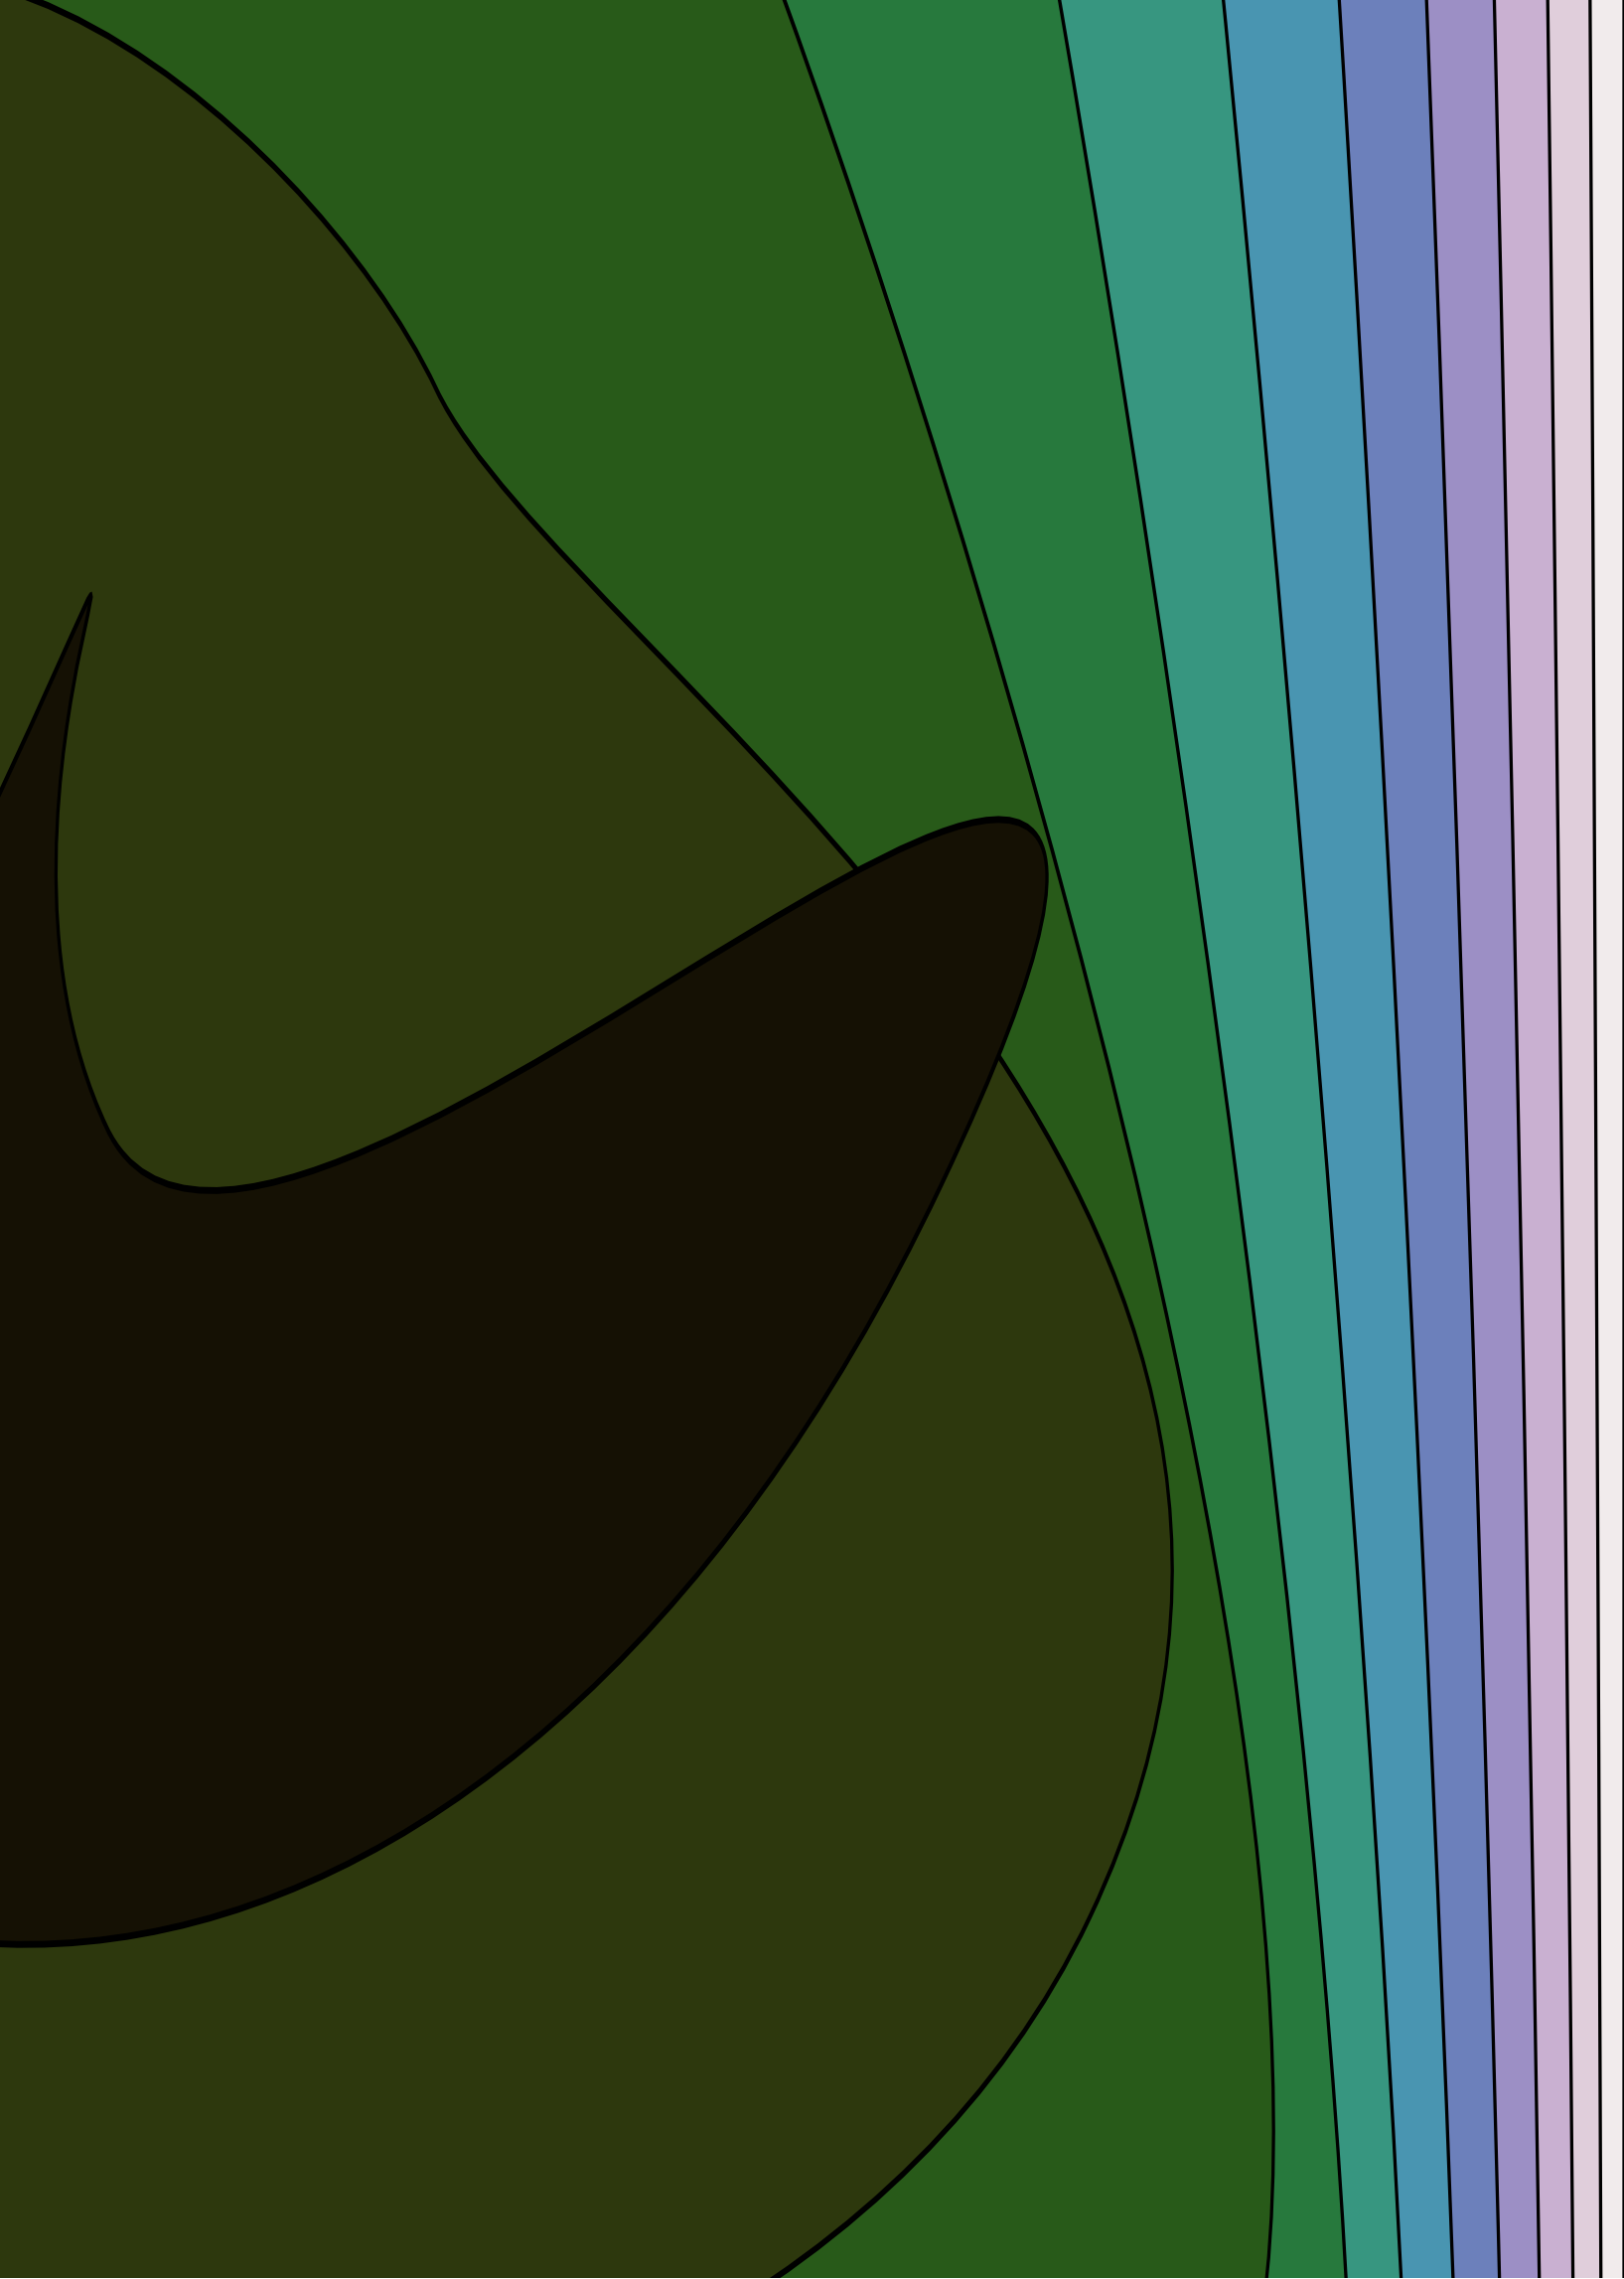

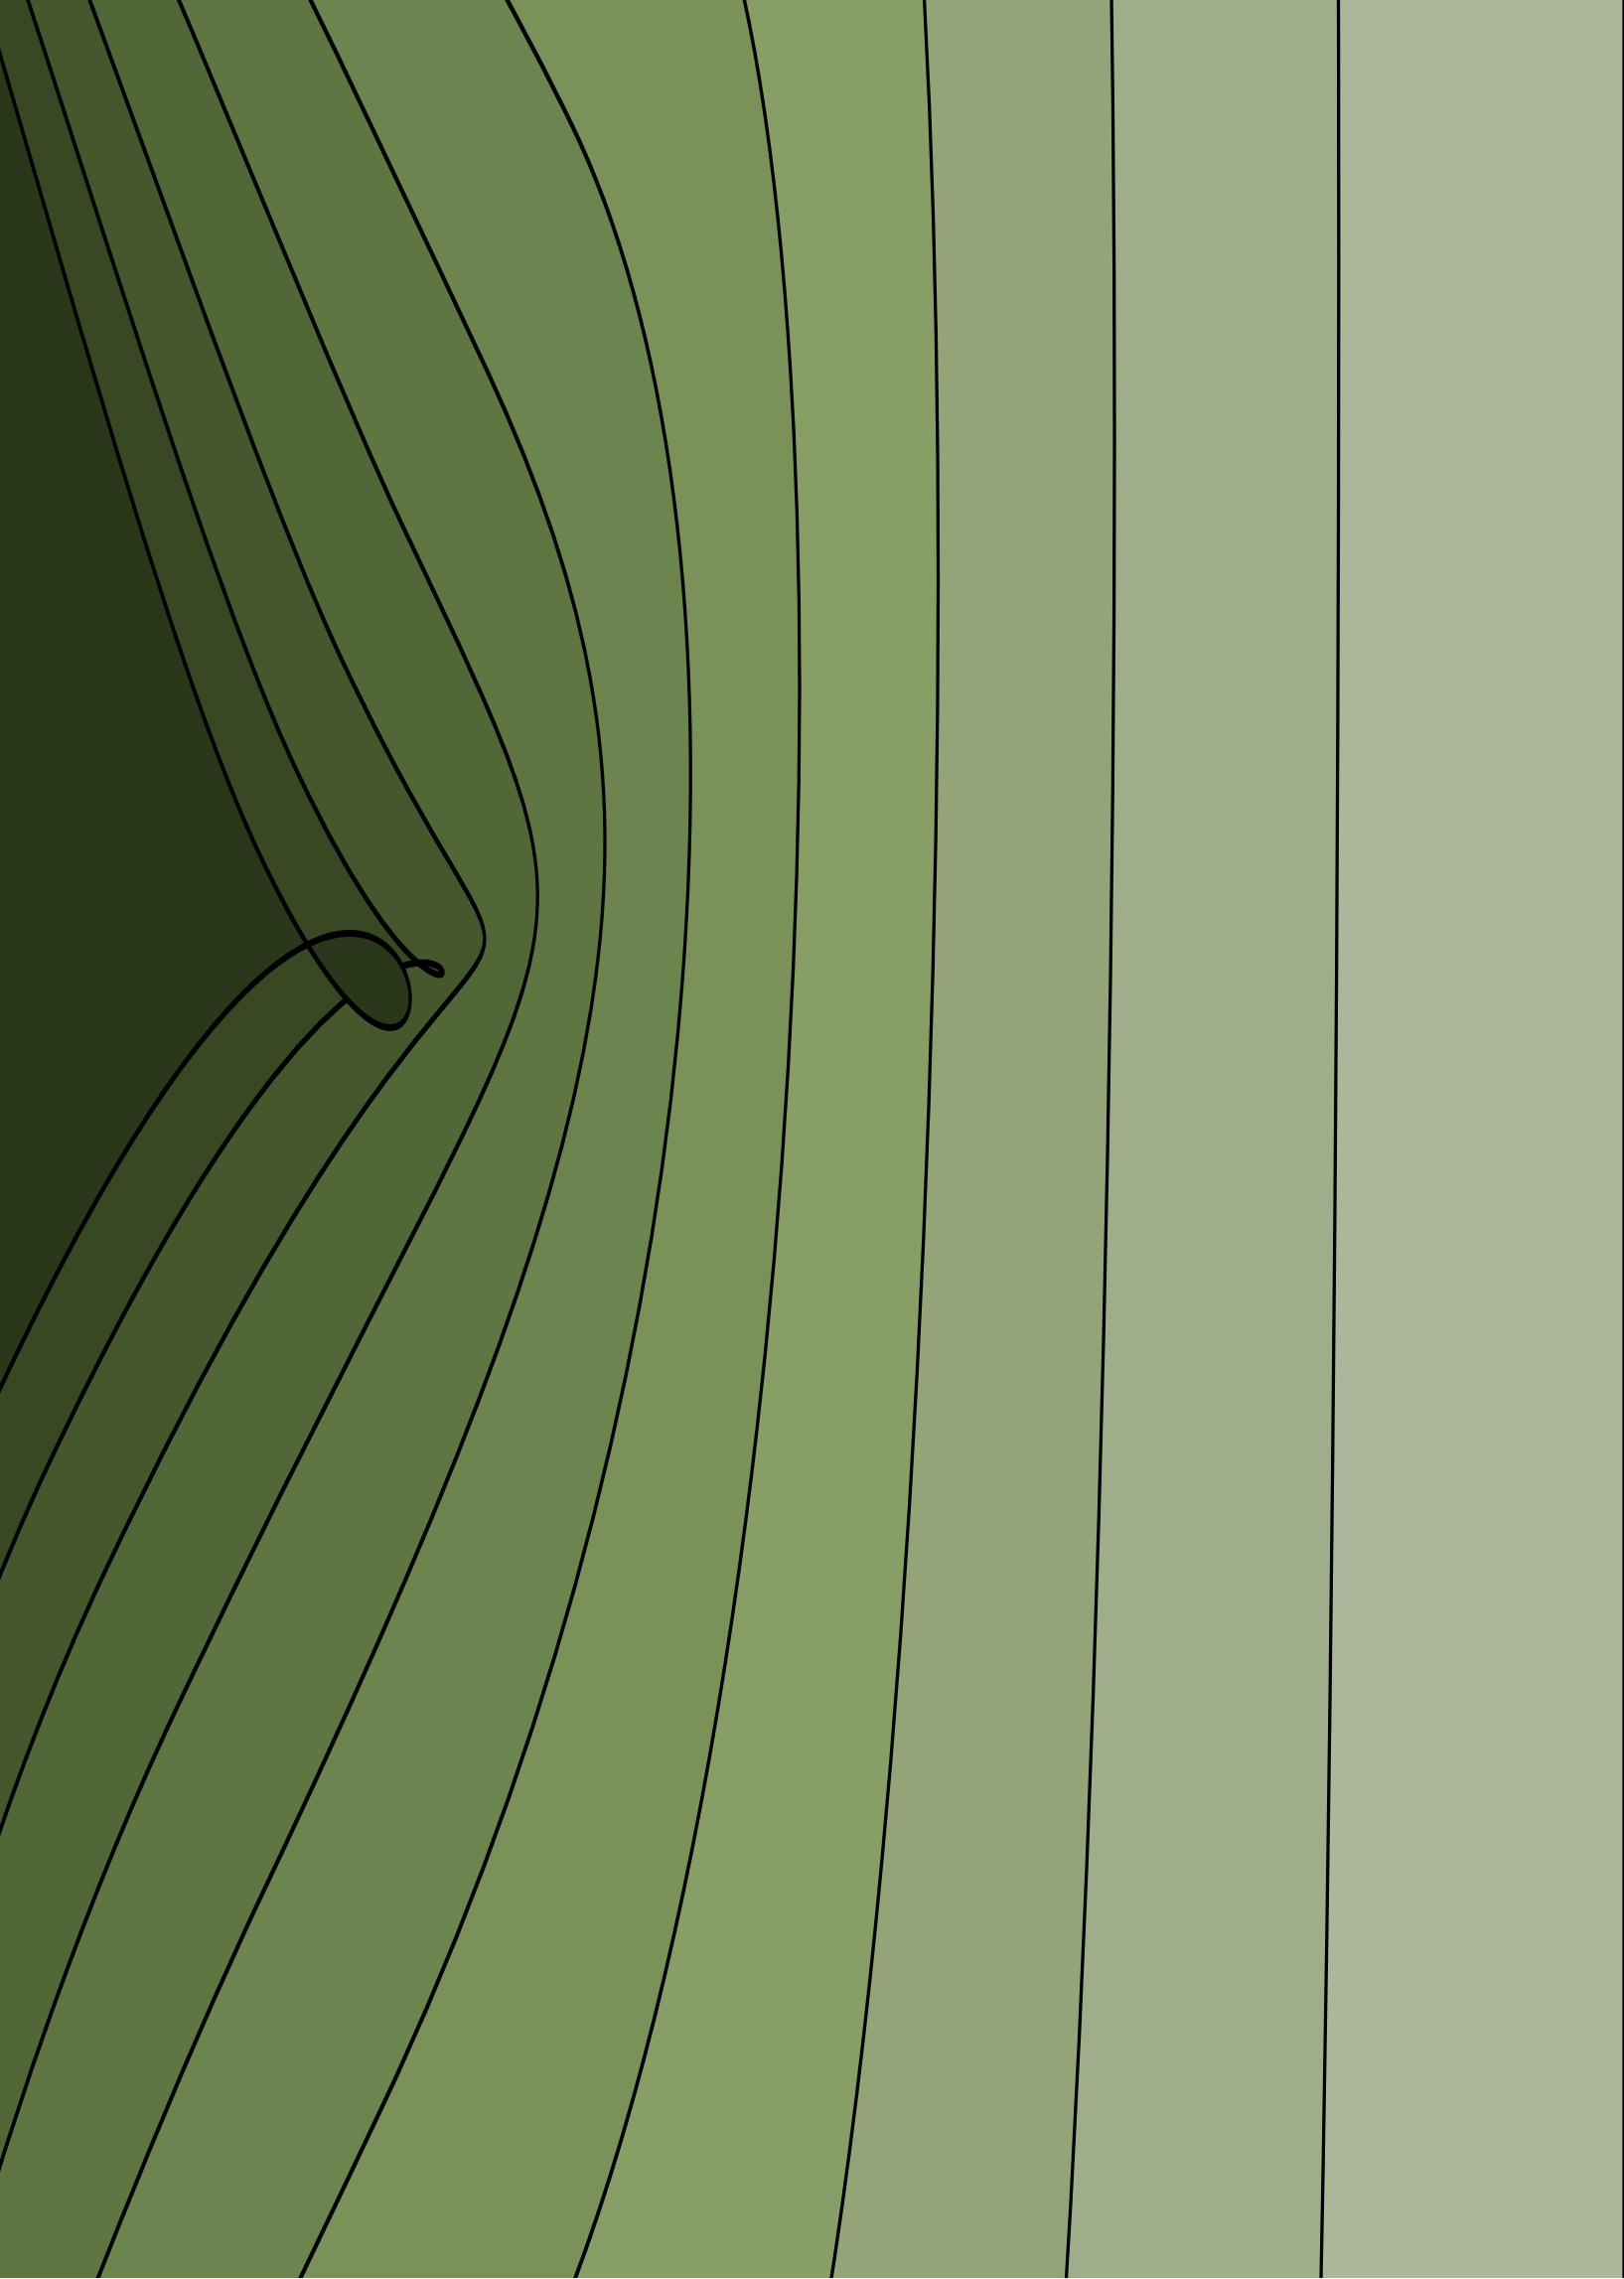

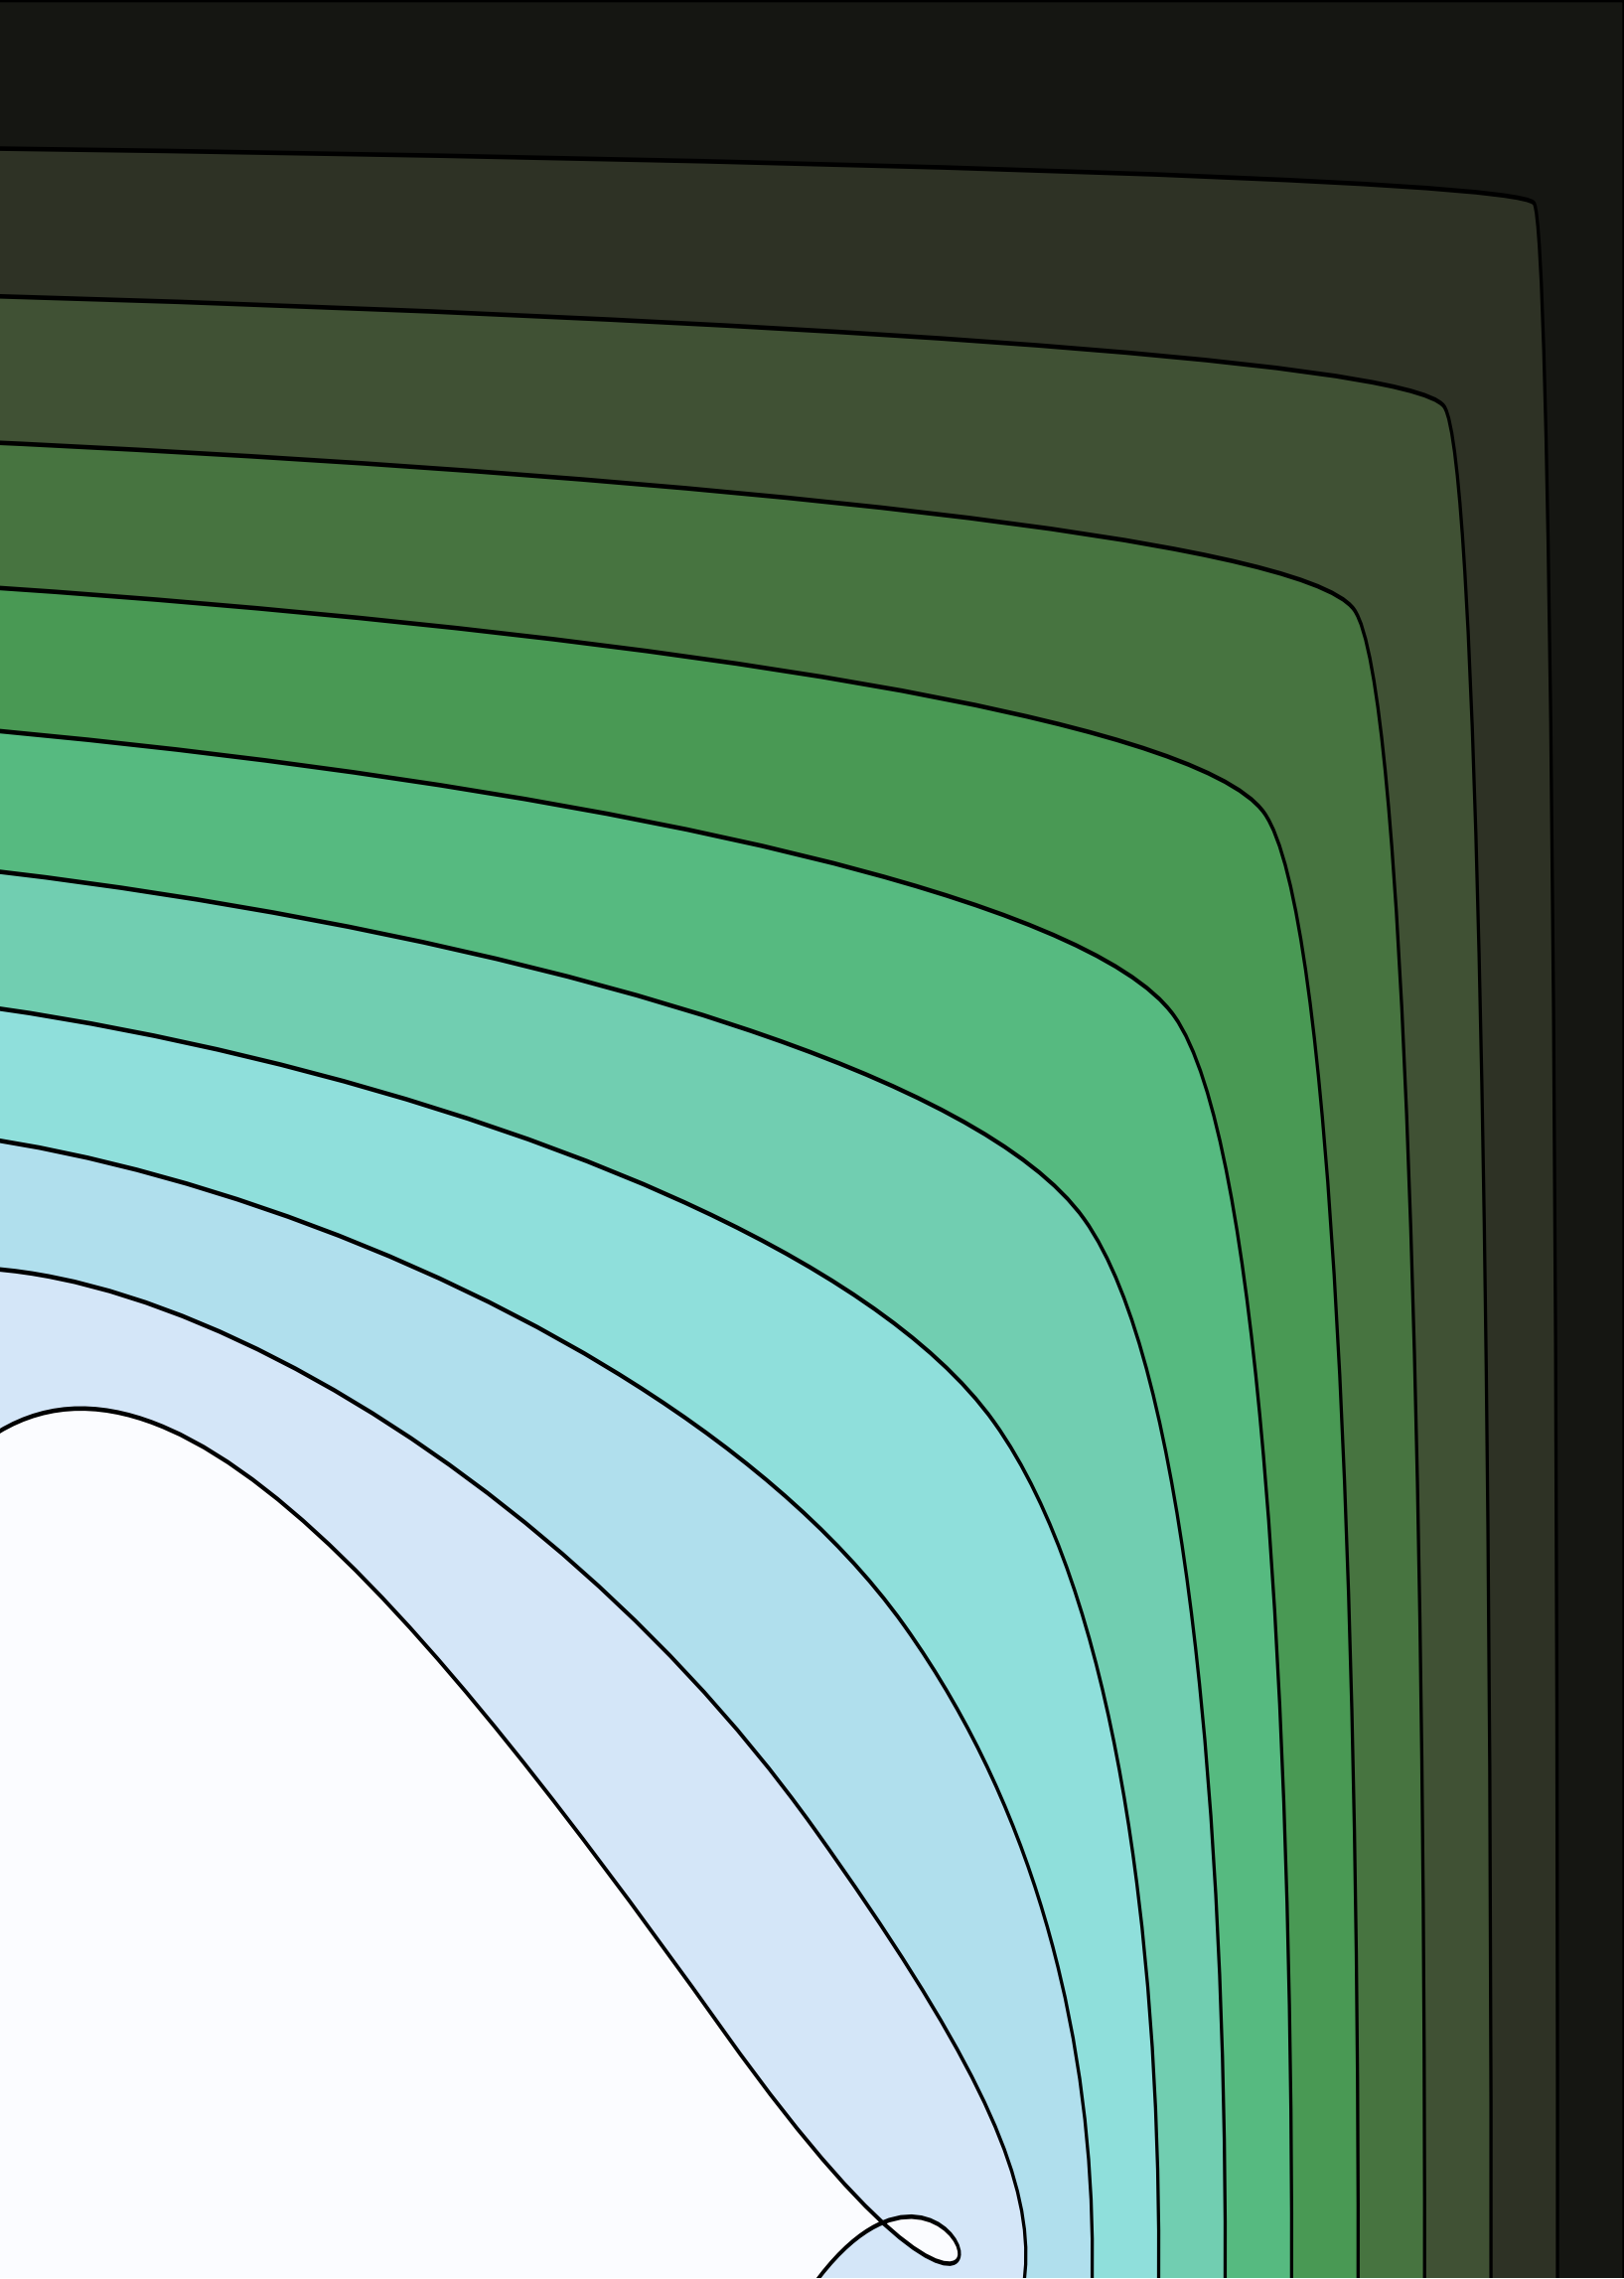

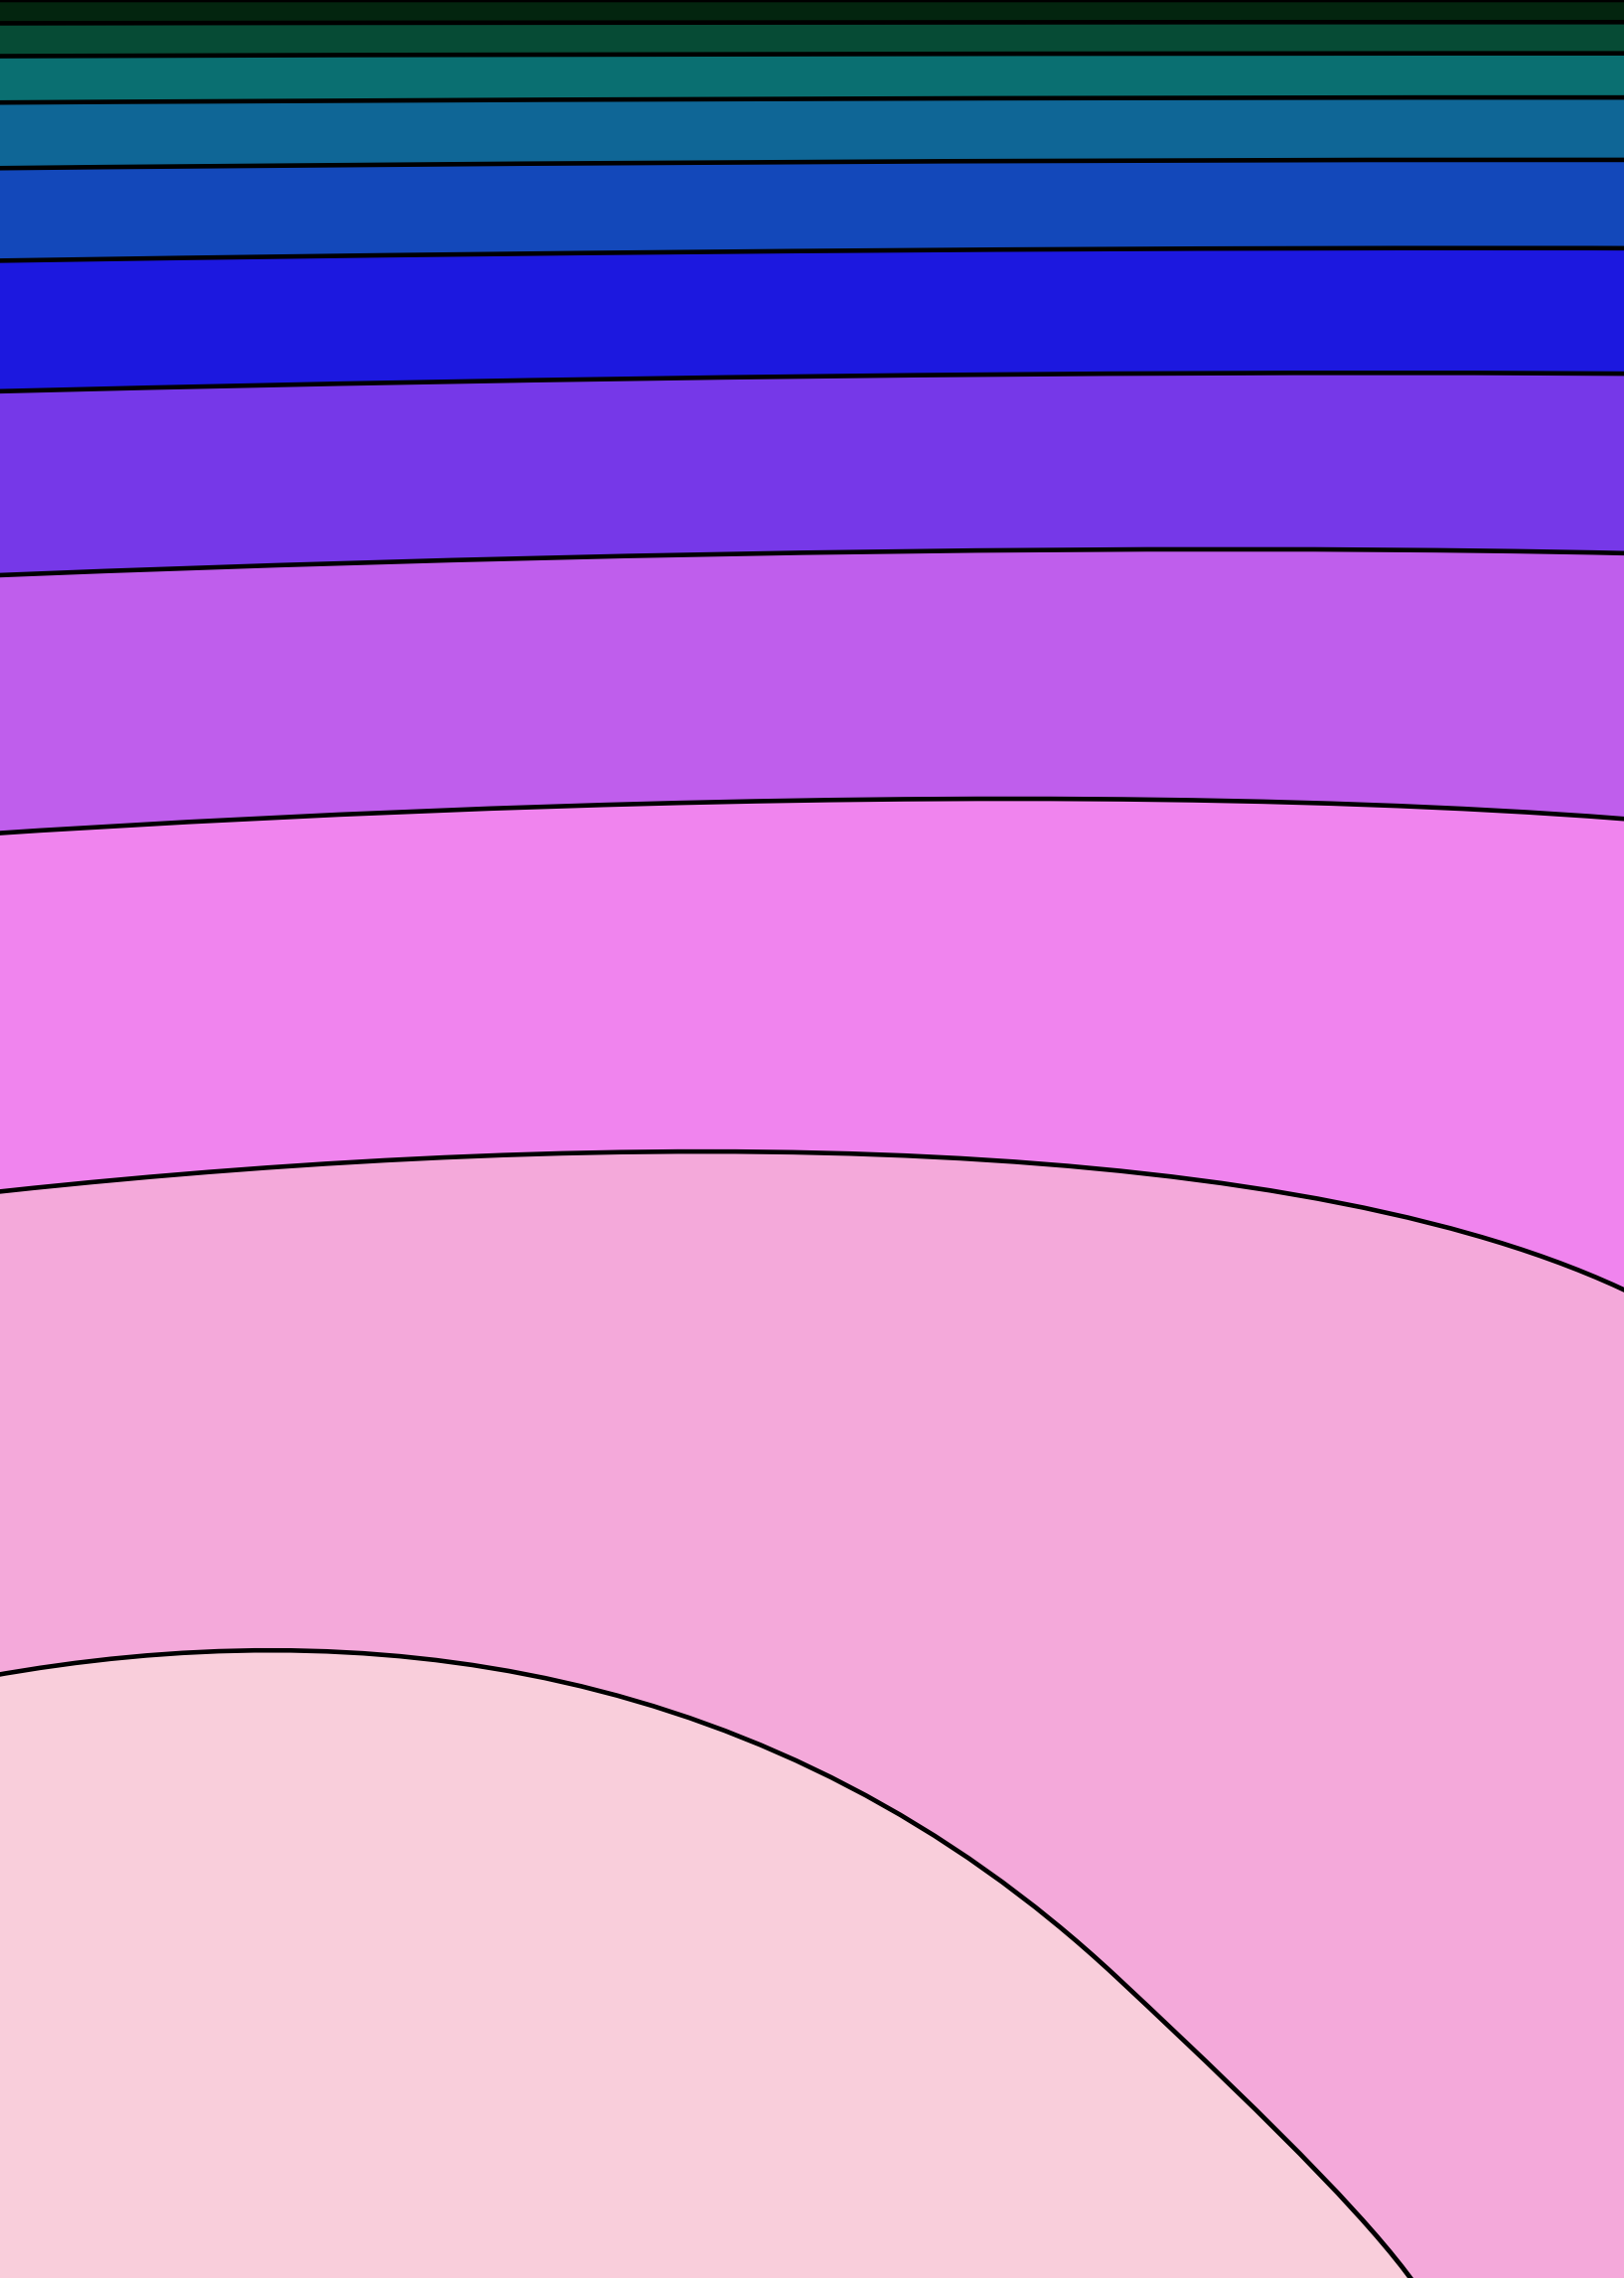

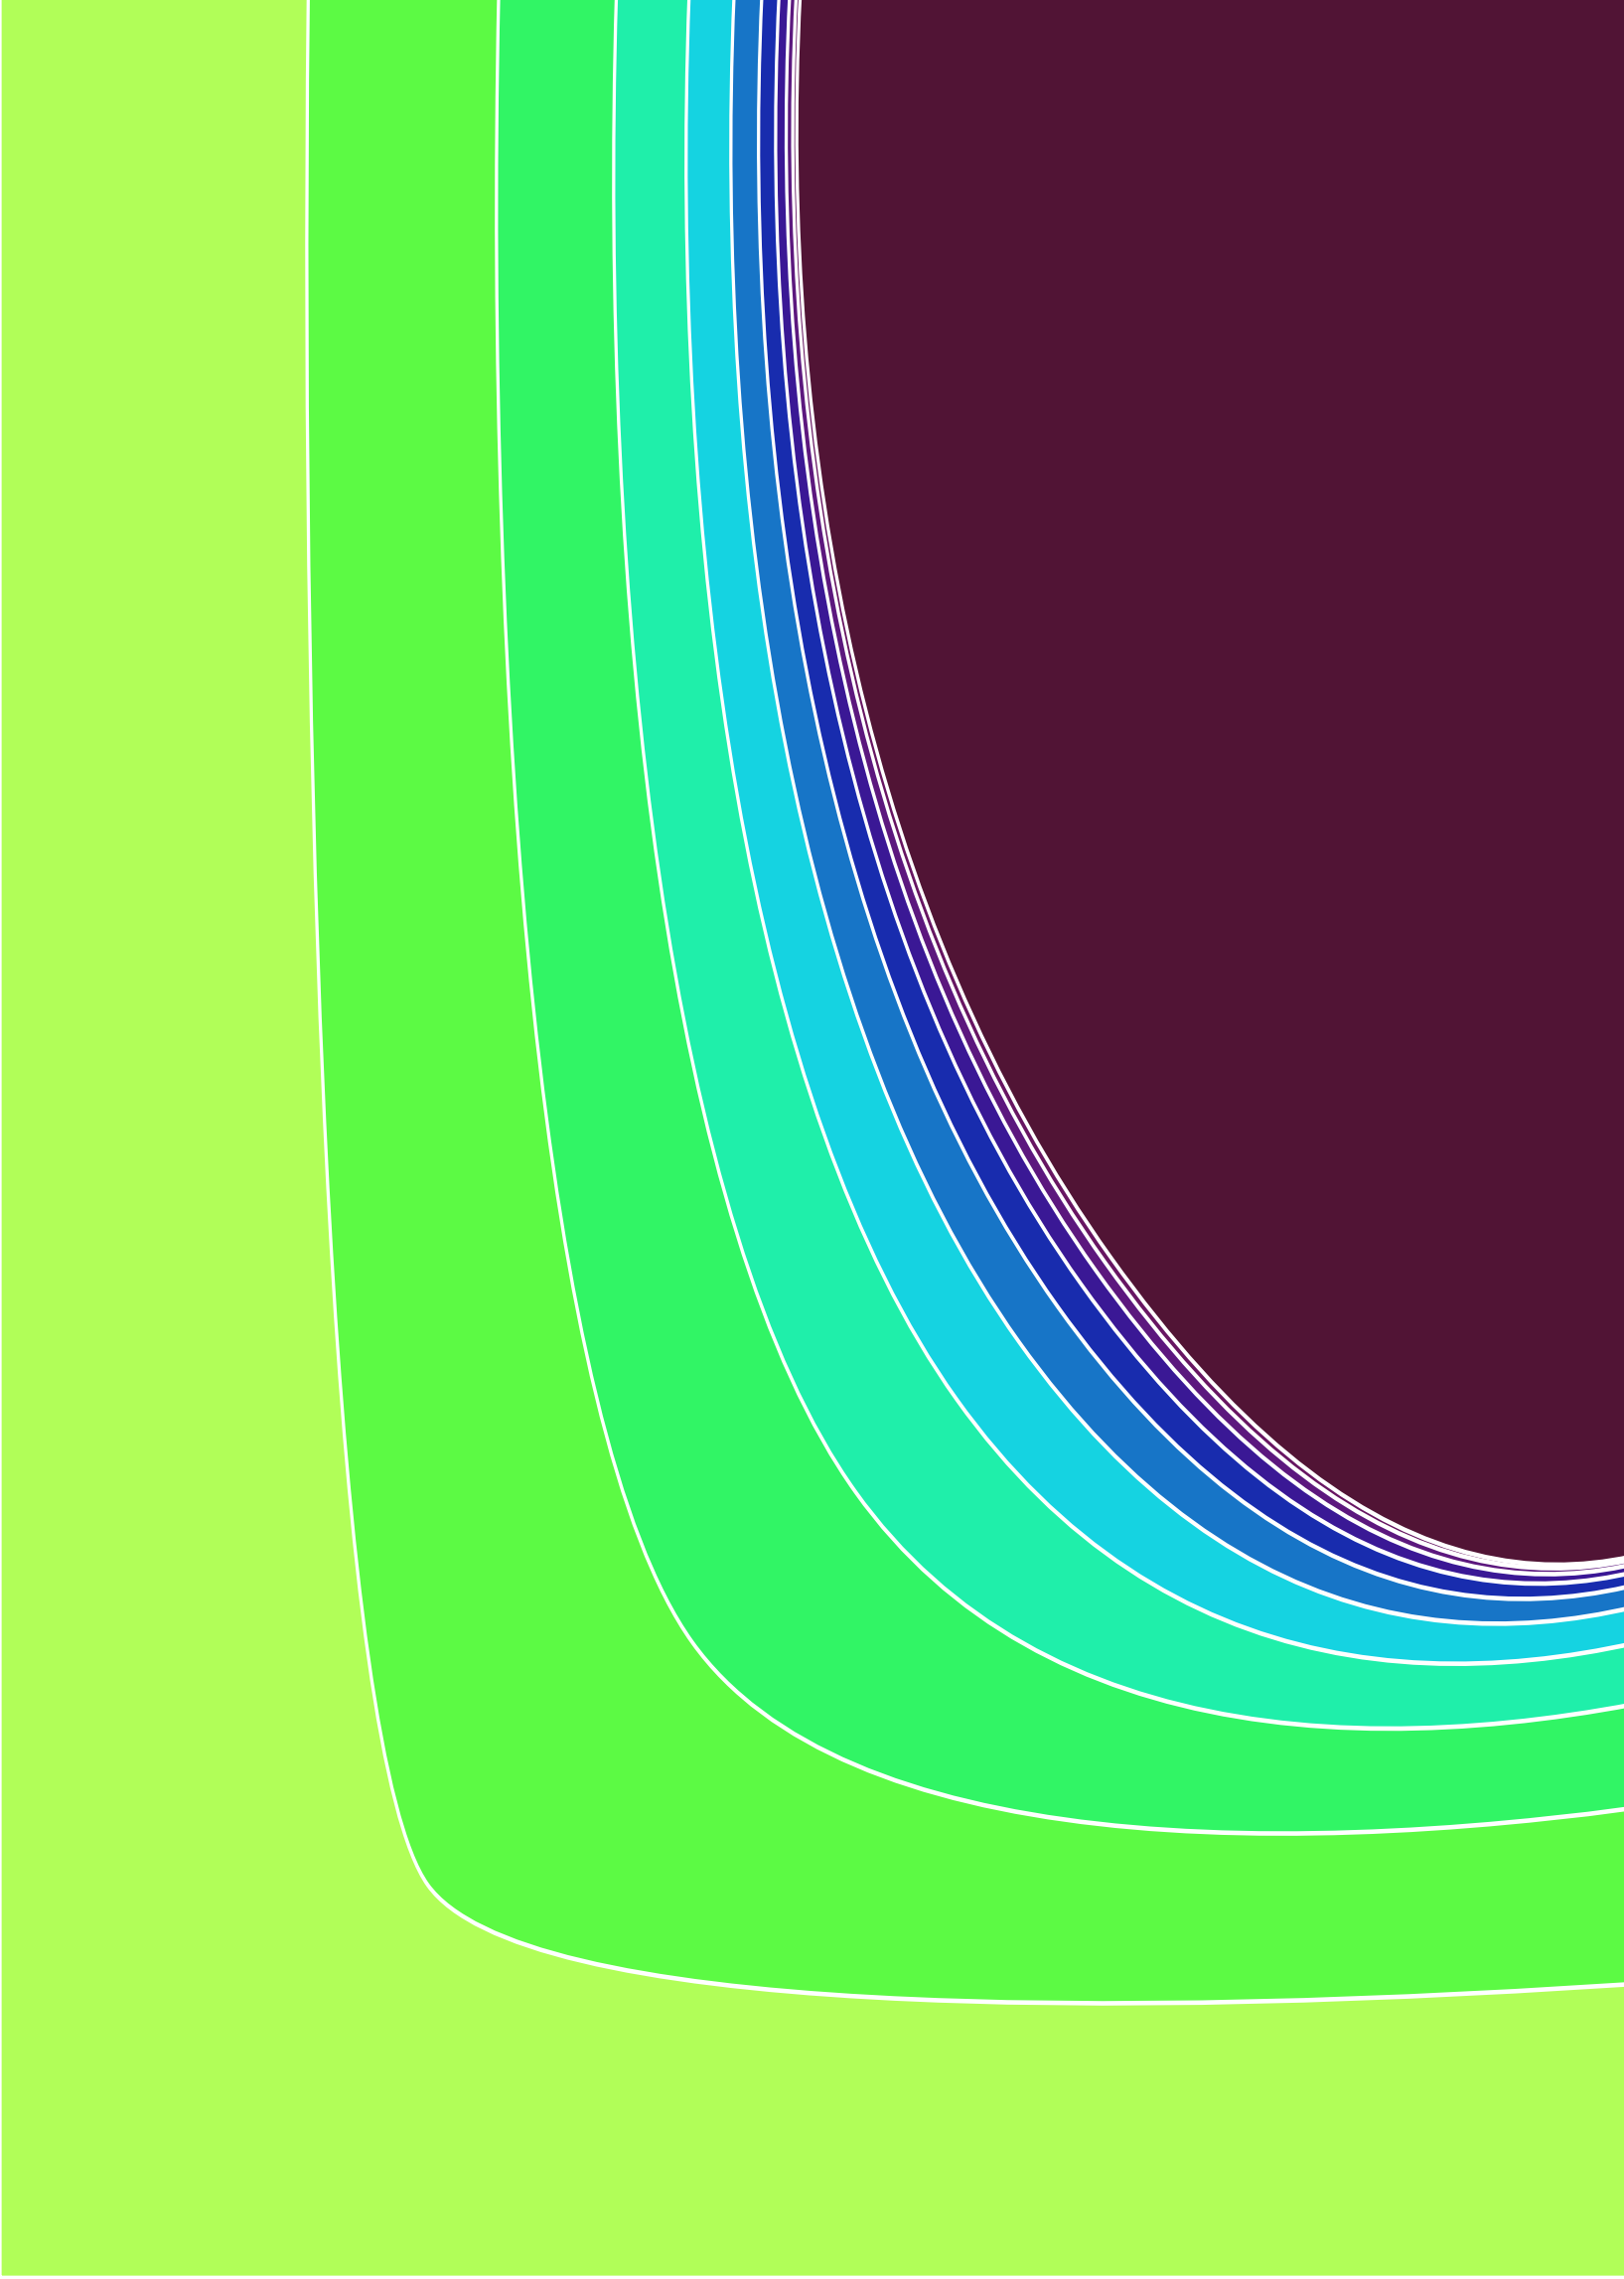

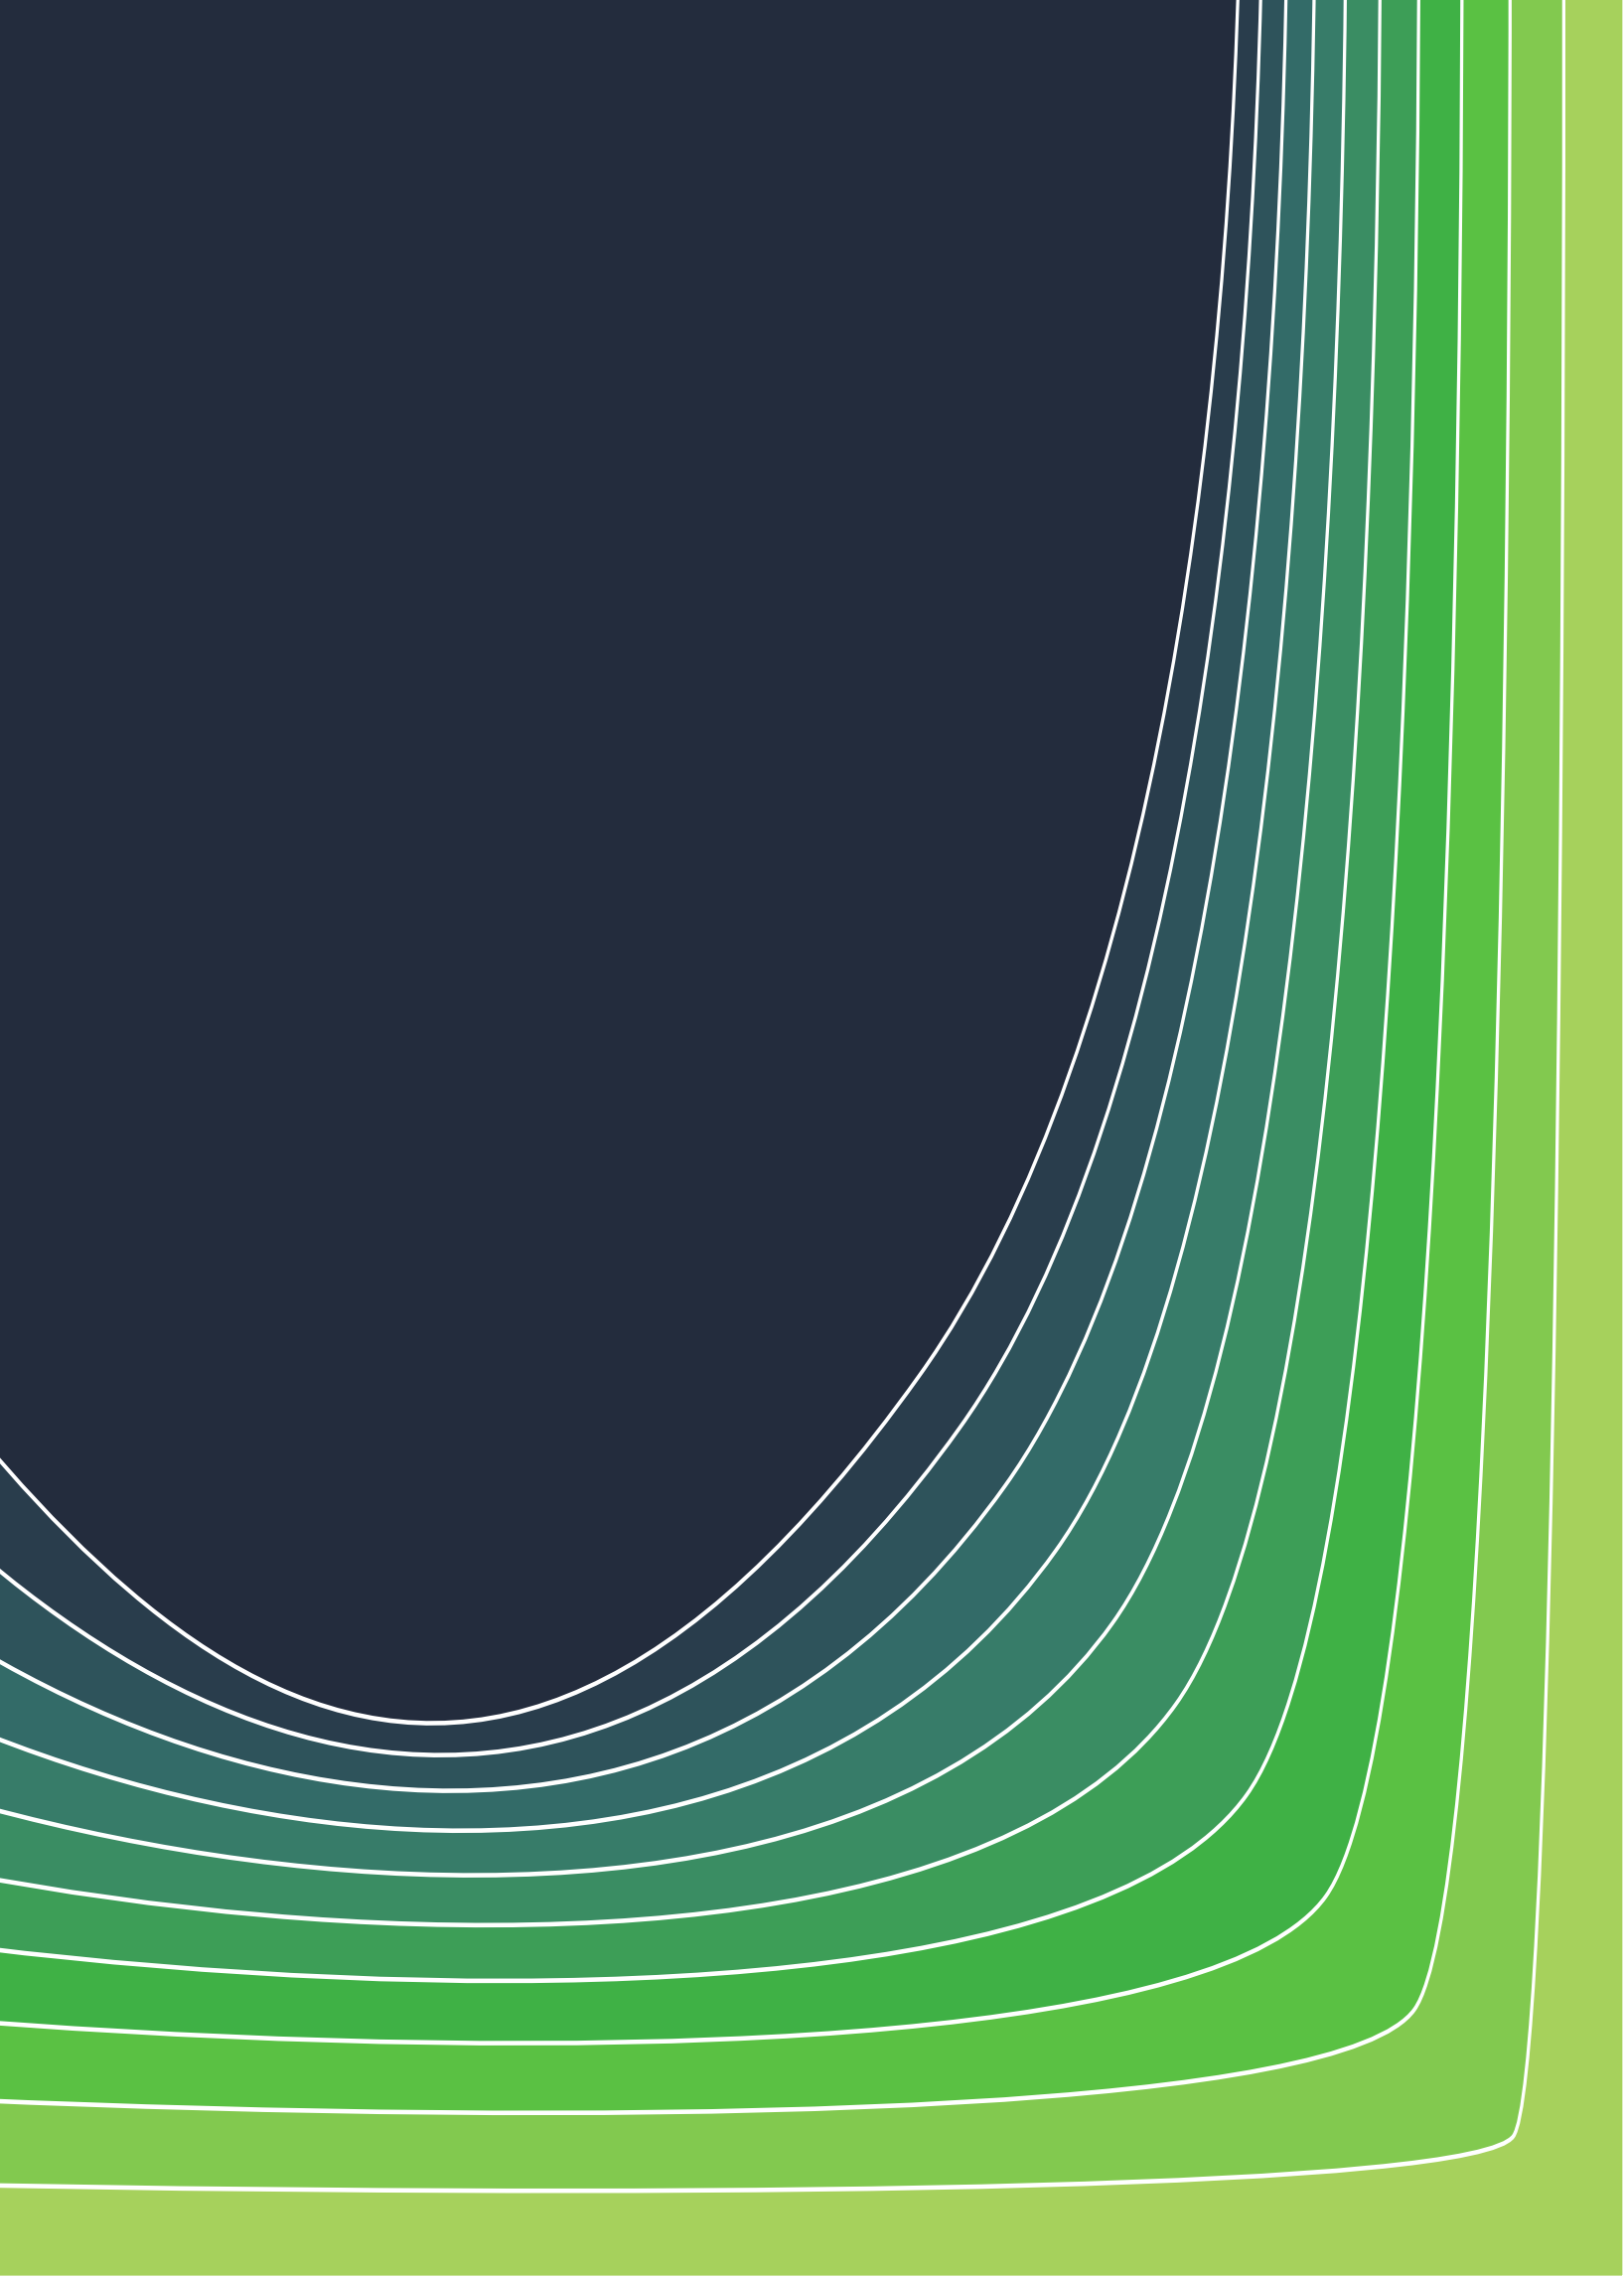

