

The background features a complex, abstract design. On the left side, there are several vertical, slightly curved lines in various shades of green, creating a layered effect. The rest of the background is a mix of grey and light green tones, separated by smooth, flowing black outlines that form organic, rounded shapes. A white rectangular box is positioned in the center-left area, containing the title and author information.

# 100 random slices

July the 5th, 2017 — Vasilis van Gemert

Every day my webserver generates a new book, filled with sliced blobs of a random colour that turn into rectangles in ten steps. The blobs might have a border, and this border, if it exists, is either black or white. The ten steps follow a certain ratio. This ratio is one of the twelve so called excellent orthogons: The Quadrat, the Hemidiagon, the Trion, the Quadriagon, the Biauron, the Penton, the Diagon, the Bipenton, the Hemiolion, the Auron, the Hecton, and the Doppelquadrat.

Created for Vasilis van Gemert — and you — by his webserver.
