

The background features a vertical gradient from dark olive green on the left to a lighter, vibrant green on the right. Overlaid on this are several white, curved lines that originate from the left edge and curve towards the right, creating a sense of depth and movement. These lines vary in curvature and spacing, some being more pronounced than others.

100 random slices

May the 2nd, 2017 — Vasilis van Gemert

Every day my webserver generates a new book, filled with sliced blobs of a random colour that turn into rectangles in ten steps. The blobs might have a border, and this border, if it exists, is either black or white. The ten steps follow a certain ratio. This ratio is one of the twelve so called excellent orthogons: The Quadrat, the Hemidiagon, the Trion, the Quadriagon, the Biauron, the Penton, the Diagon, the Bipenton, the Hemiolion, the Auron, the Hecton, and the Doppelquadrat.

Created for Vasilis van Gemert — and you — by his webserver.
