

The background is a solid green color. Overlaid on this are several thin, white, curved lines that originate from the top and bottom edges and sweep across the page in various directions, creating a sense of movement and depth. These lines vary in length and curvature, some starting near the top center and ending near the bottom right, while others start near the bottom left and end near the top right.

# 100 random slices

July the 14th, 2017 — Vasilis van Gemert

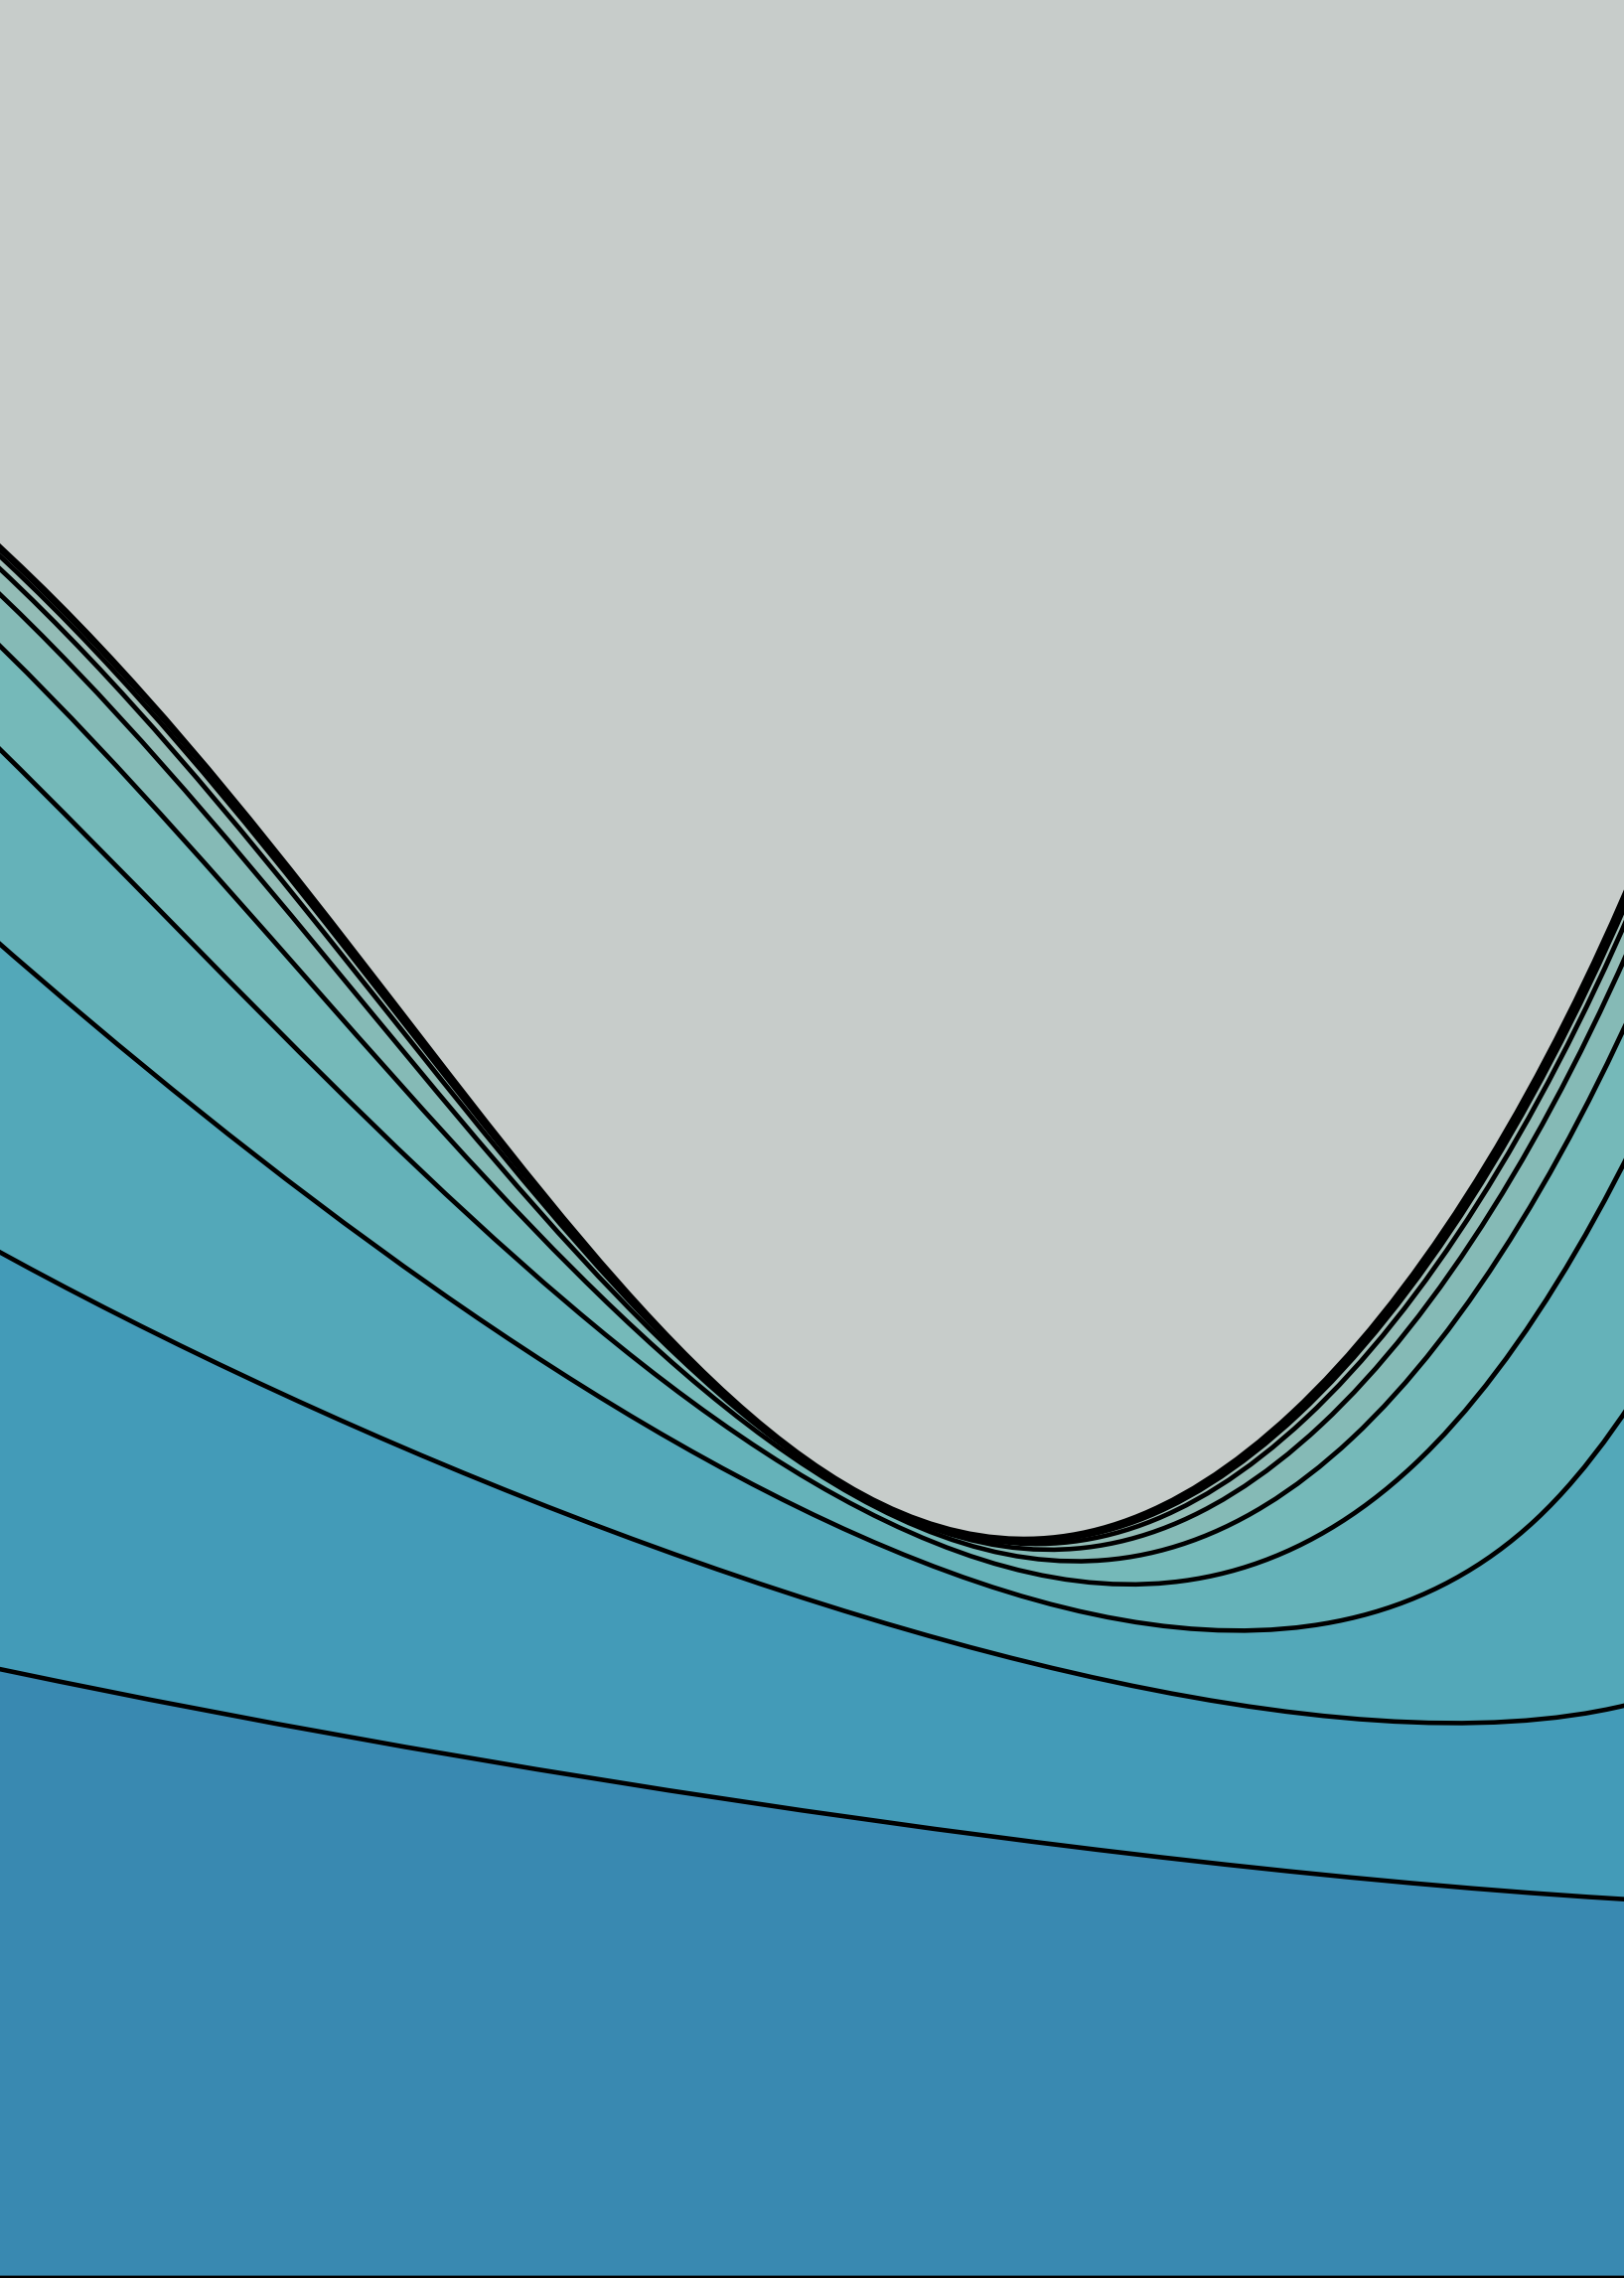

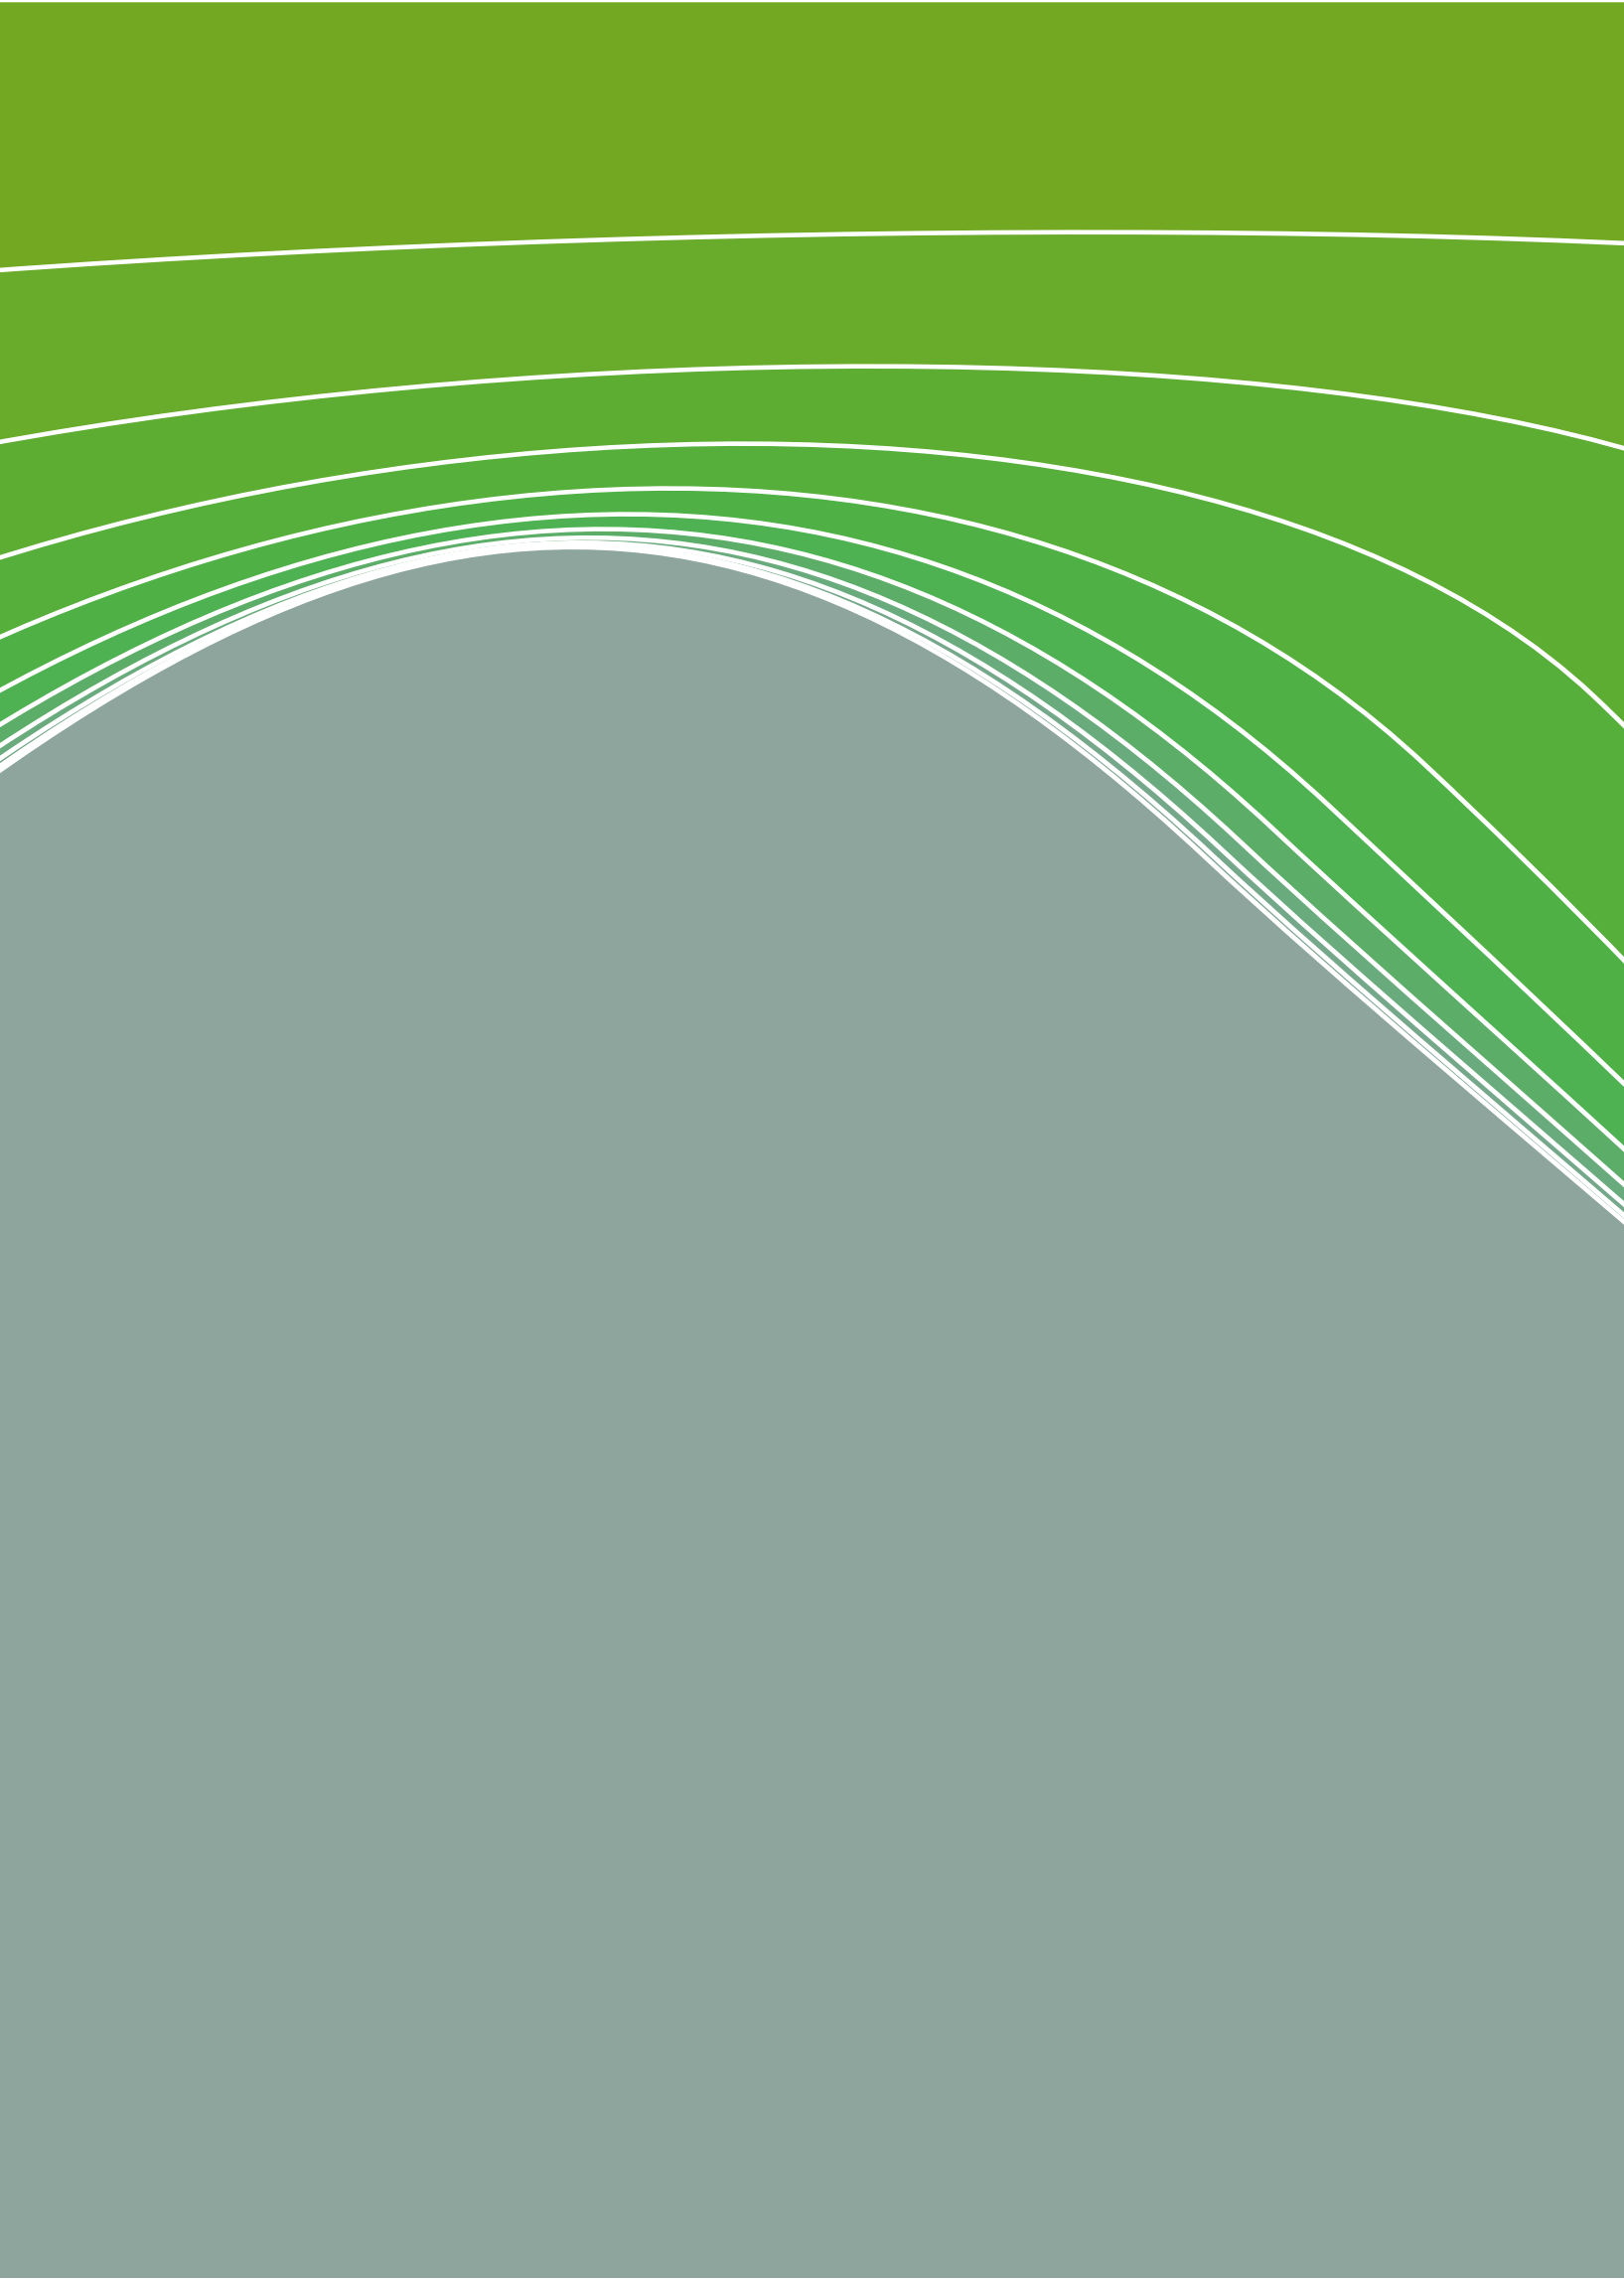

Every day my webserver generates a new book, filled with sliced blobs of a random colour that turn into rectangles in ten steps. The blobs might have a border, and this border, if it exists, is either black or white. The ten steps follow a certain ratio. This ratio is one of the twelve so called excellent orthogons: The Quadrat, the Hemidiagon, the Trion, the Quadriagon, the Biauron, the Penton, the Diagon, the Bipenton, the Hemiolion, the Auron, the Hecton, and the Doppelquadrat.

Created for Vasilis van Gemert — and you — by his webserver.