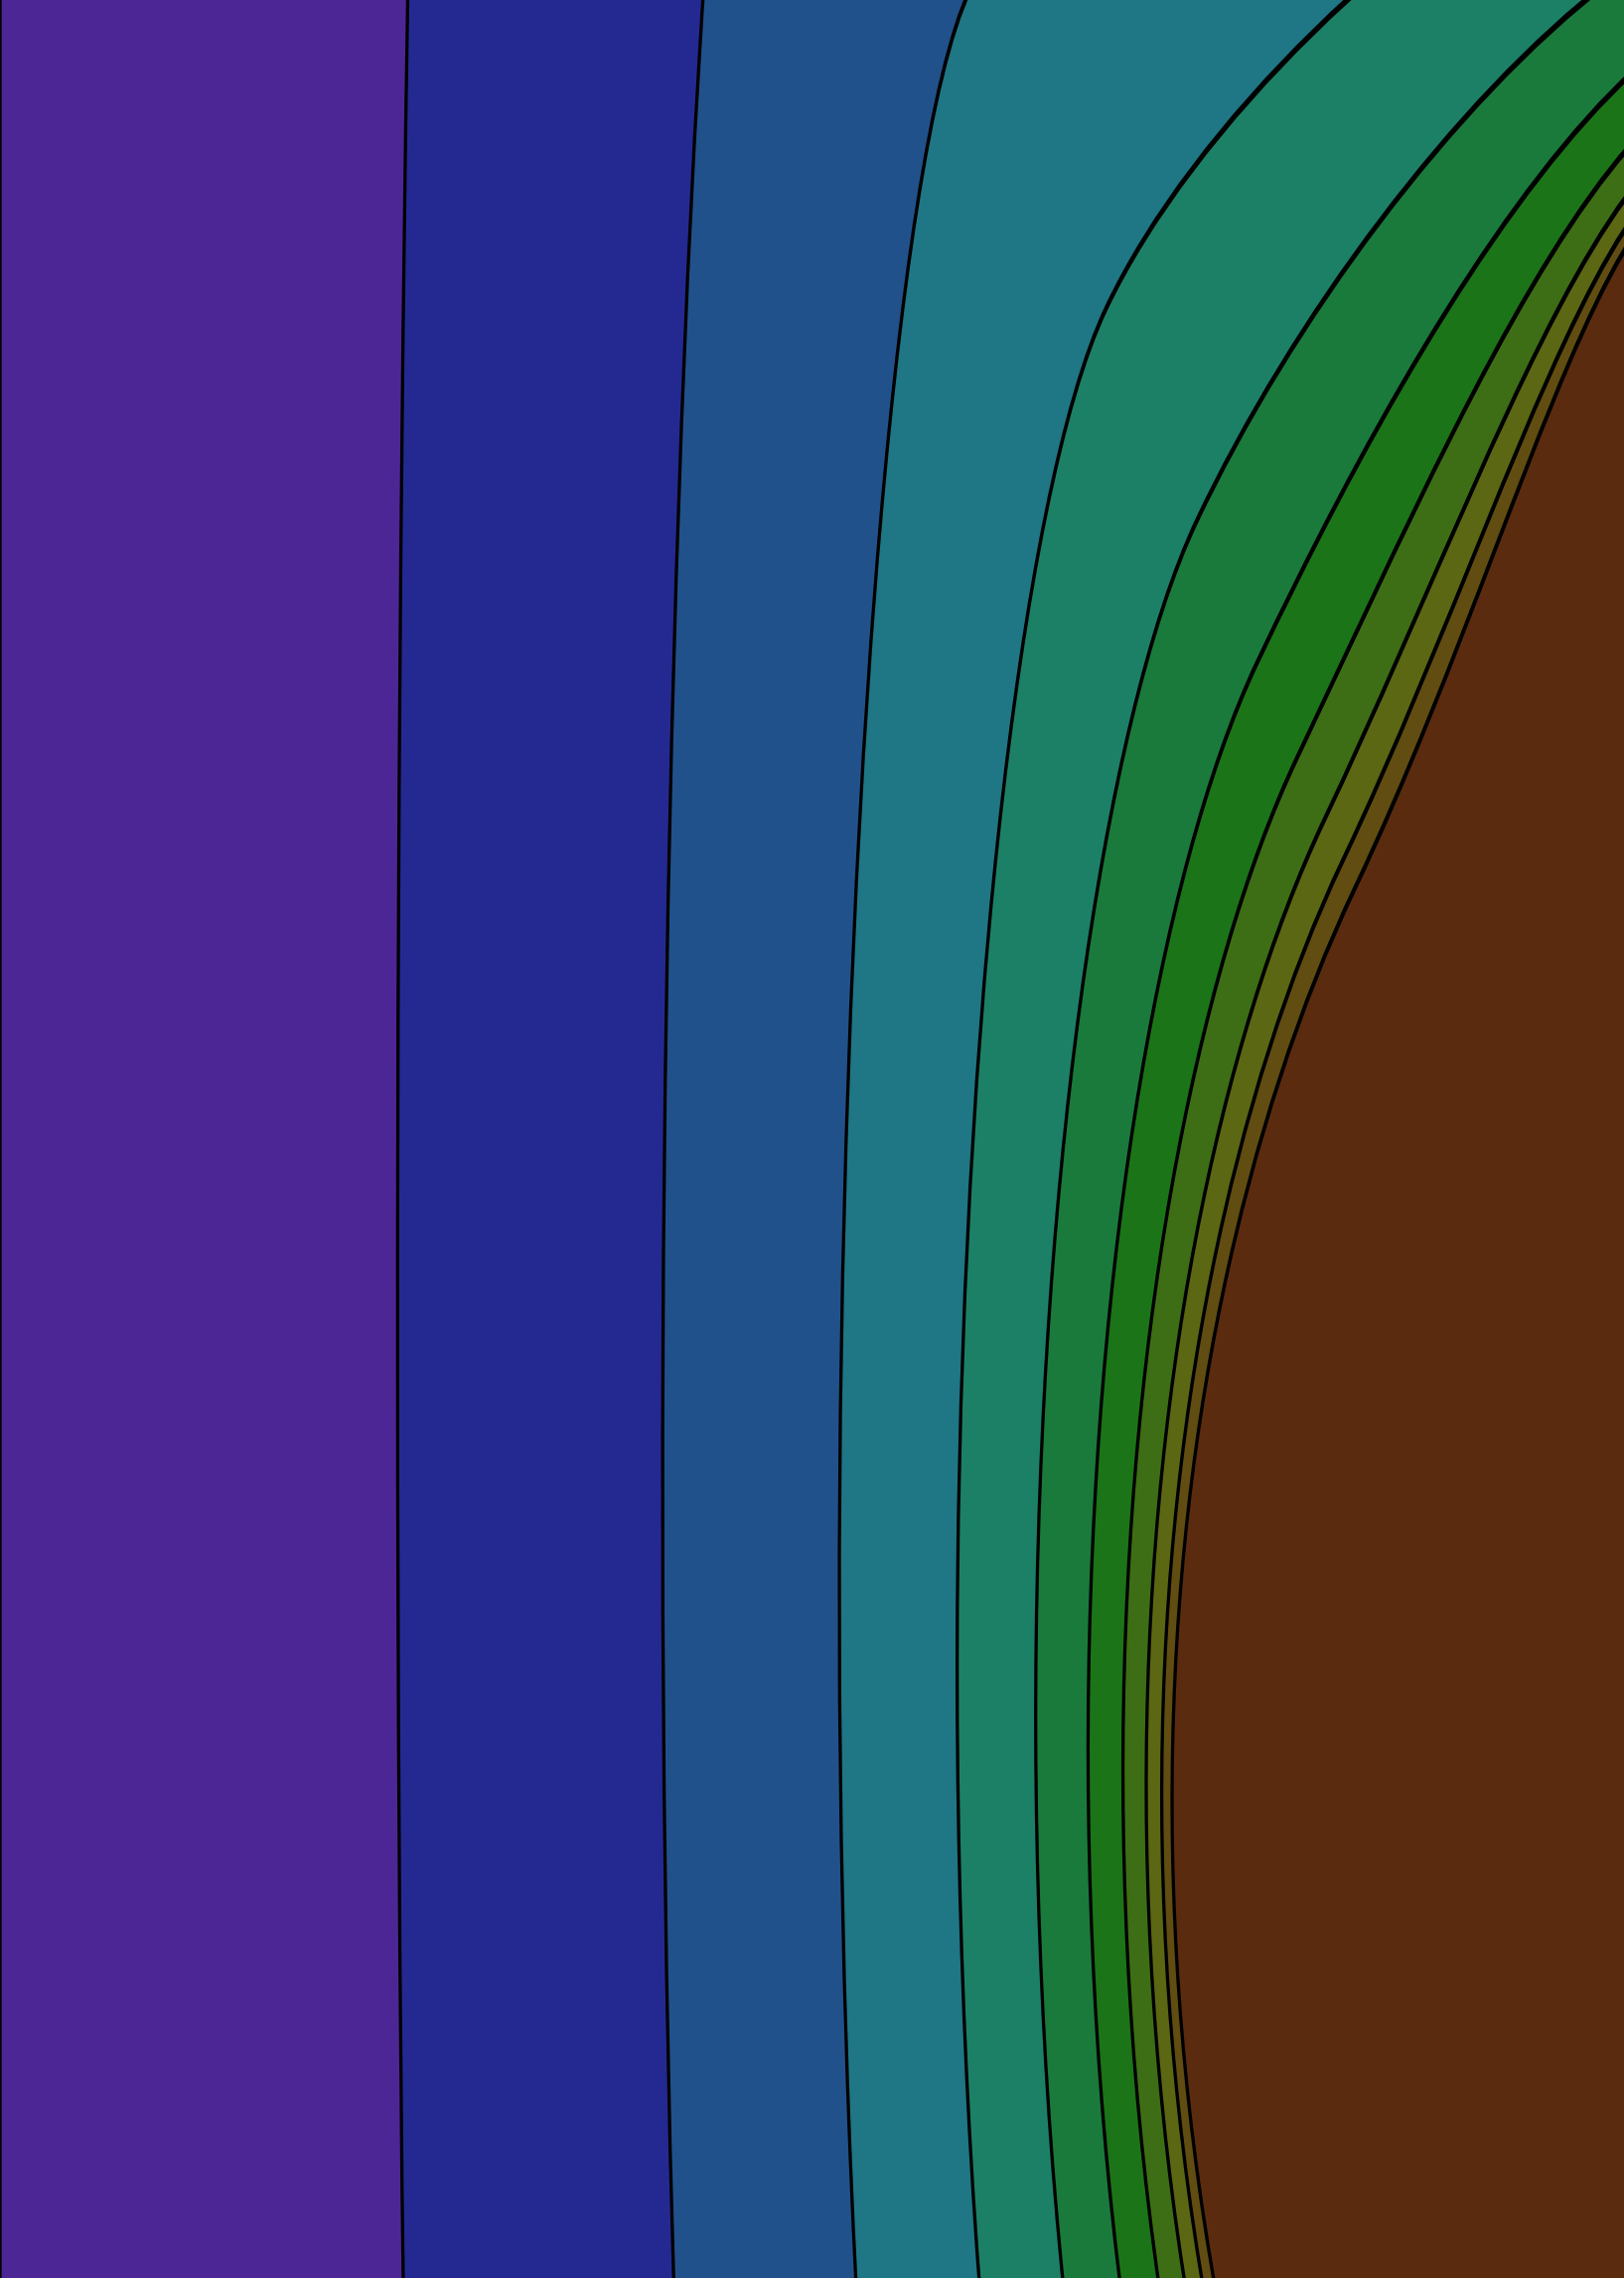

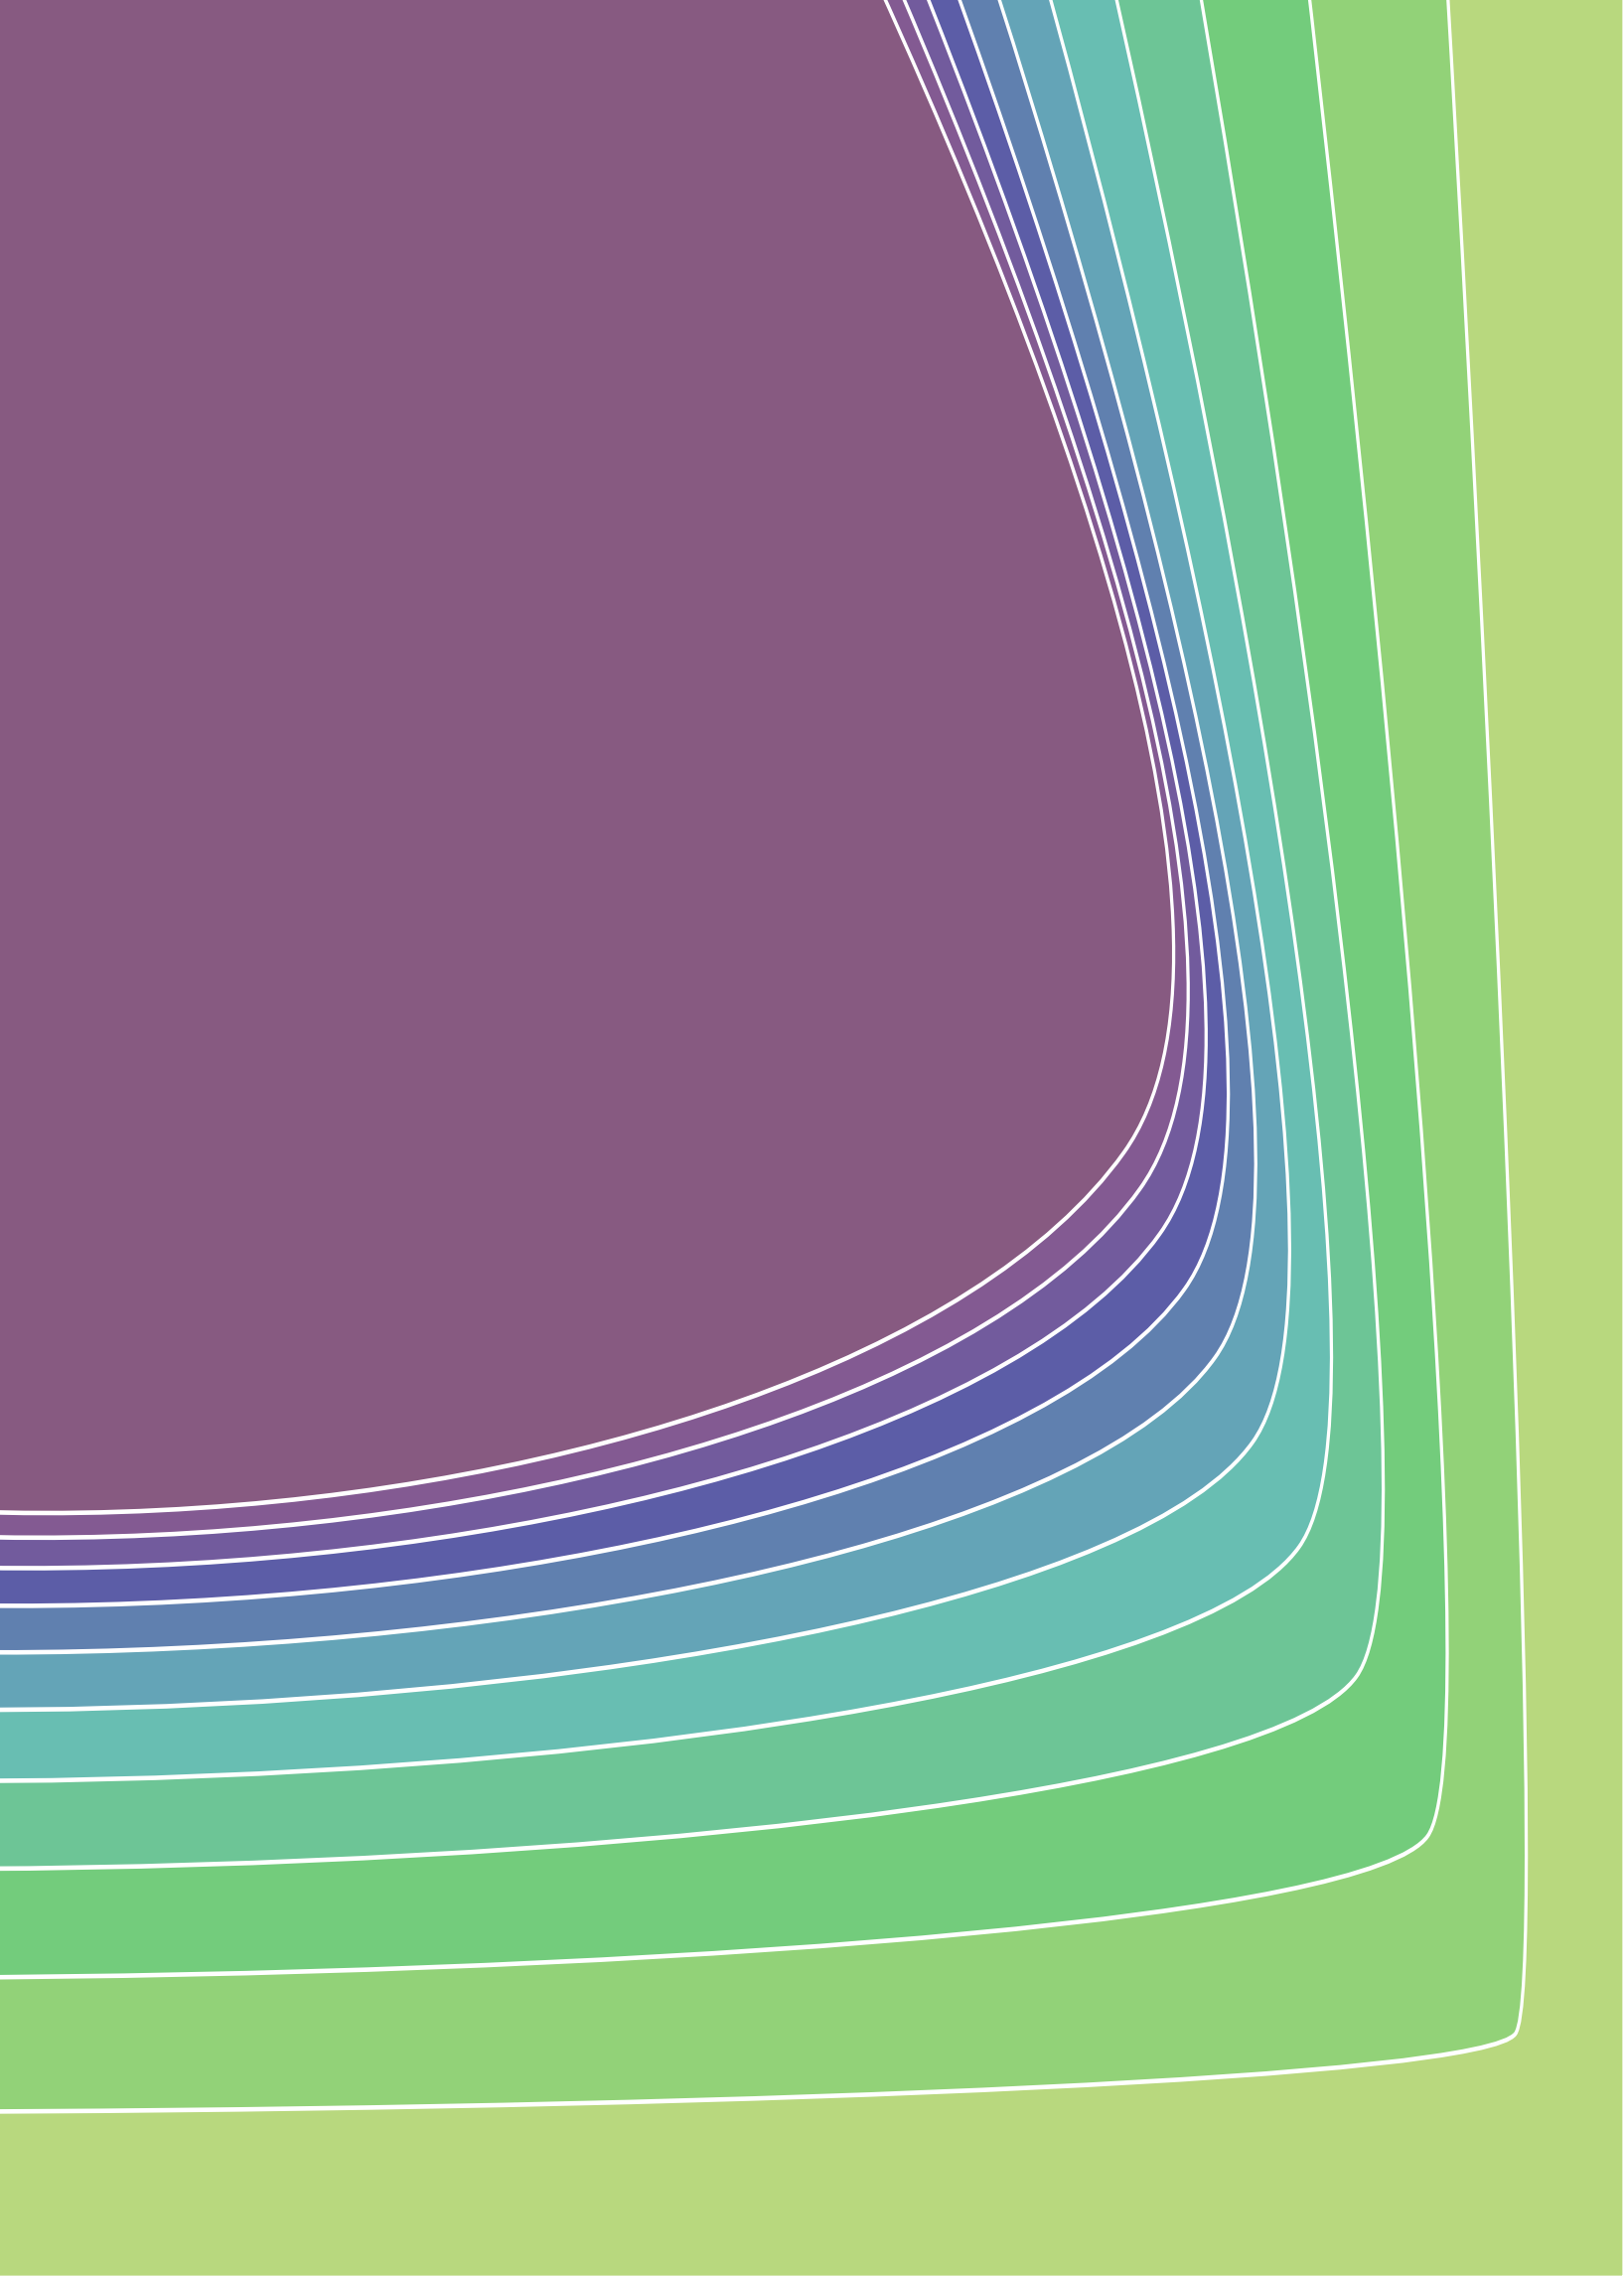

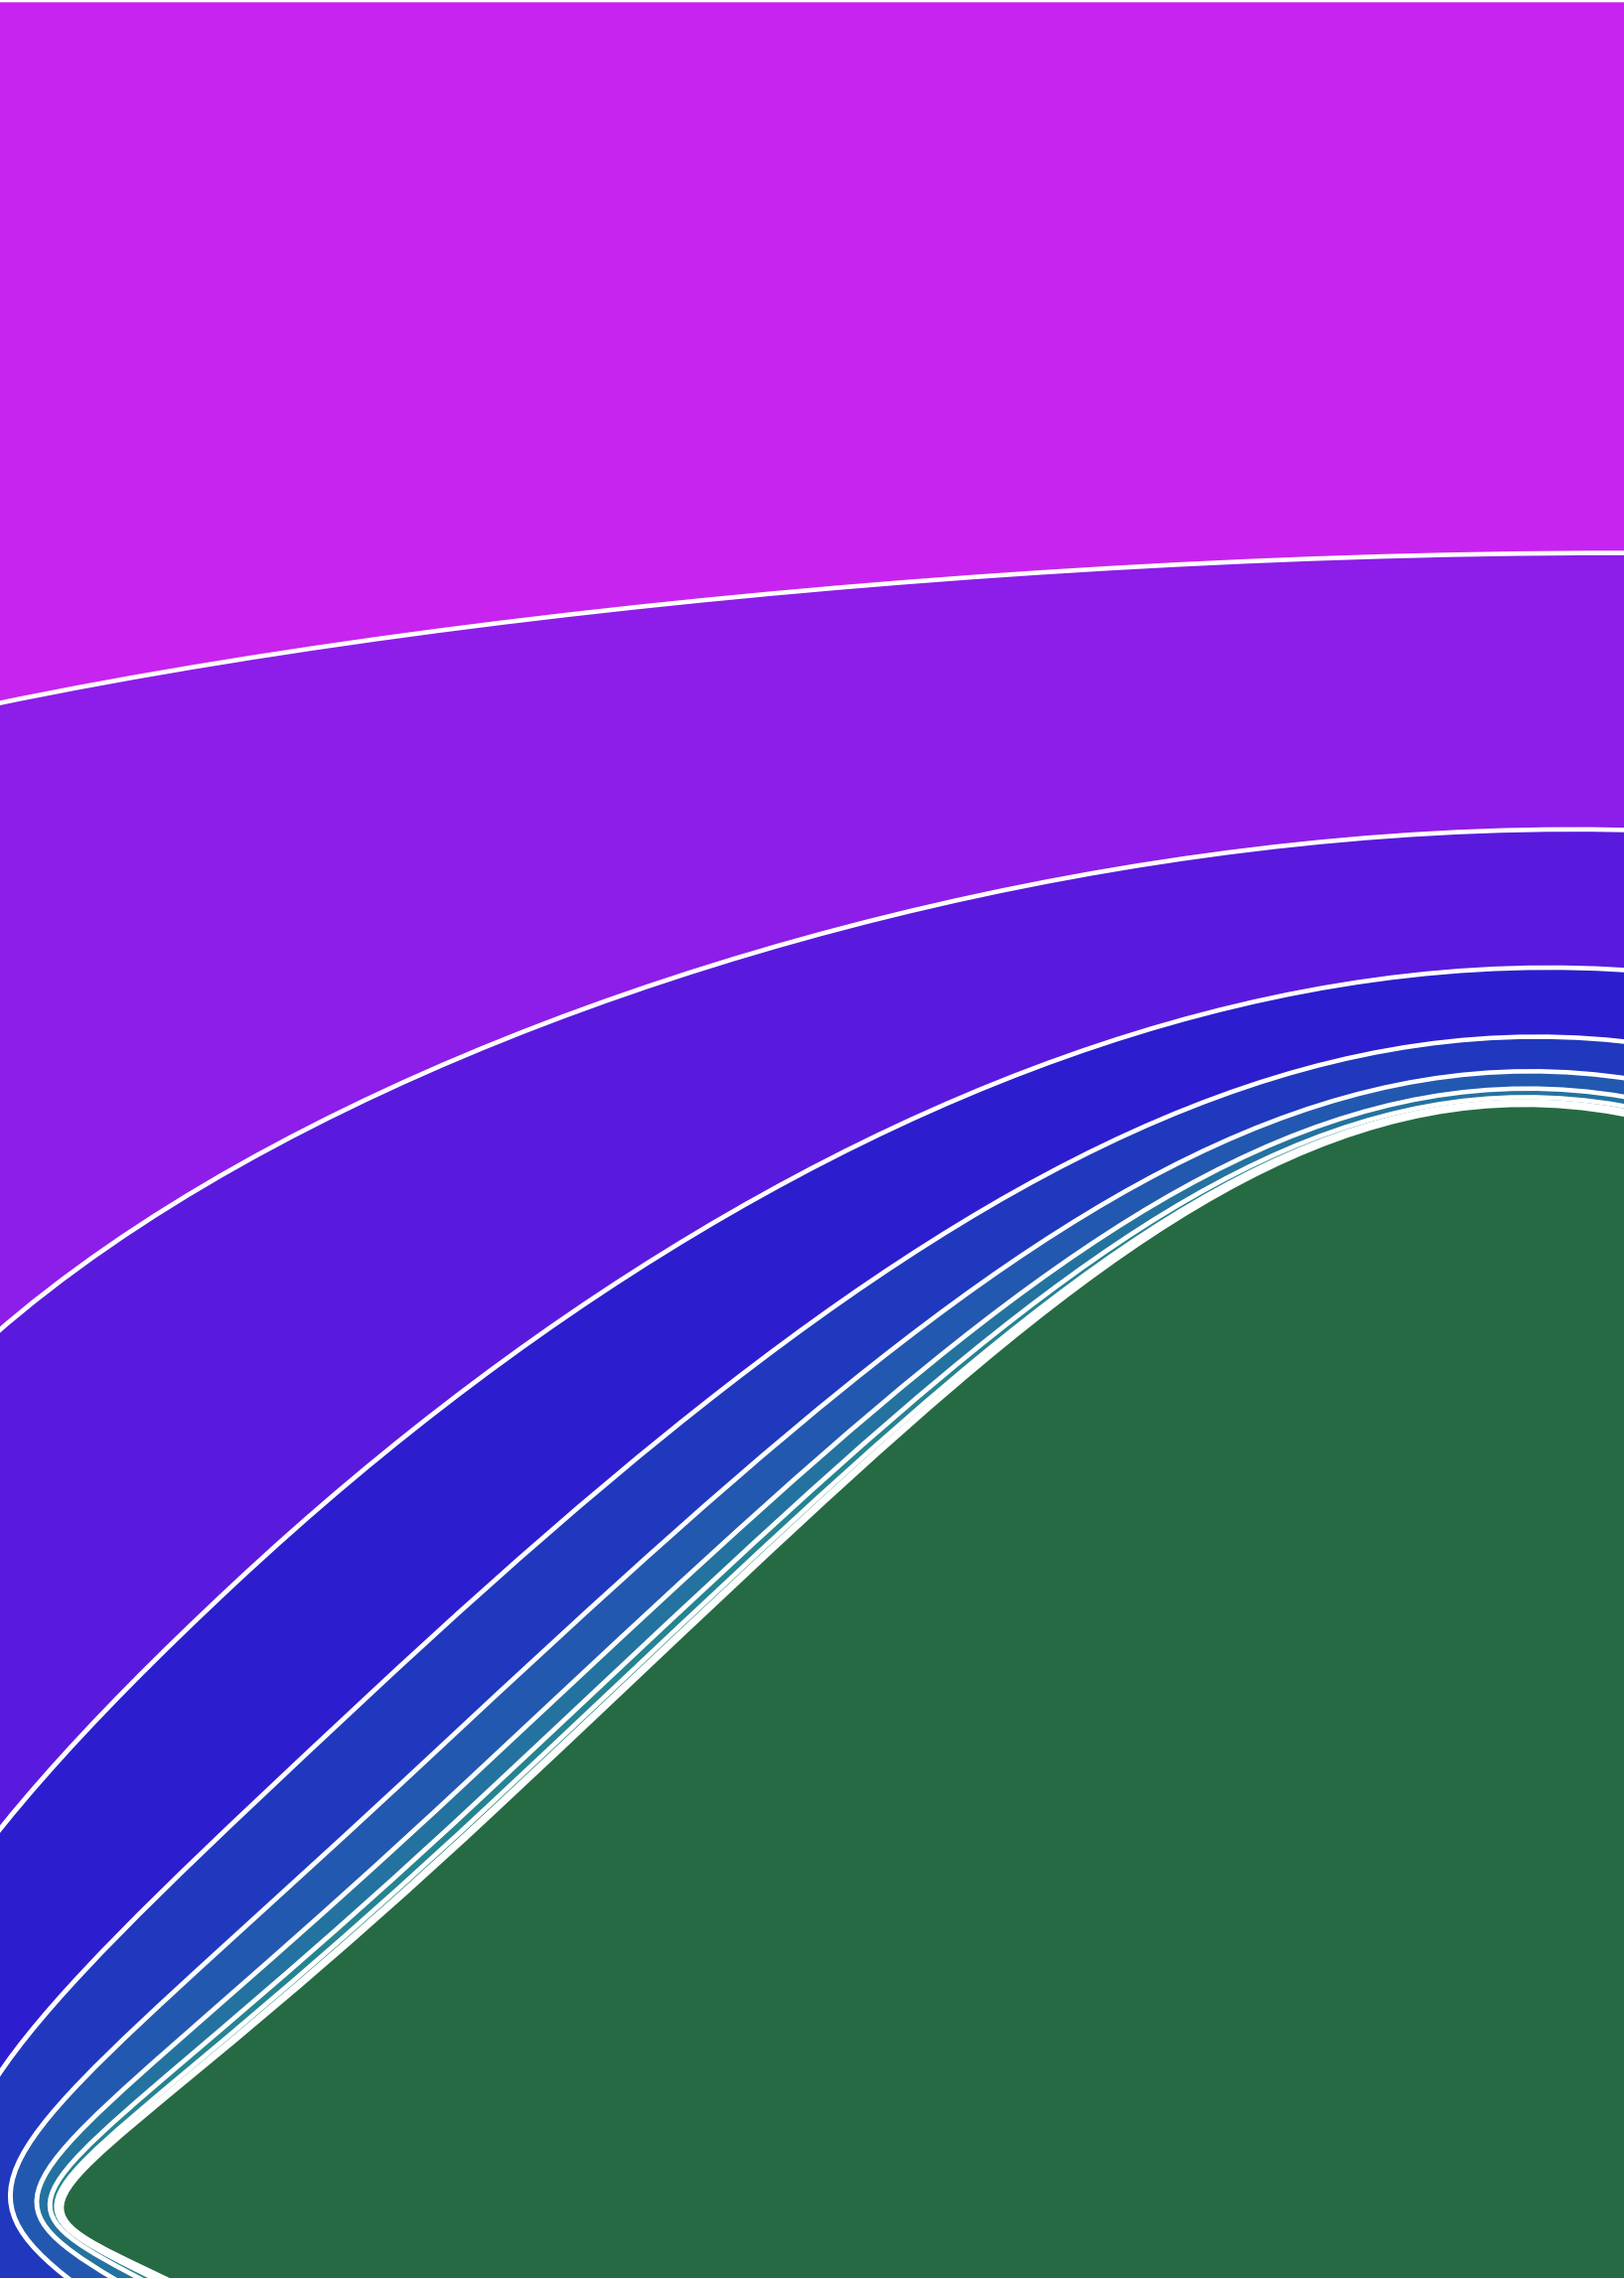

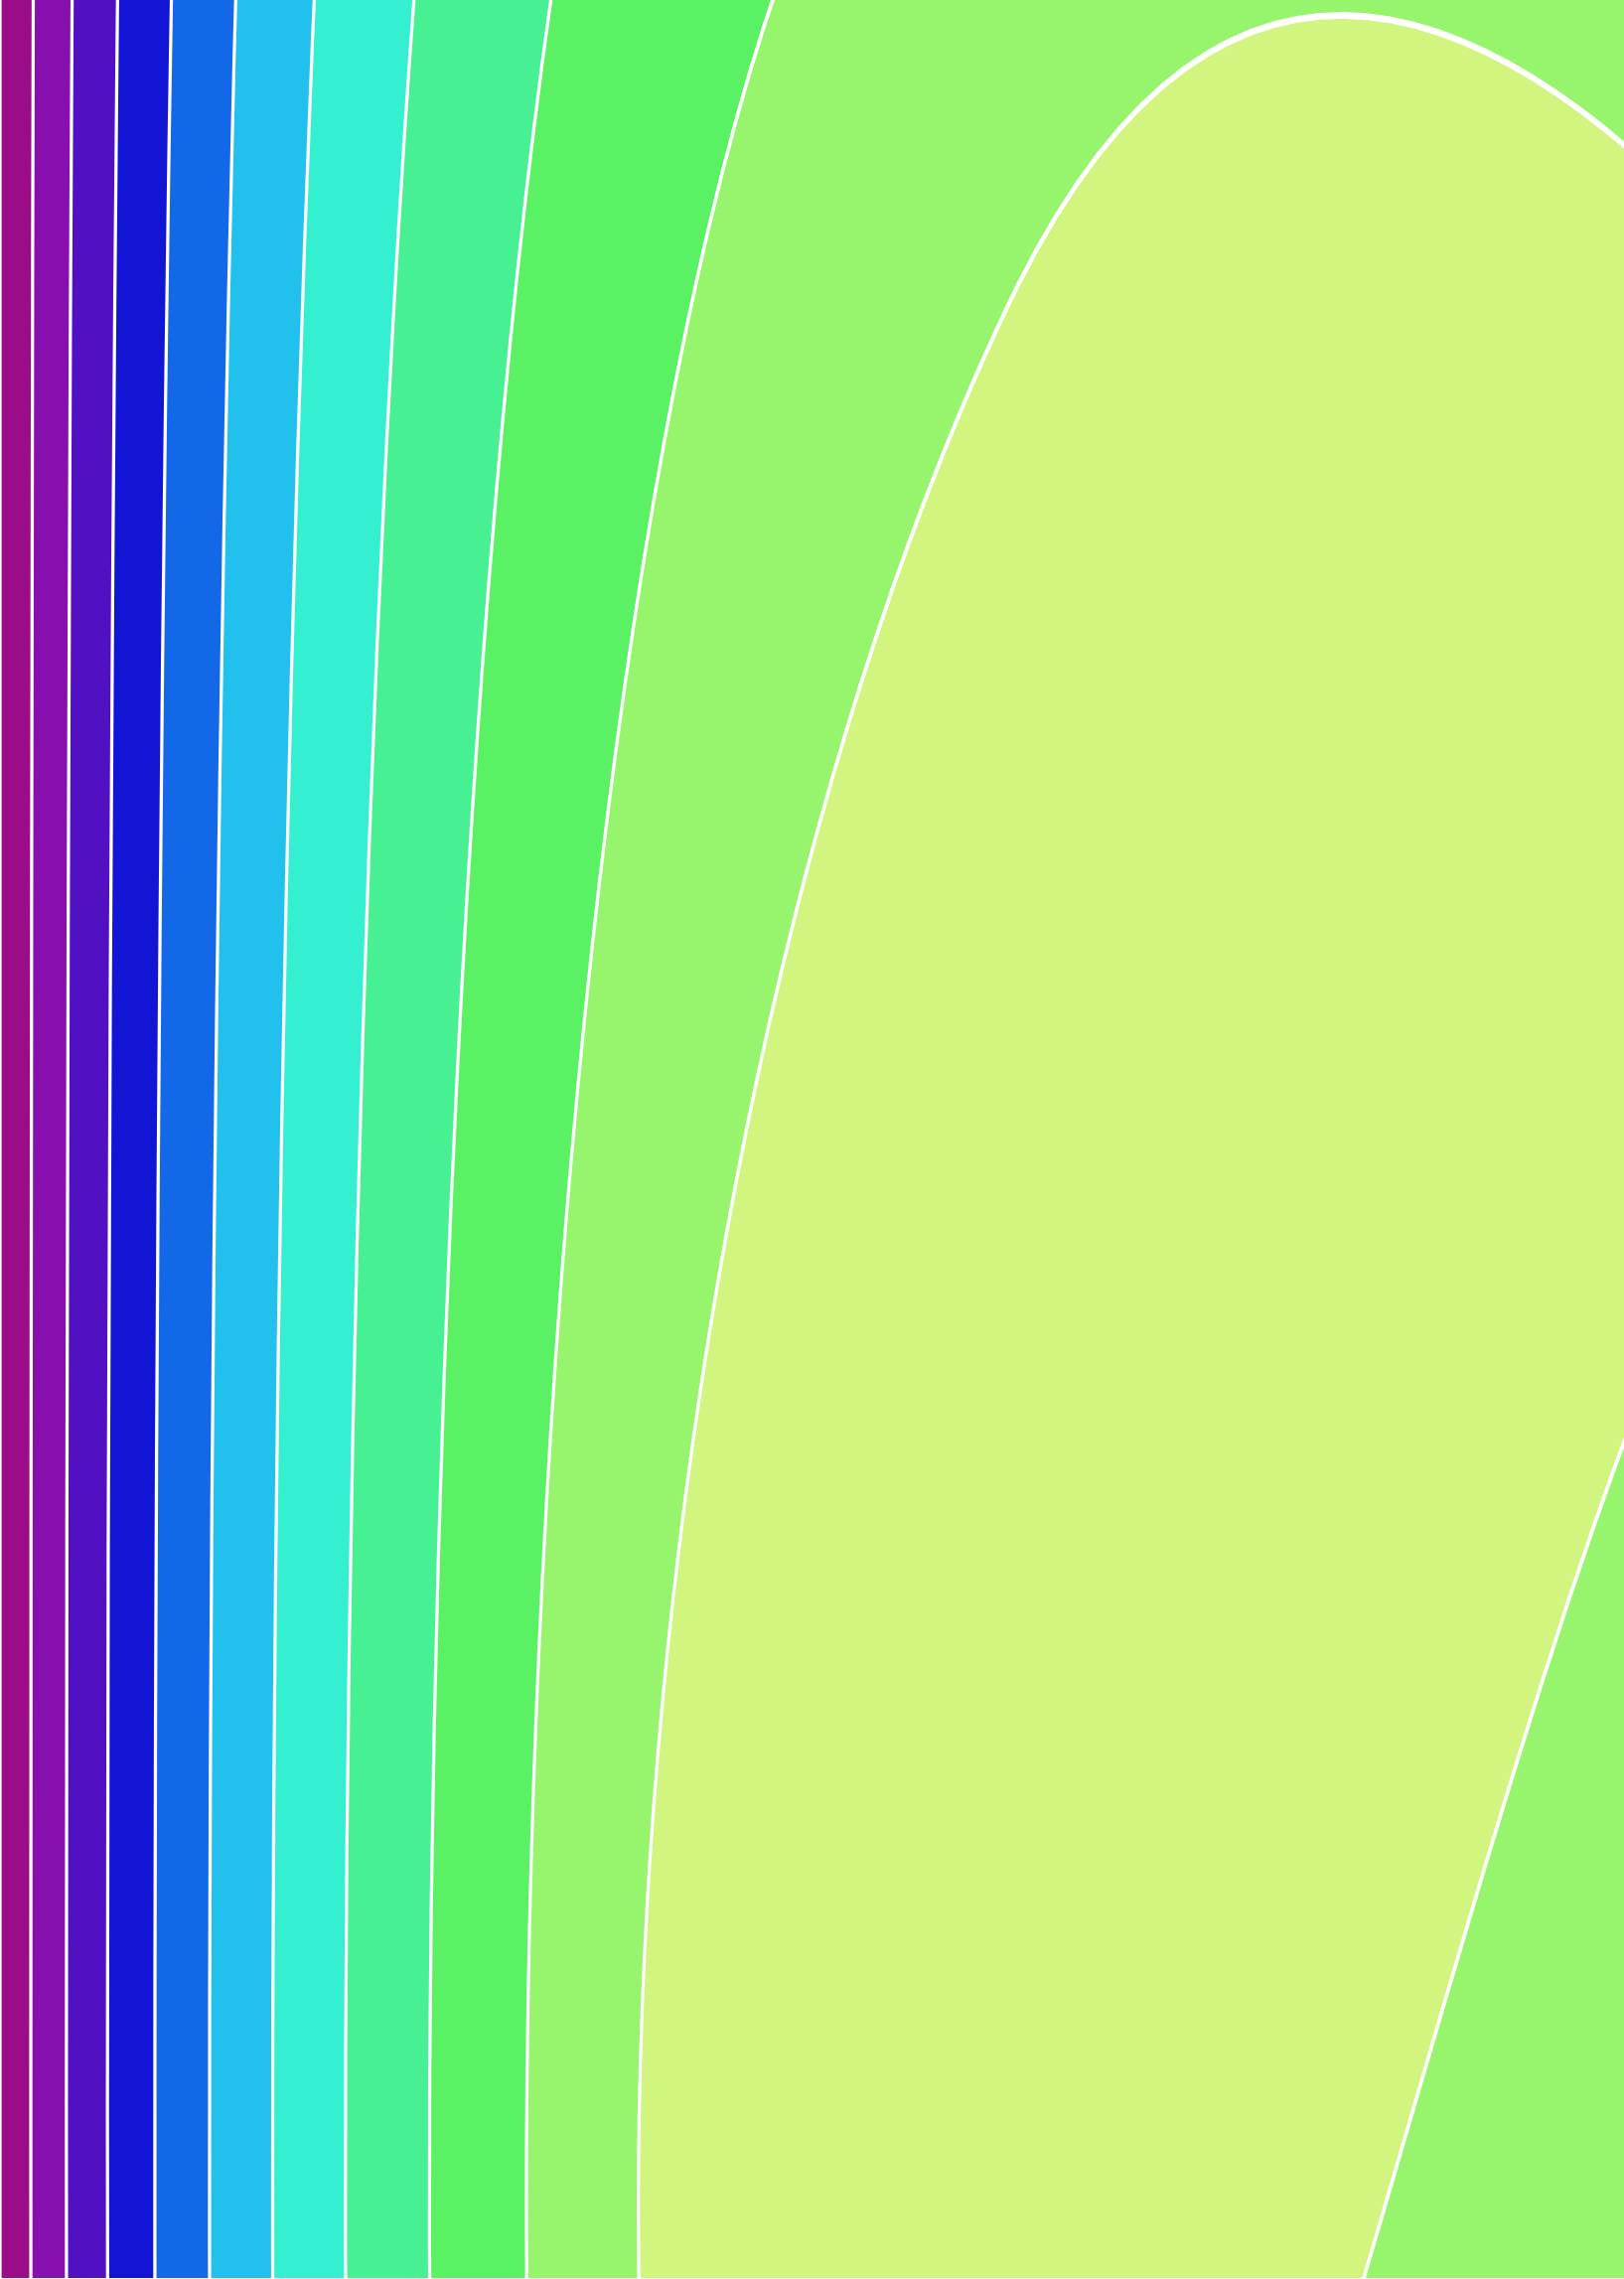

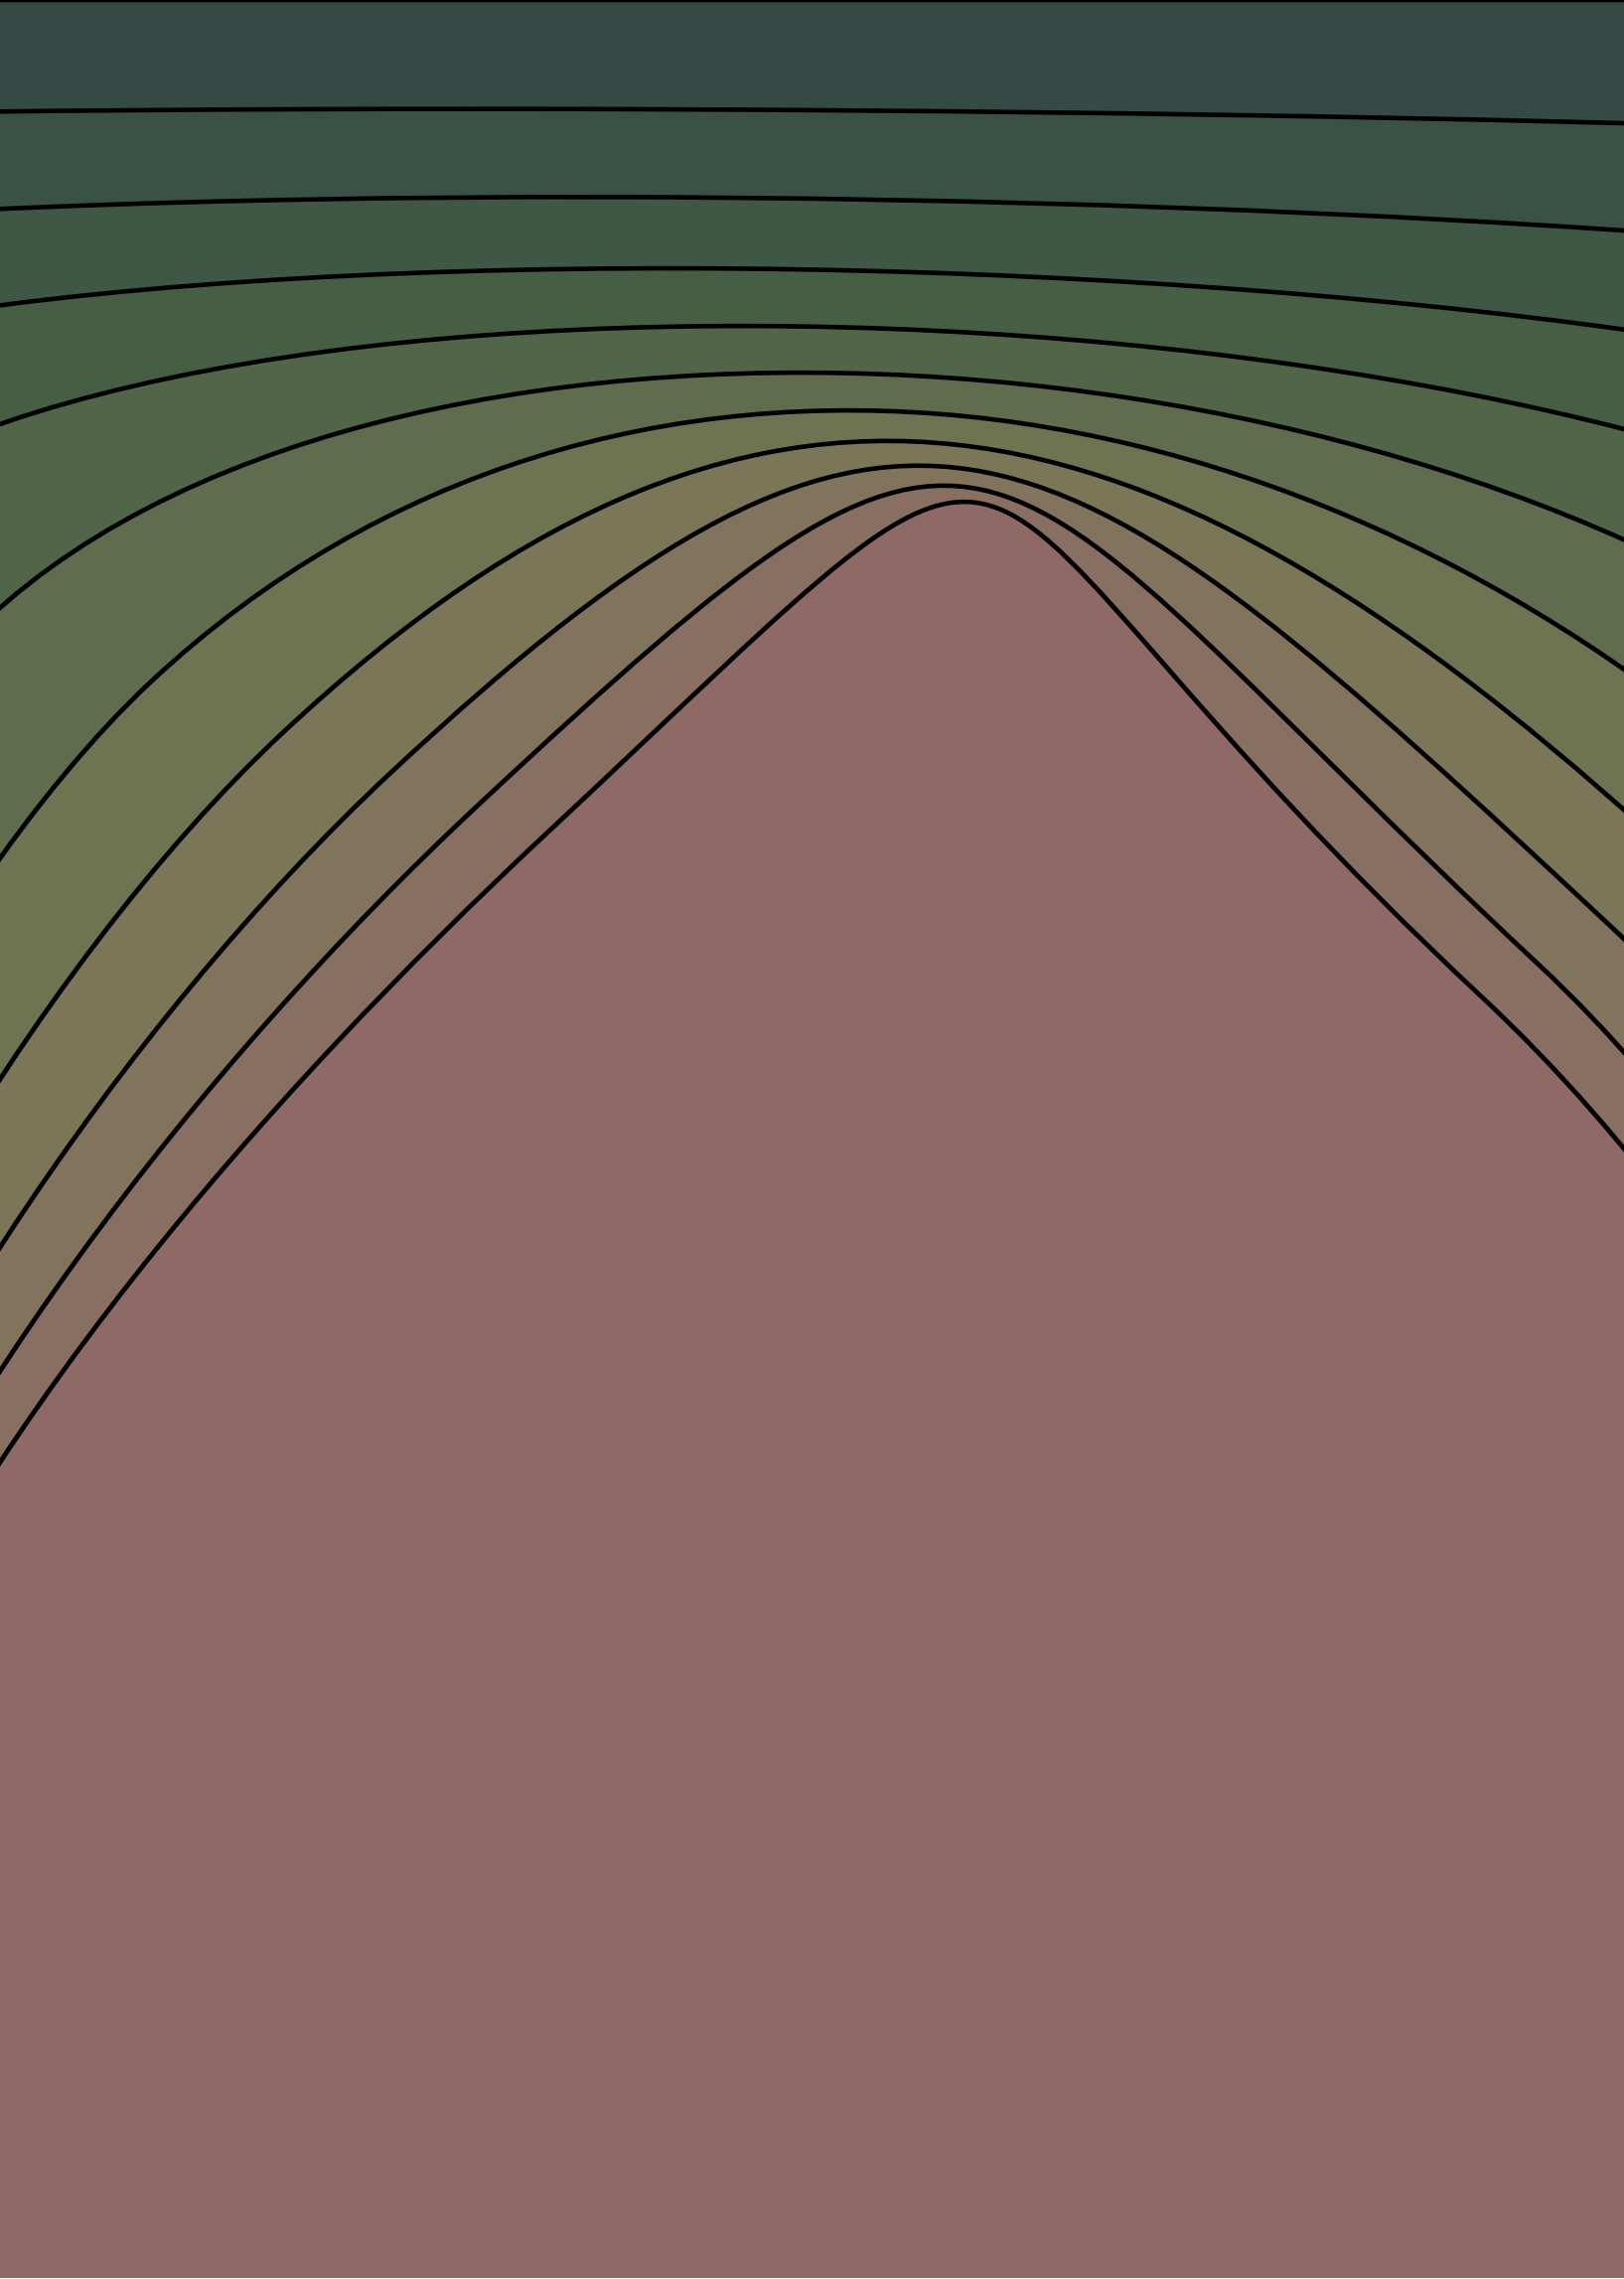

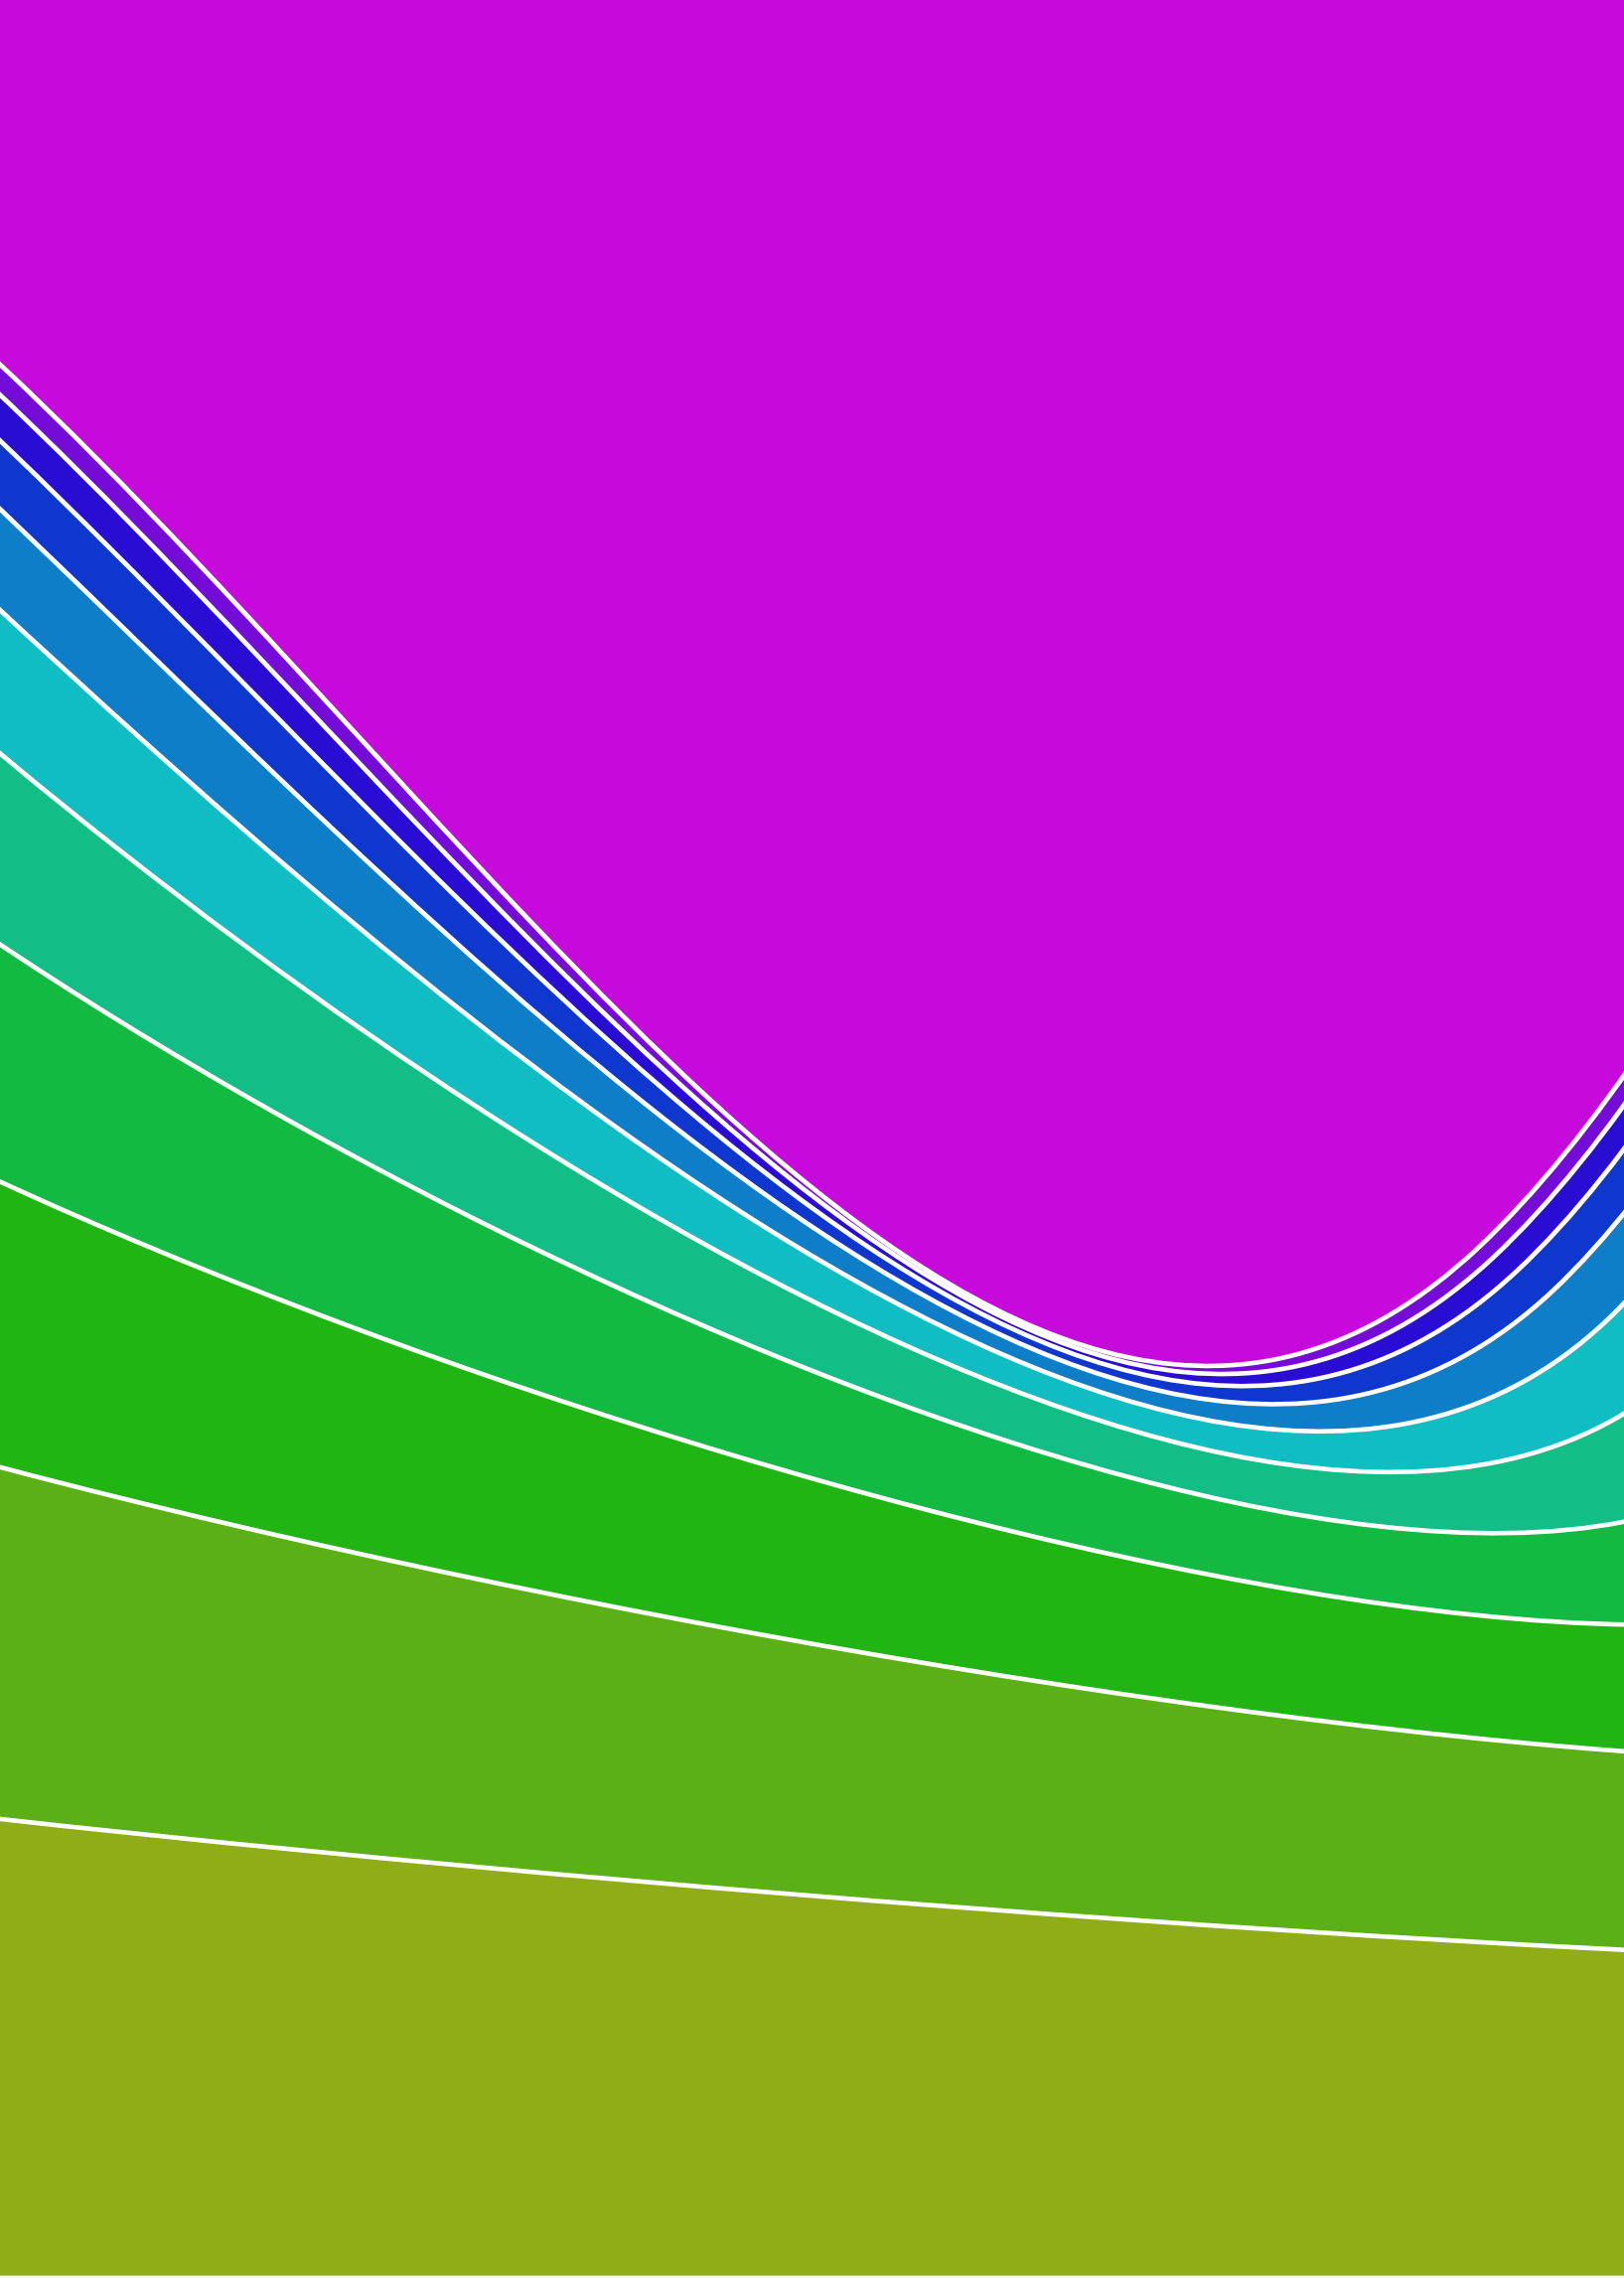

