

The background features a series of white, curved lines that sweep across the page from the top right towards the bottom left. These lines are set against a gradient of orange and light beige colors. The lines are more densely packed in the upper right corner and become more widely spaced towards the bottom left.

100 random slices

August the 18th, 2017 — Vasilis van Gemert

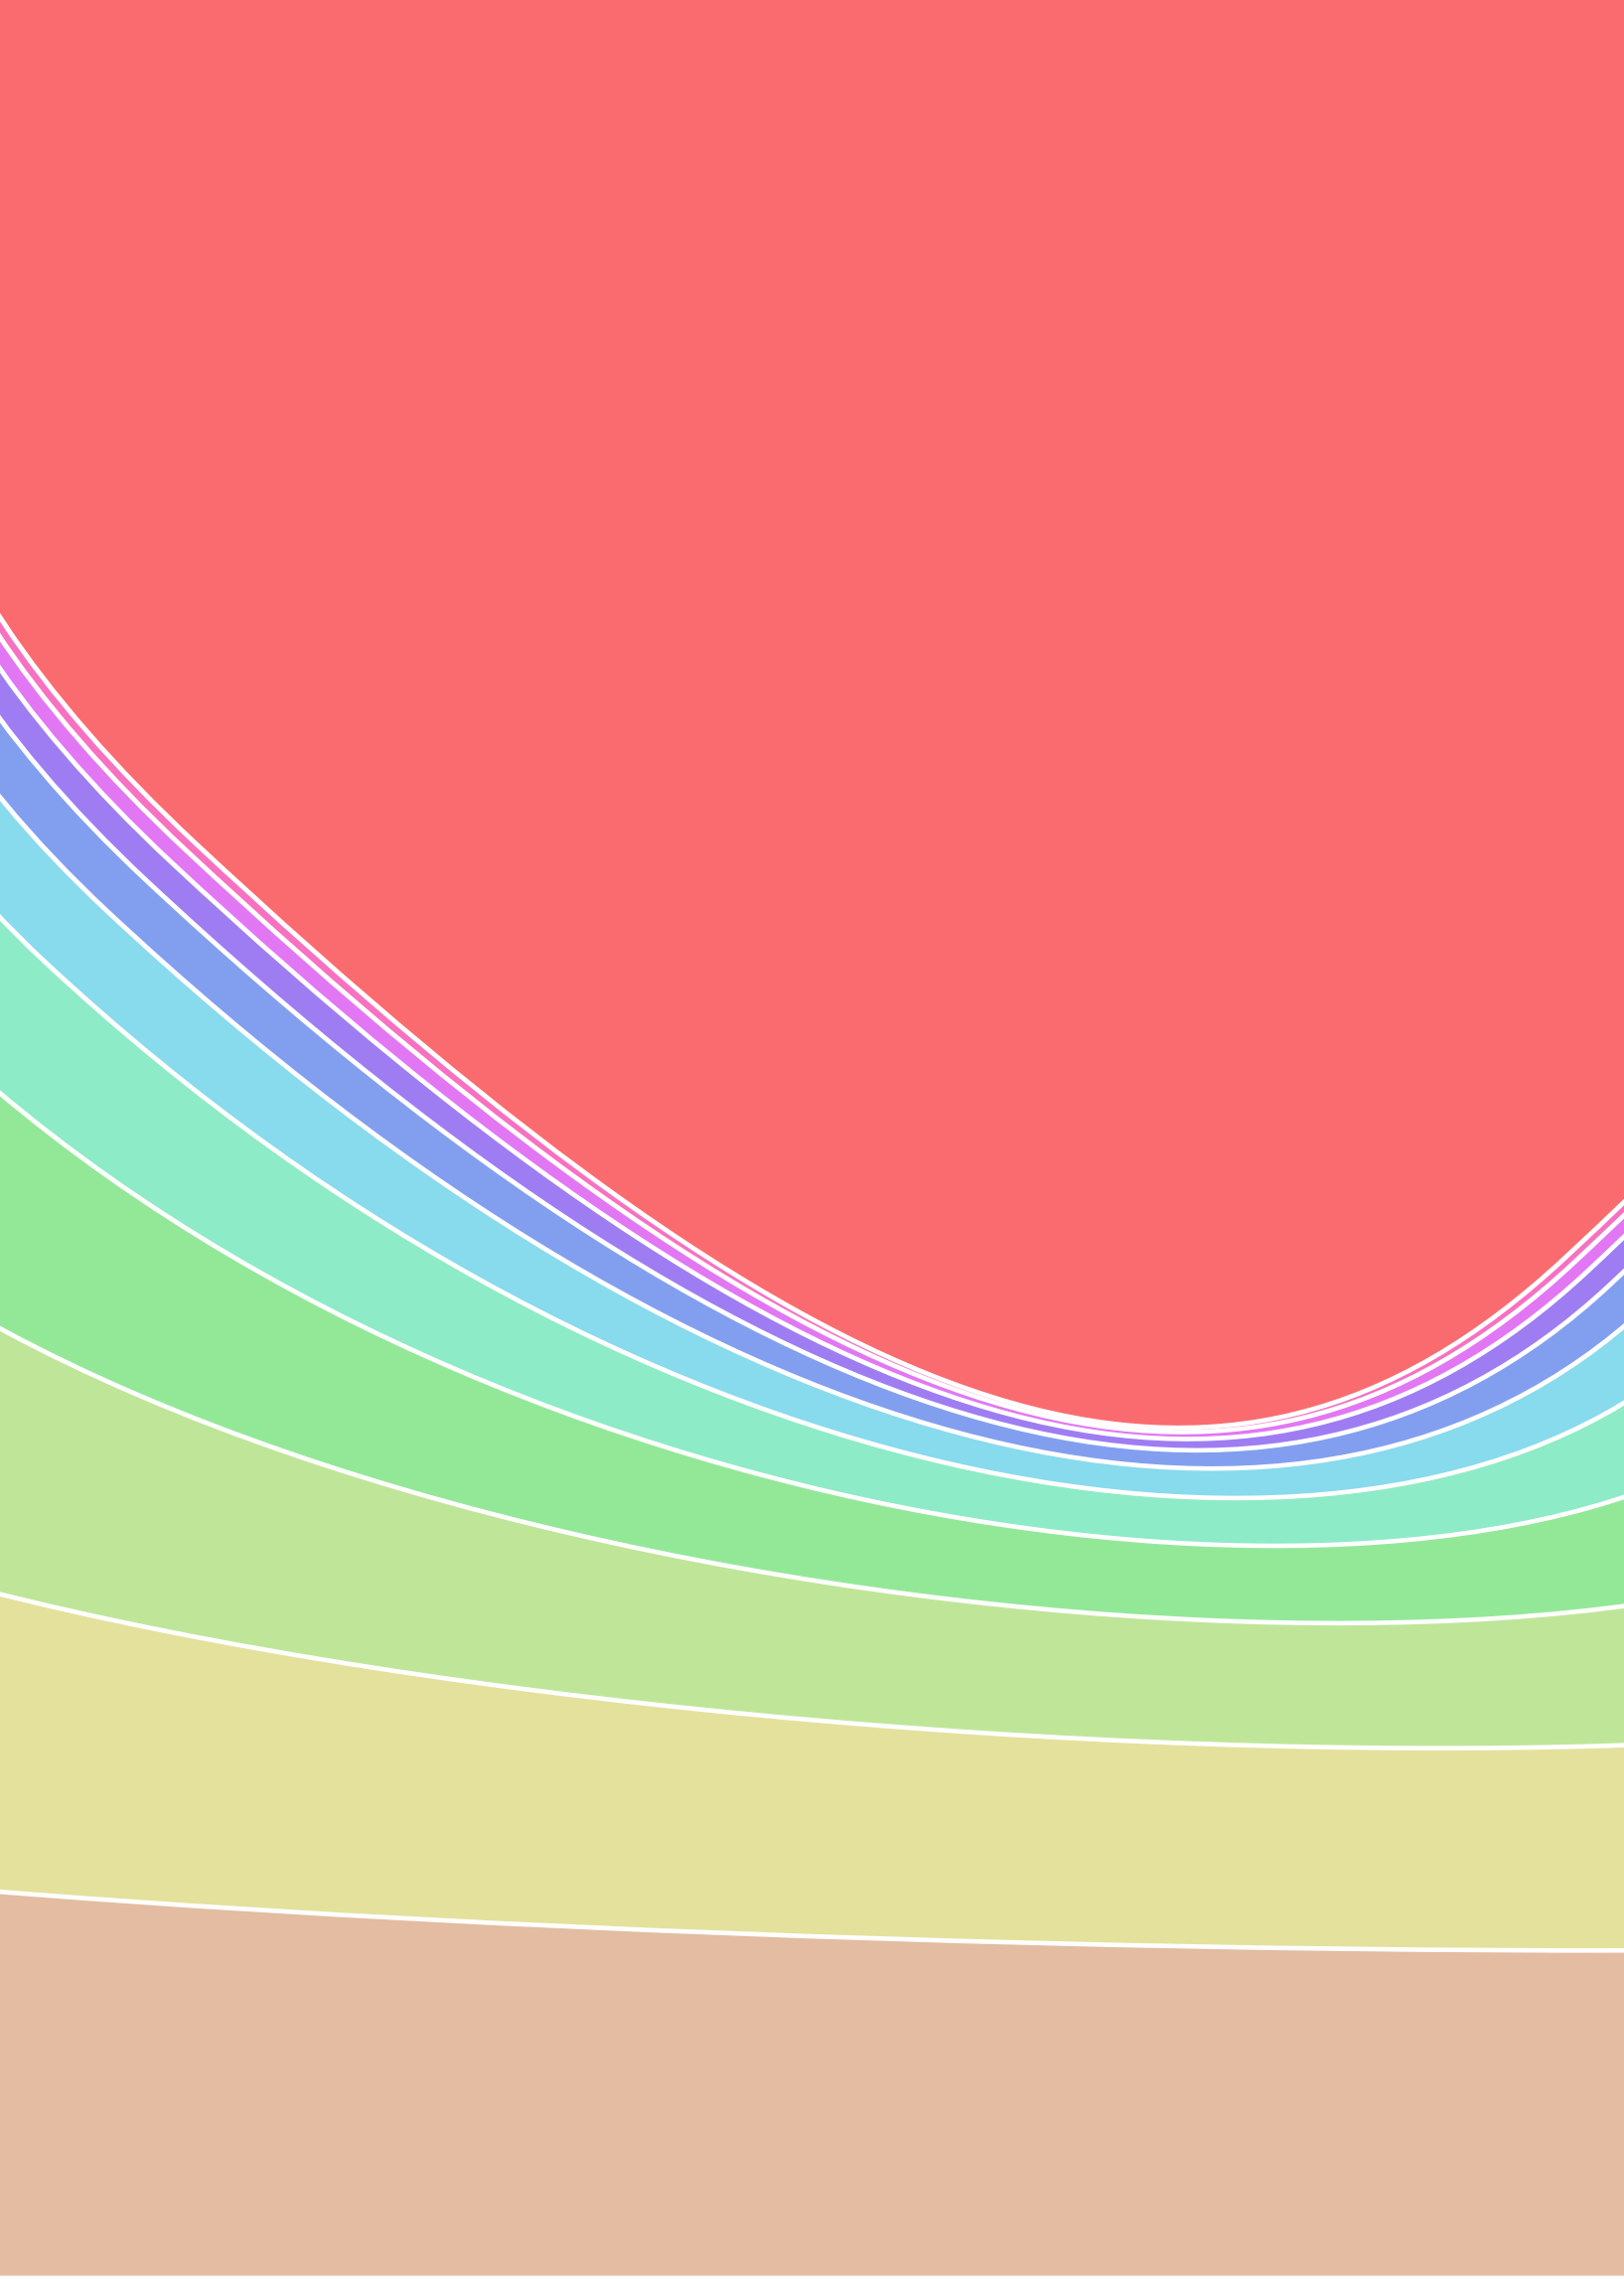

Every day my webserver generates a new book, filled with sliced blobs of a random colour that turn into rectangles in ten steps. The blobs might have a border, and this border, if it exists, is either black or white. The ten steps follow a certain ratio. This ratio is one of the twelve so called excellent orthogons: The Quadrat, the Hemidiagon, the Trion, the Quadriagon, the Biauron, the Penton, the Diagon, the Bipenton, the Hemiolion, the Auron, the Hecton, and the Doppelquadrat.

Created for Vasilis van Gemert — and you — by his webserver.