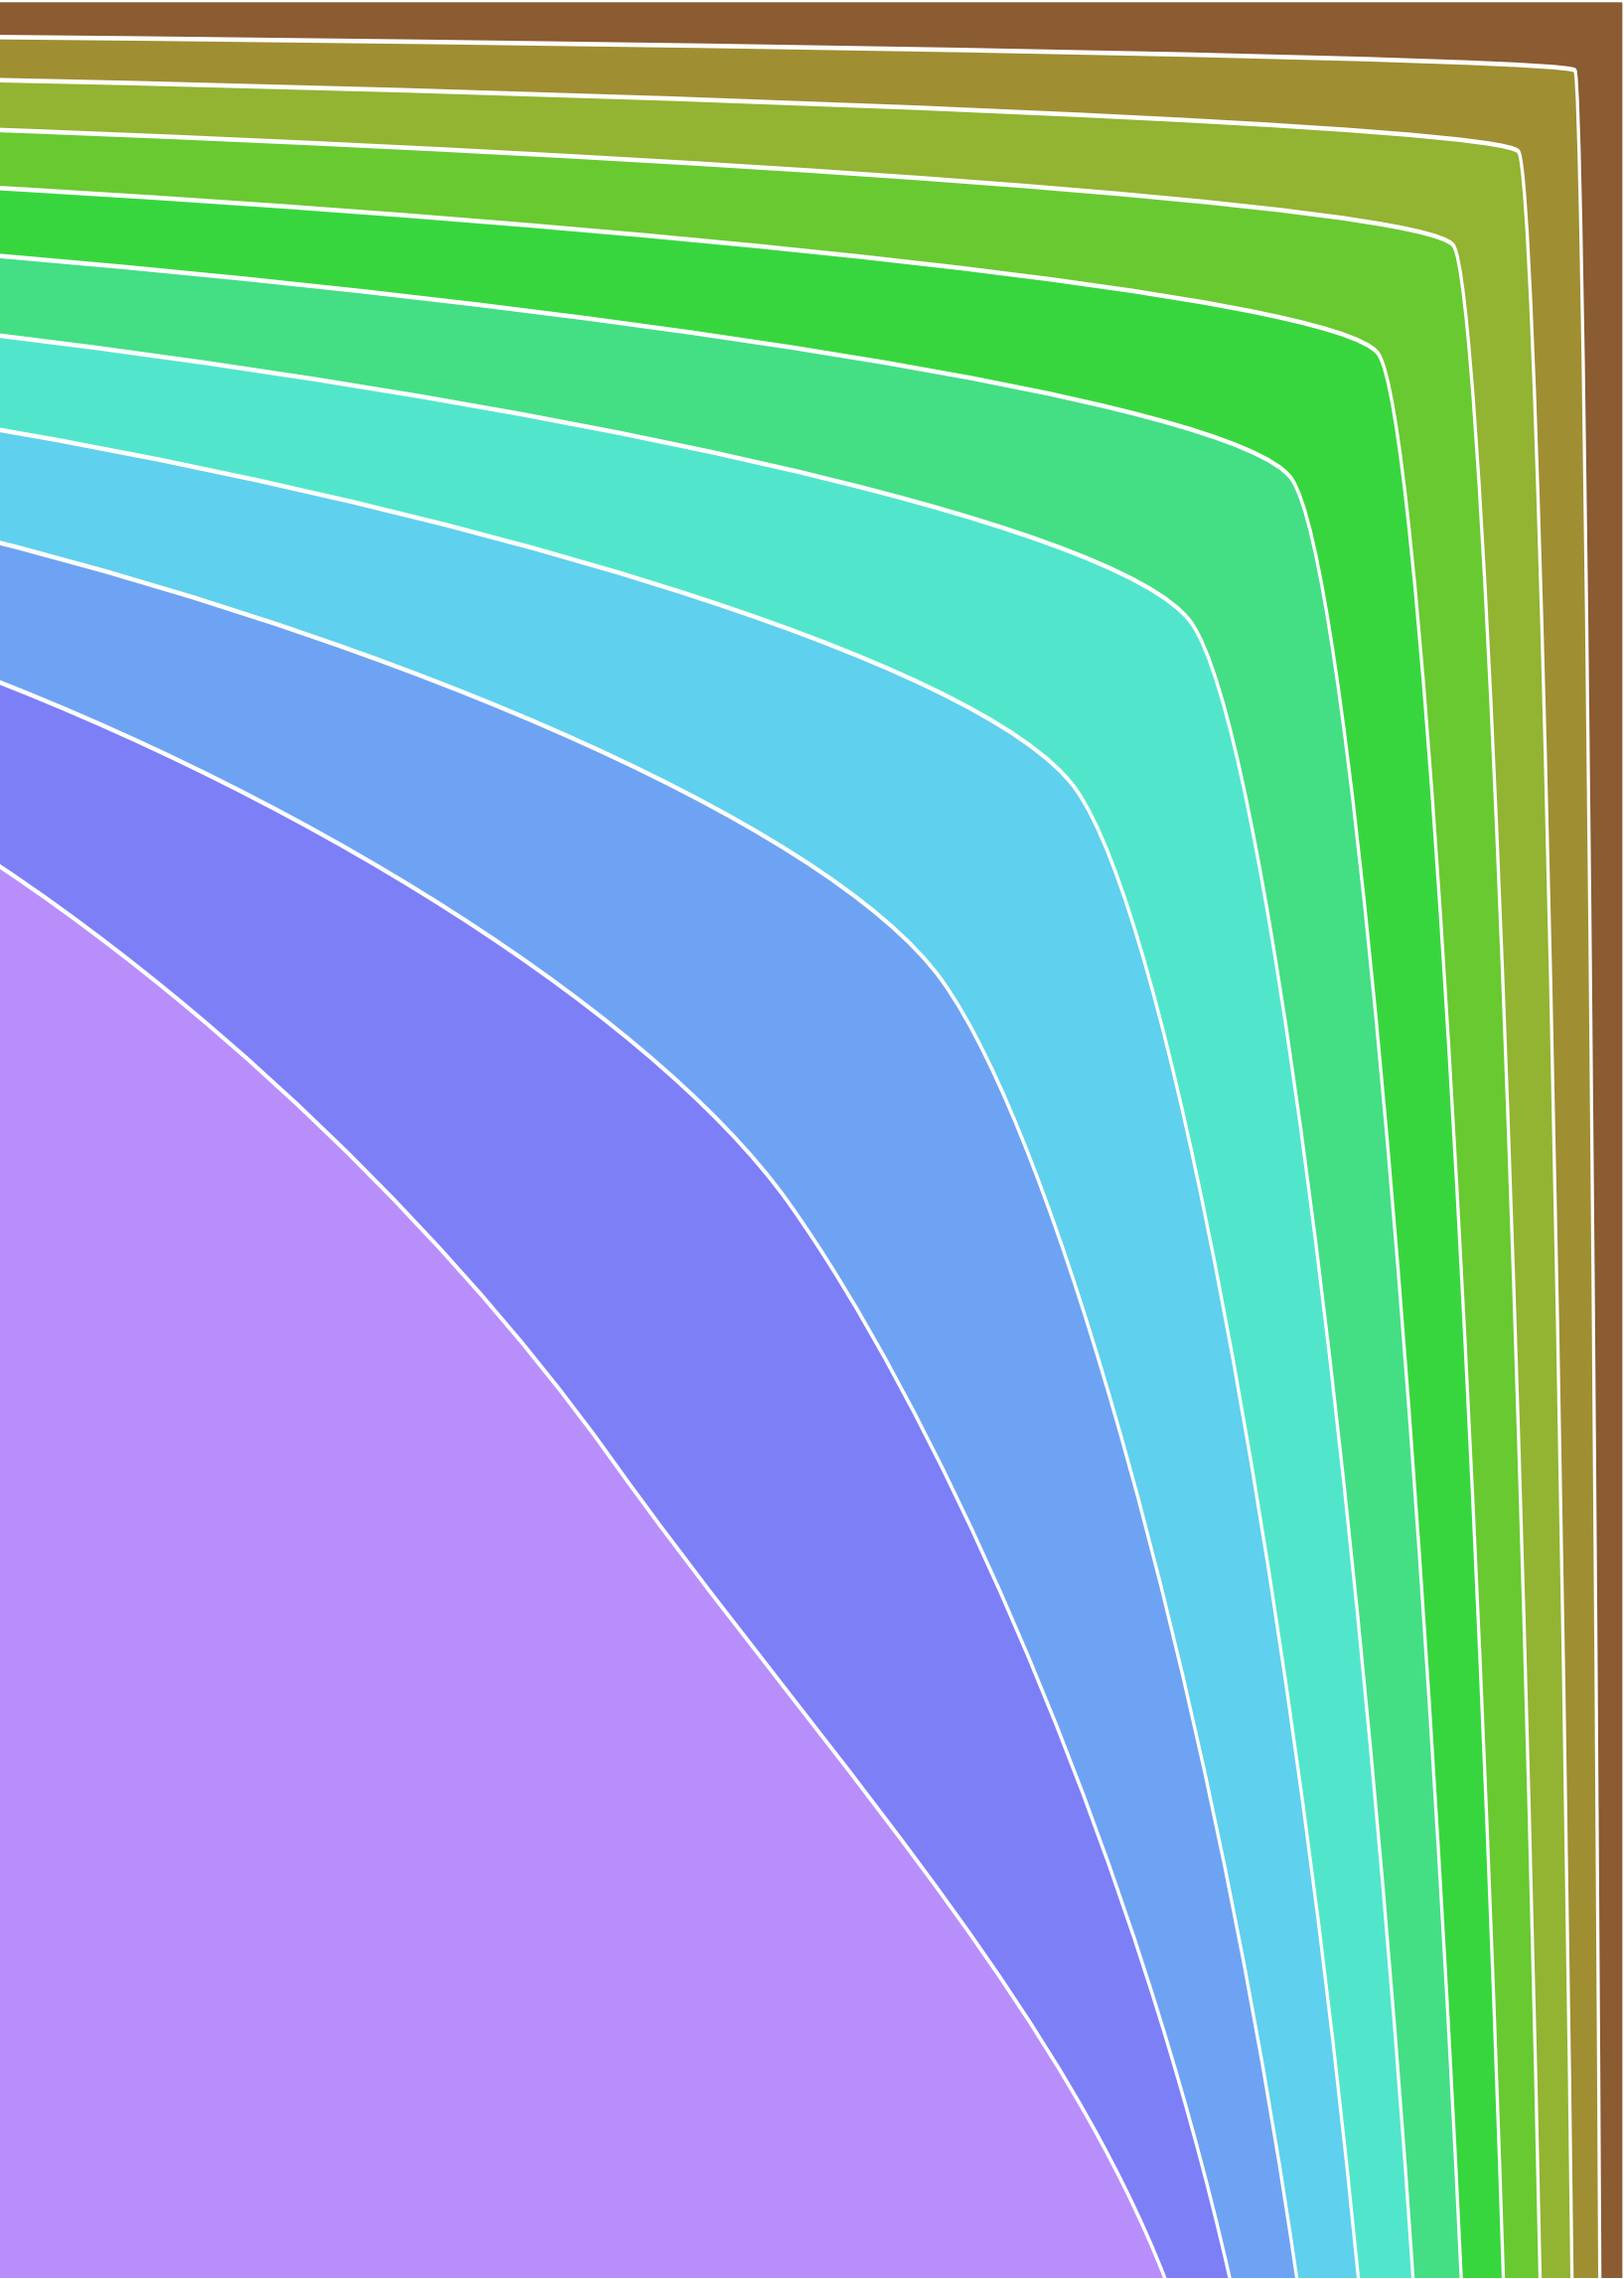

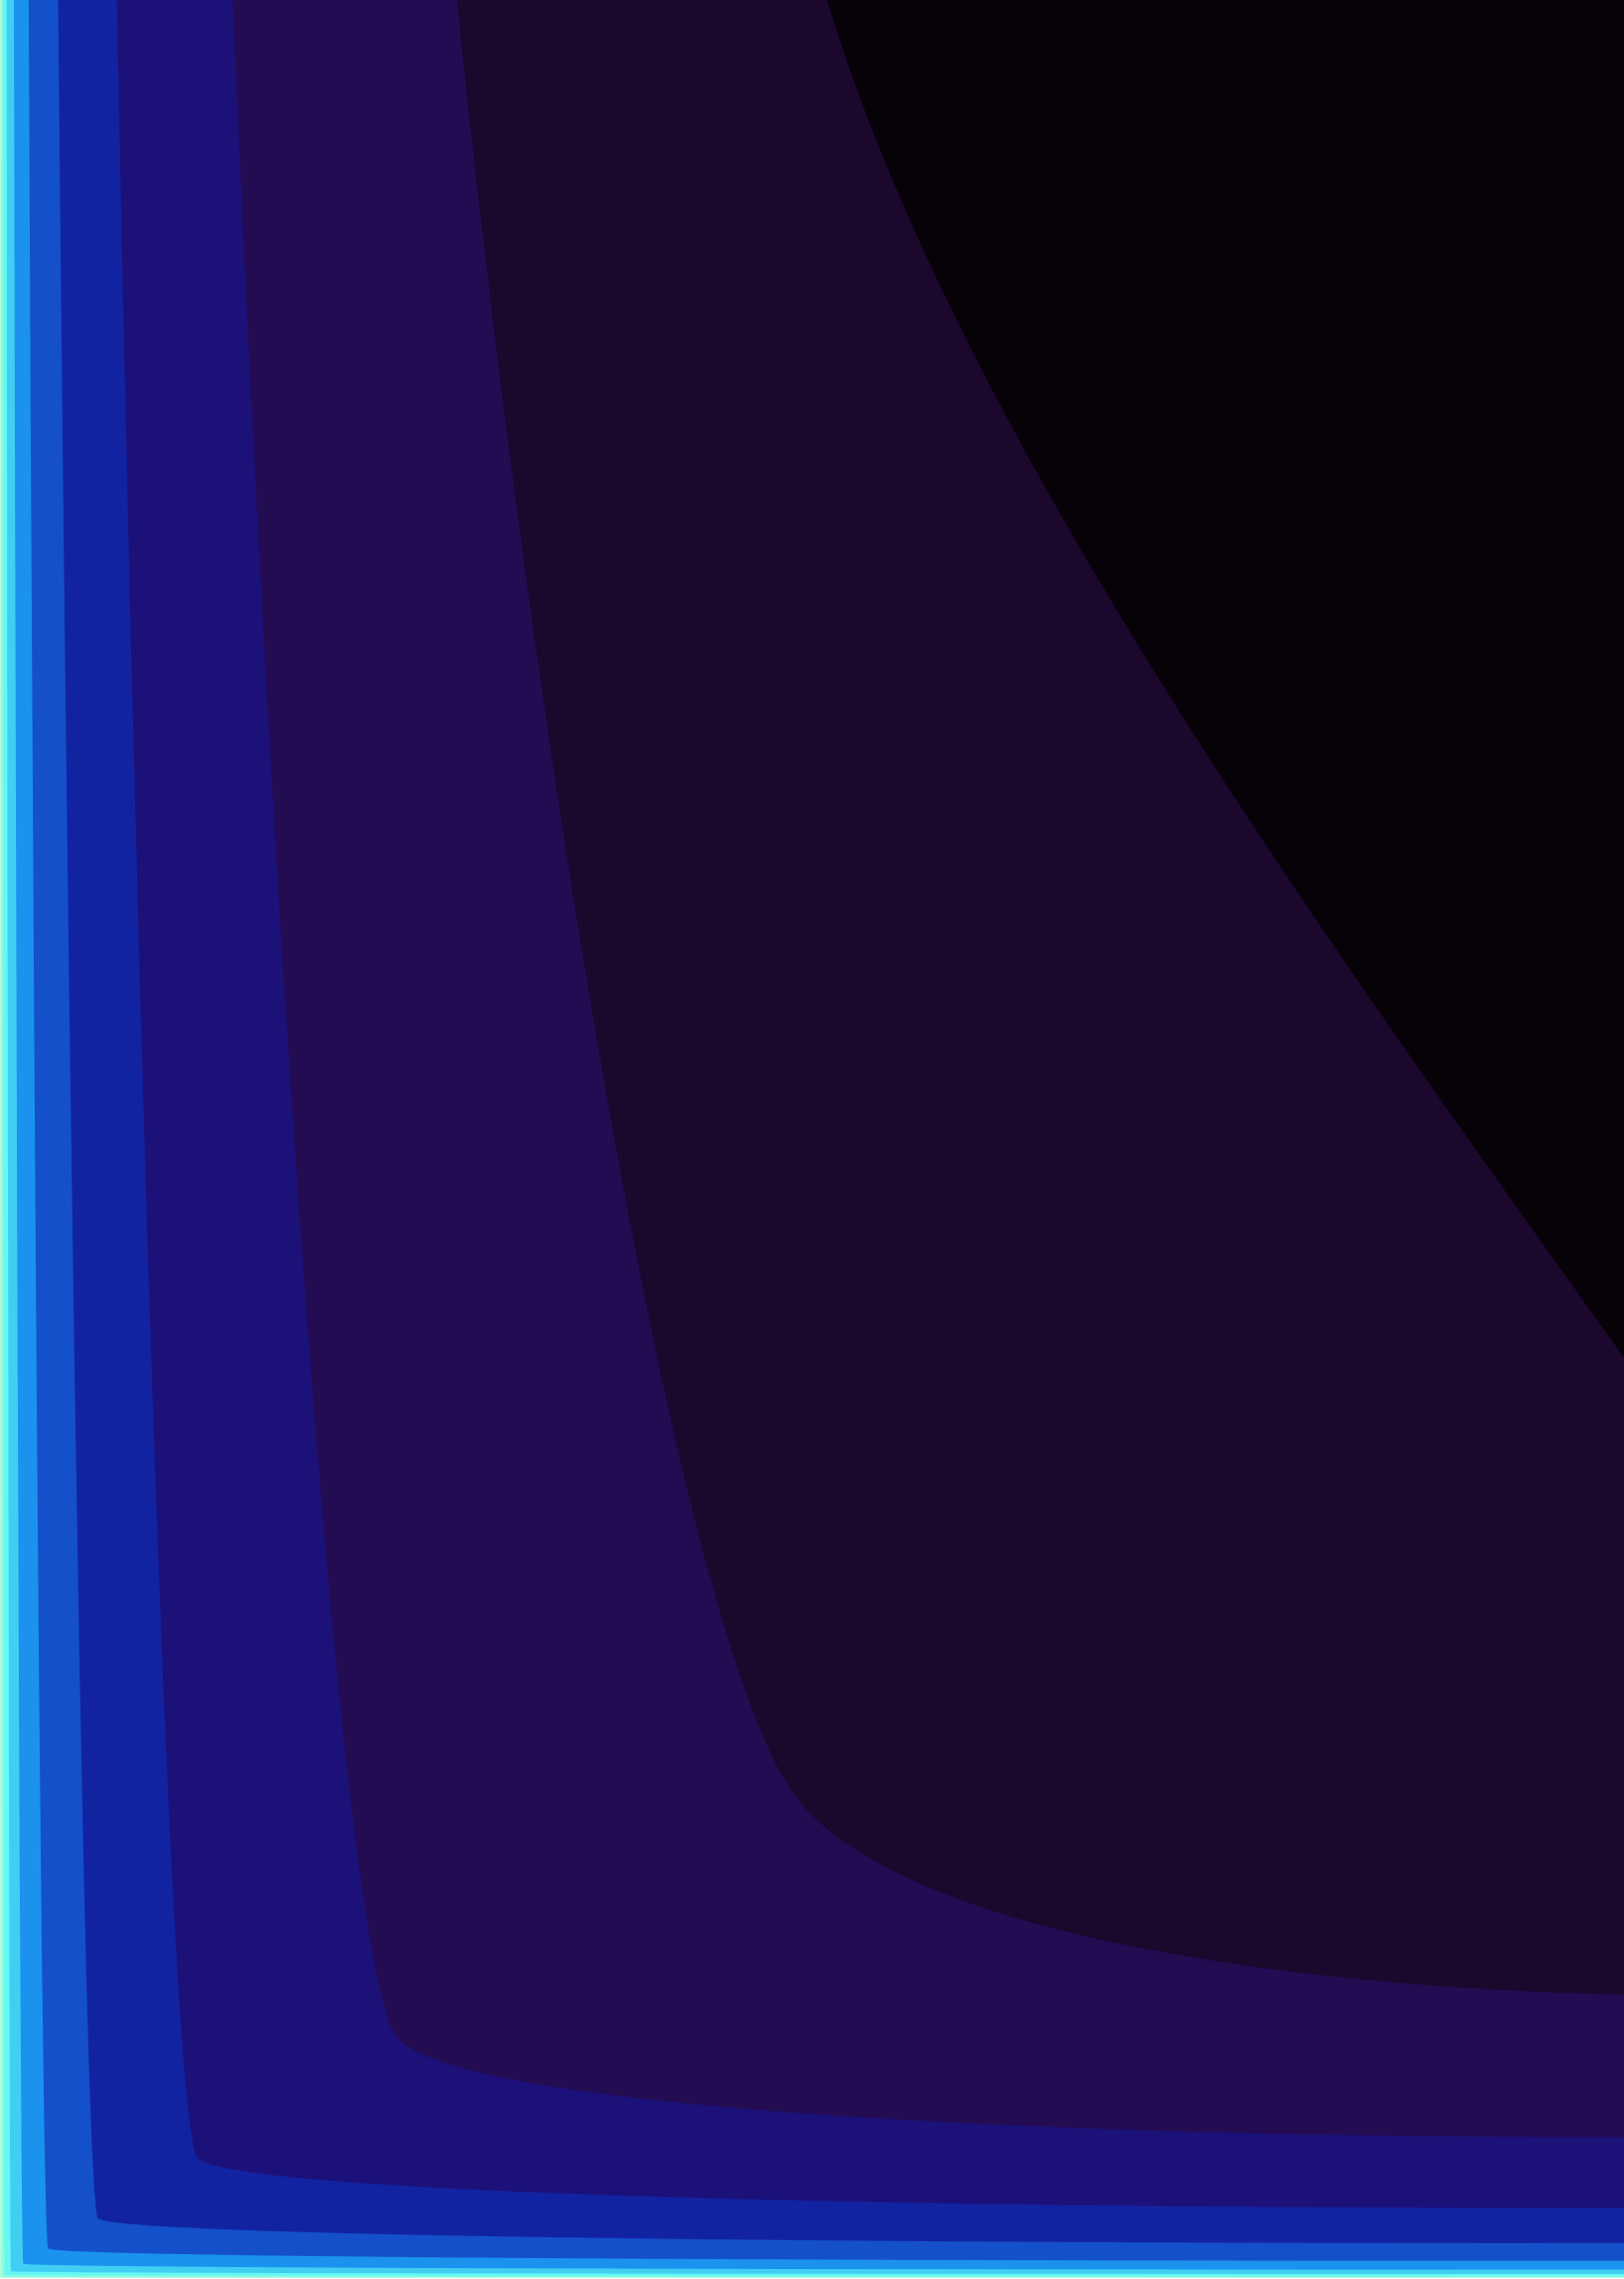

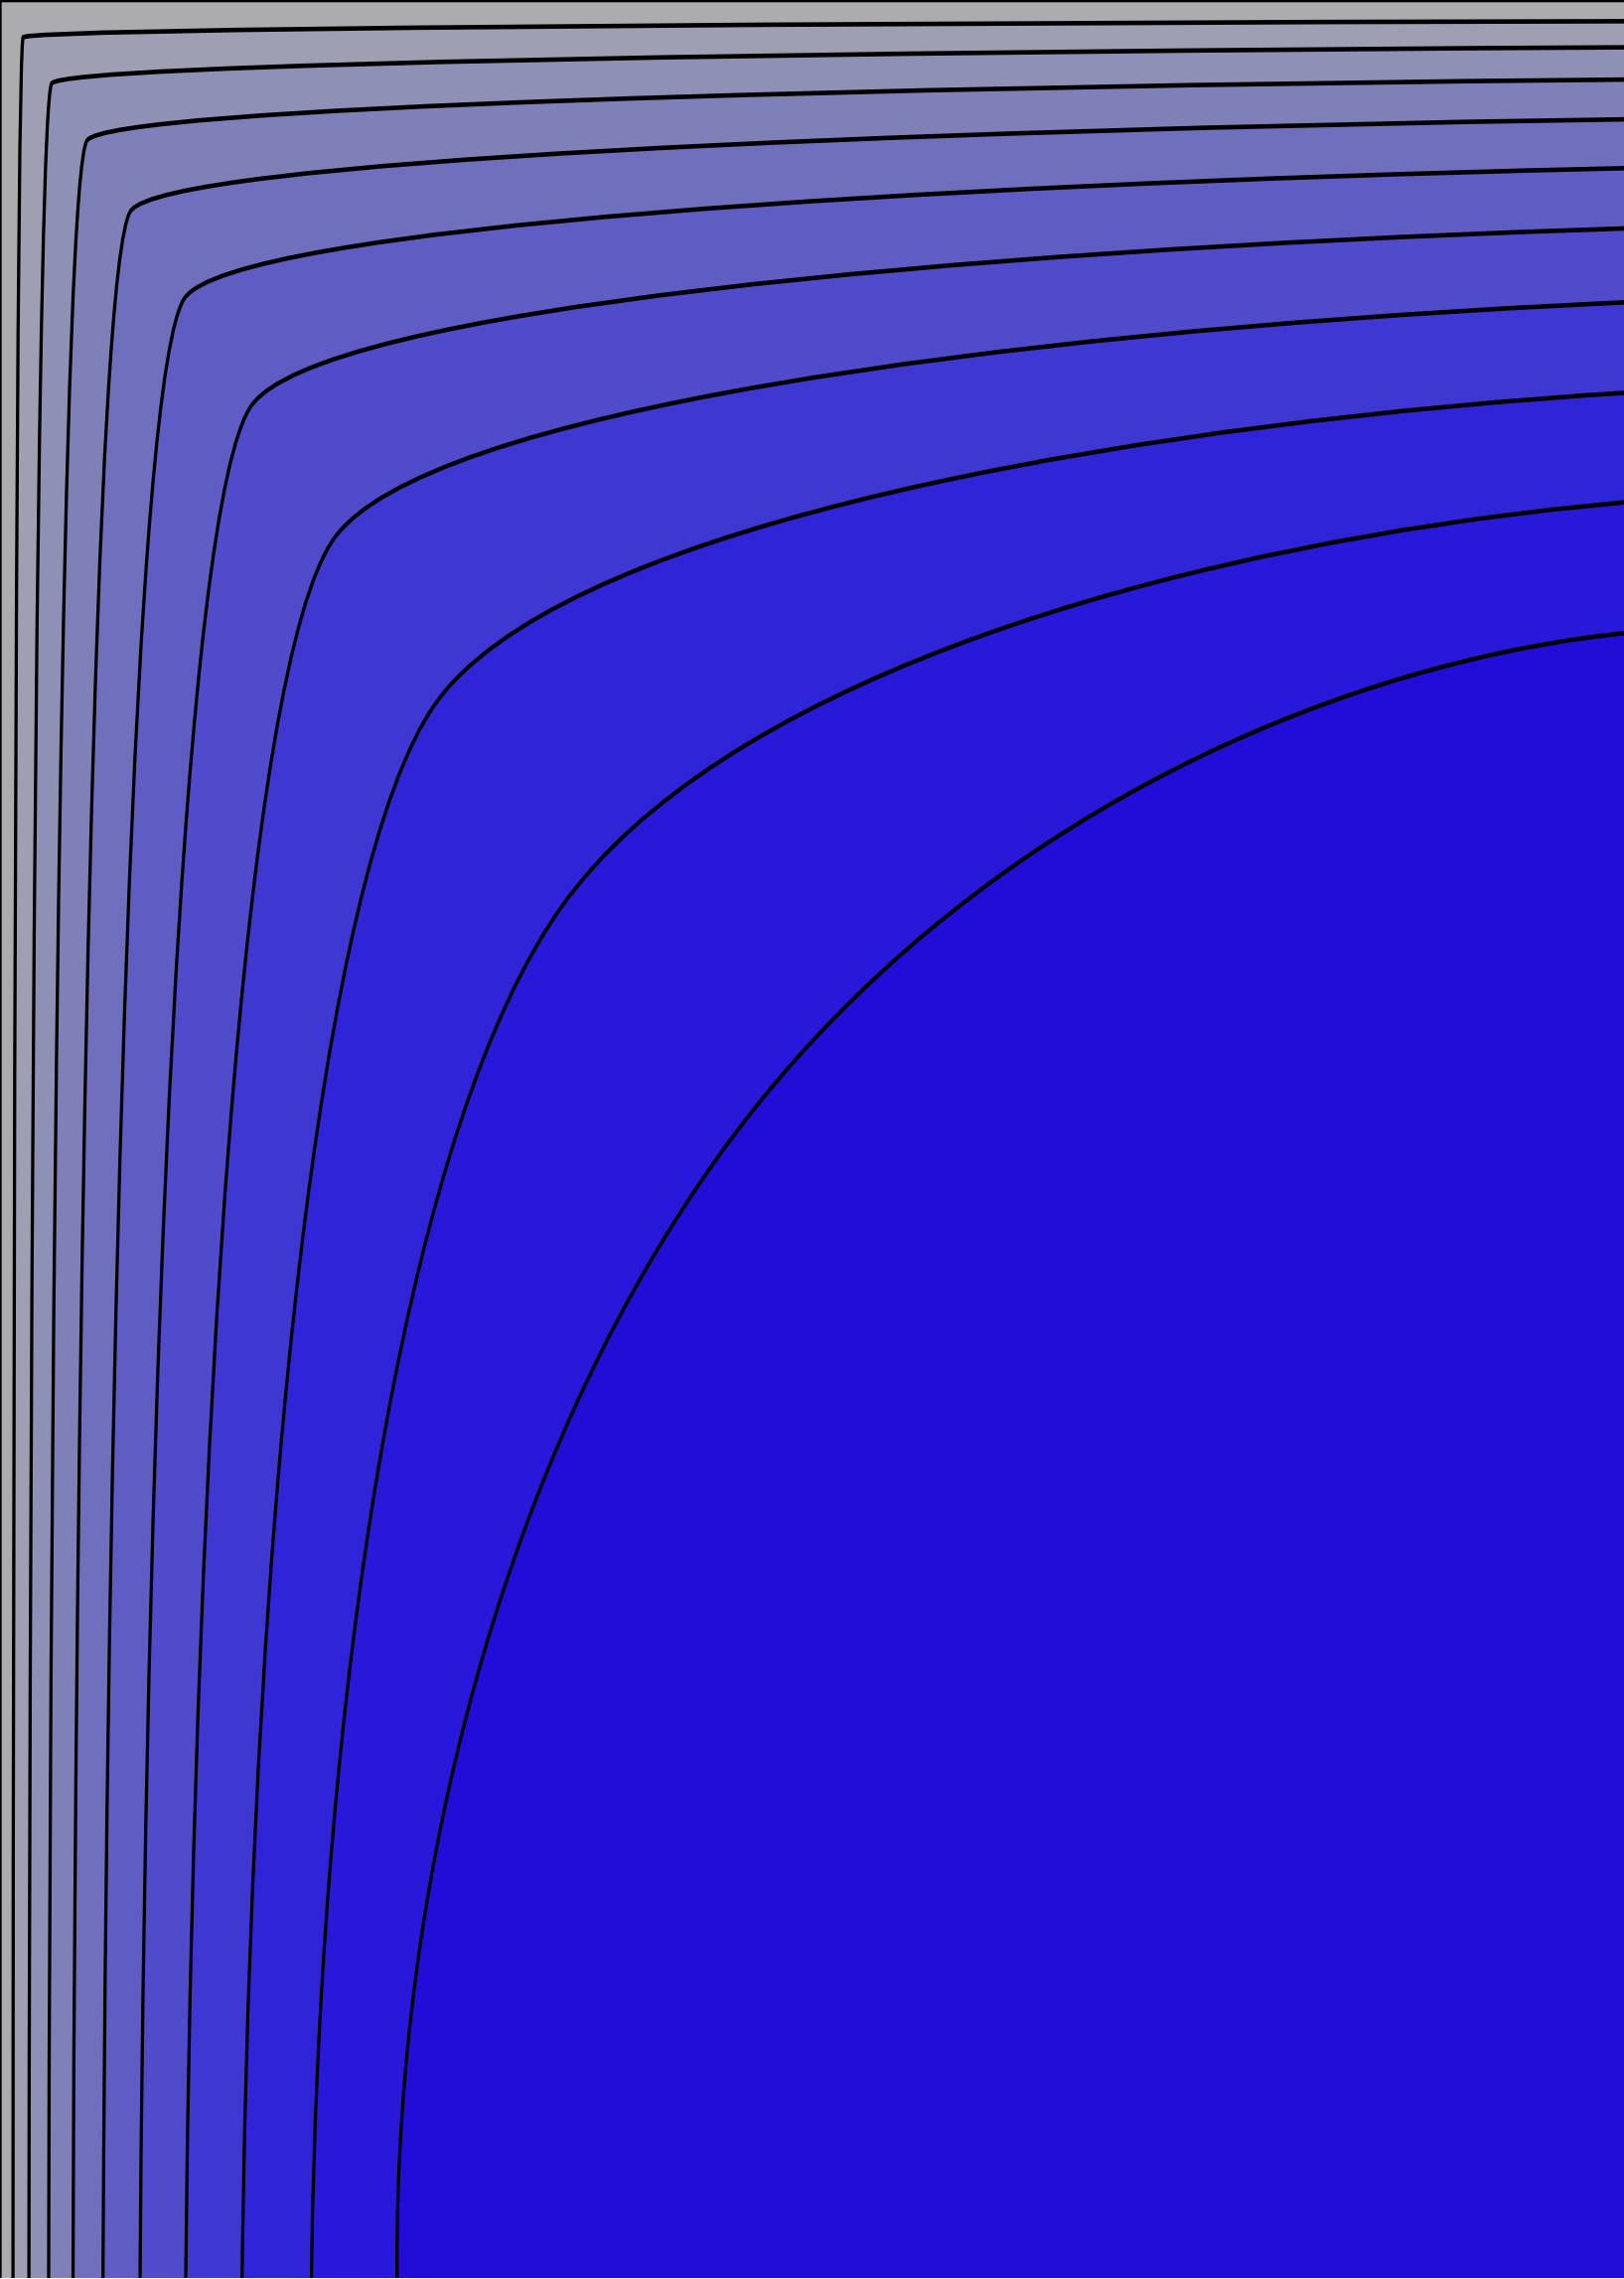

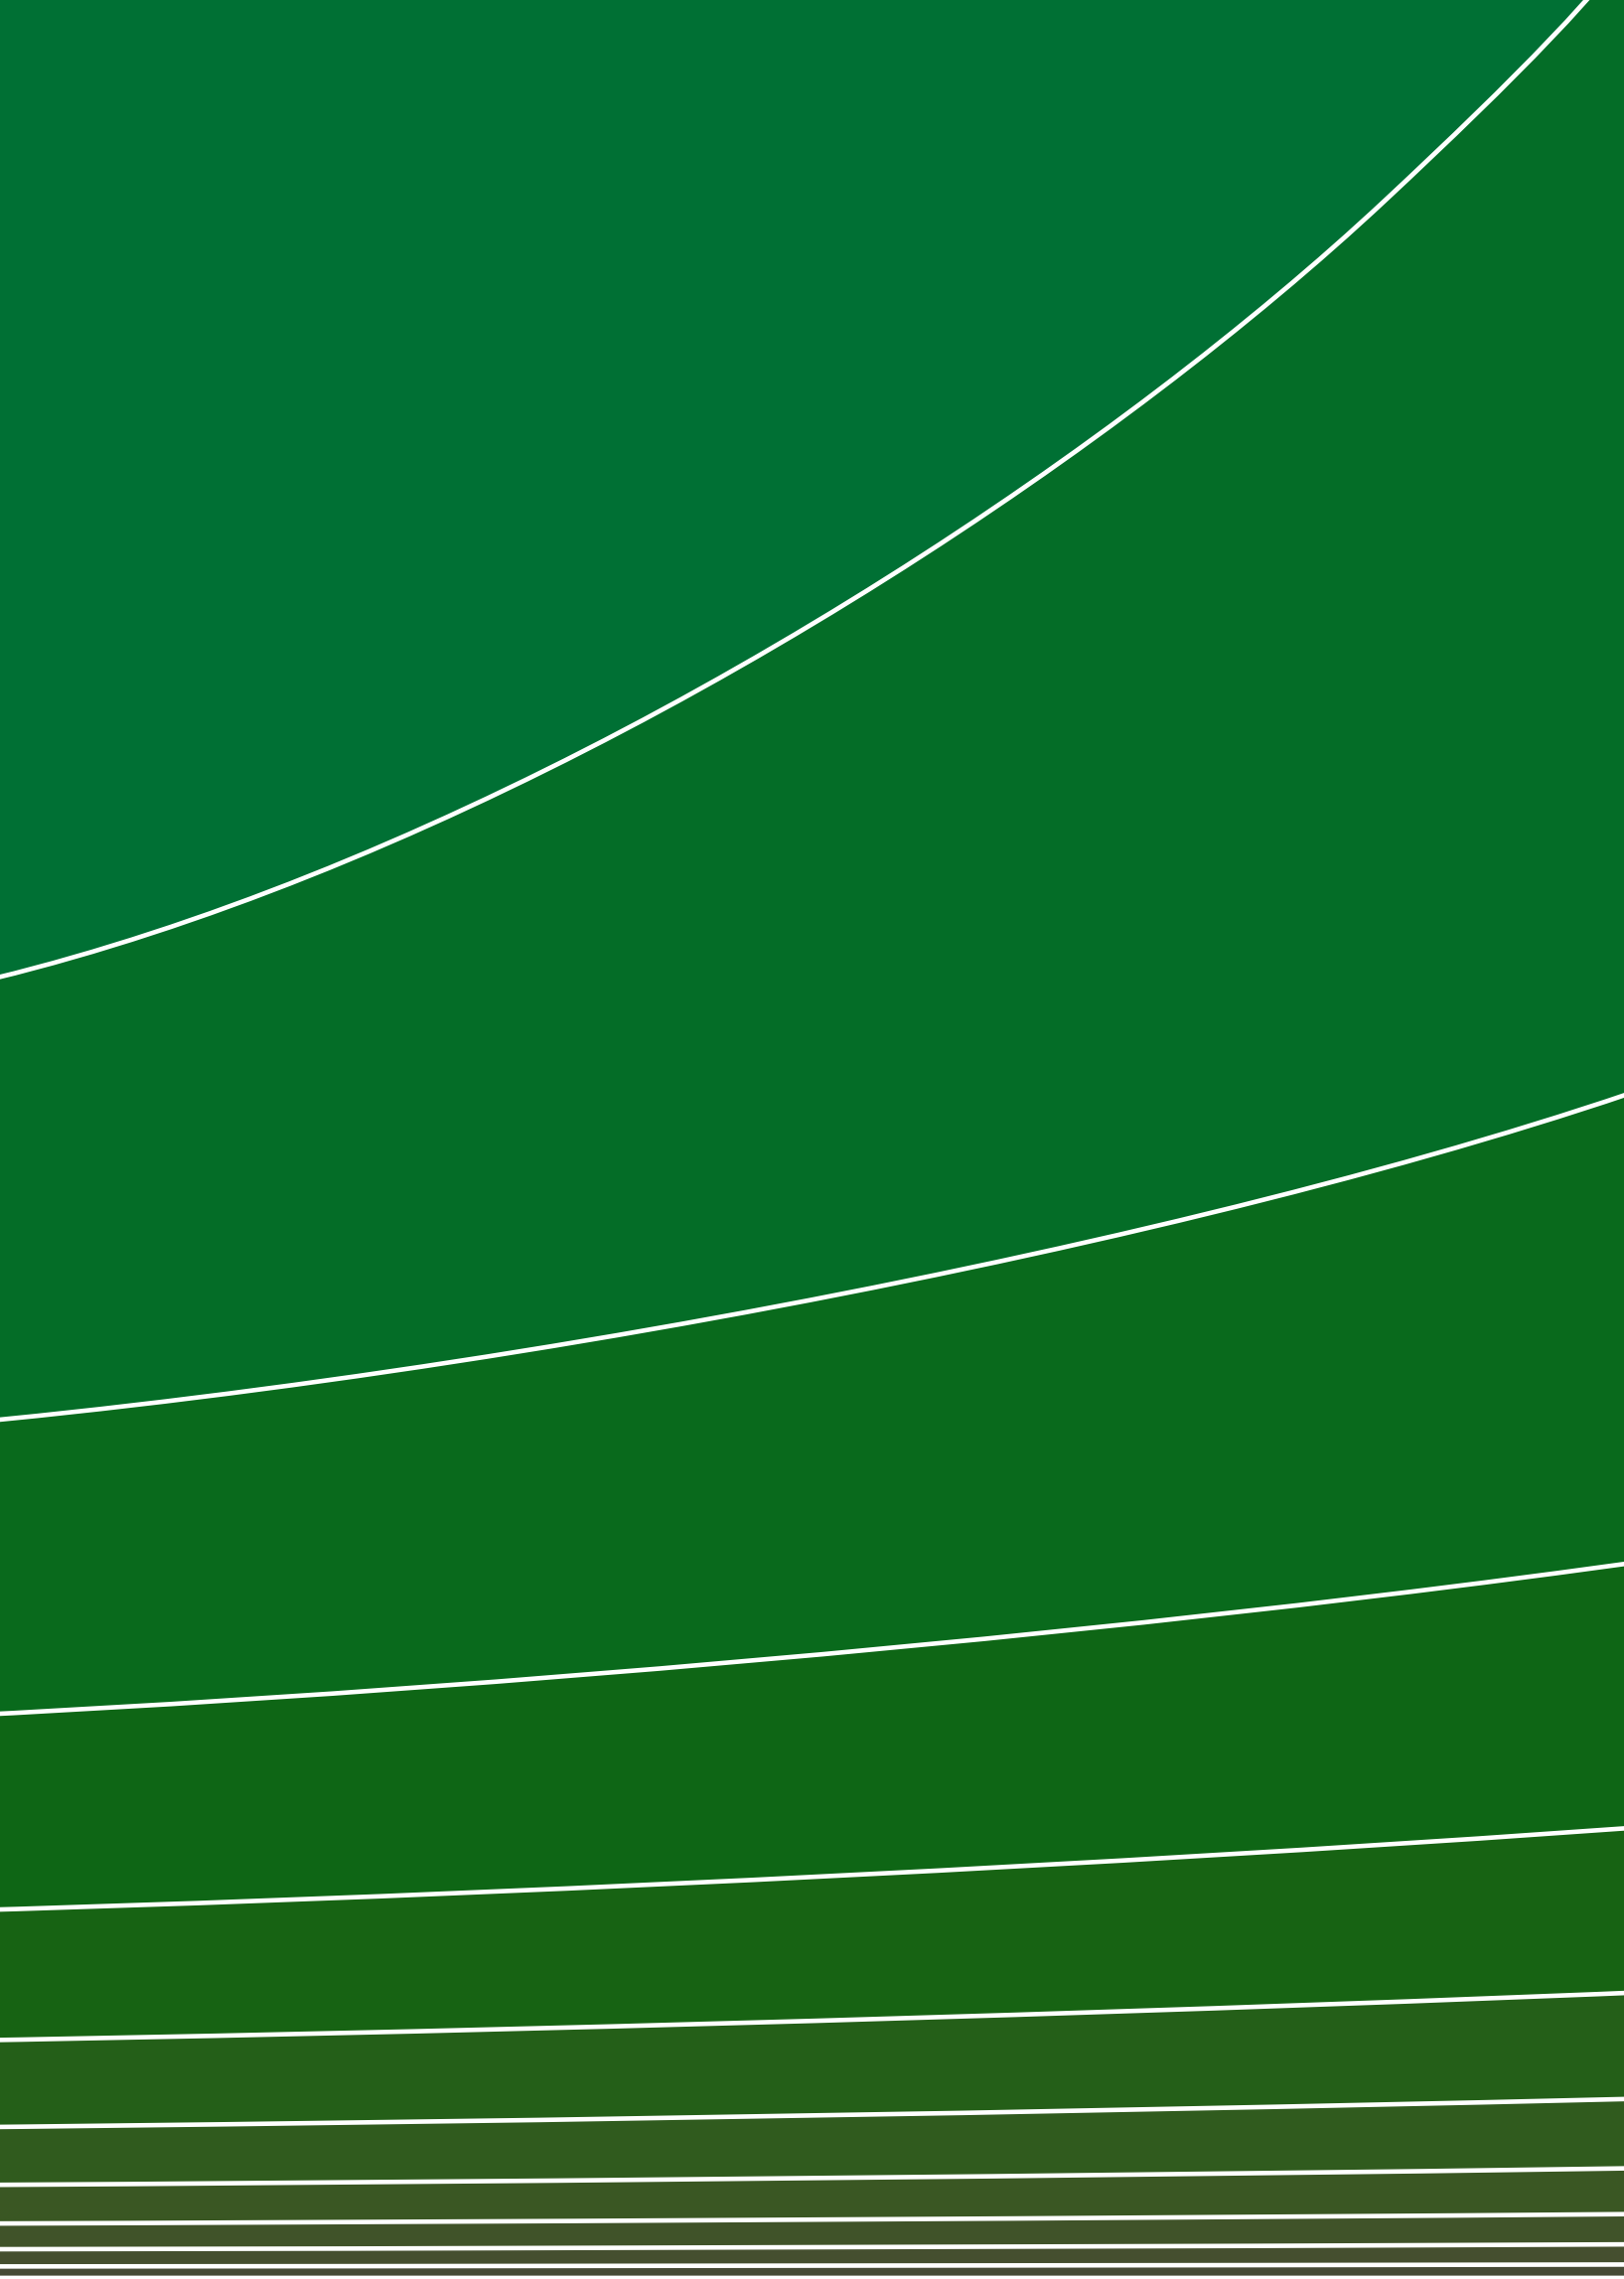

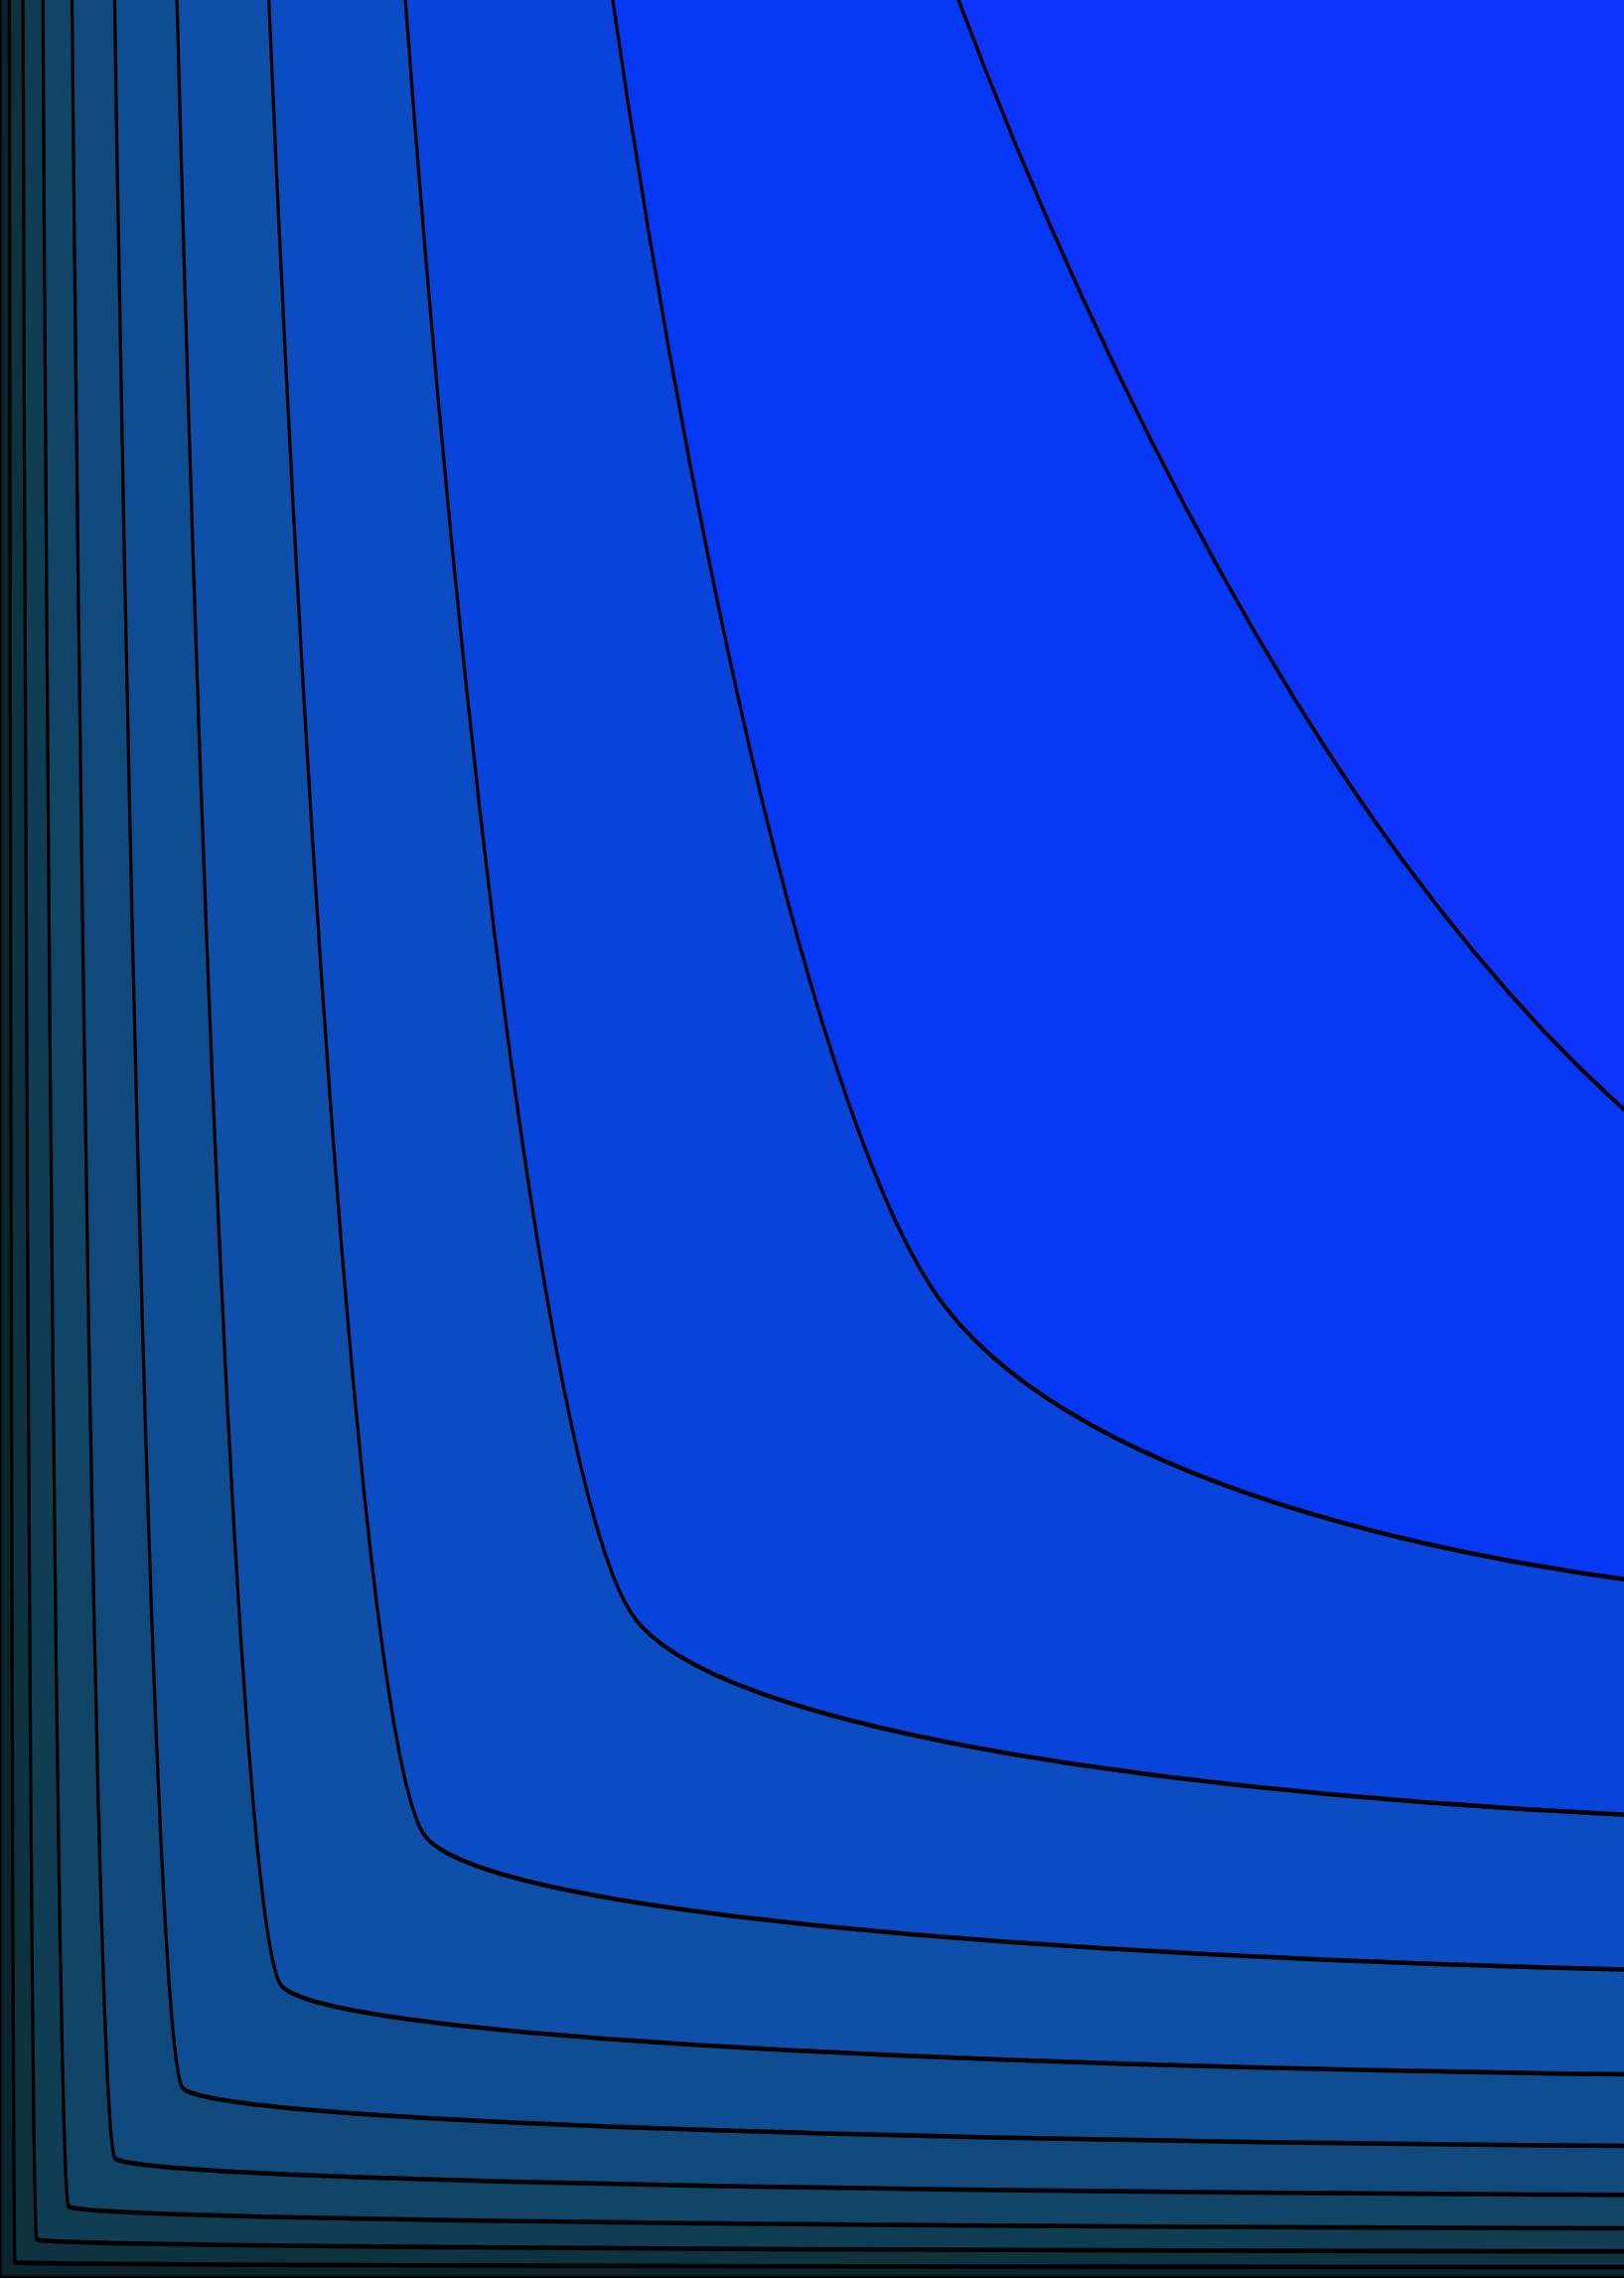

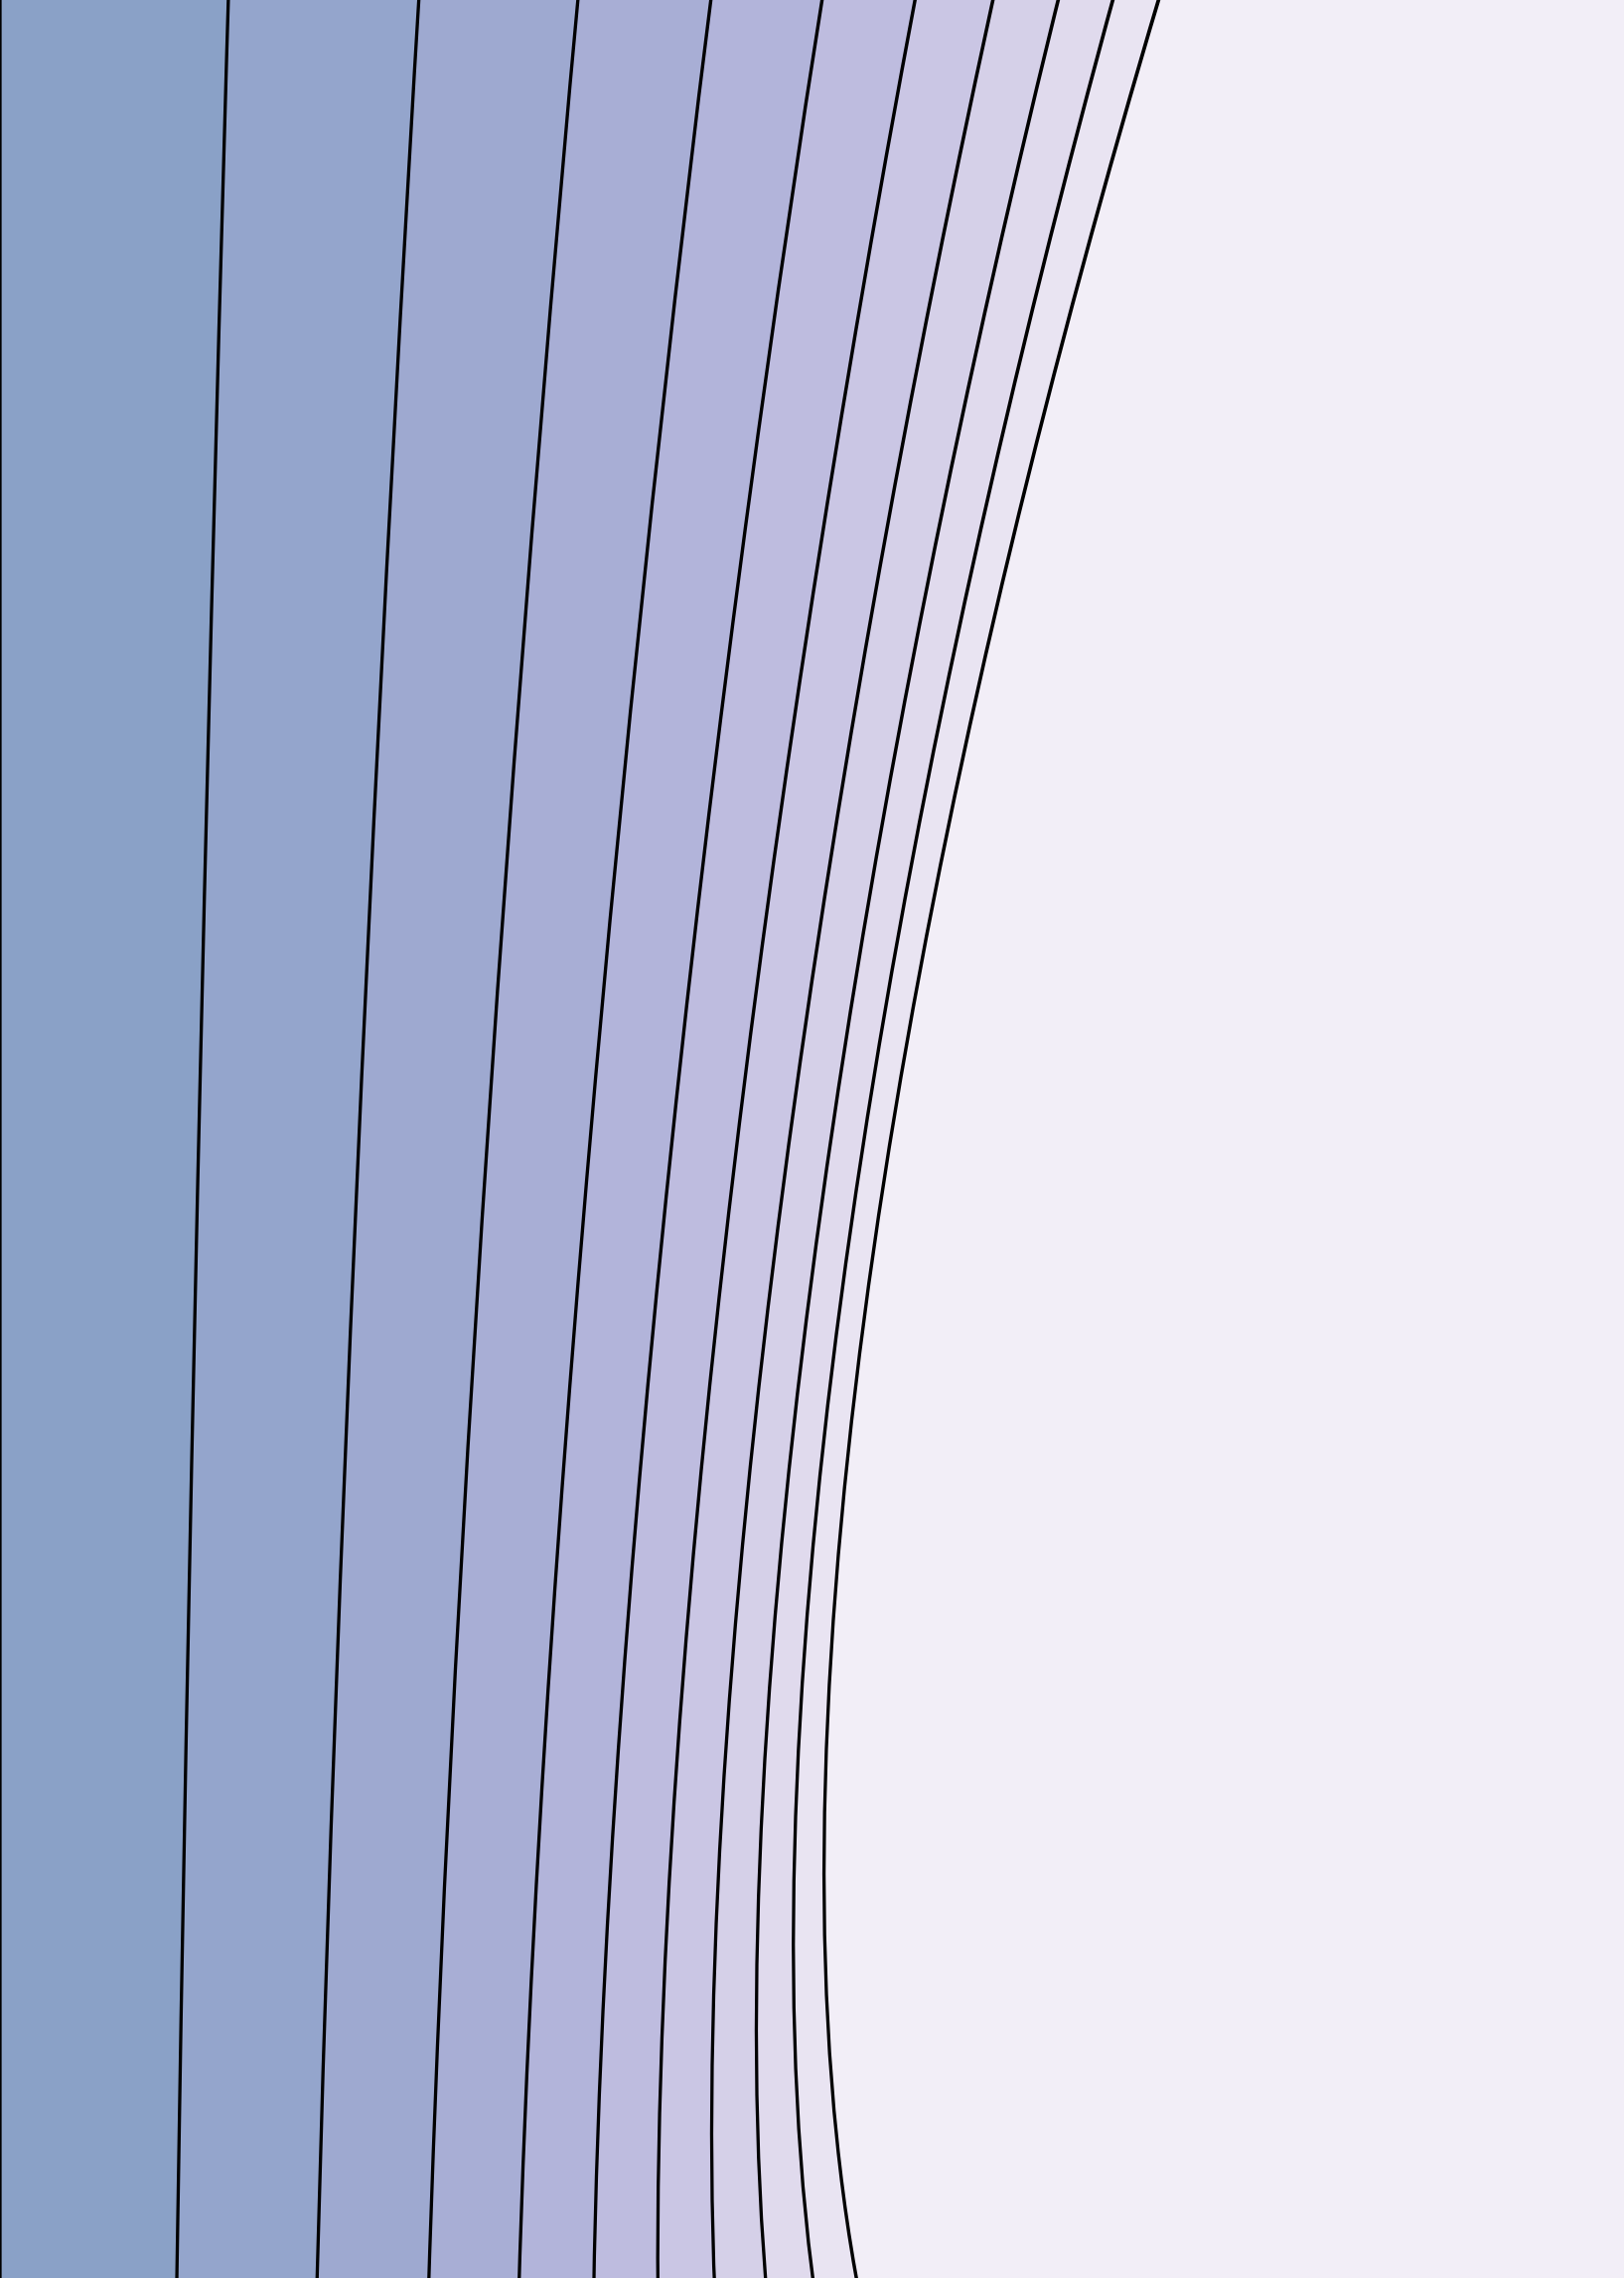

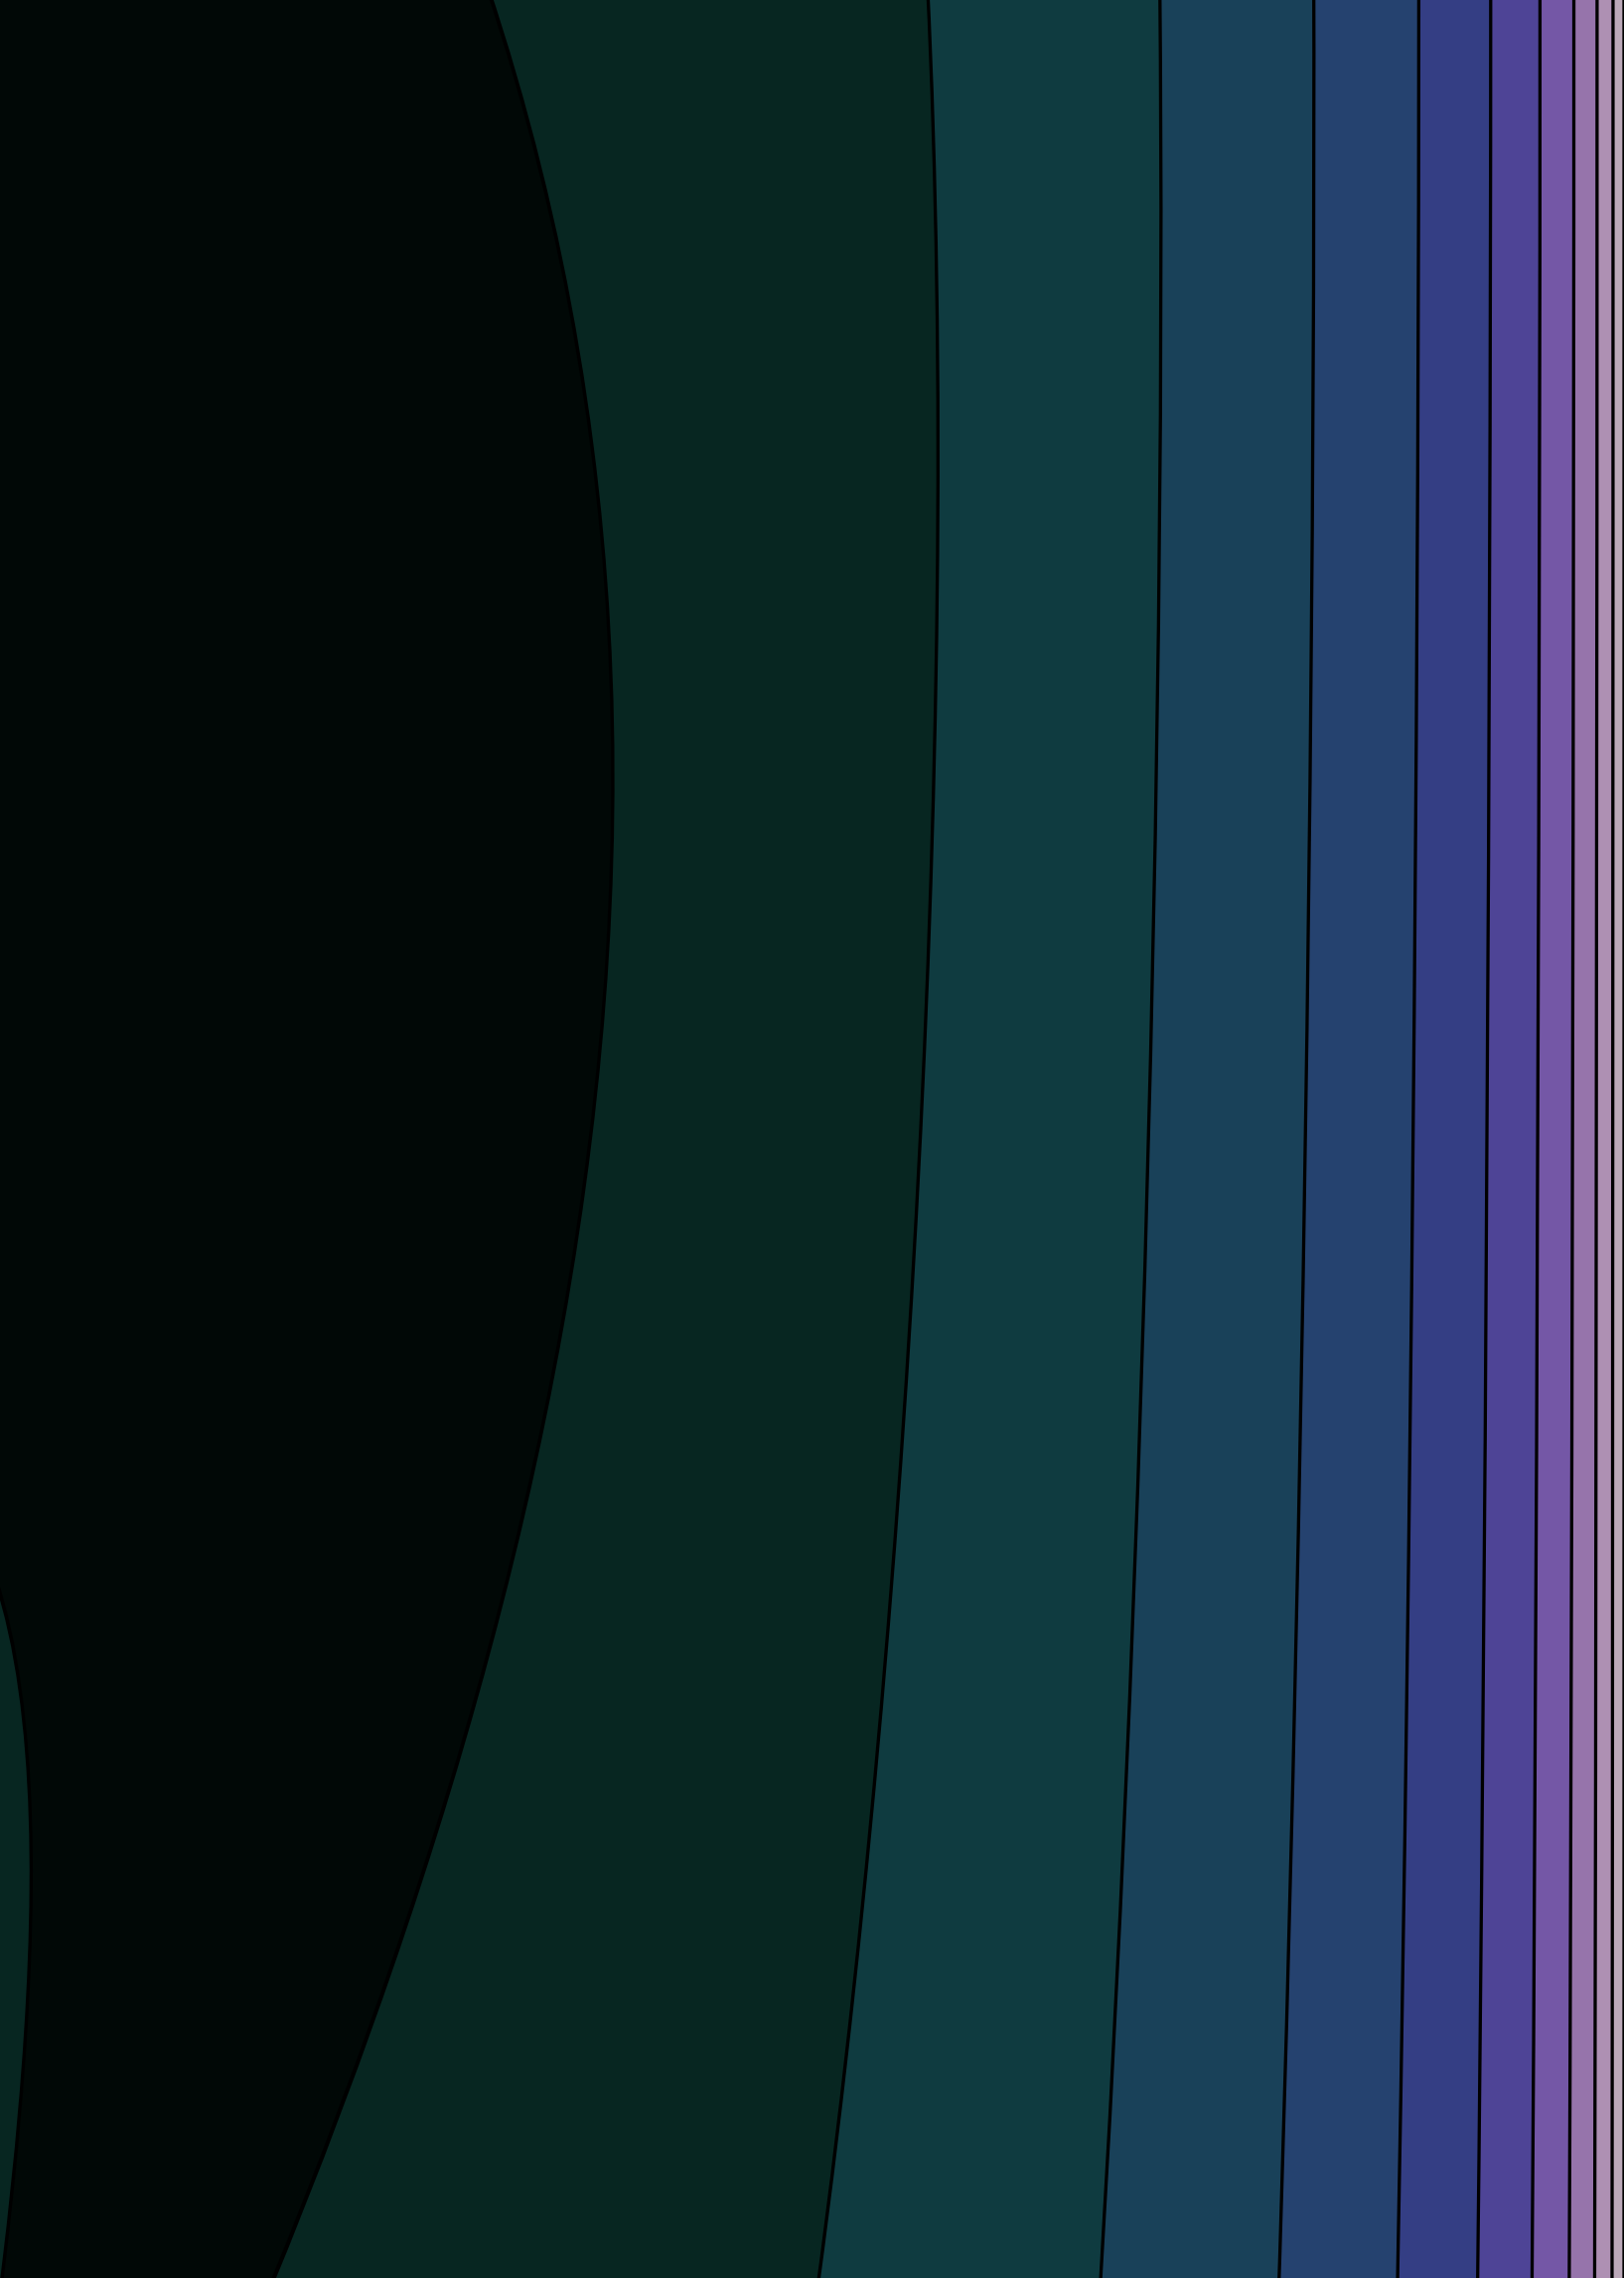

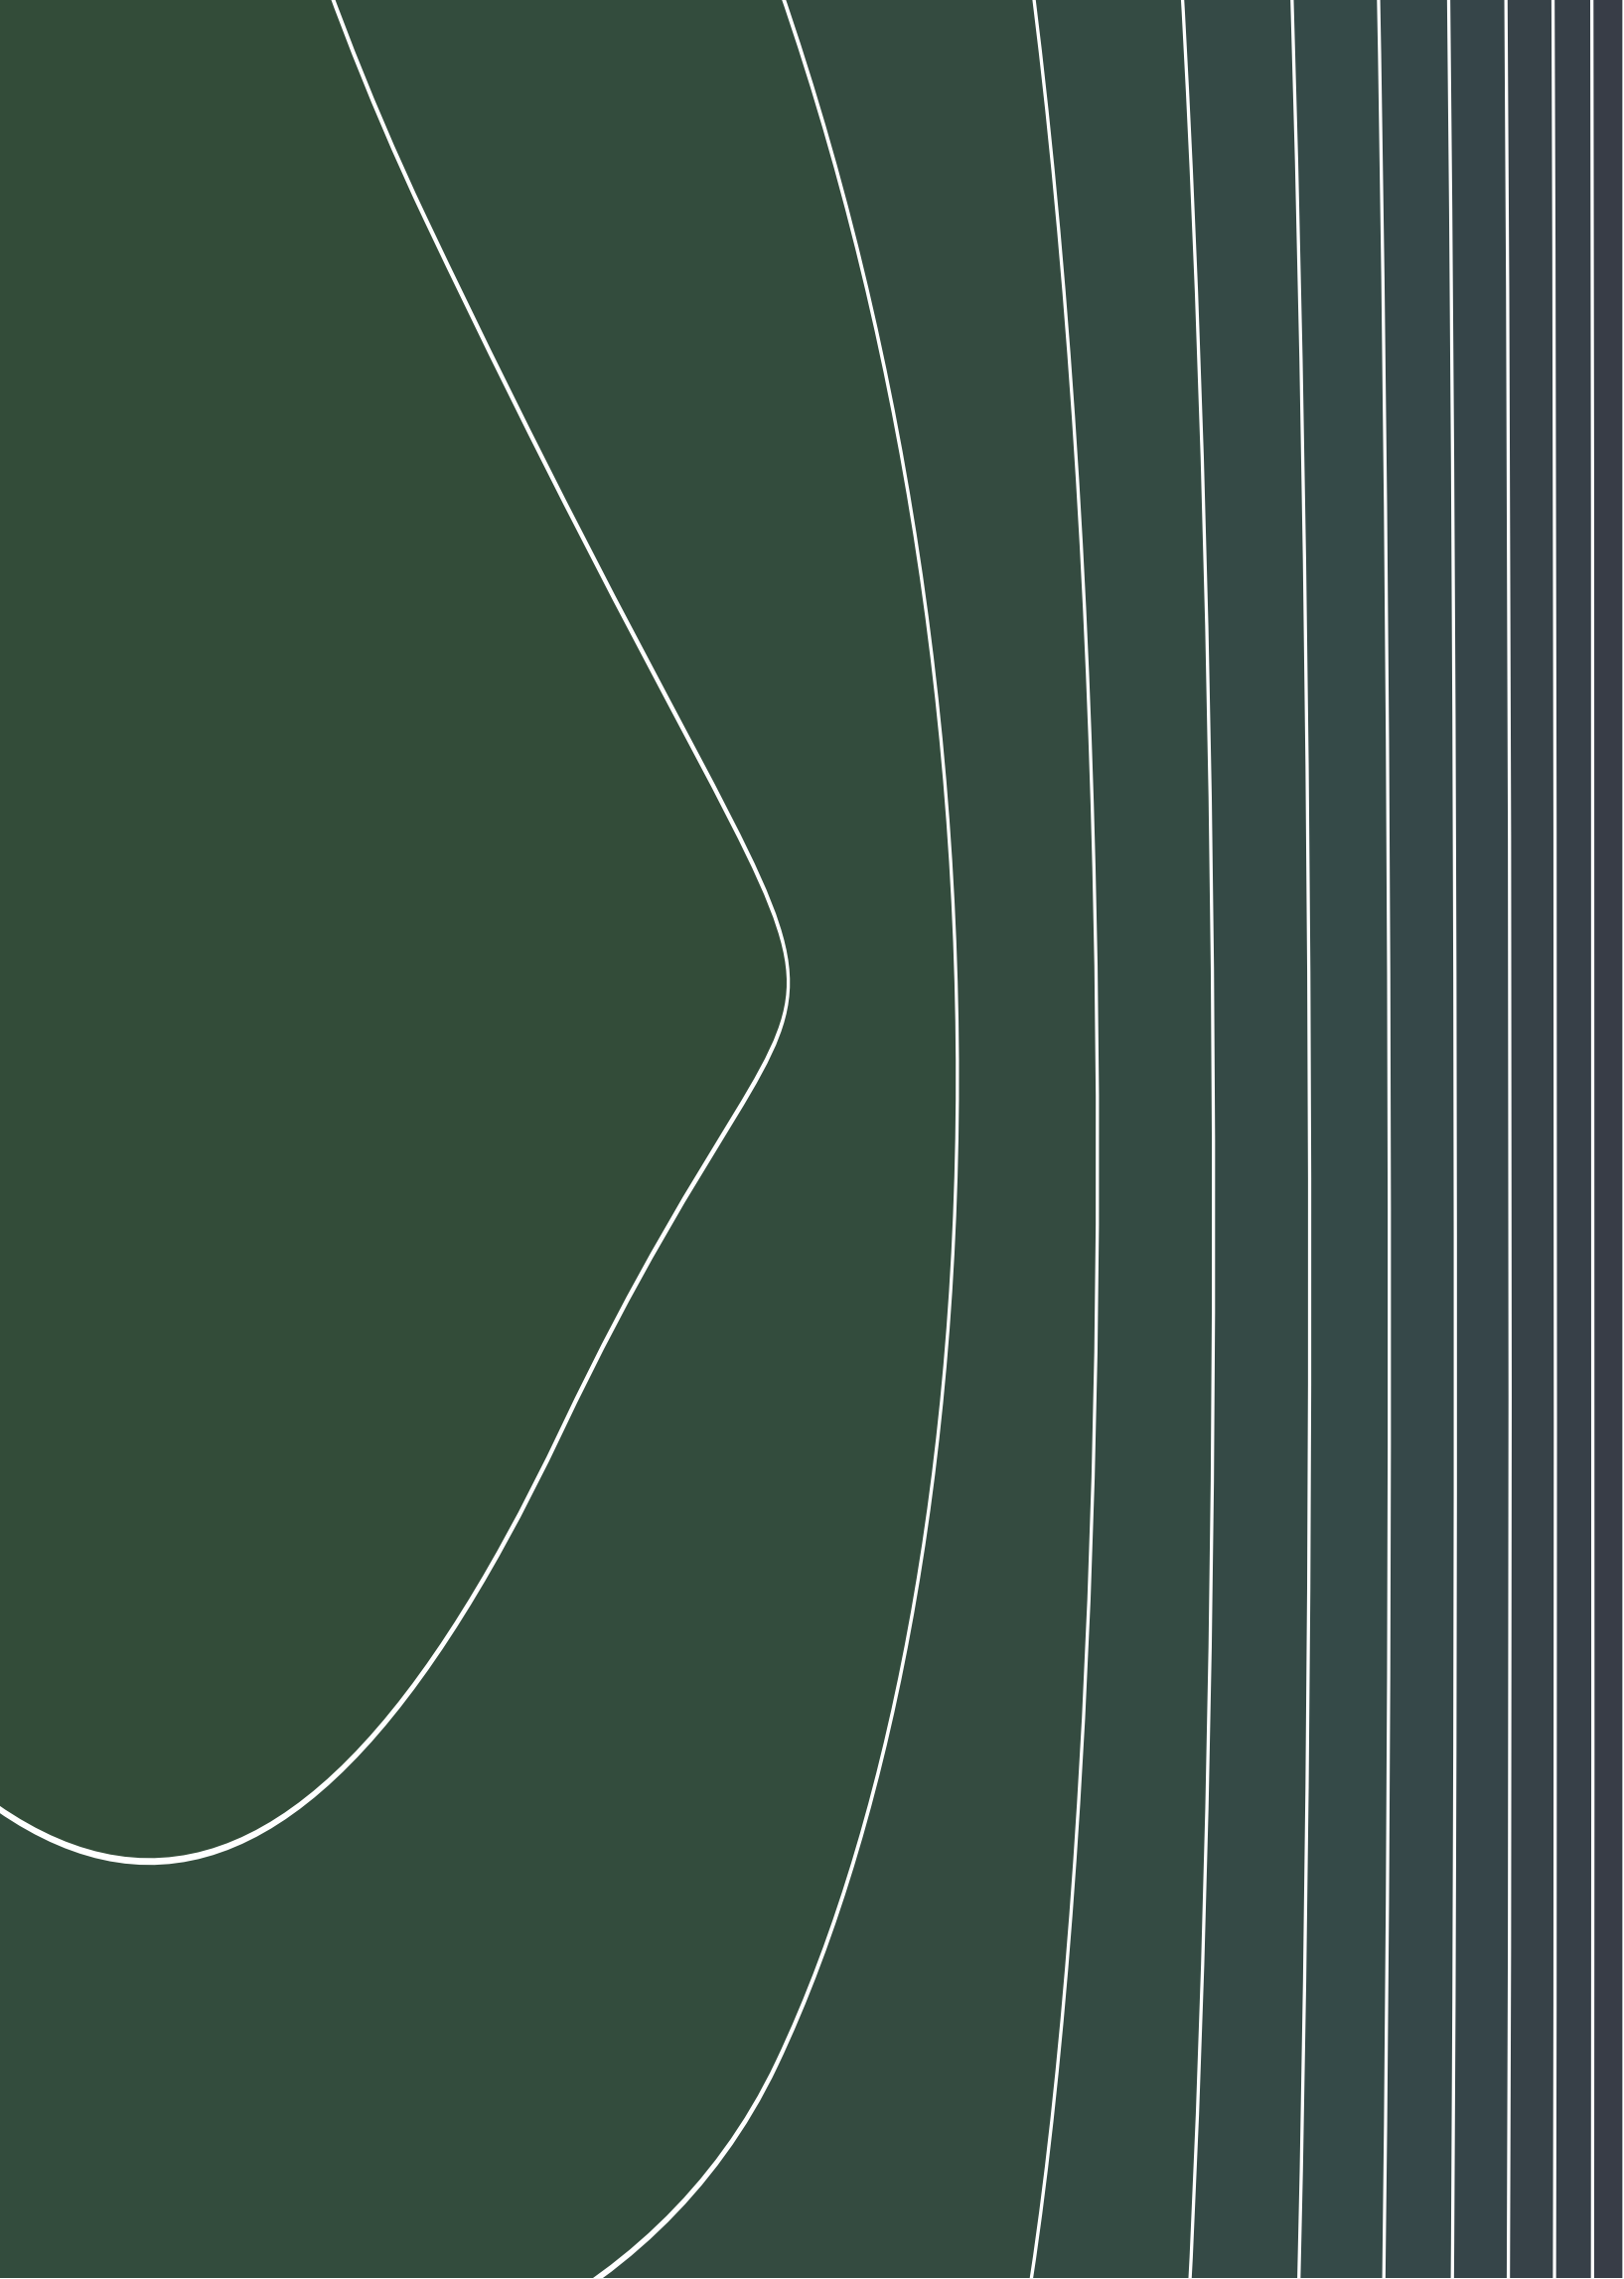

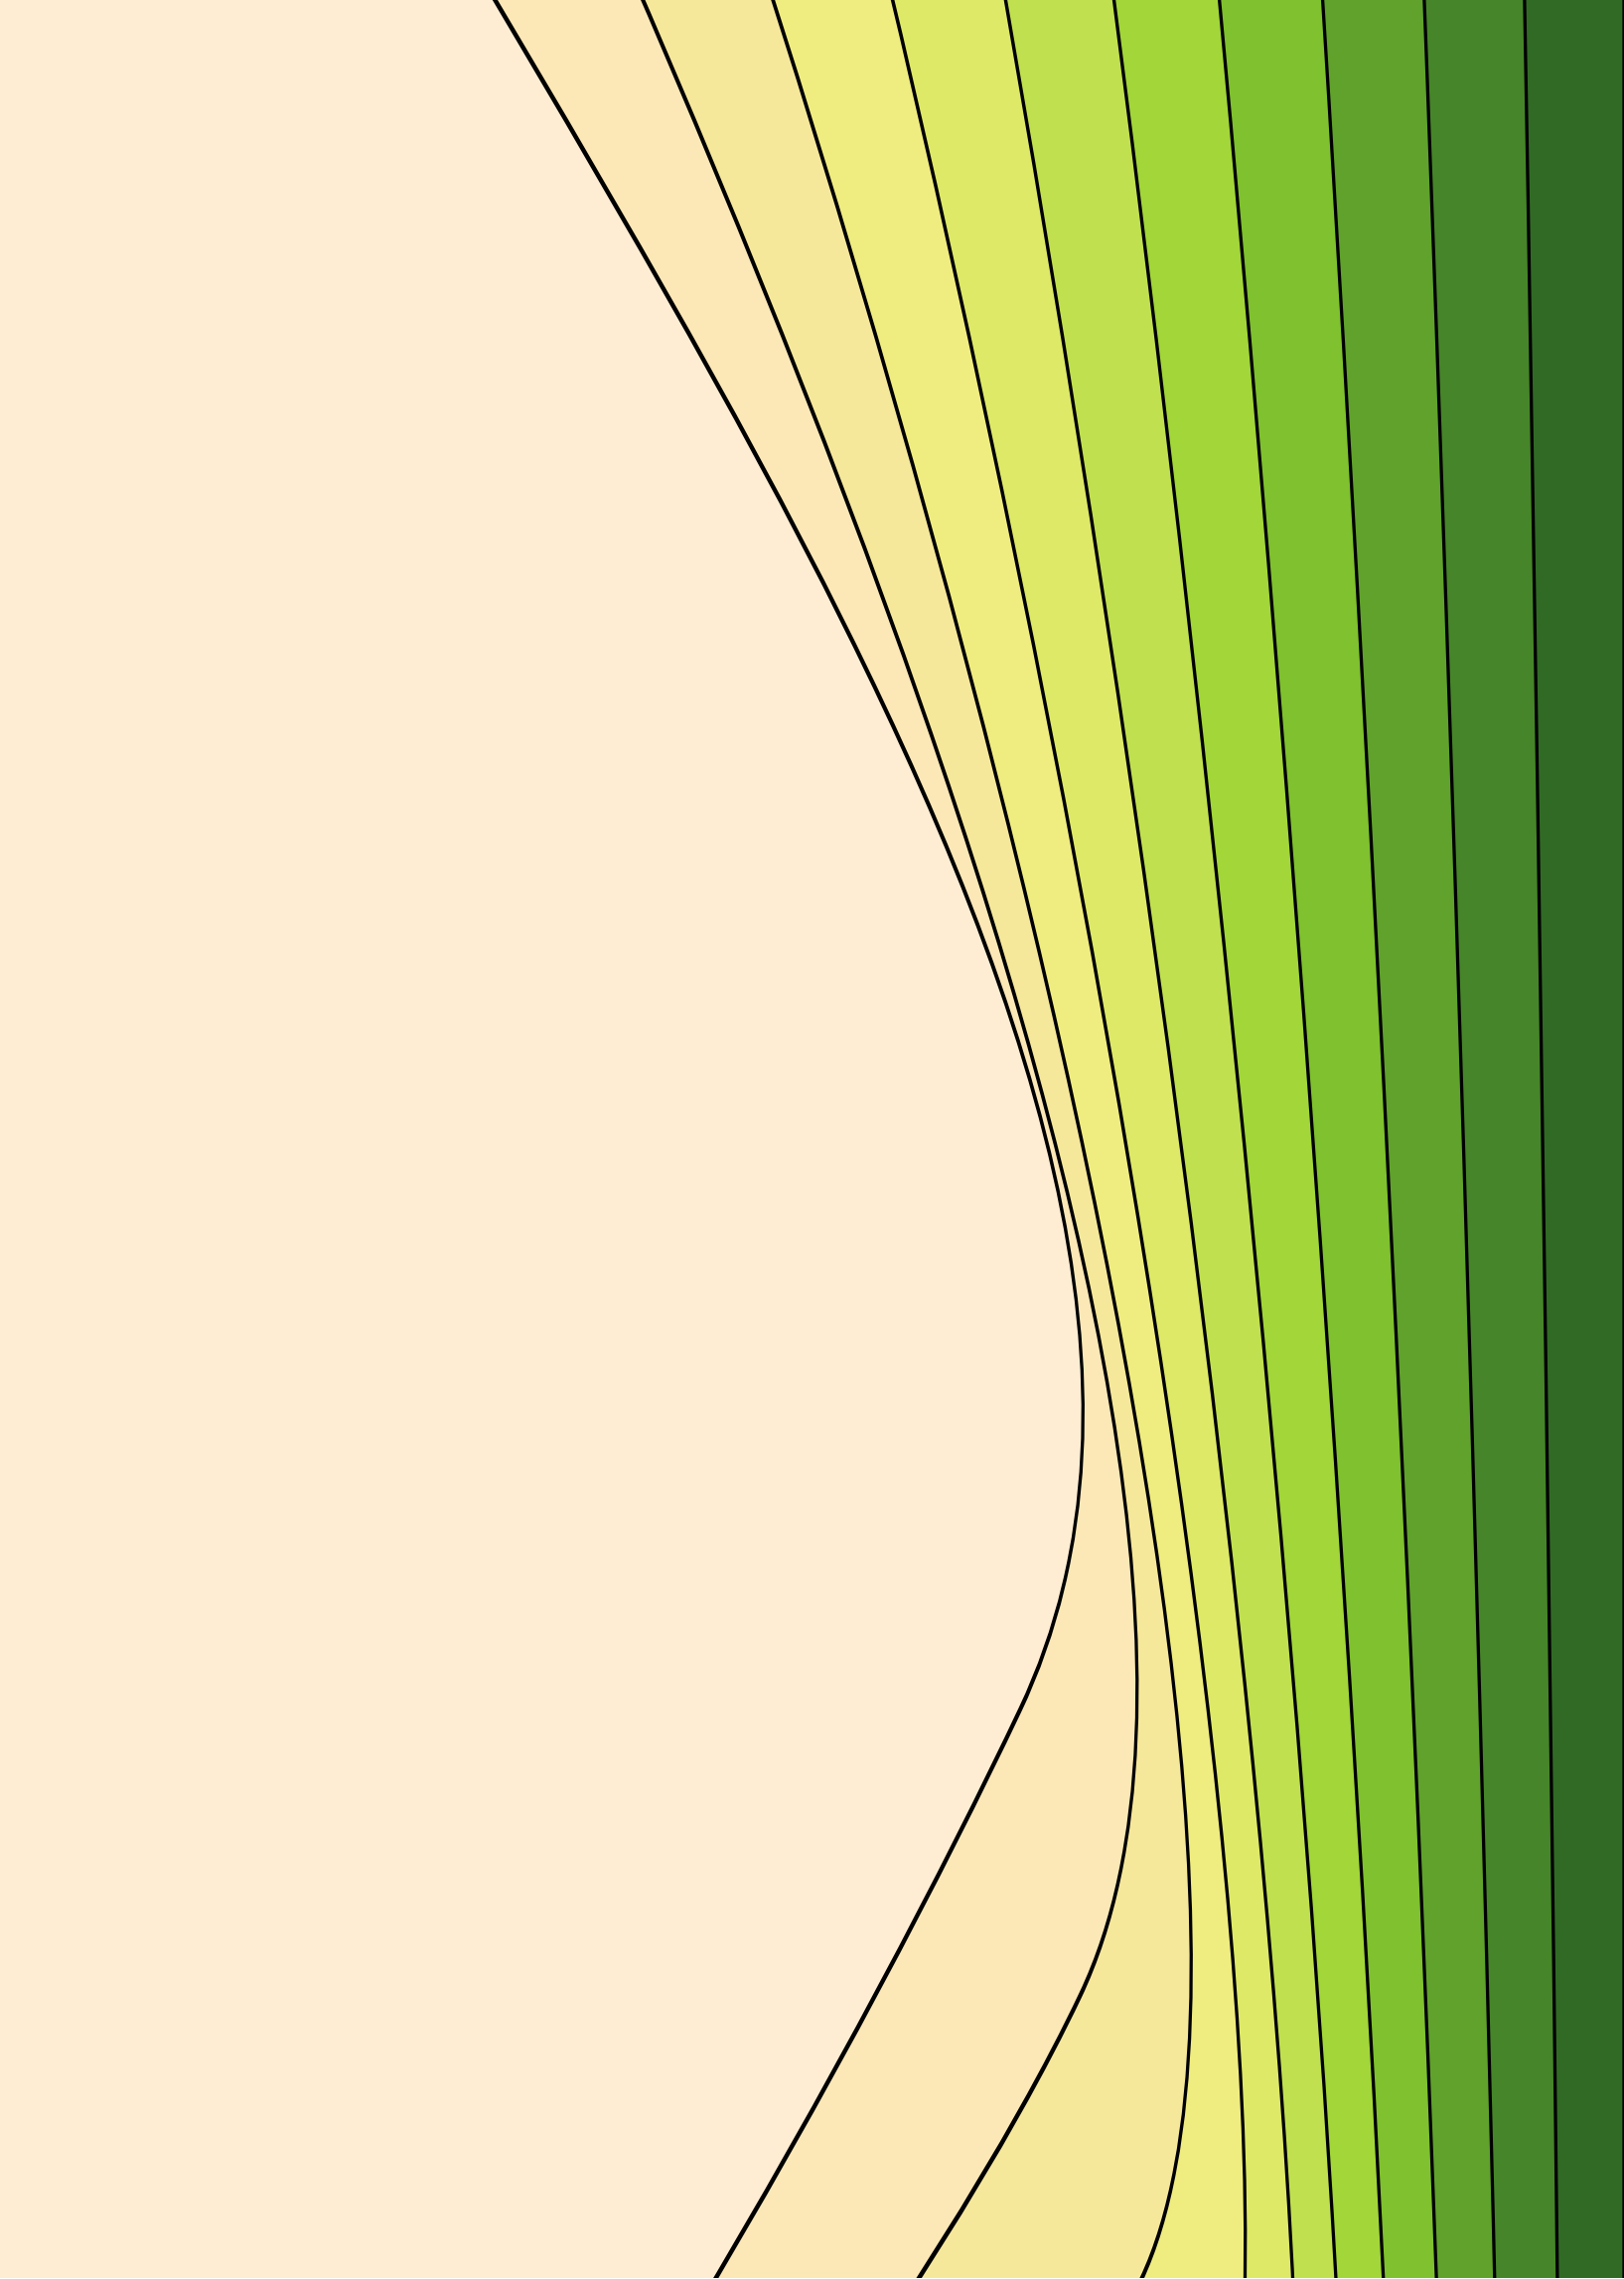

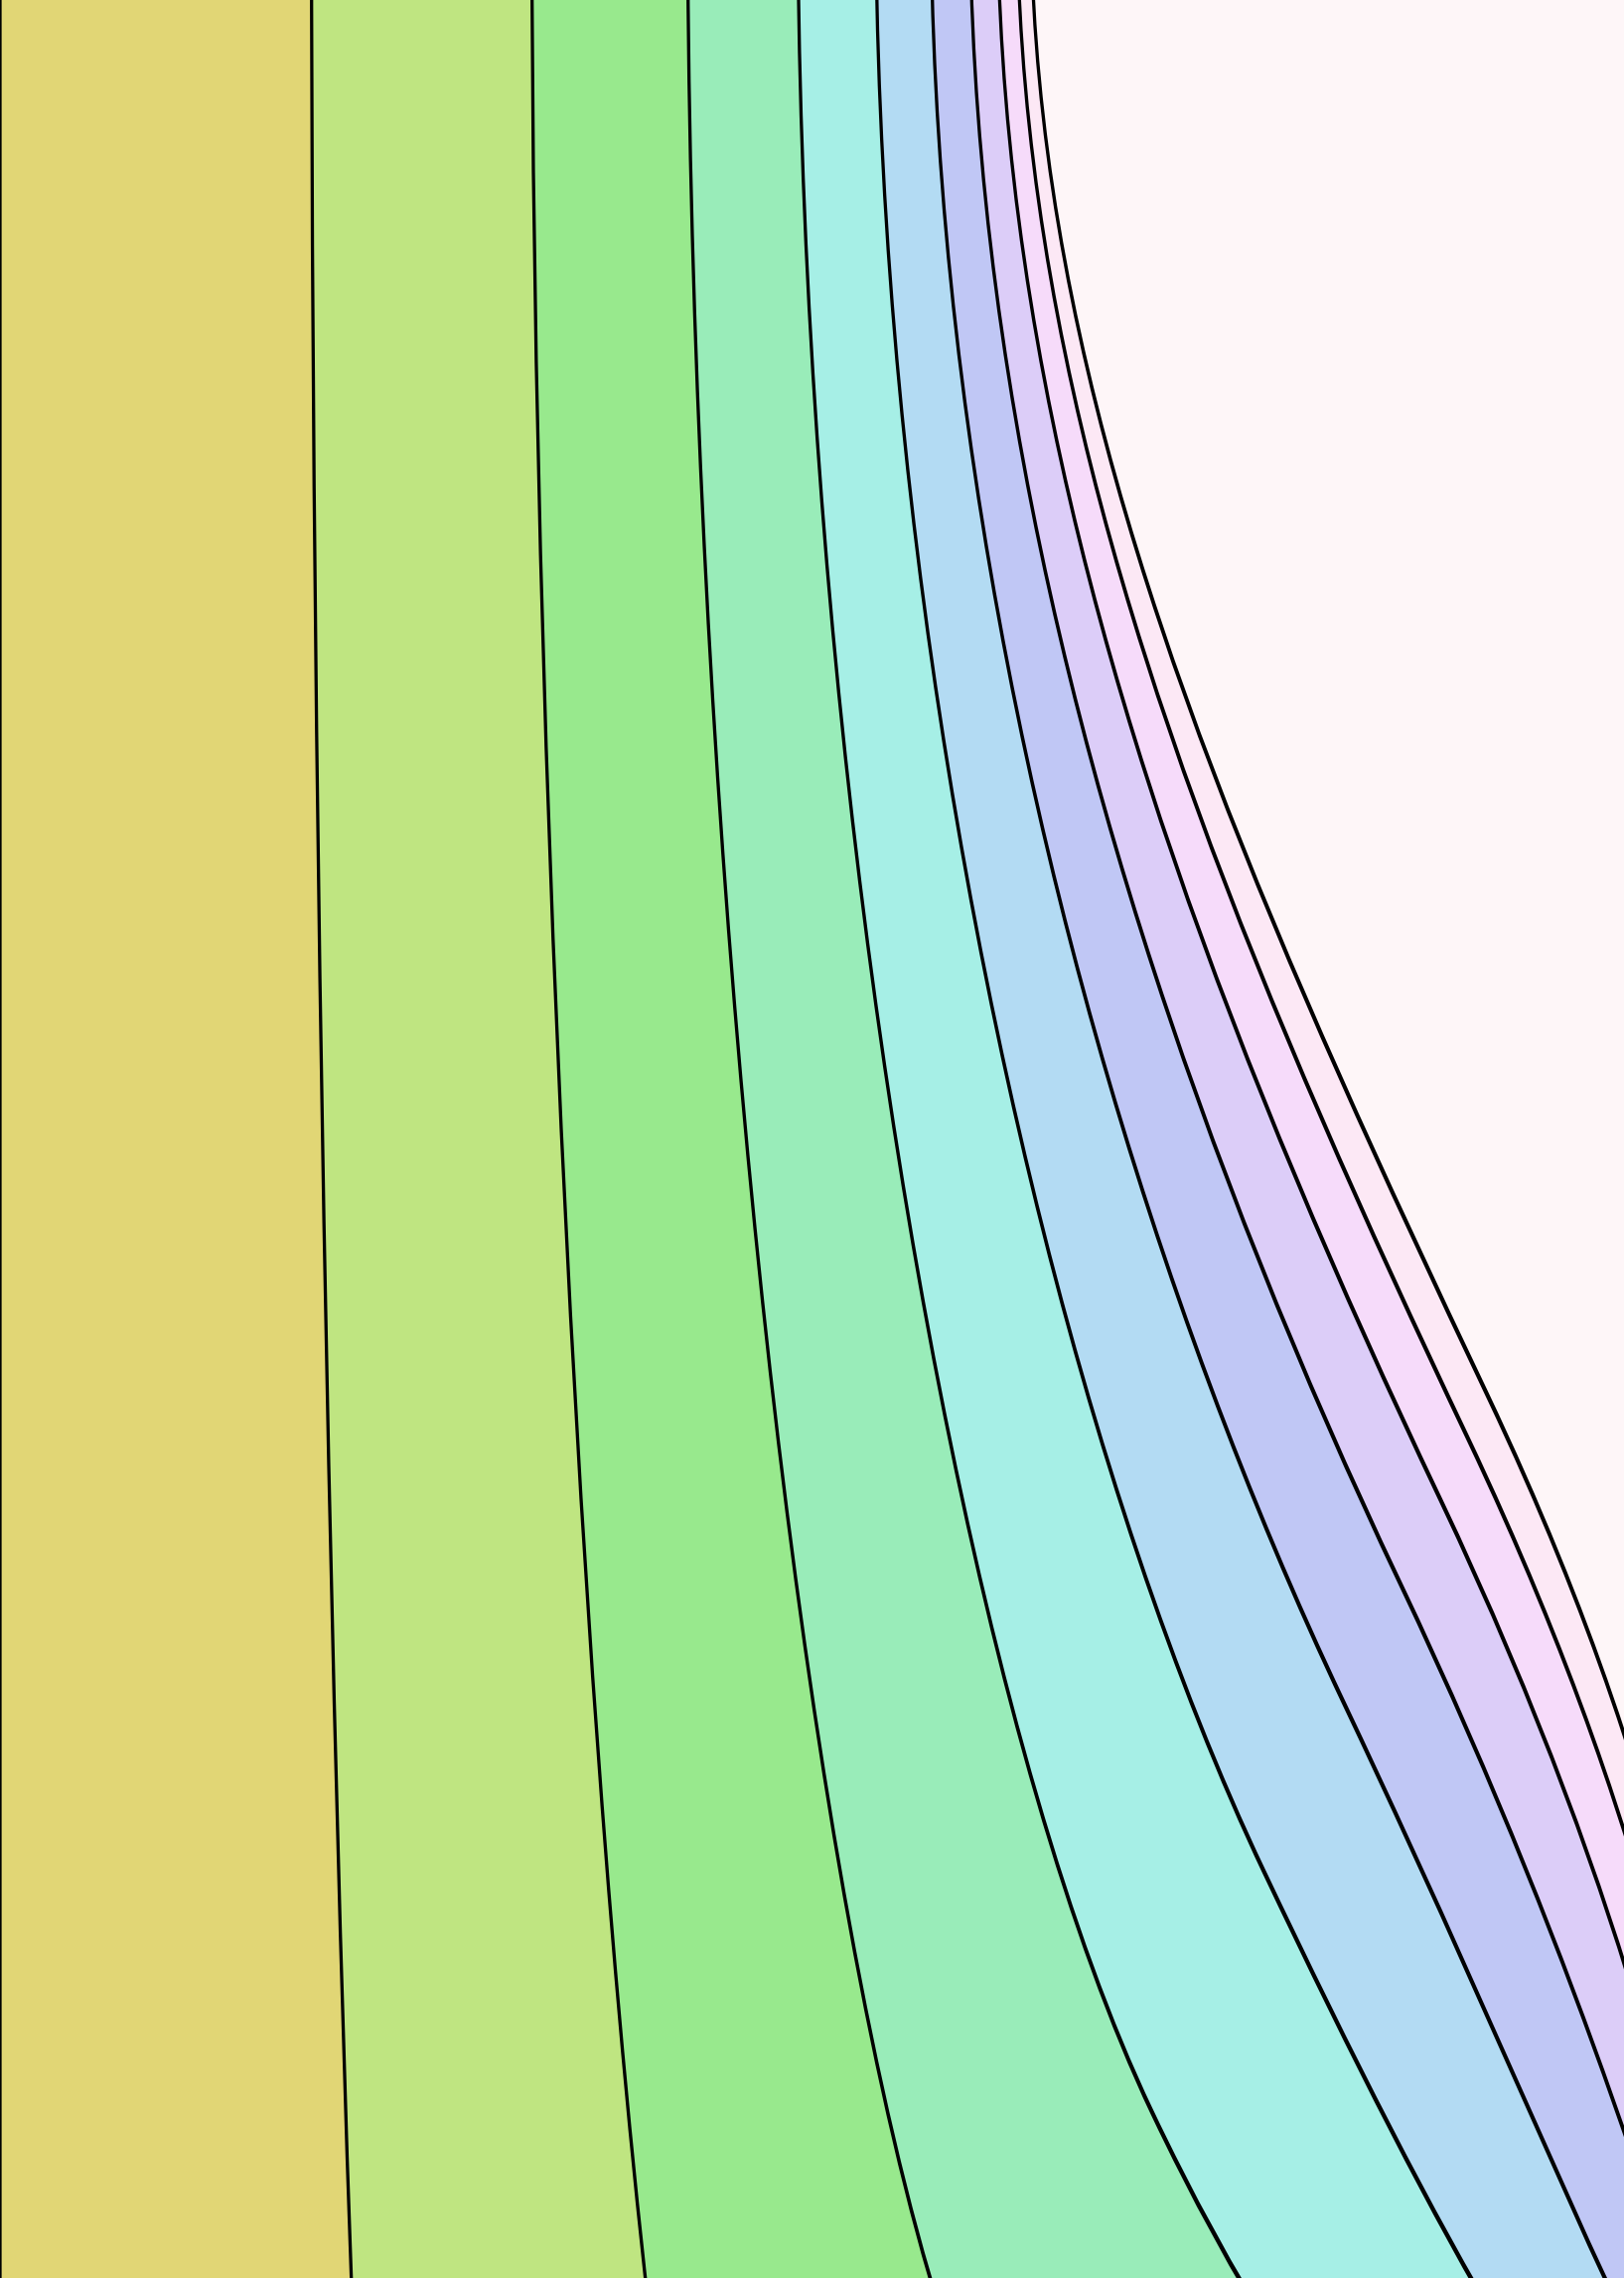

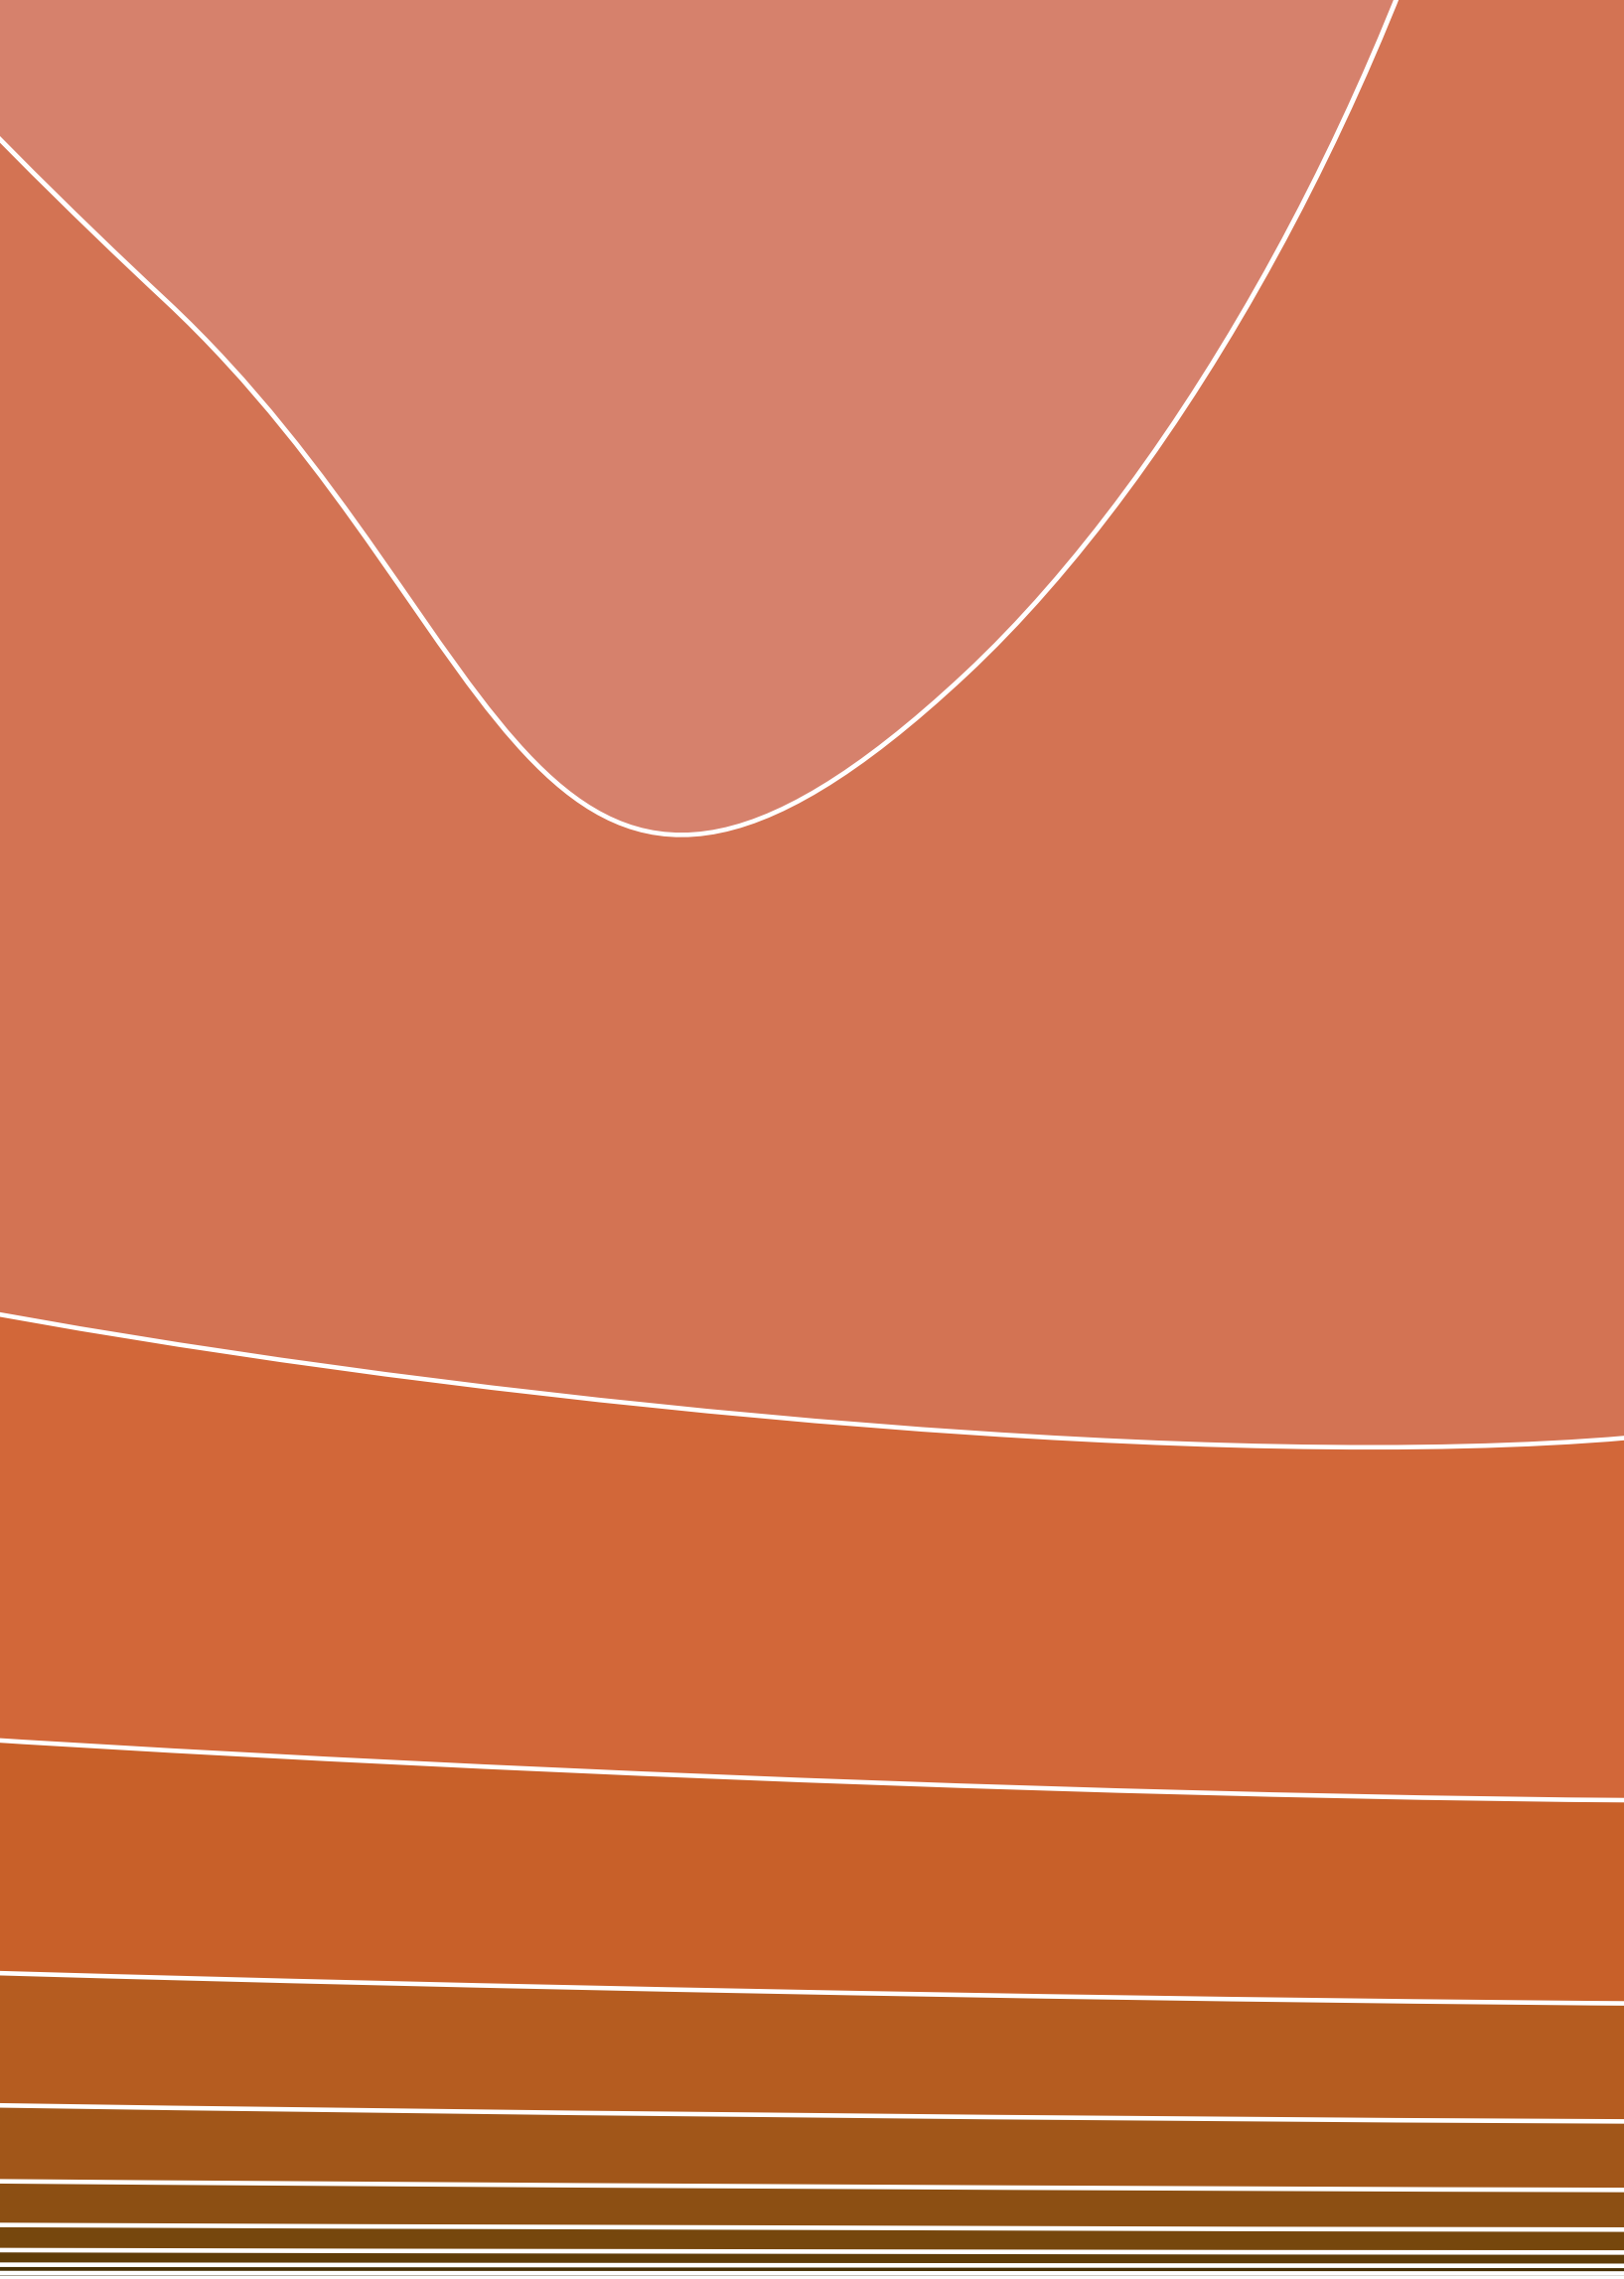

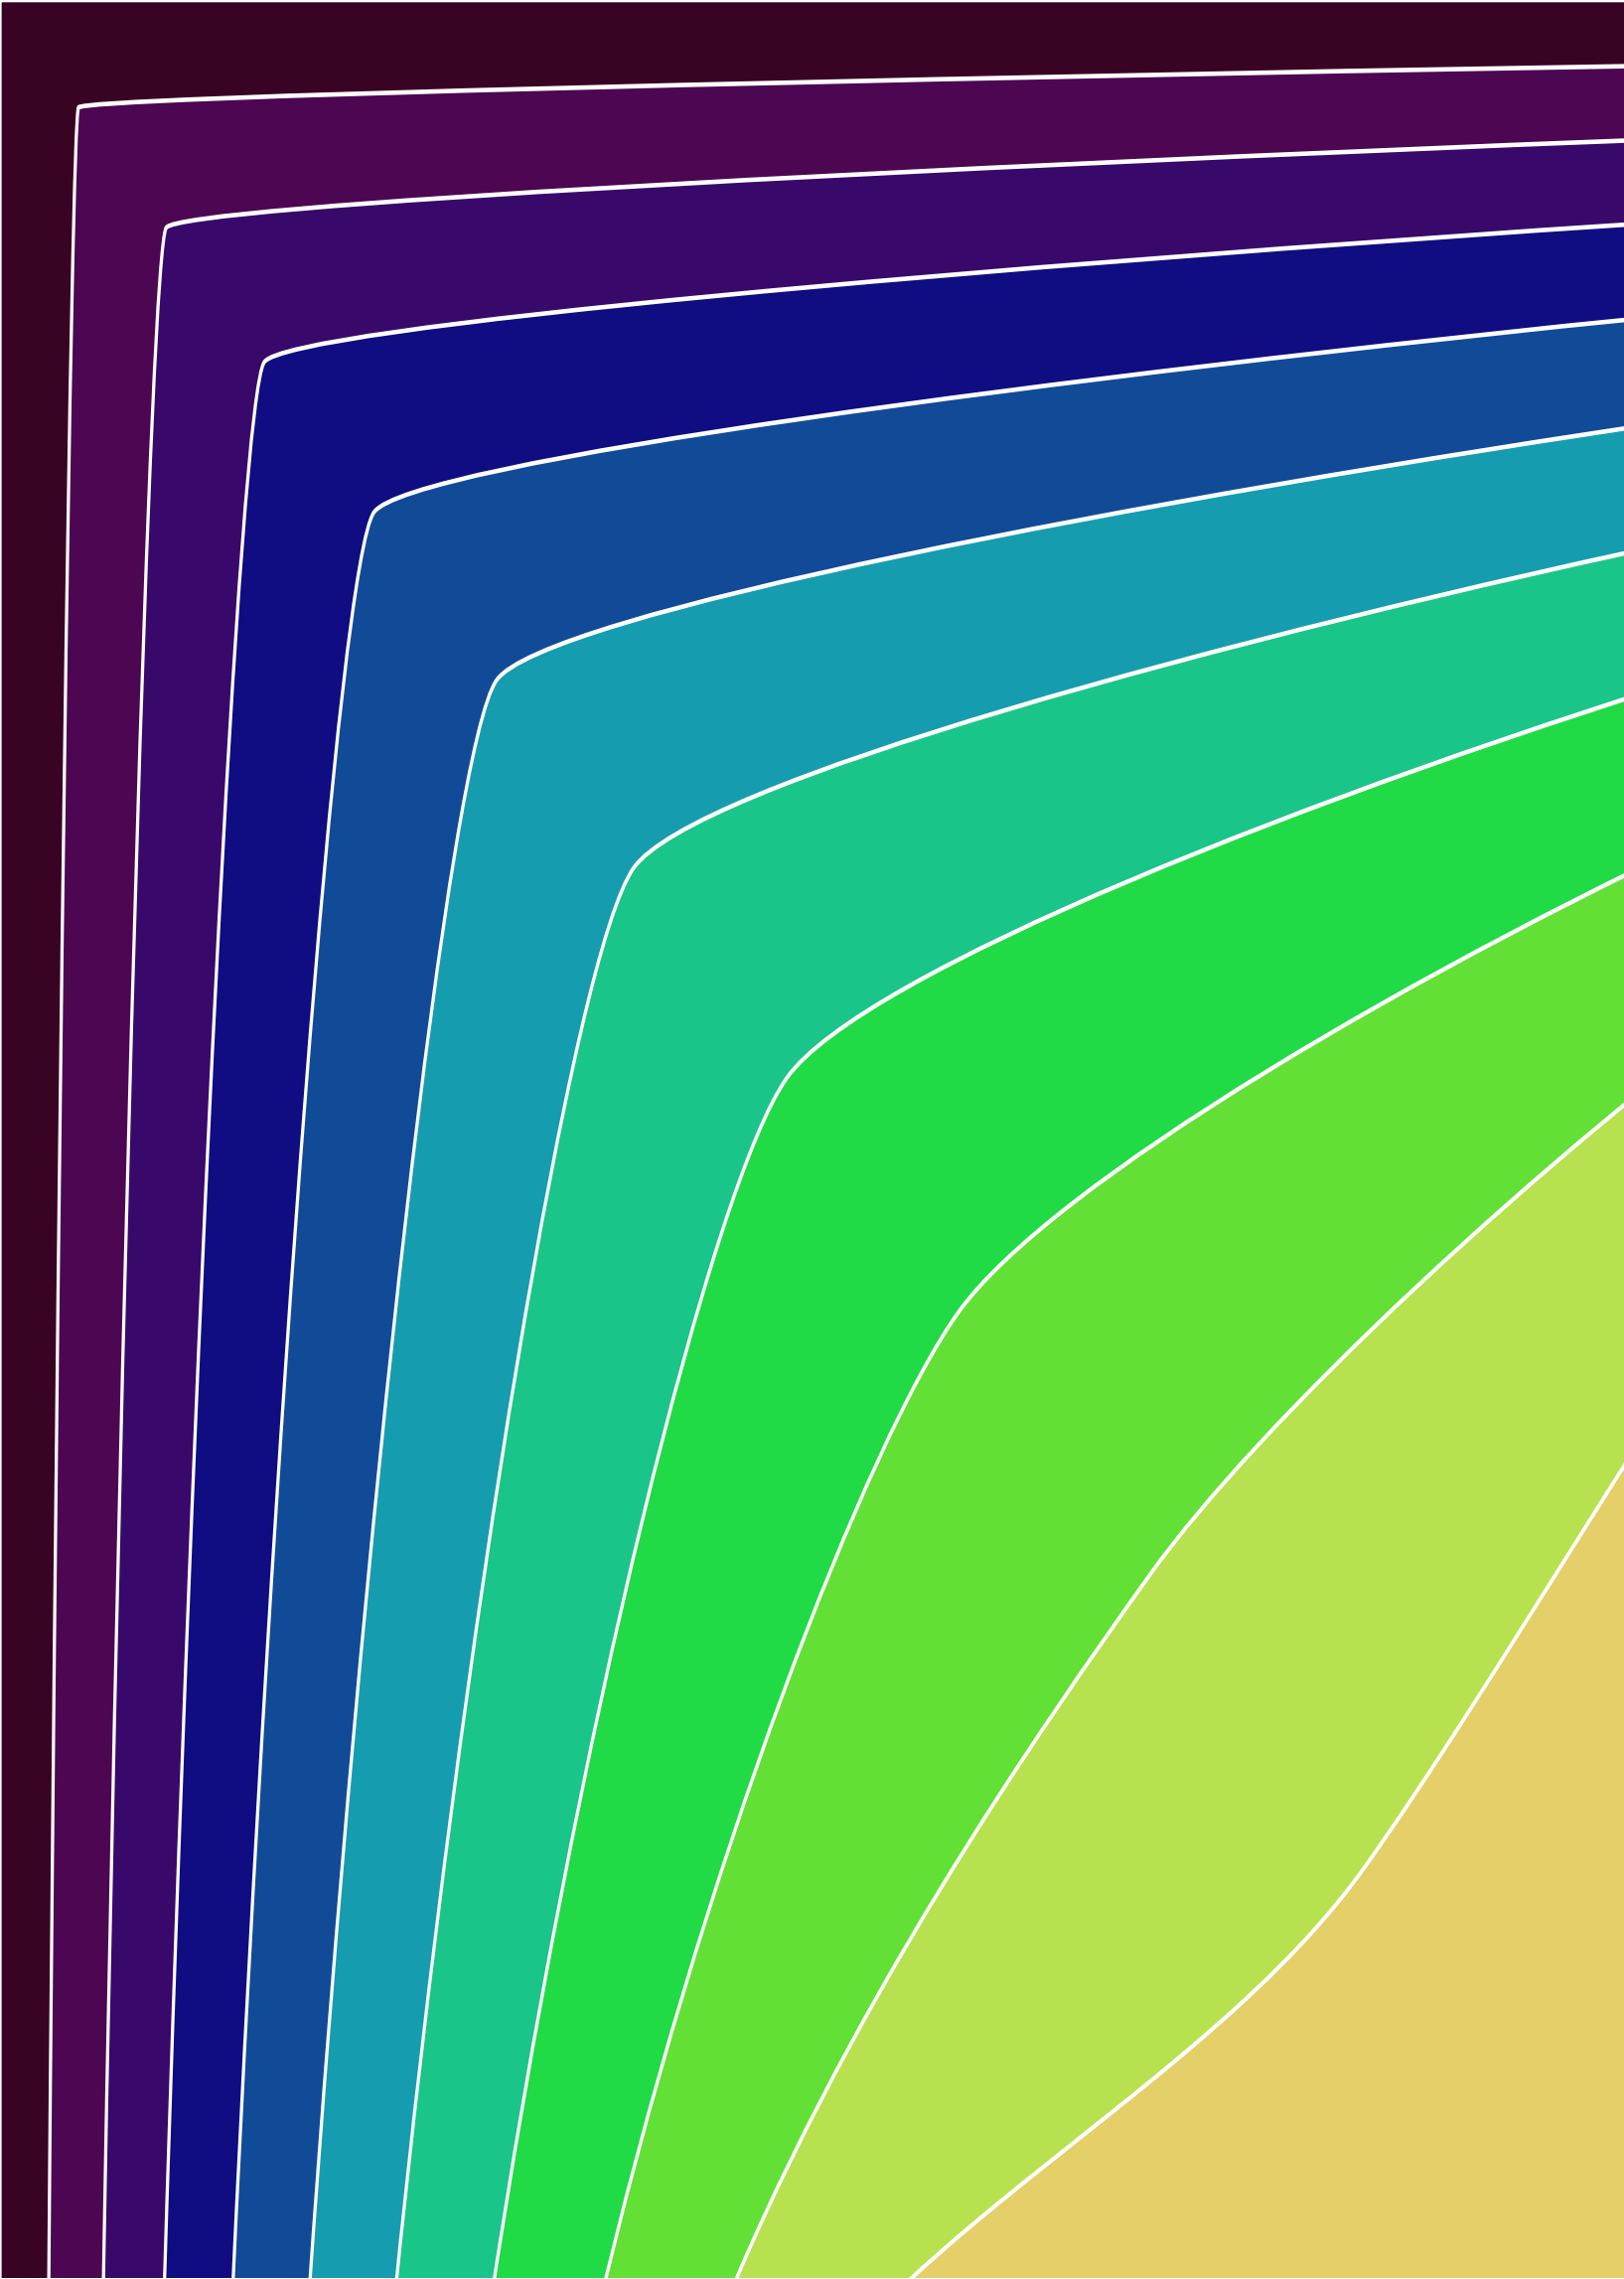

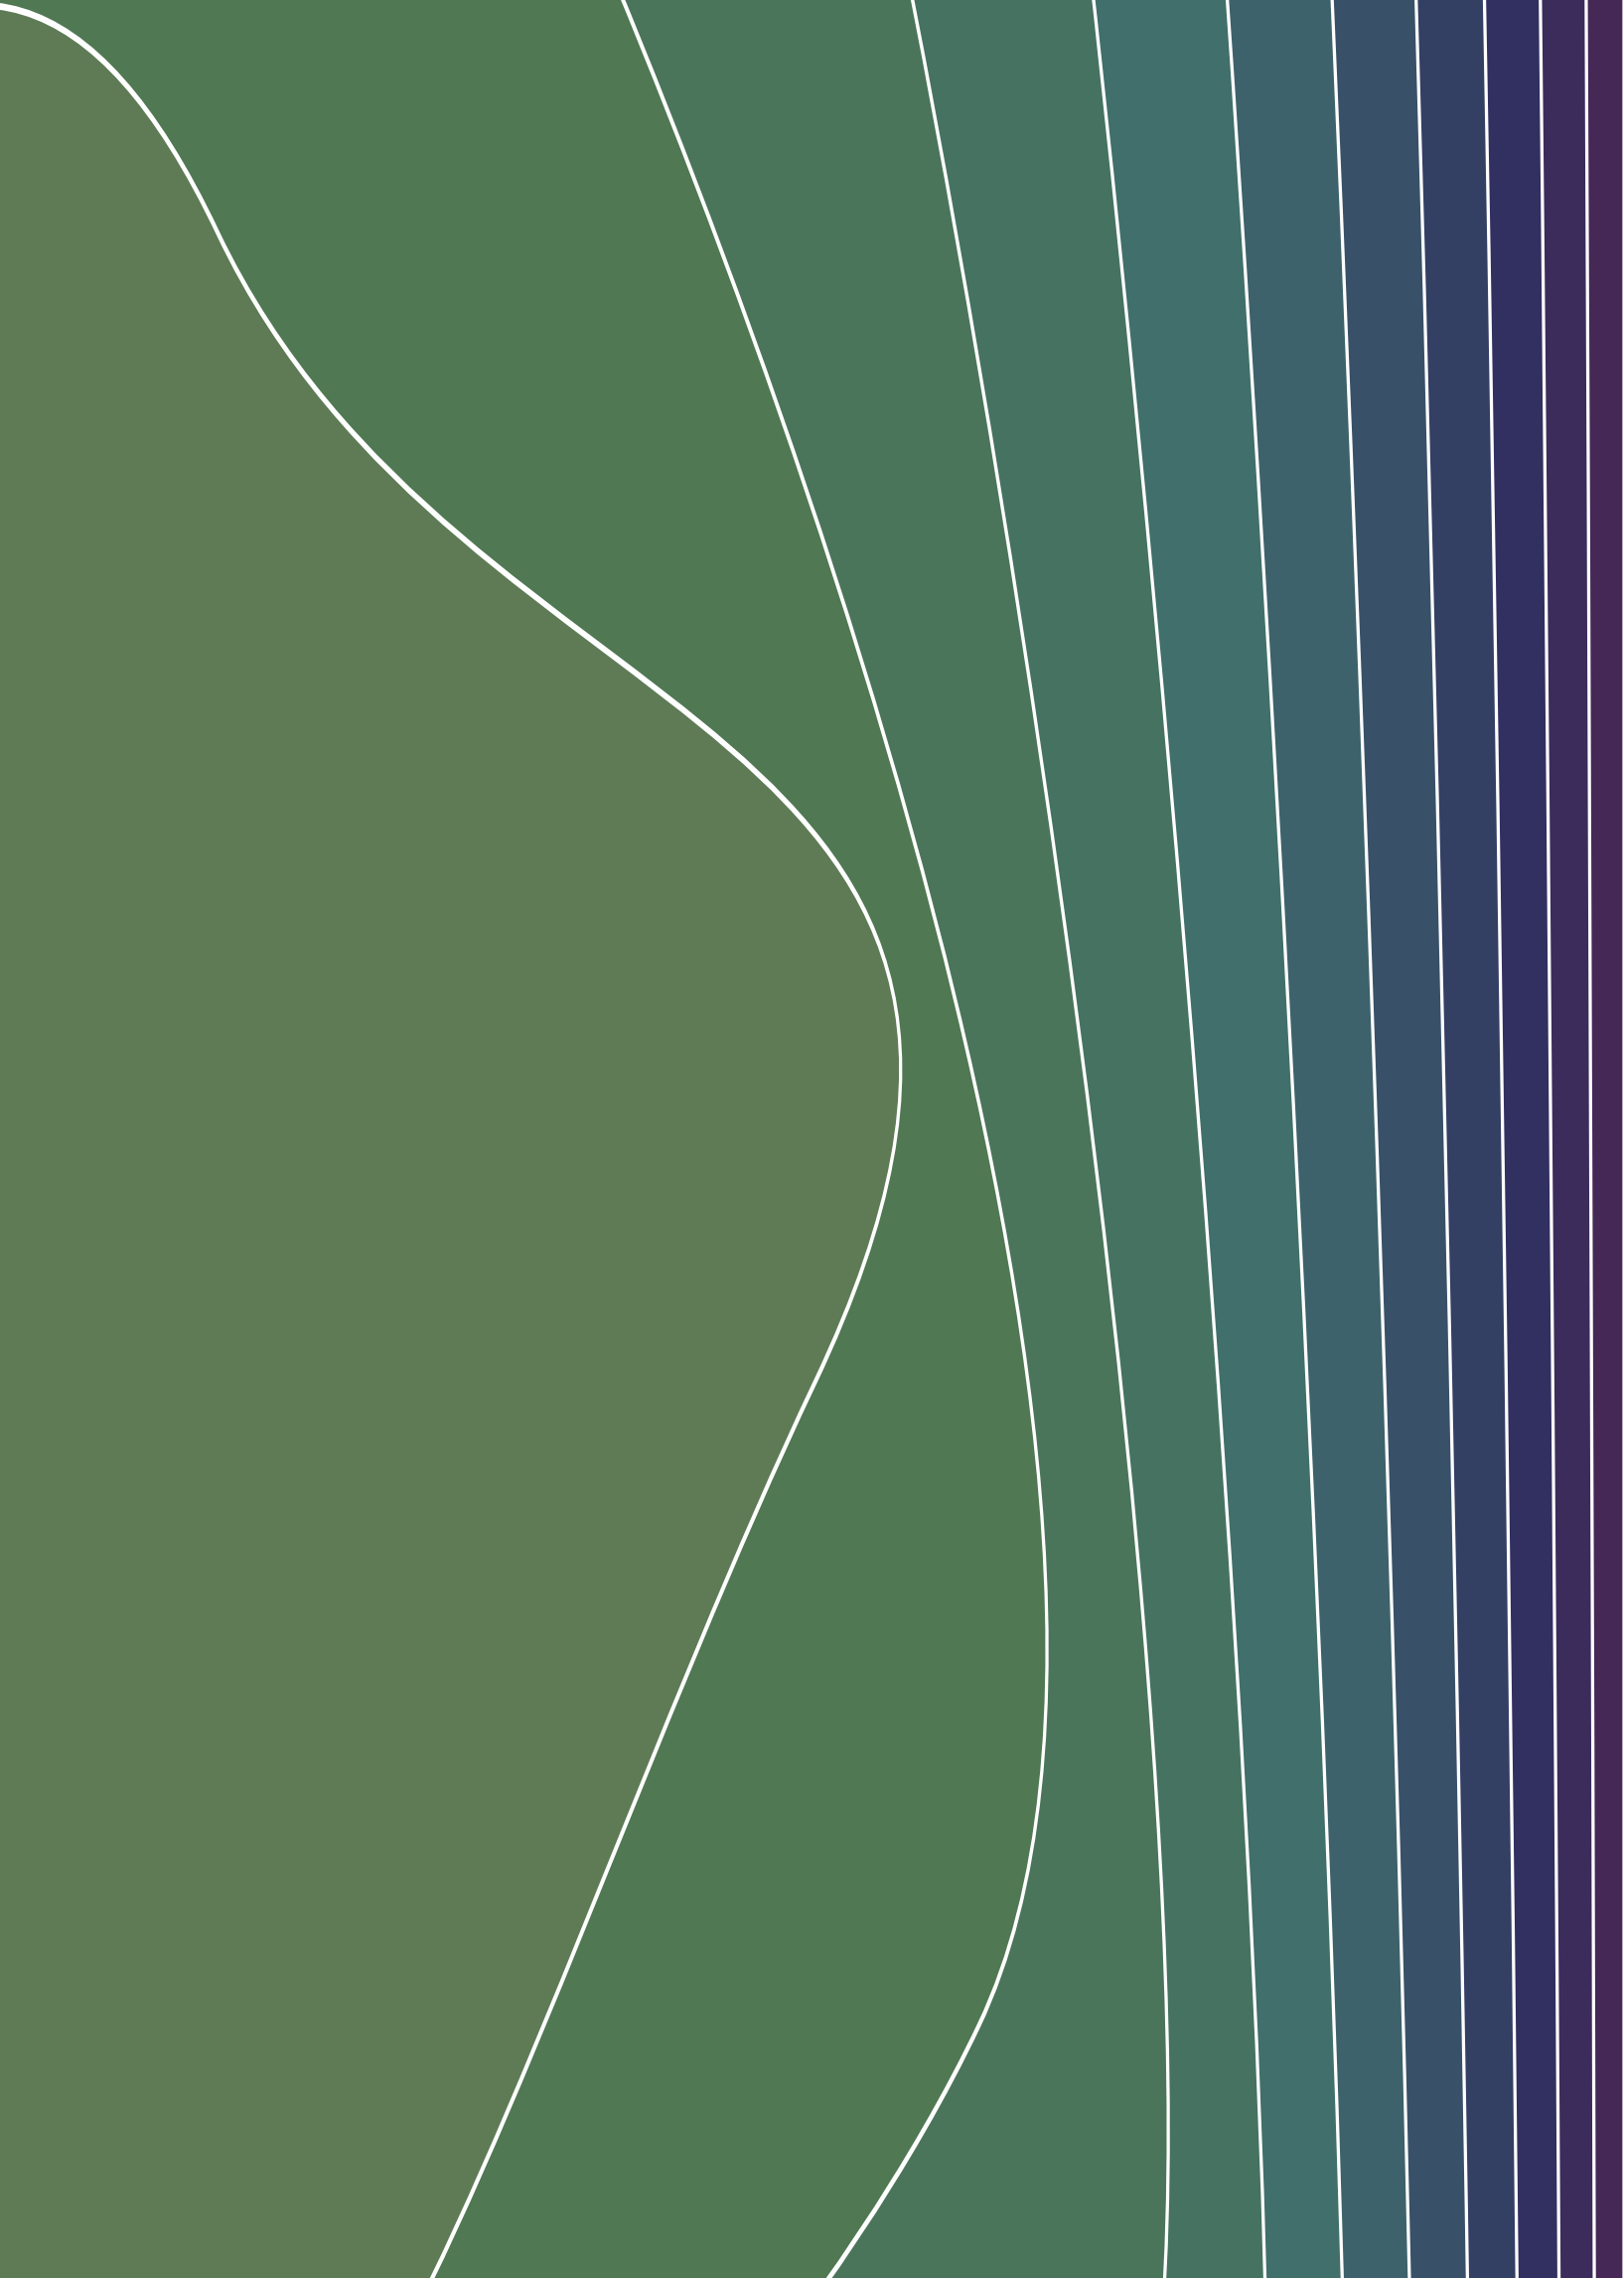

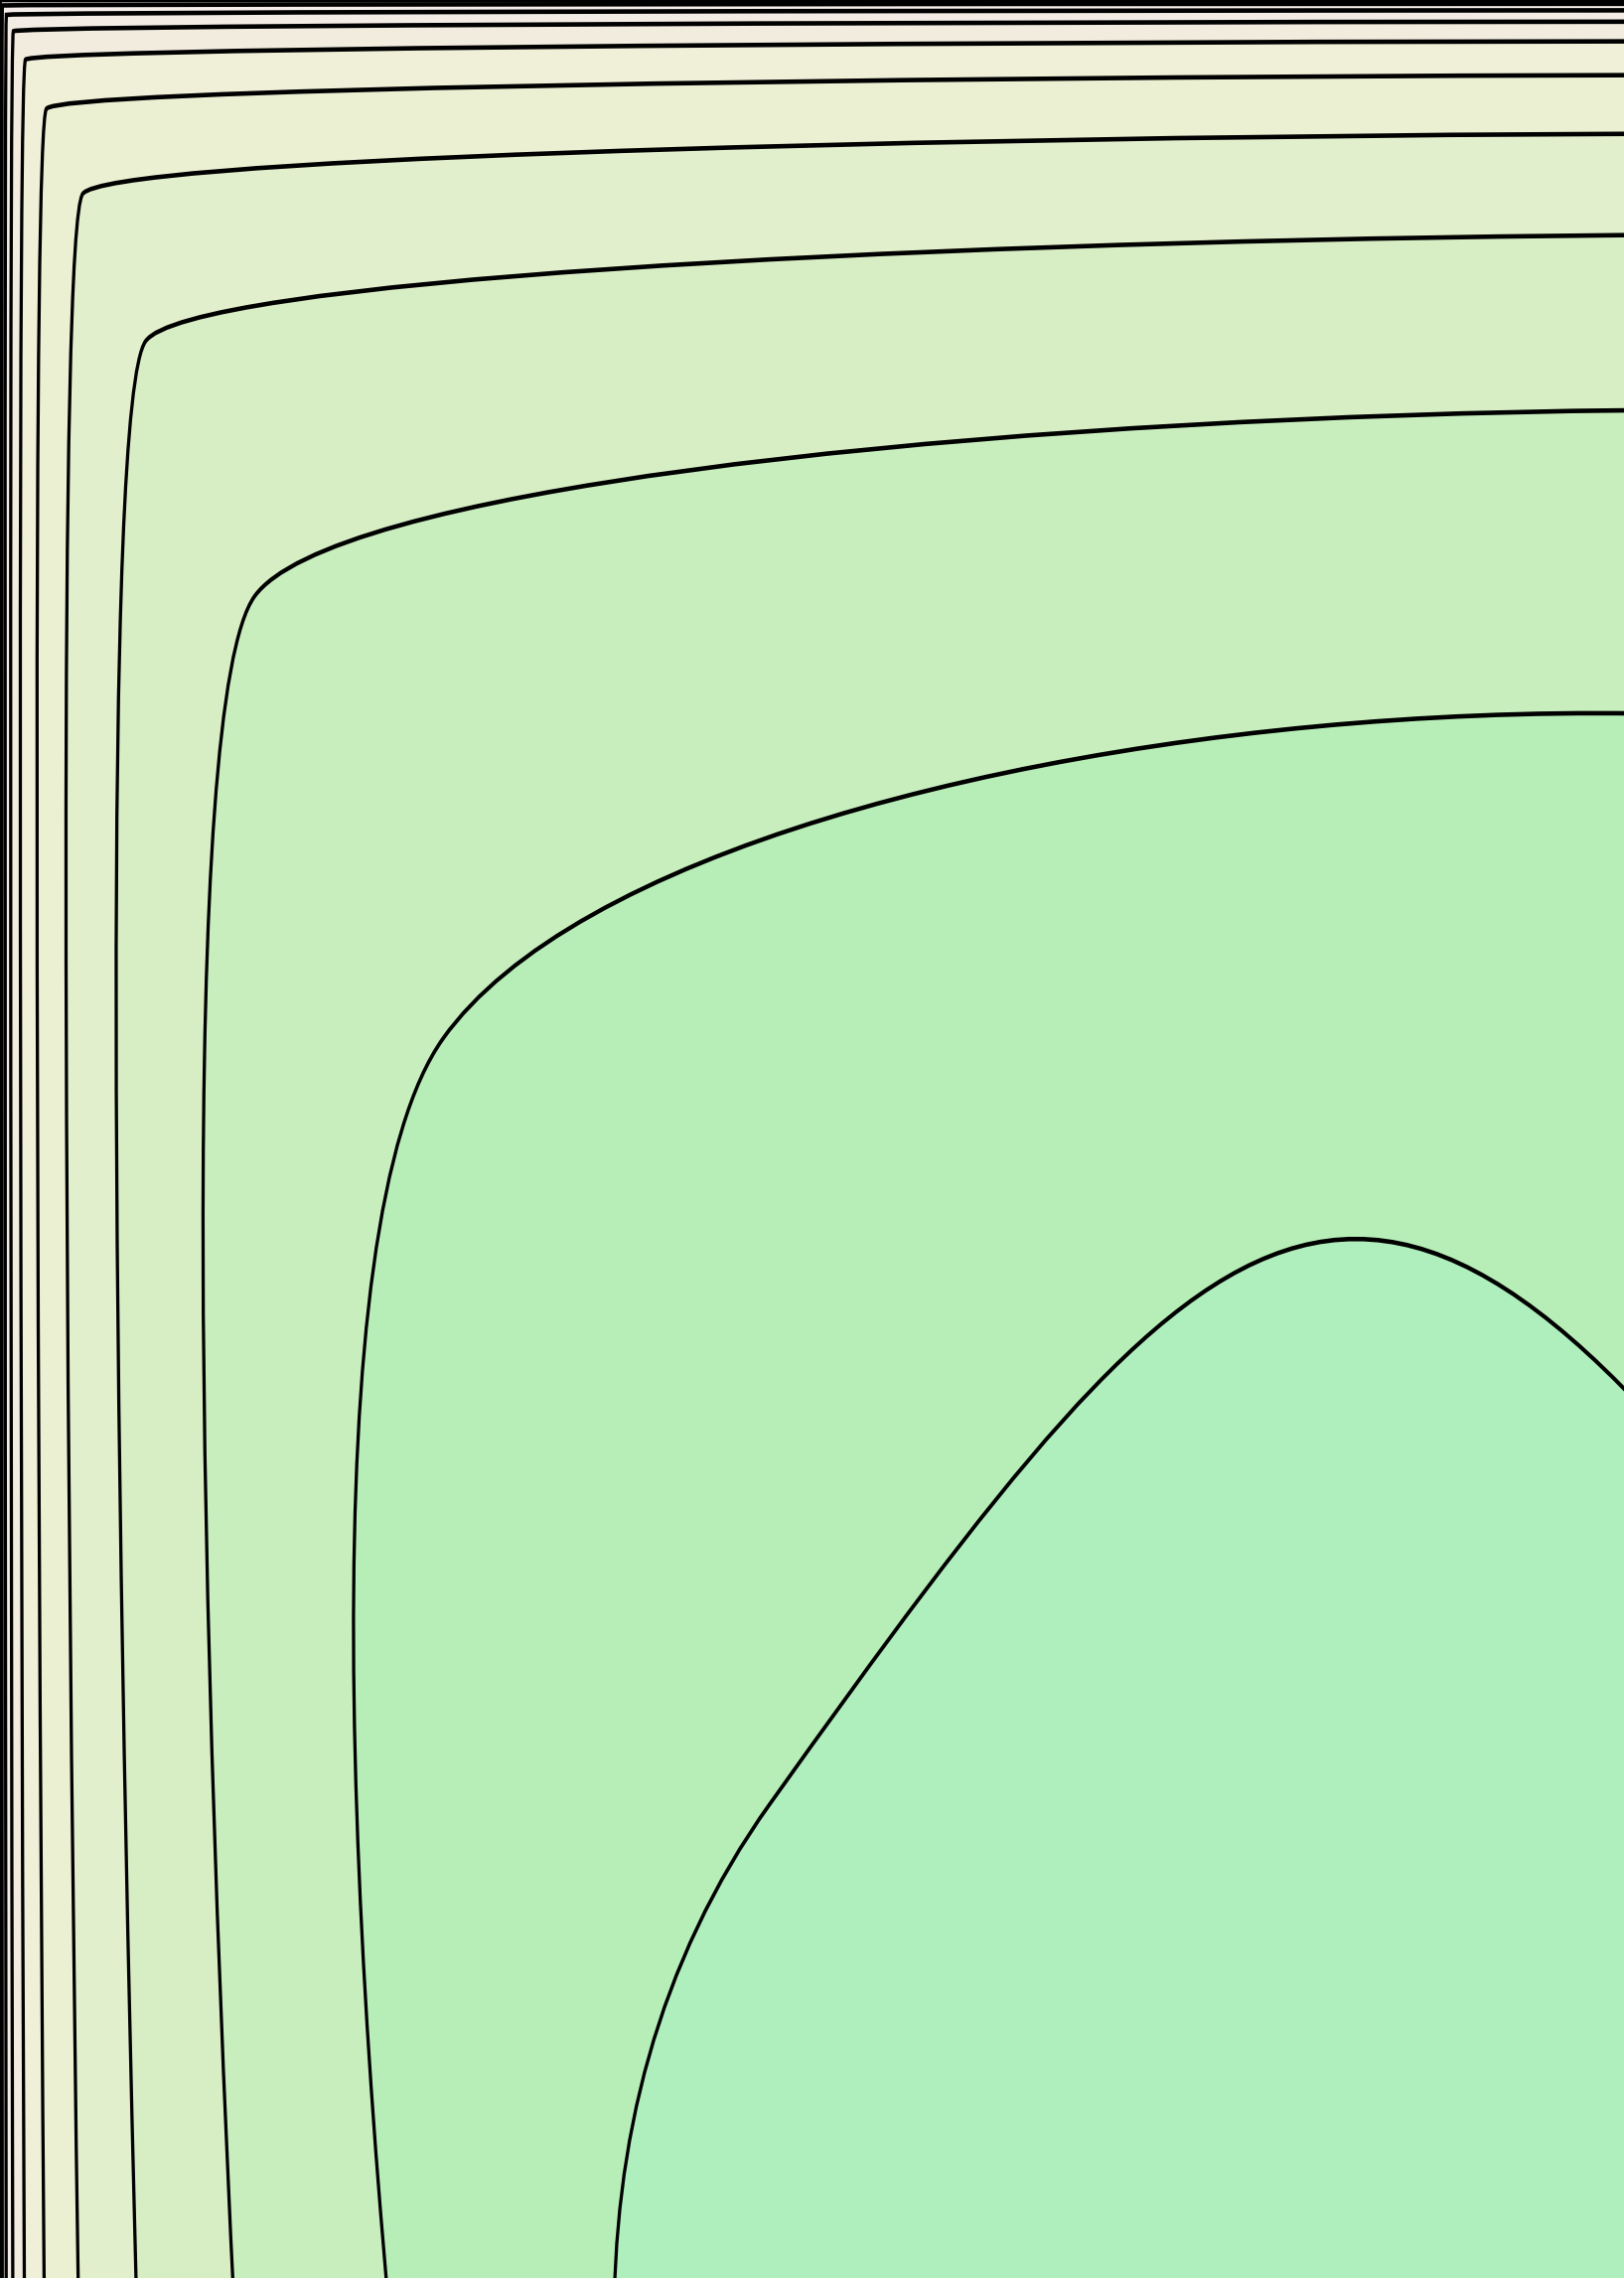

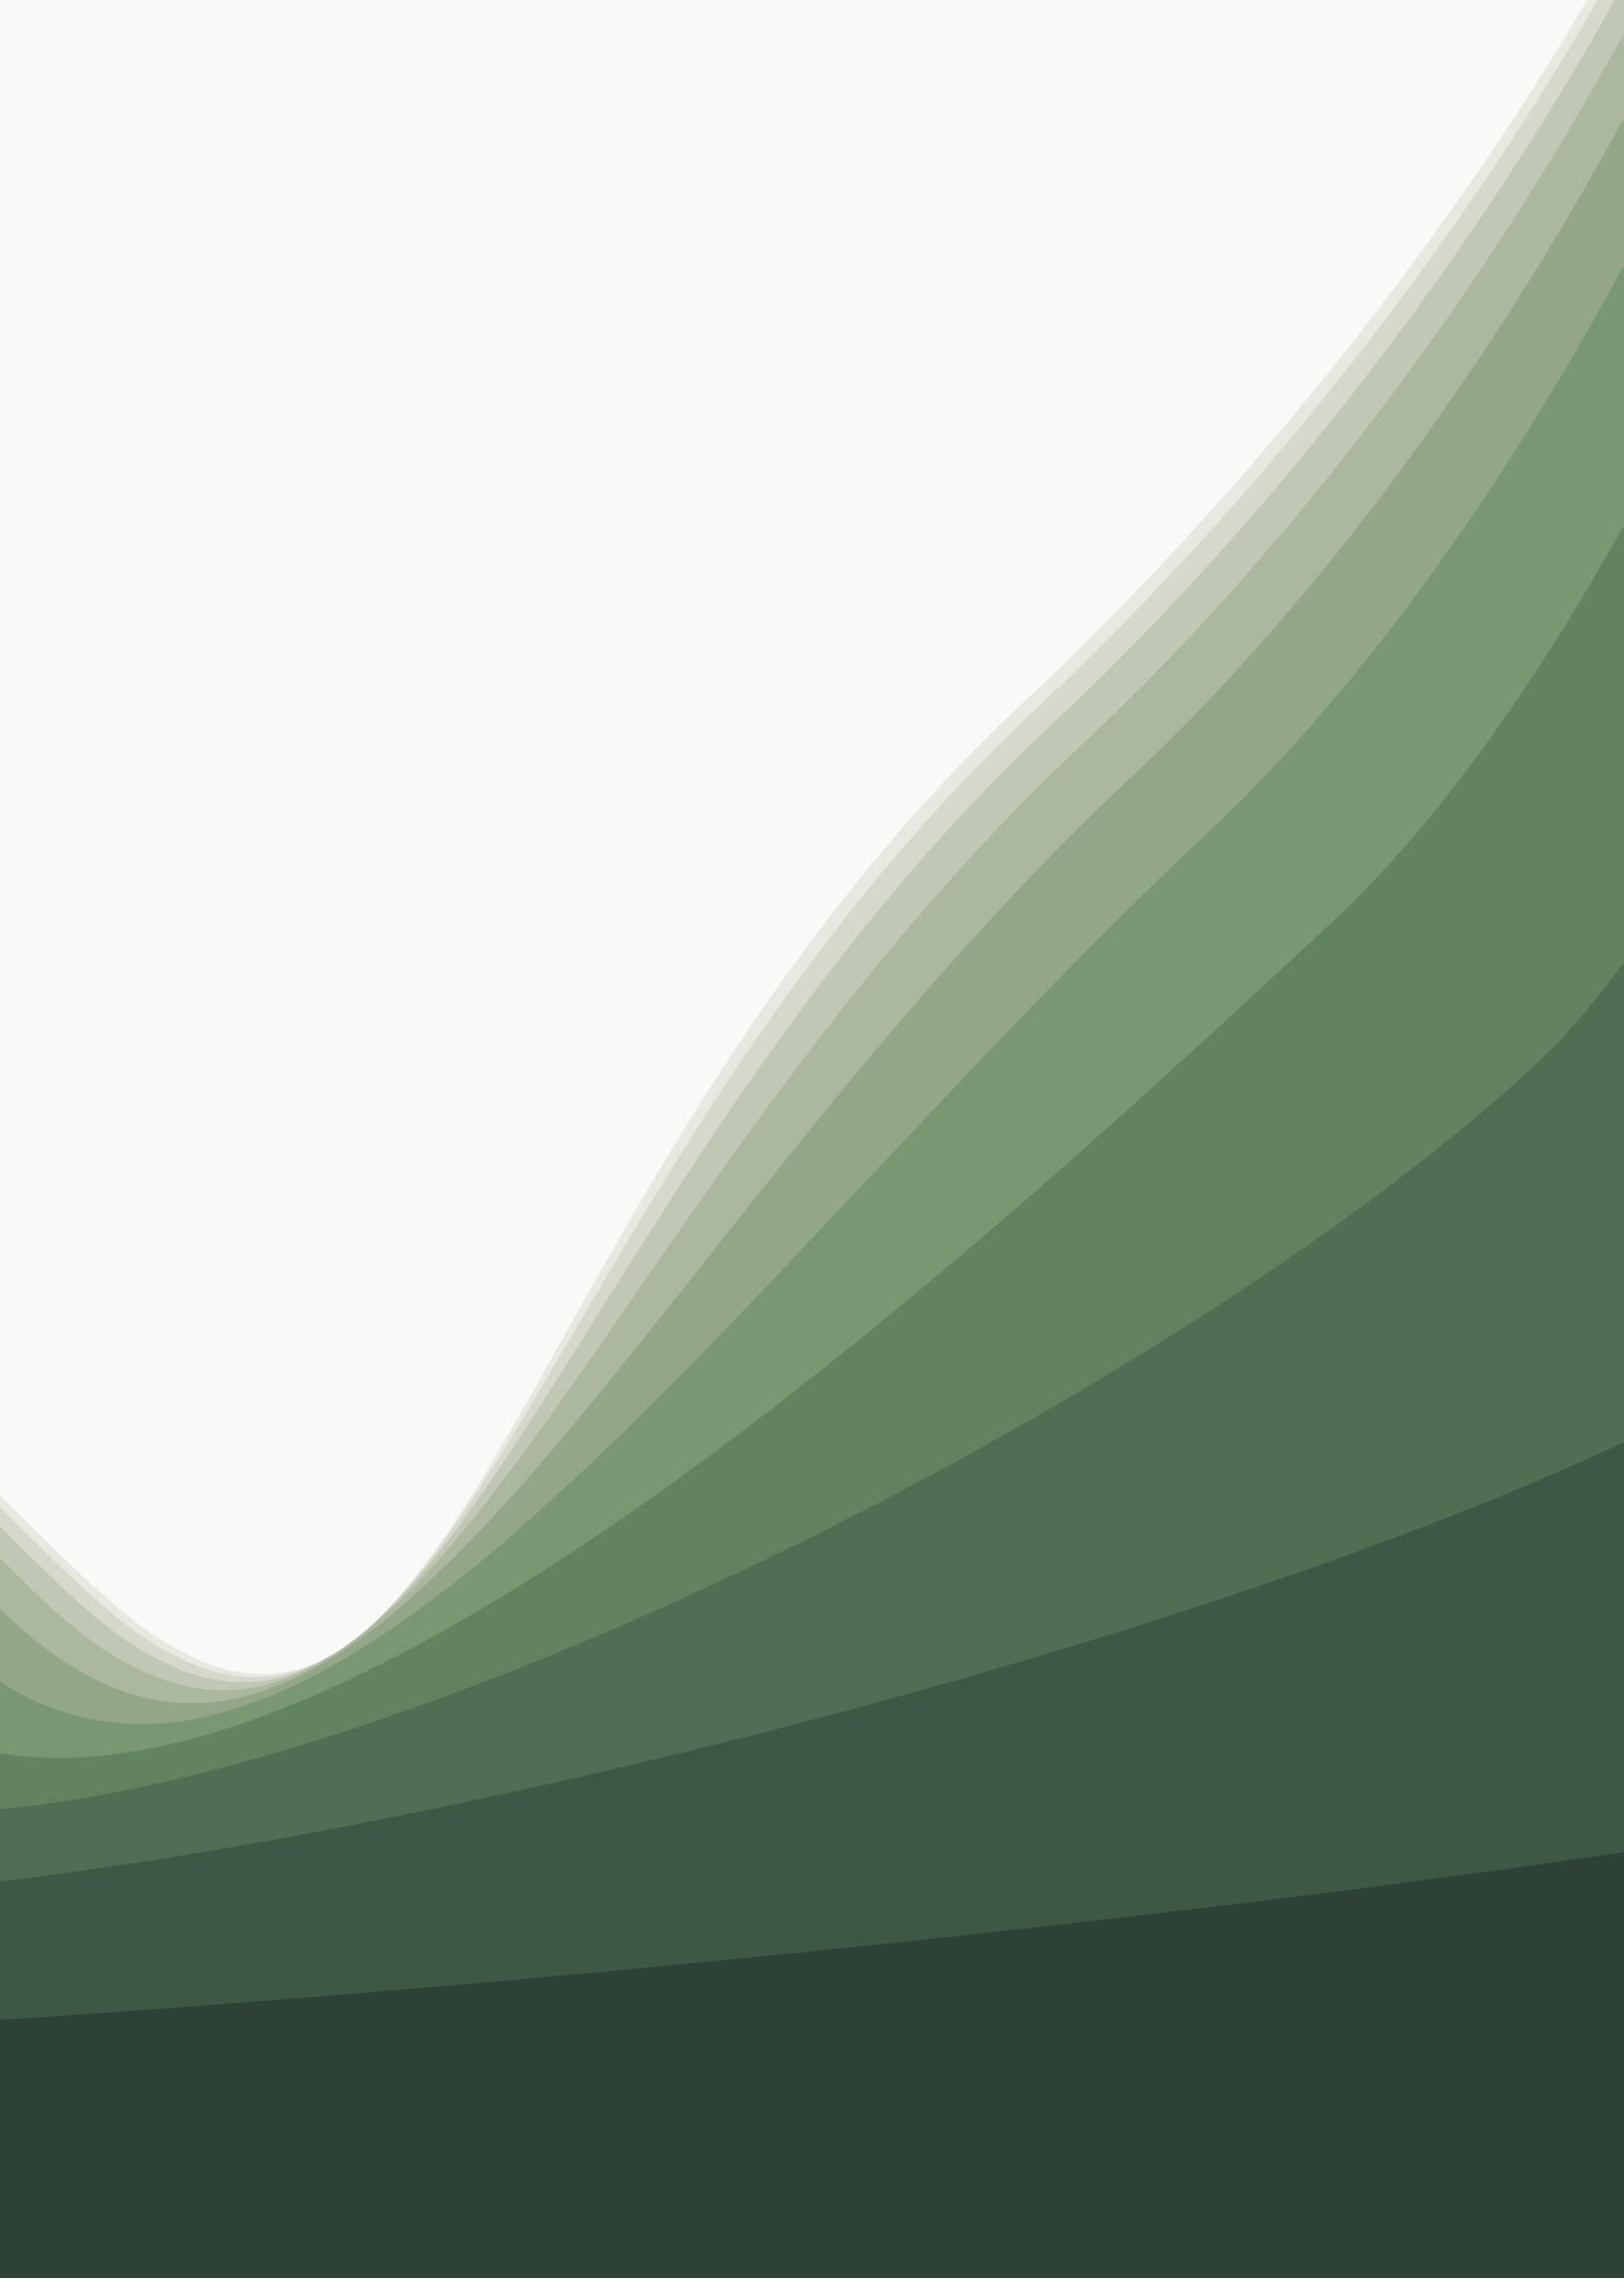

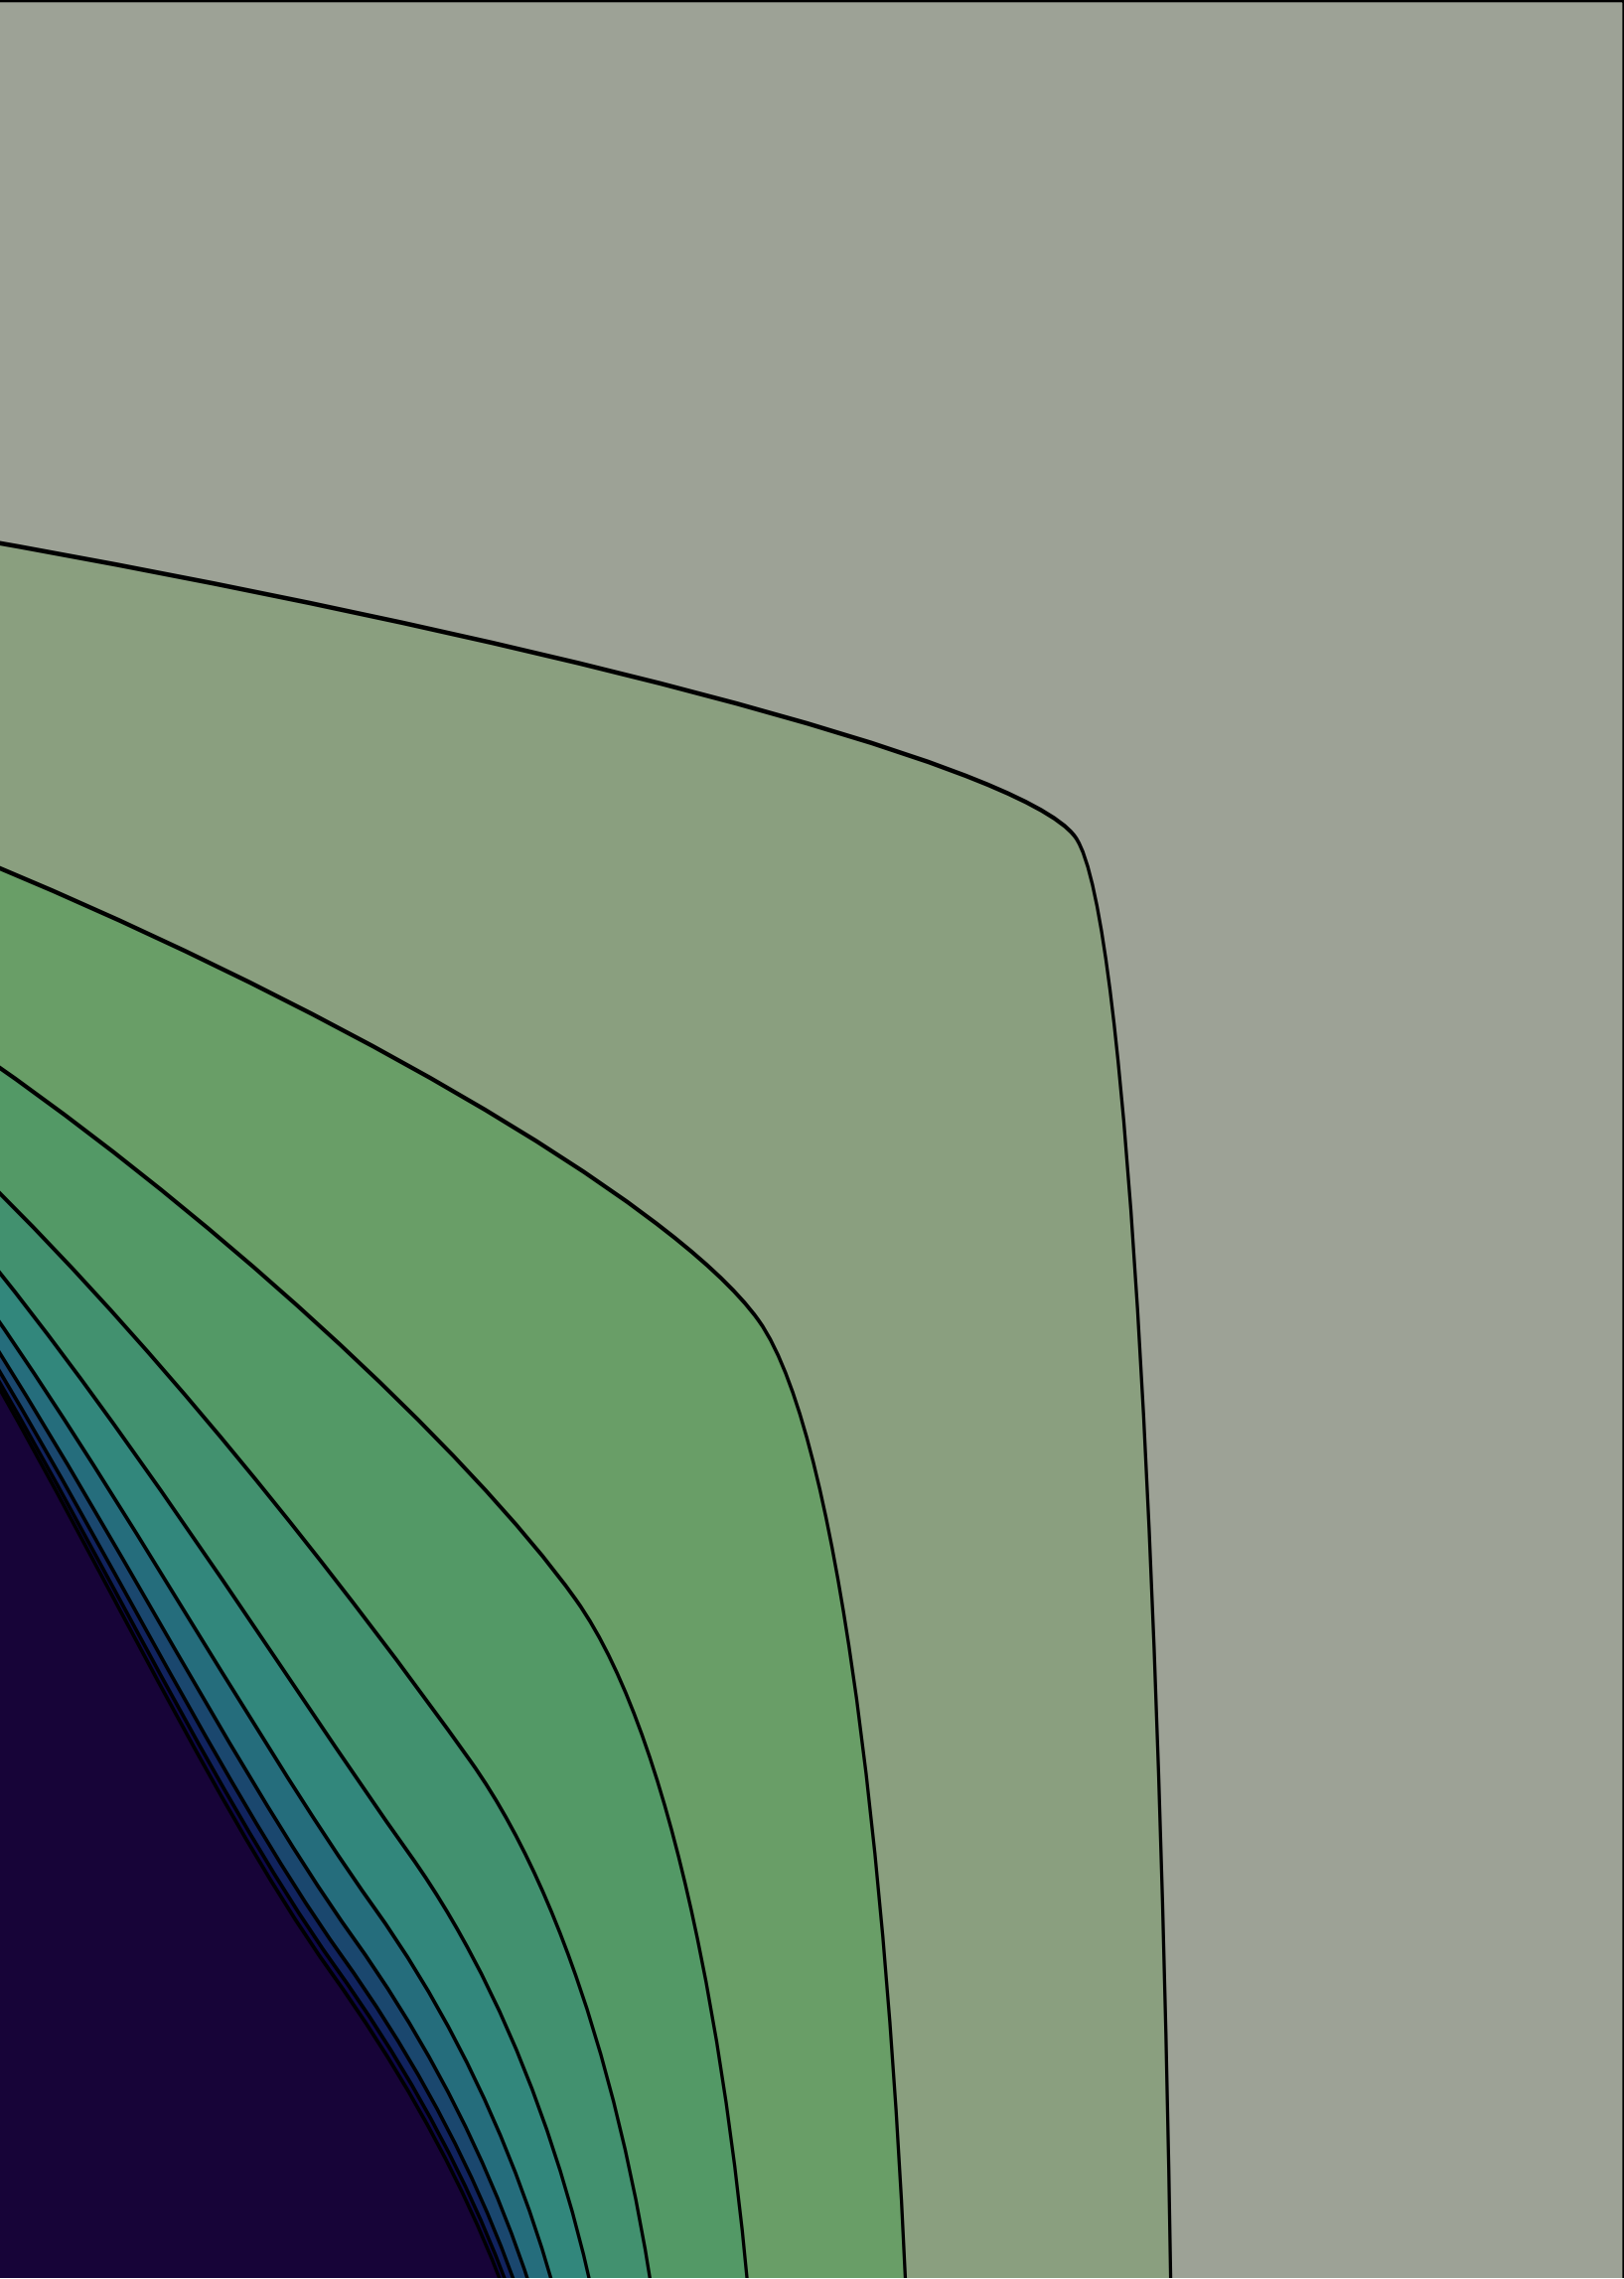

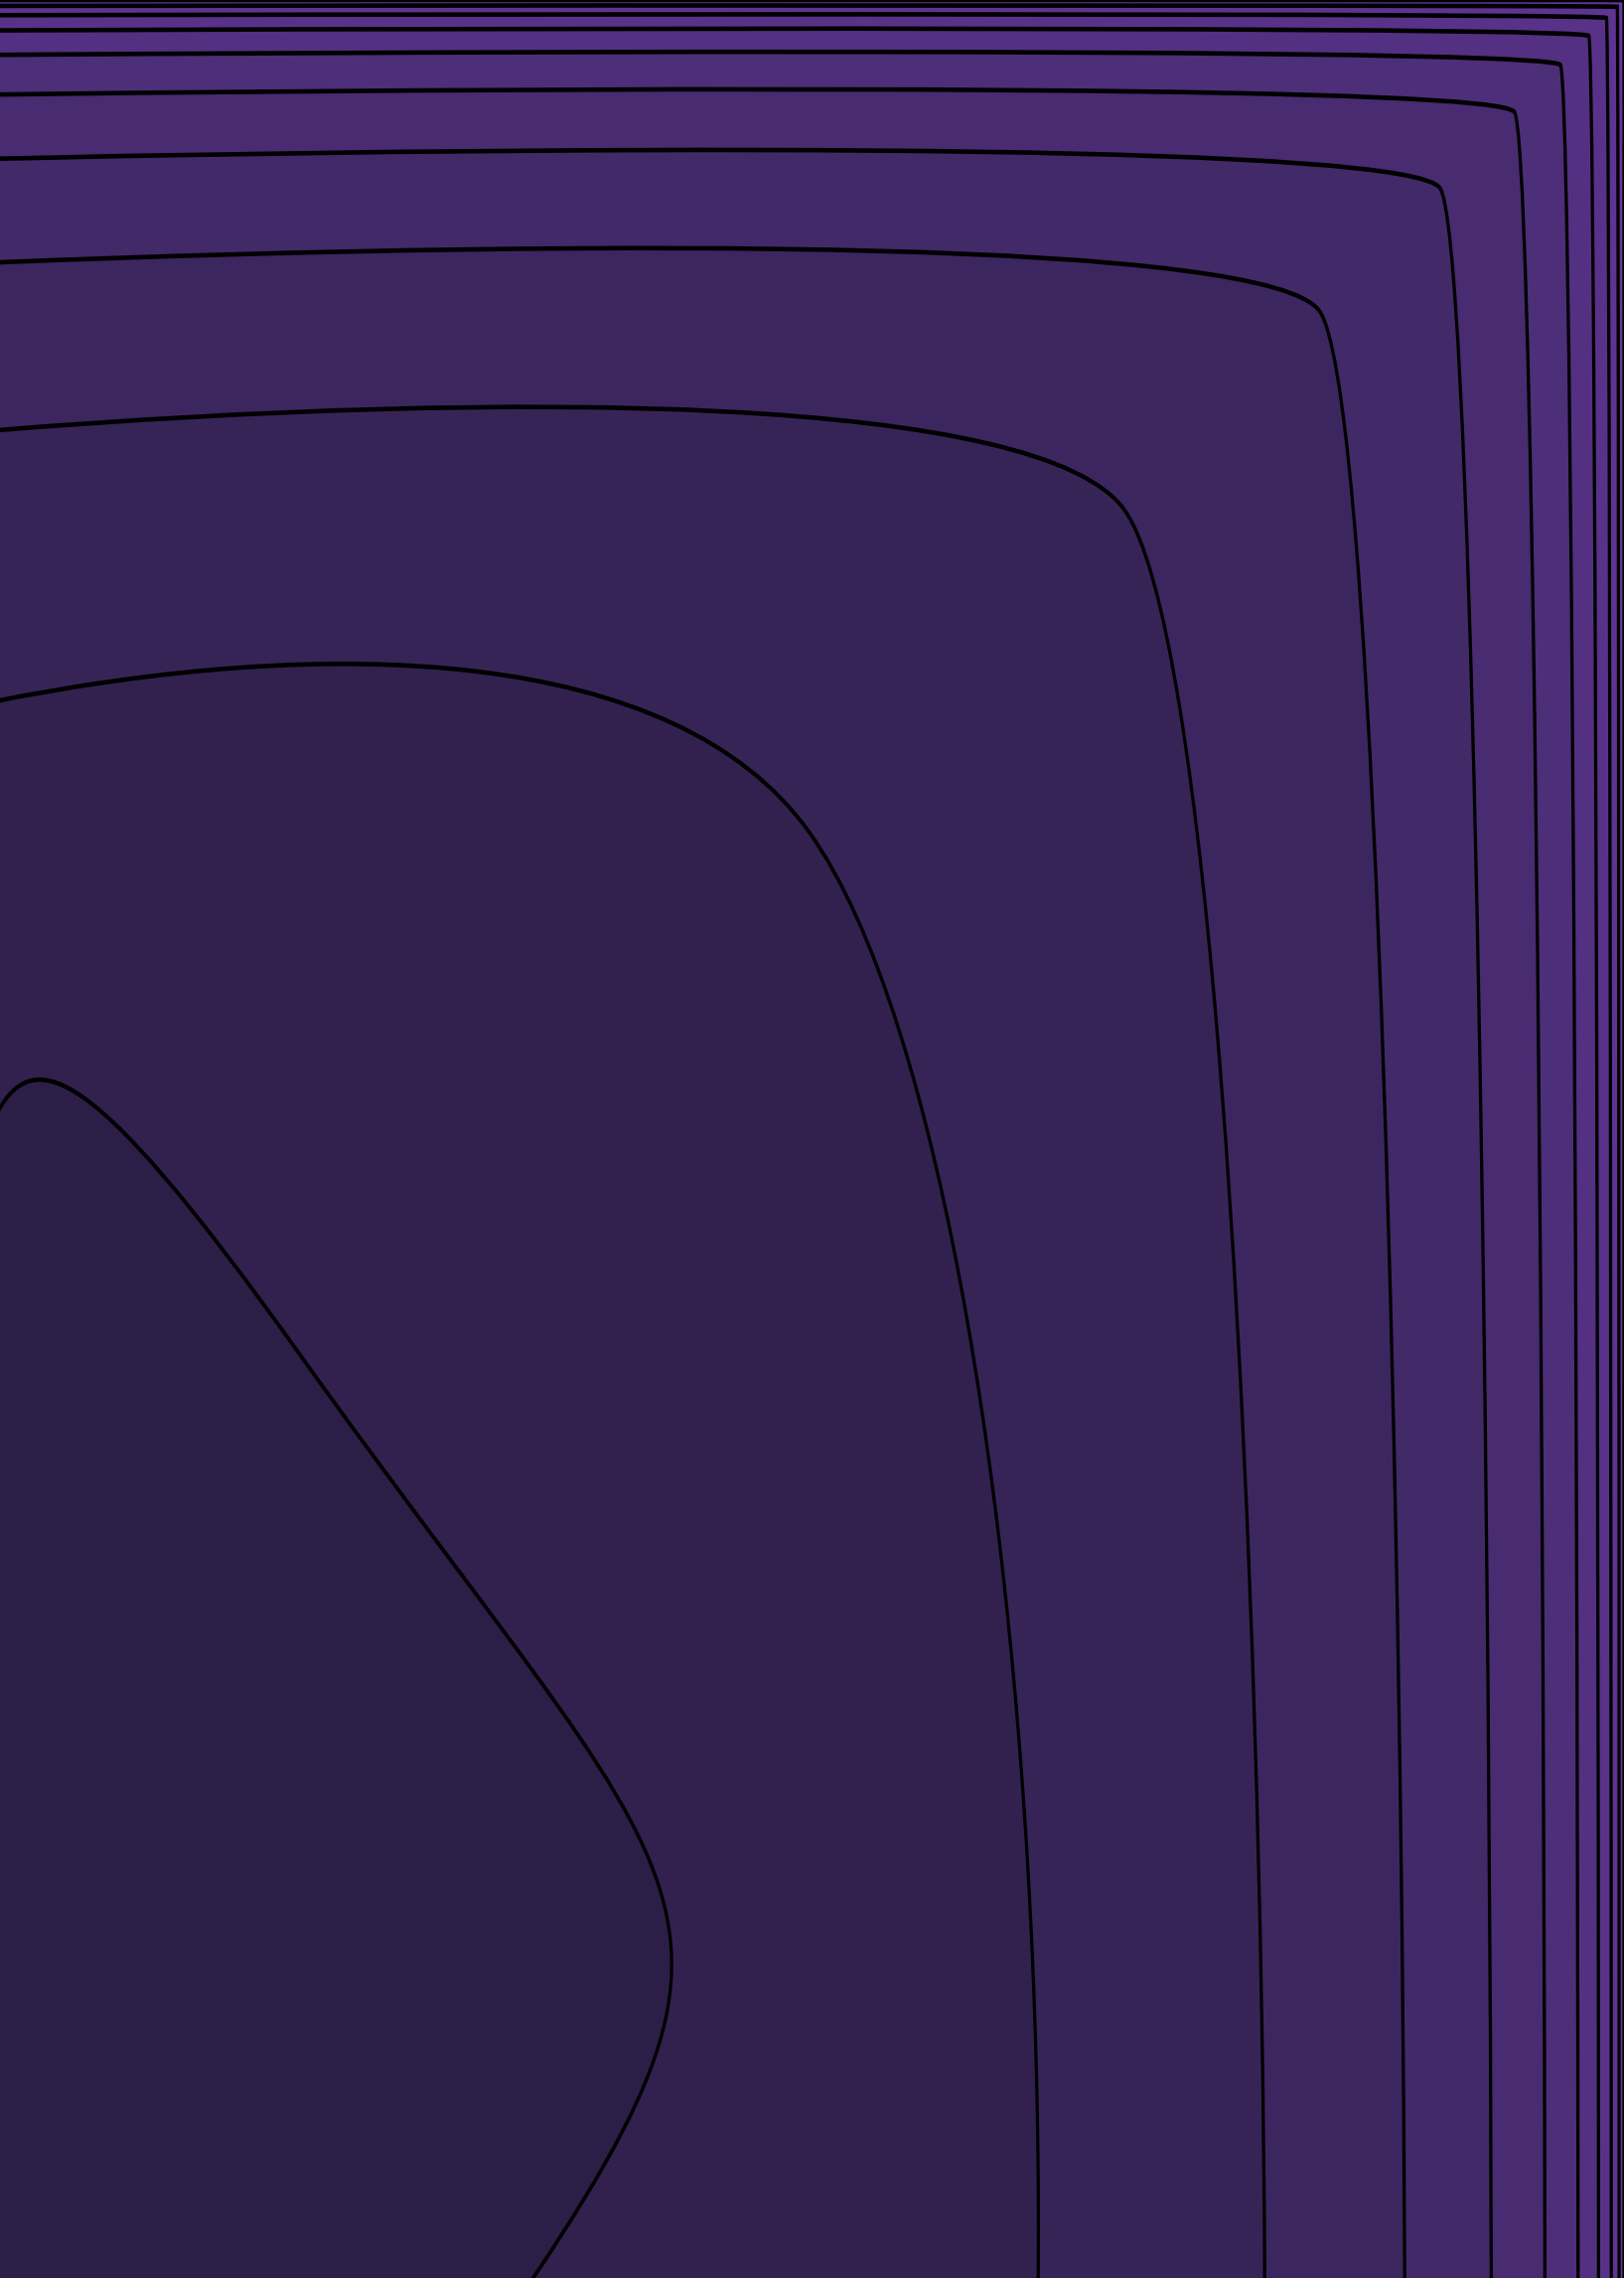

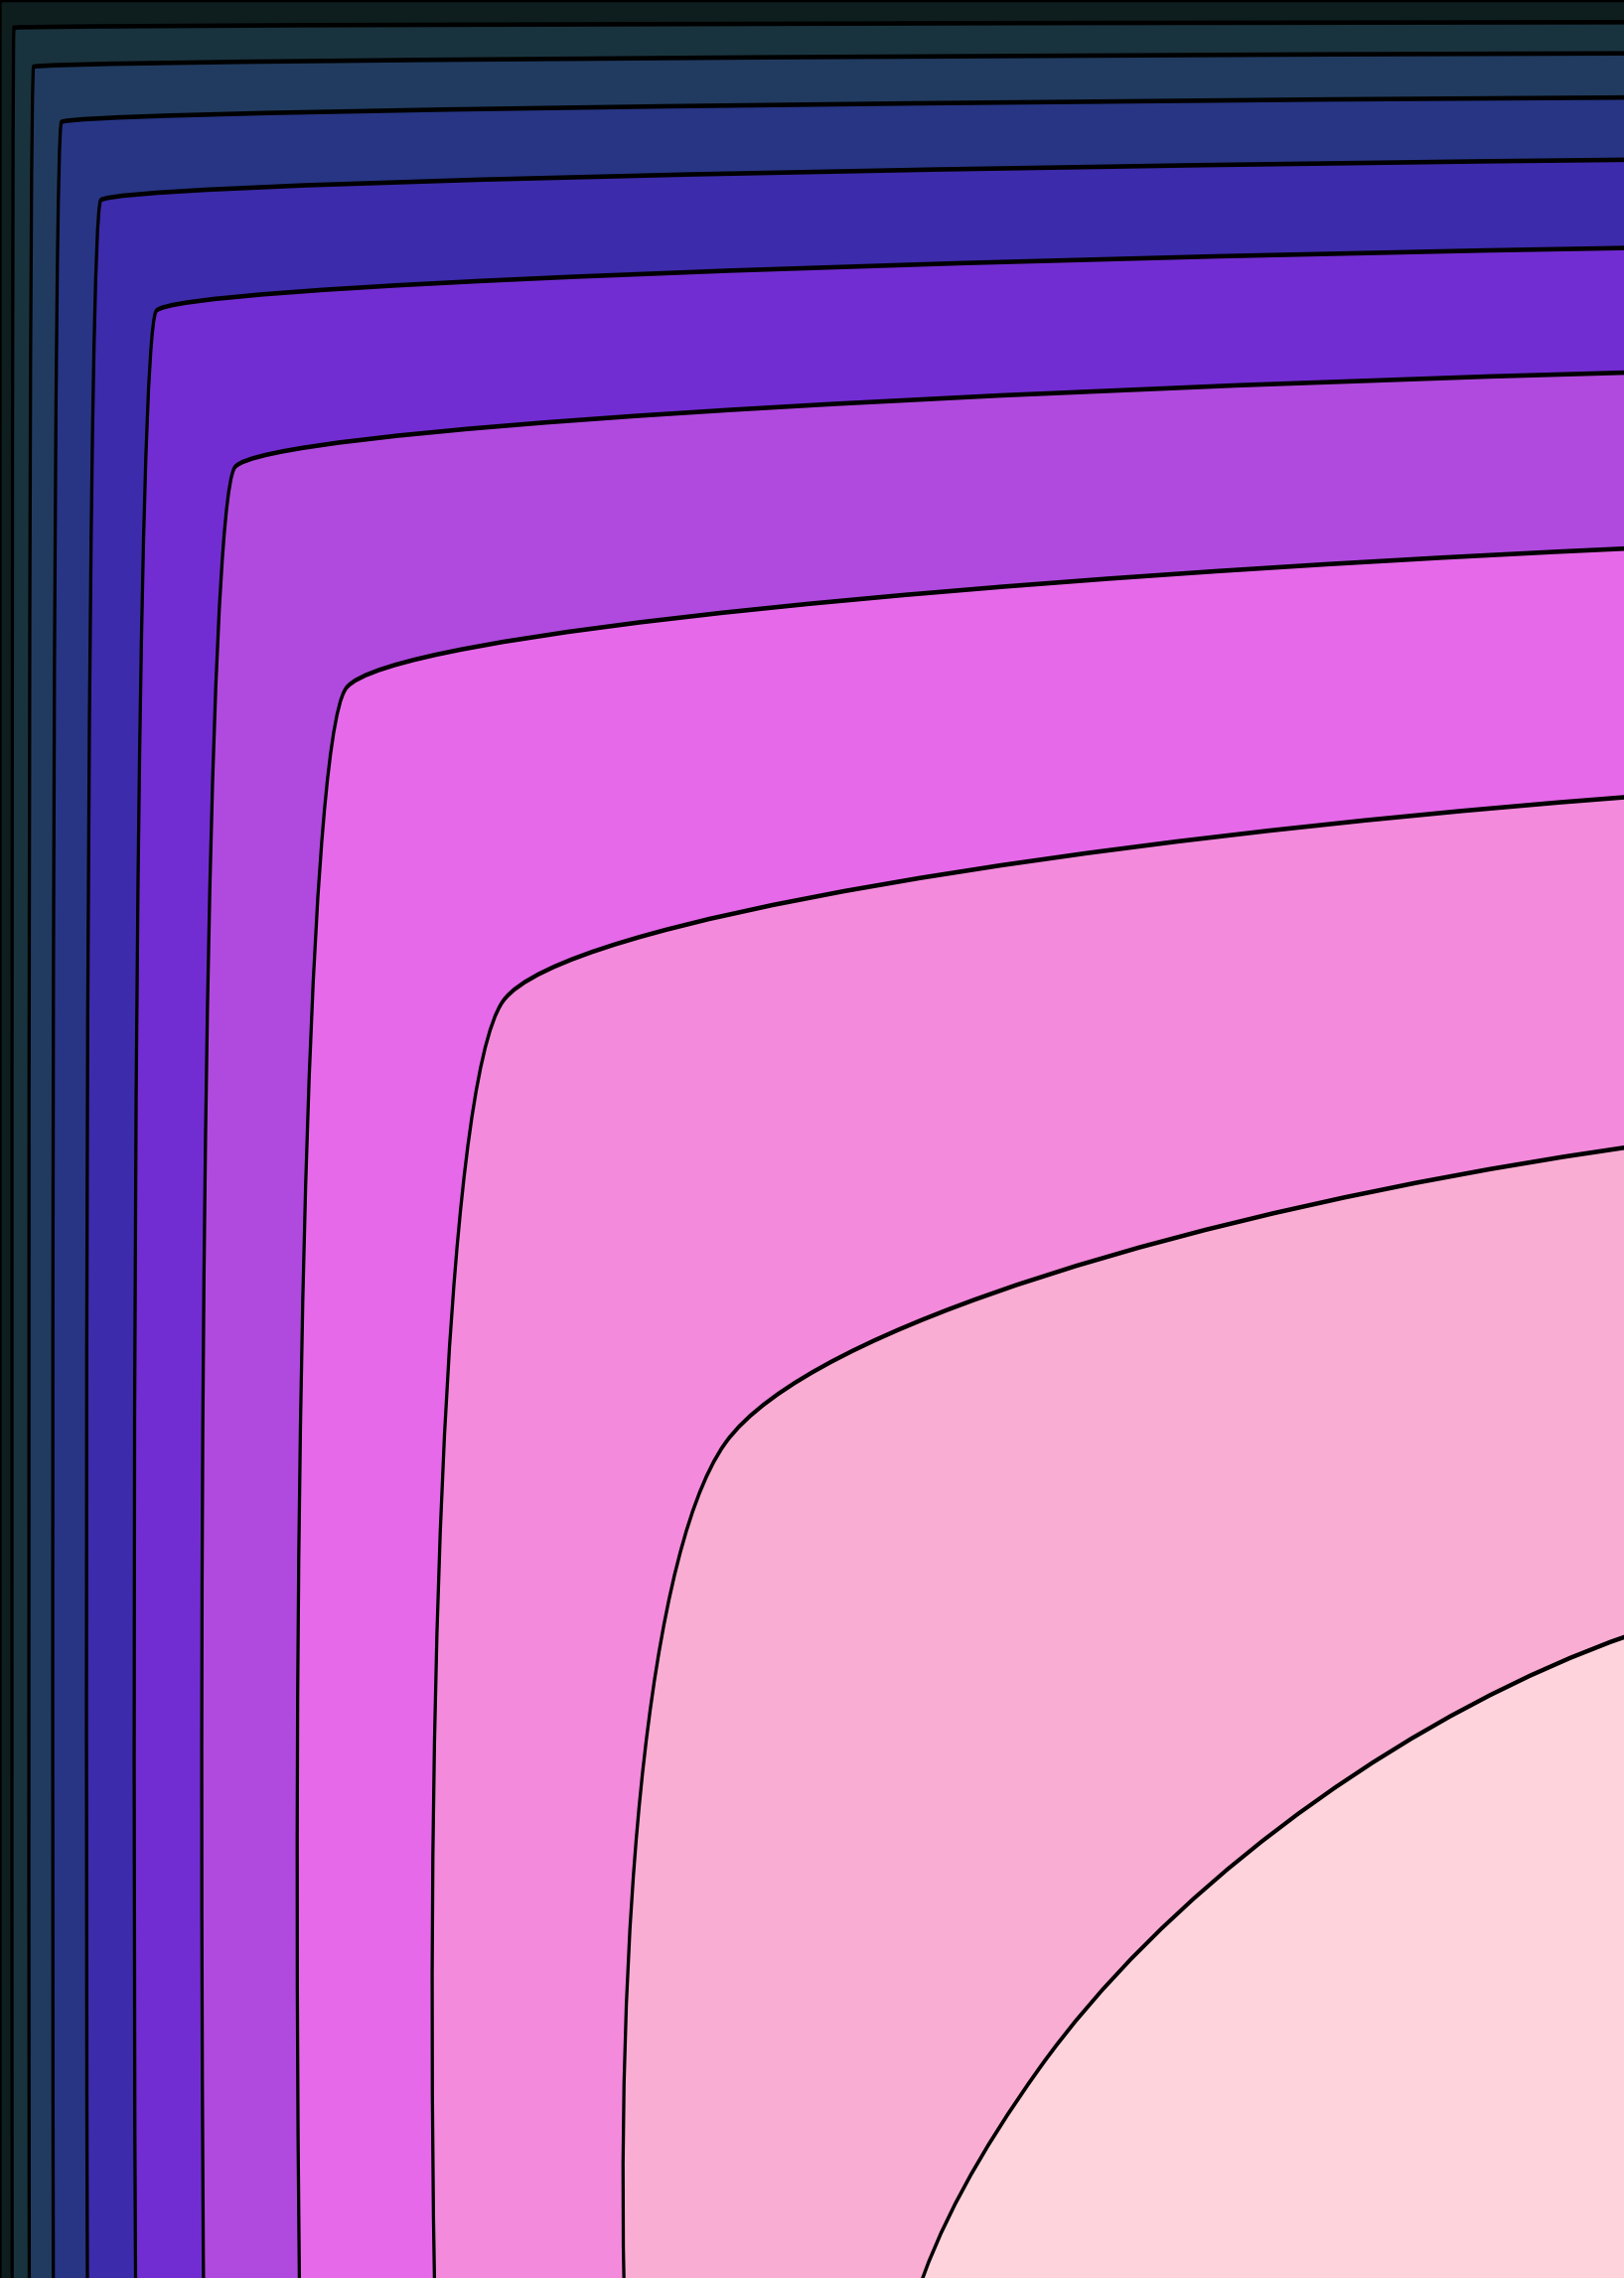

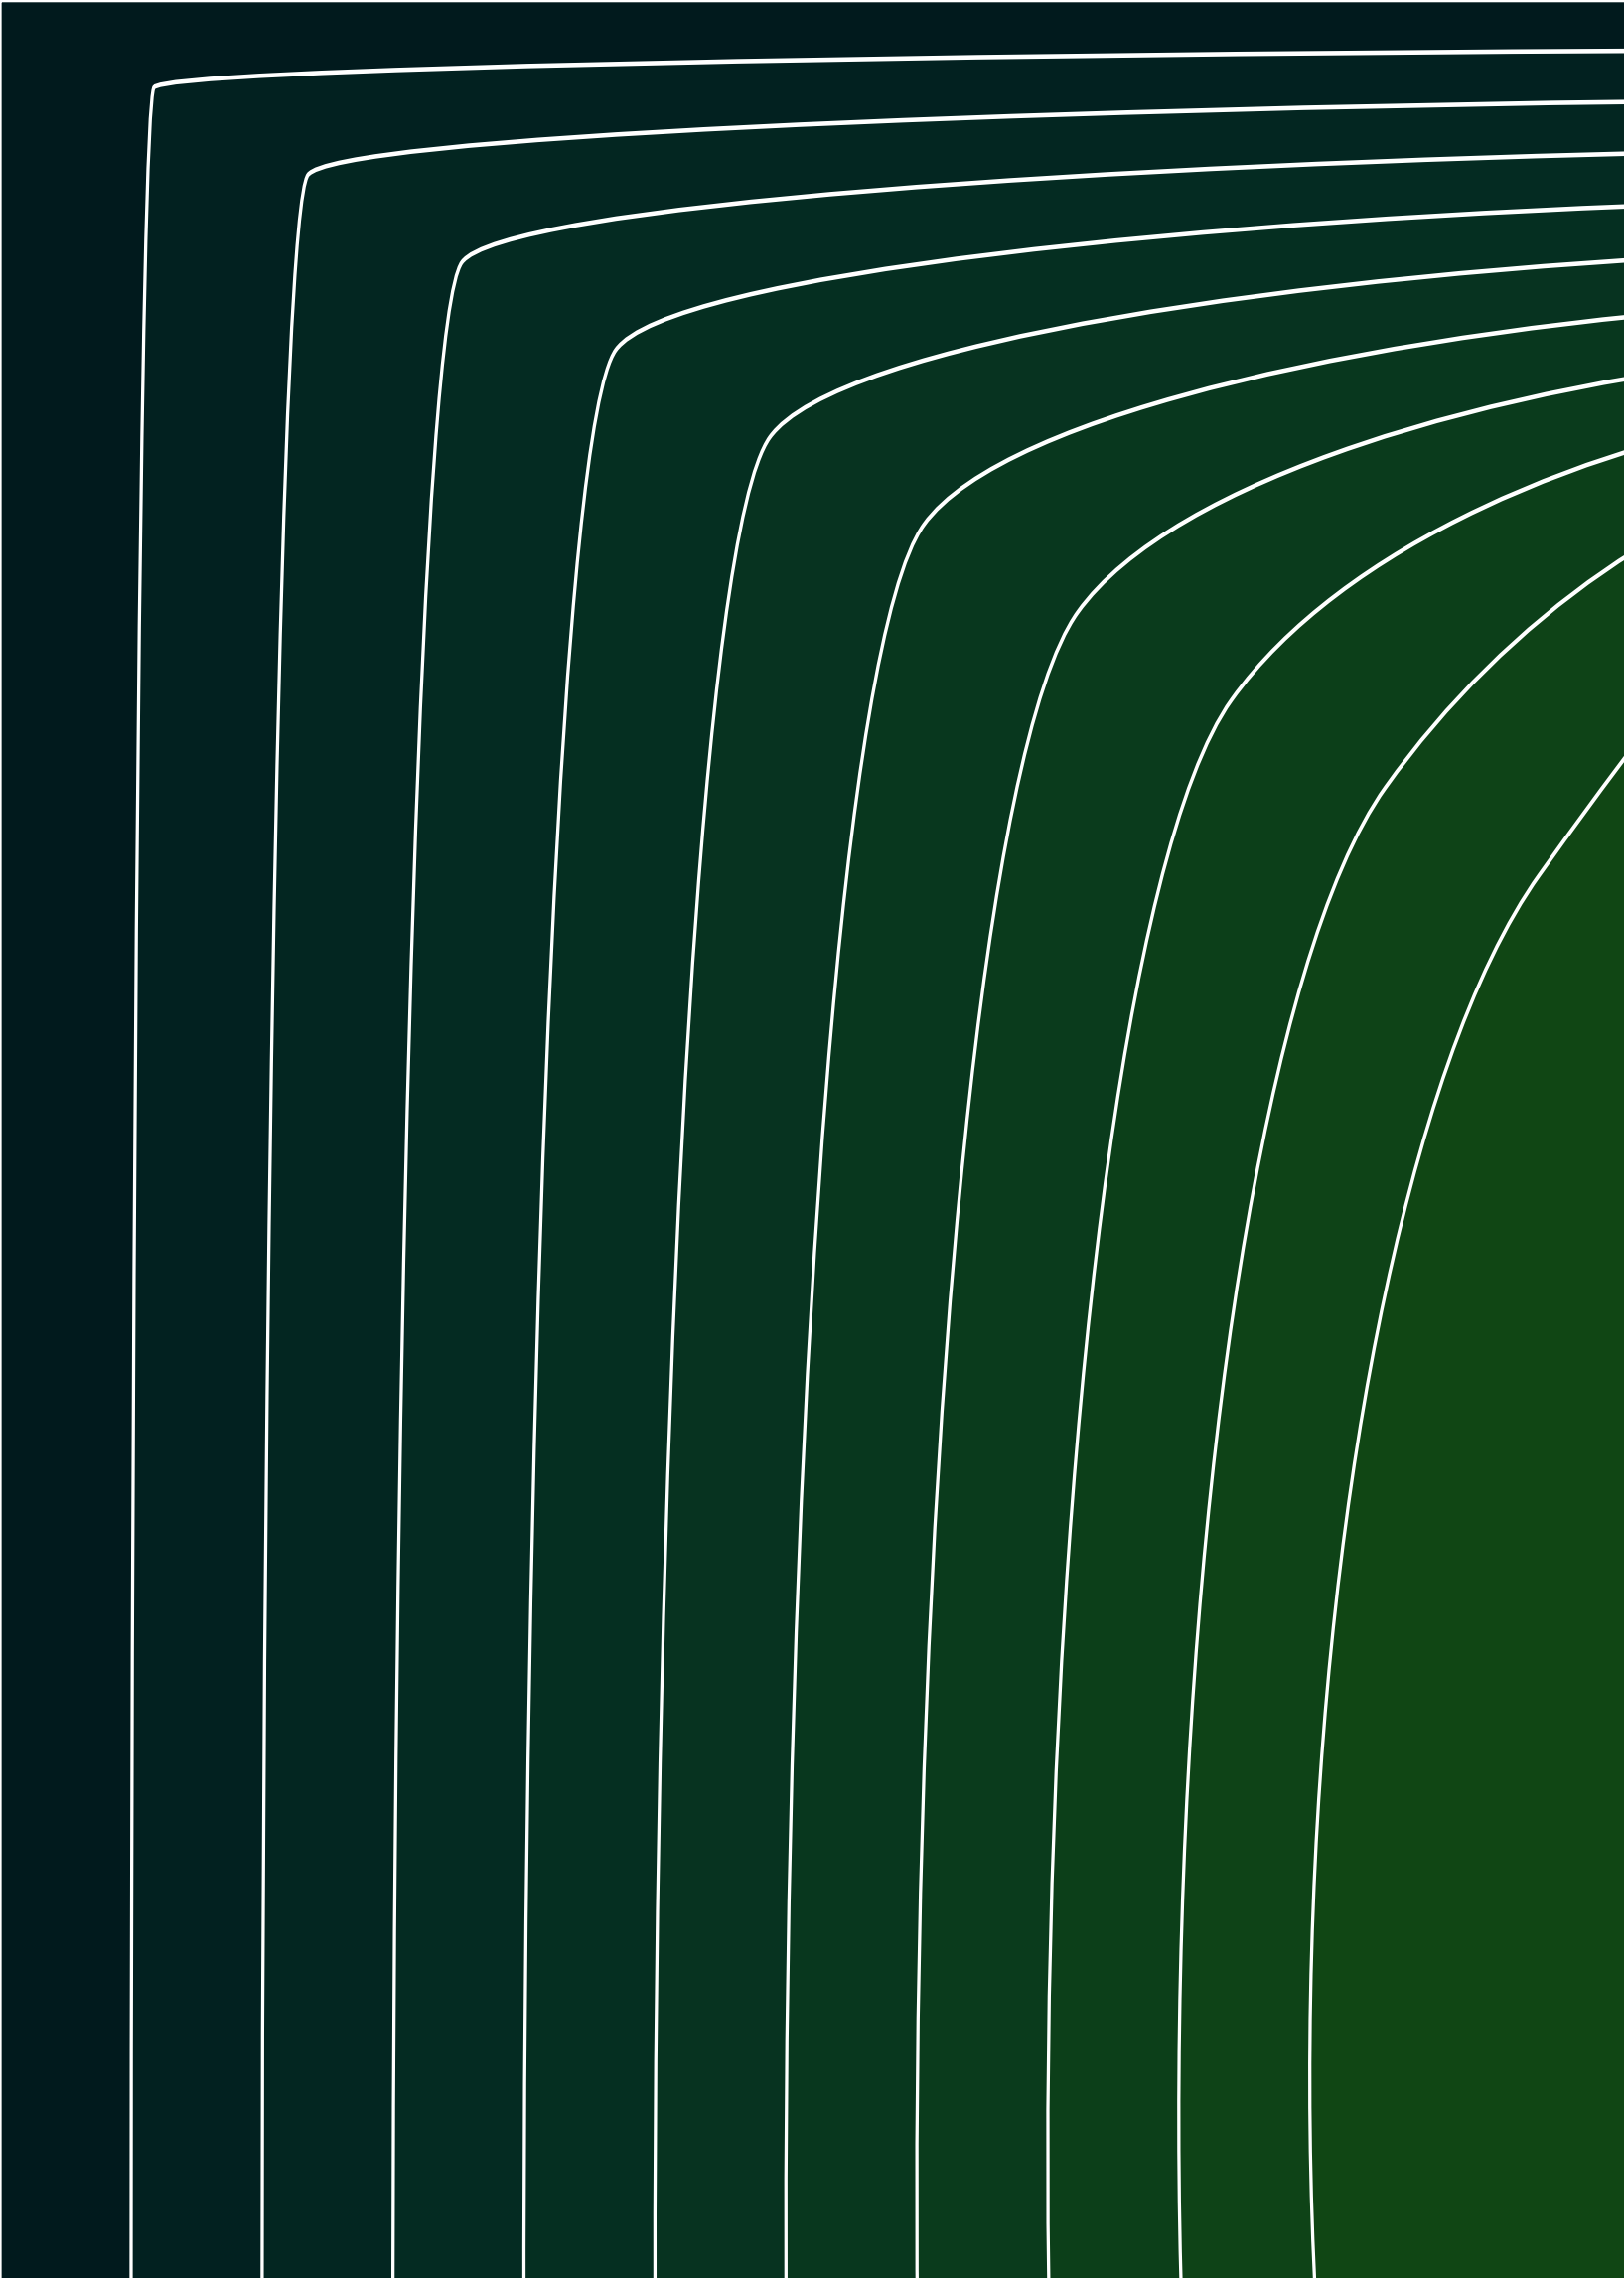

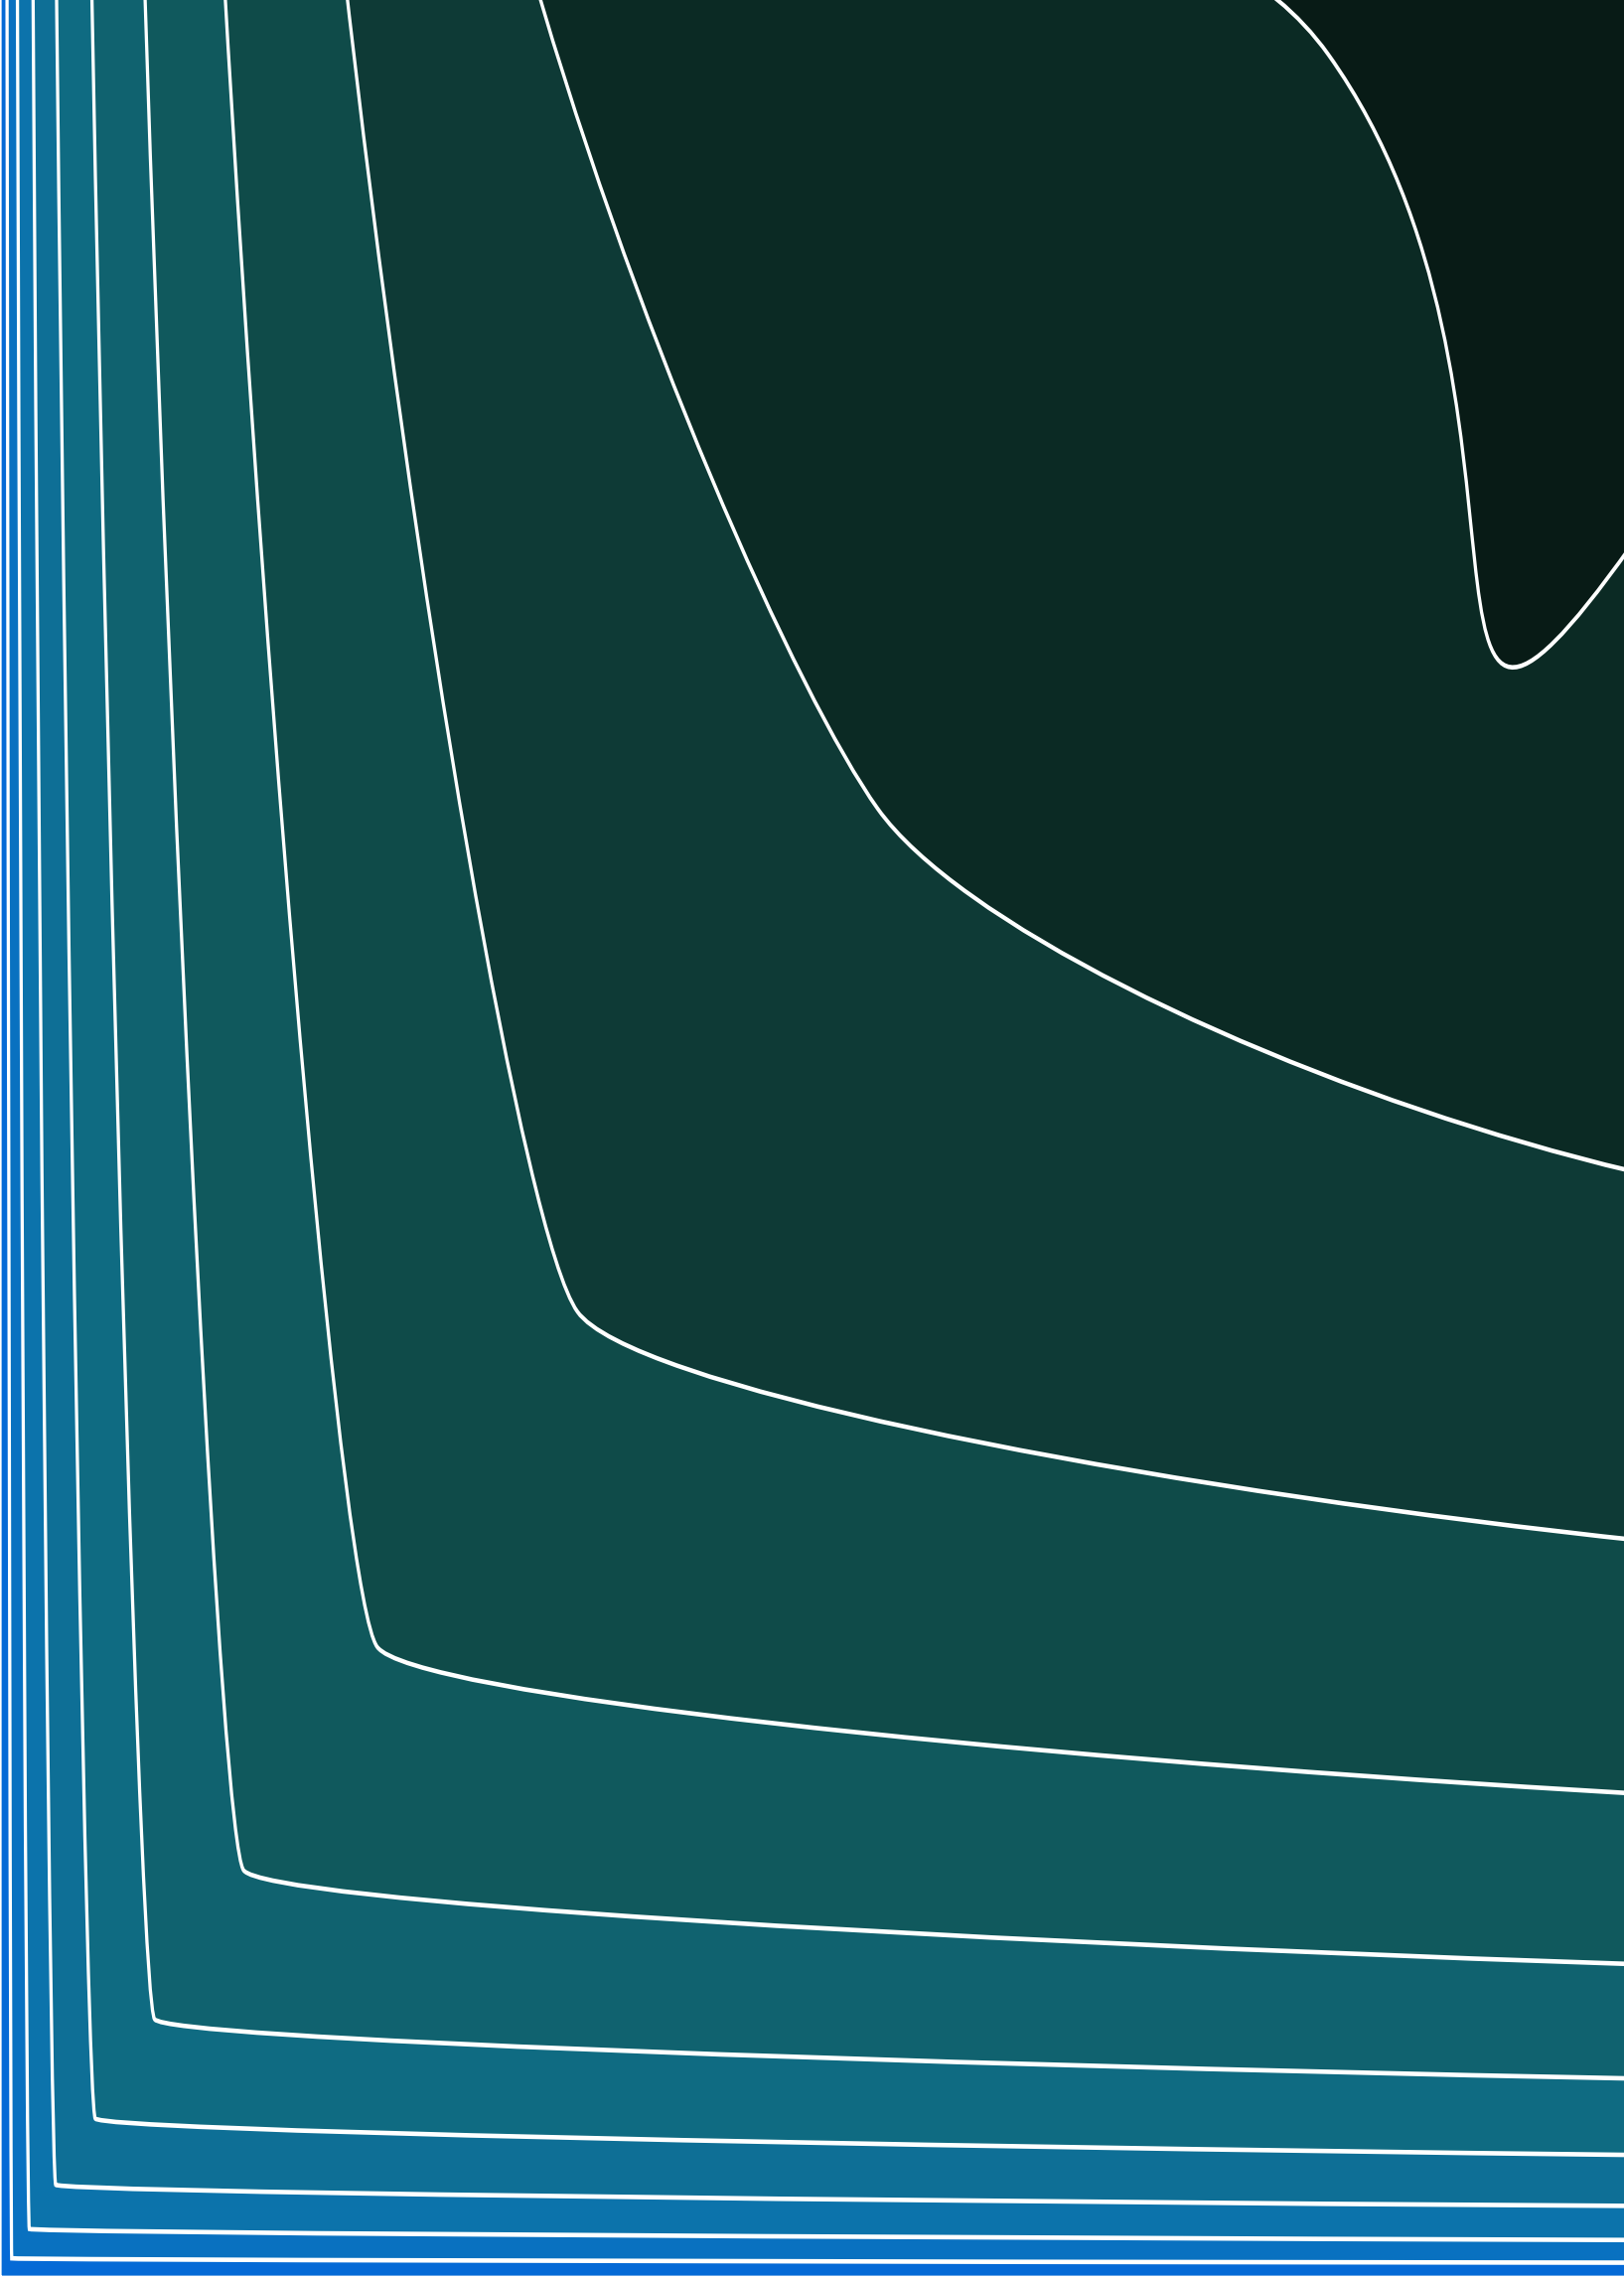

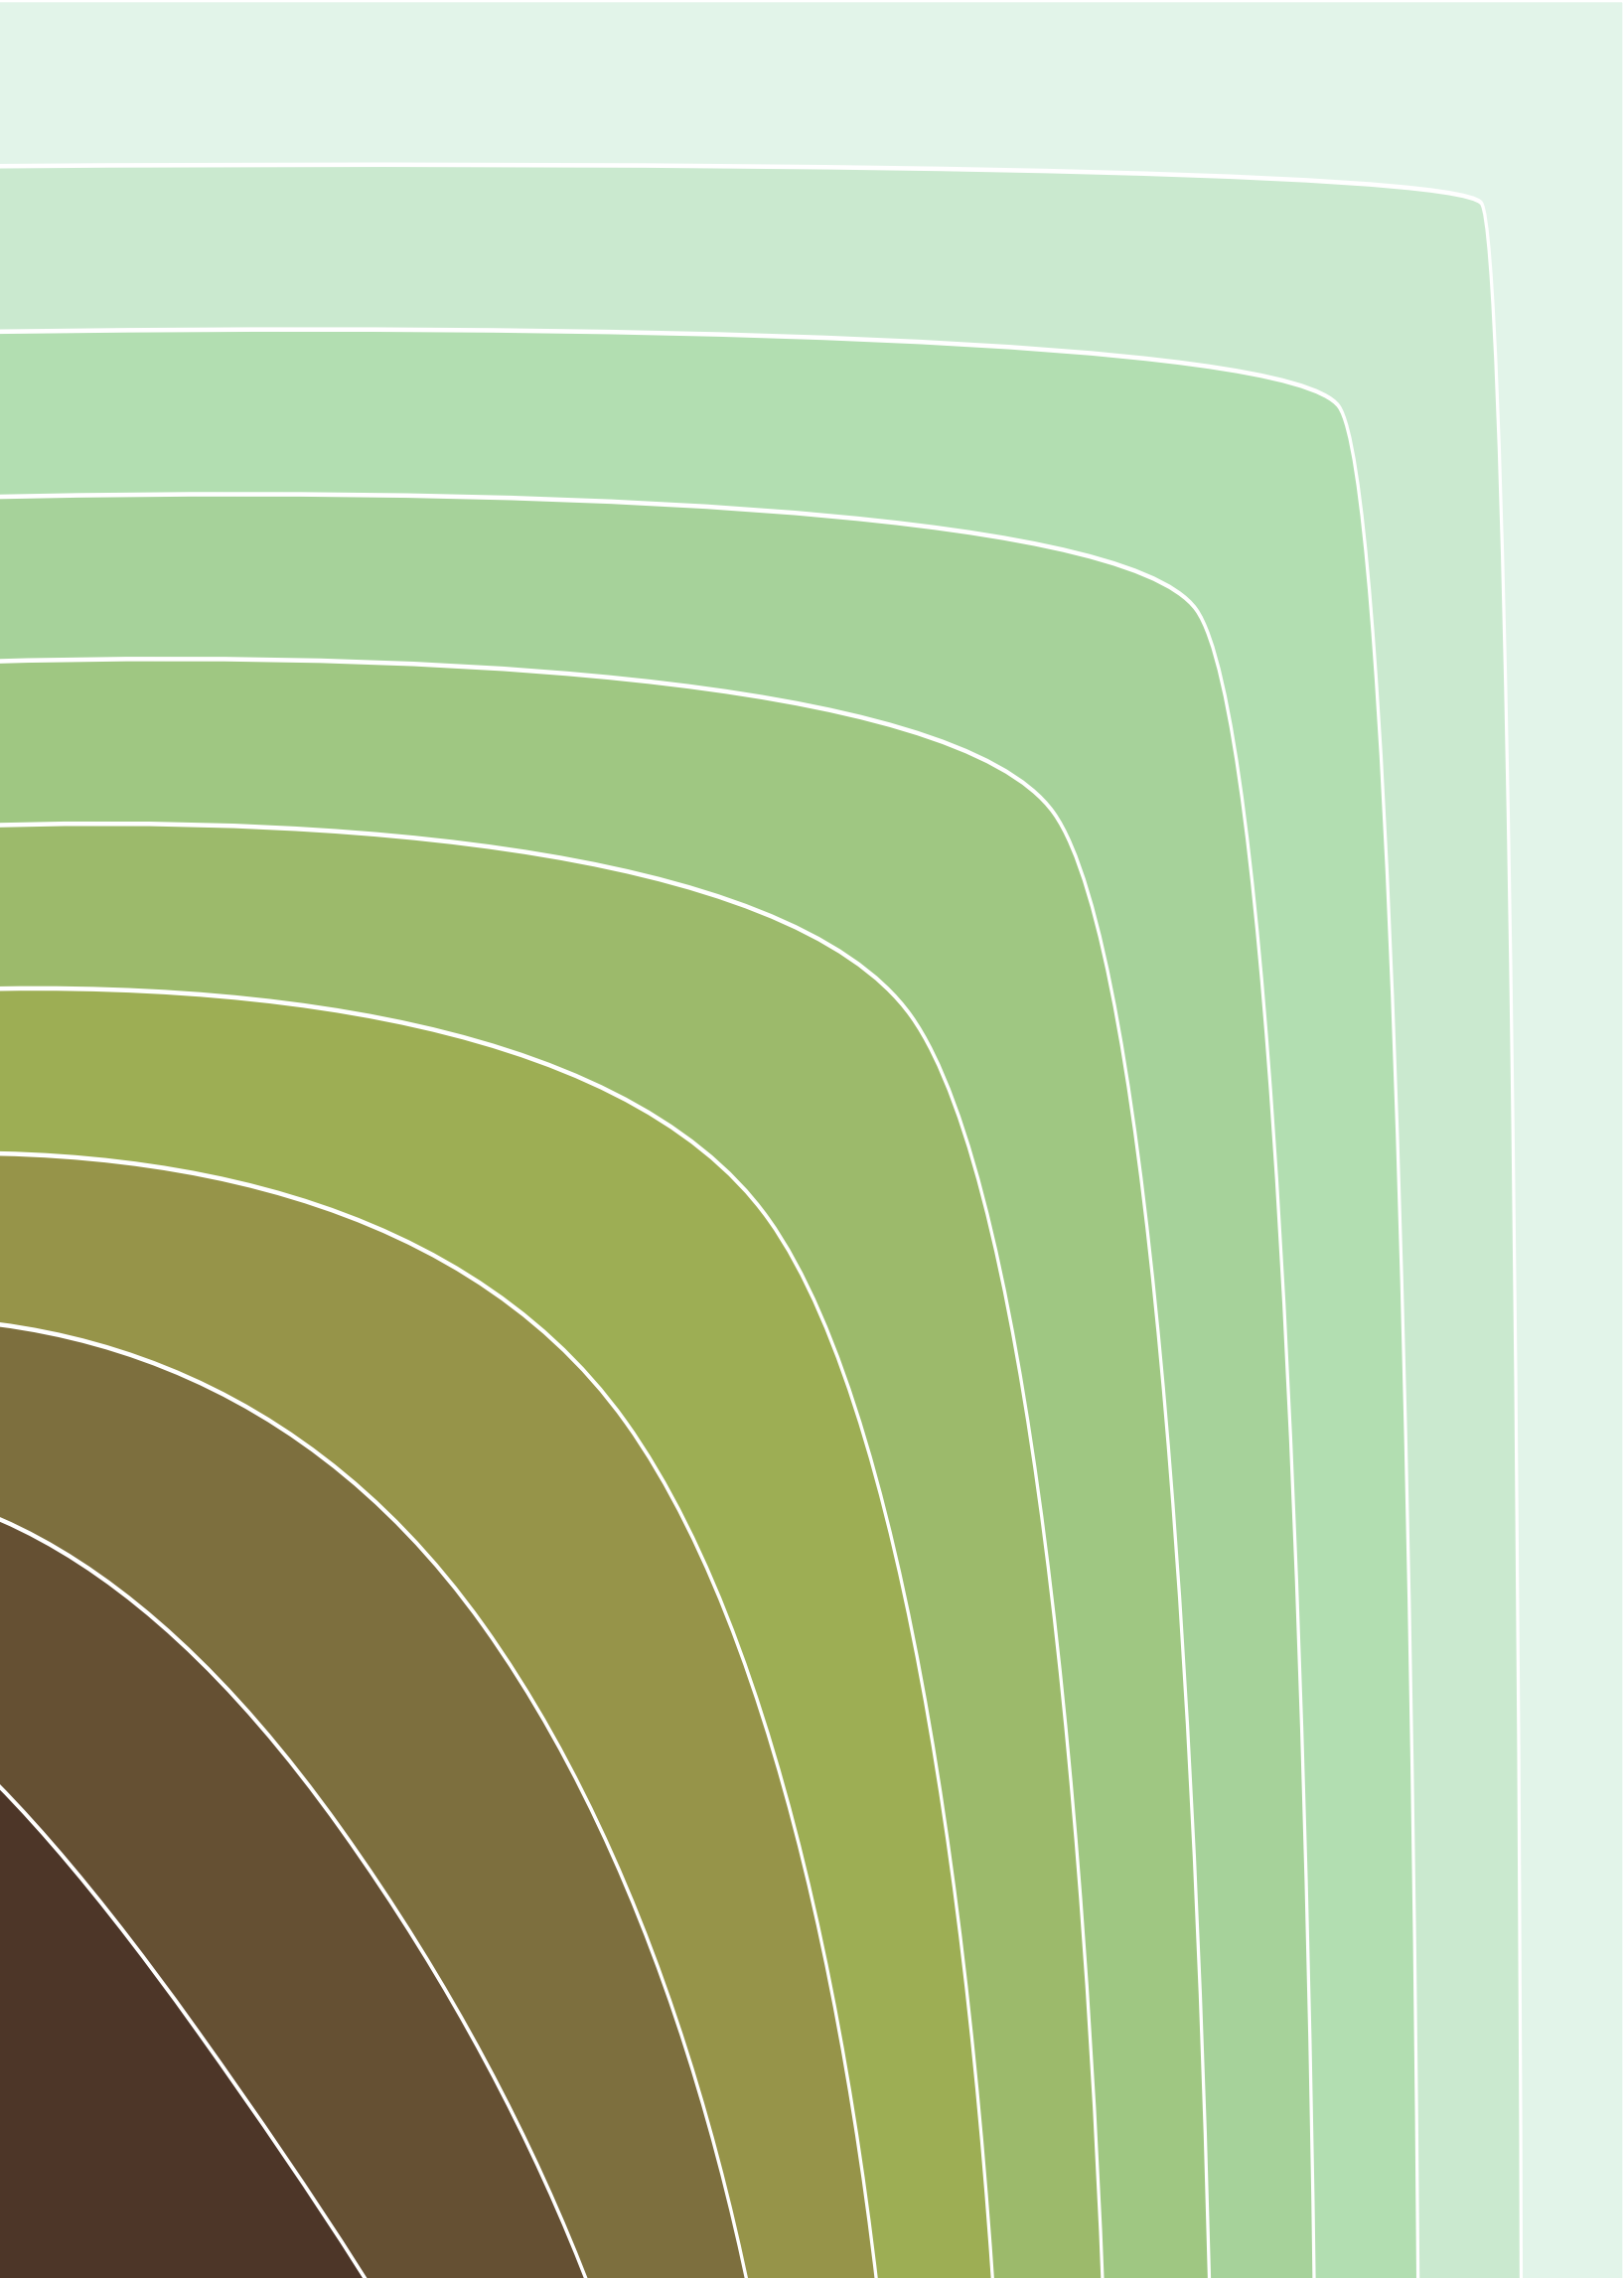

Every day my webserver generates a new book, filled with sliced blobs of a random colour that turn into rectangles in ten steps. The blobs might have a border, and this border, if it exists, is either black or white. The ten steps follow a certain ratio. This ratio is one of the twelve so called excellent orthogons: The Quadrat, the Hemidiagon, the Trion, the Quadriagon, the Biauron, the Penton, the Diagon, the Bipenton, the Hemiolion, the Auron, the Hecton, and the Doppelquadrat.

Created for Vasilis van Gemert — and you — by his webserver.
