

The background of the image is a contour plot. It features a series of nested, roughly rectangular contours that are slightly rounded at the corners. The contours are filled with a color gradient that transitions from a pale, muted green on the left side to a vibrant, bright cyan on the right side. The lines of the contours are thin and black. A white rectangular box is positioned in the center-left of the image, containing text.

100 random slices

August the 19th, 2017 — Vasilis van Gemert

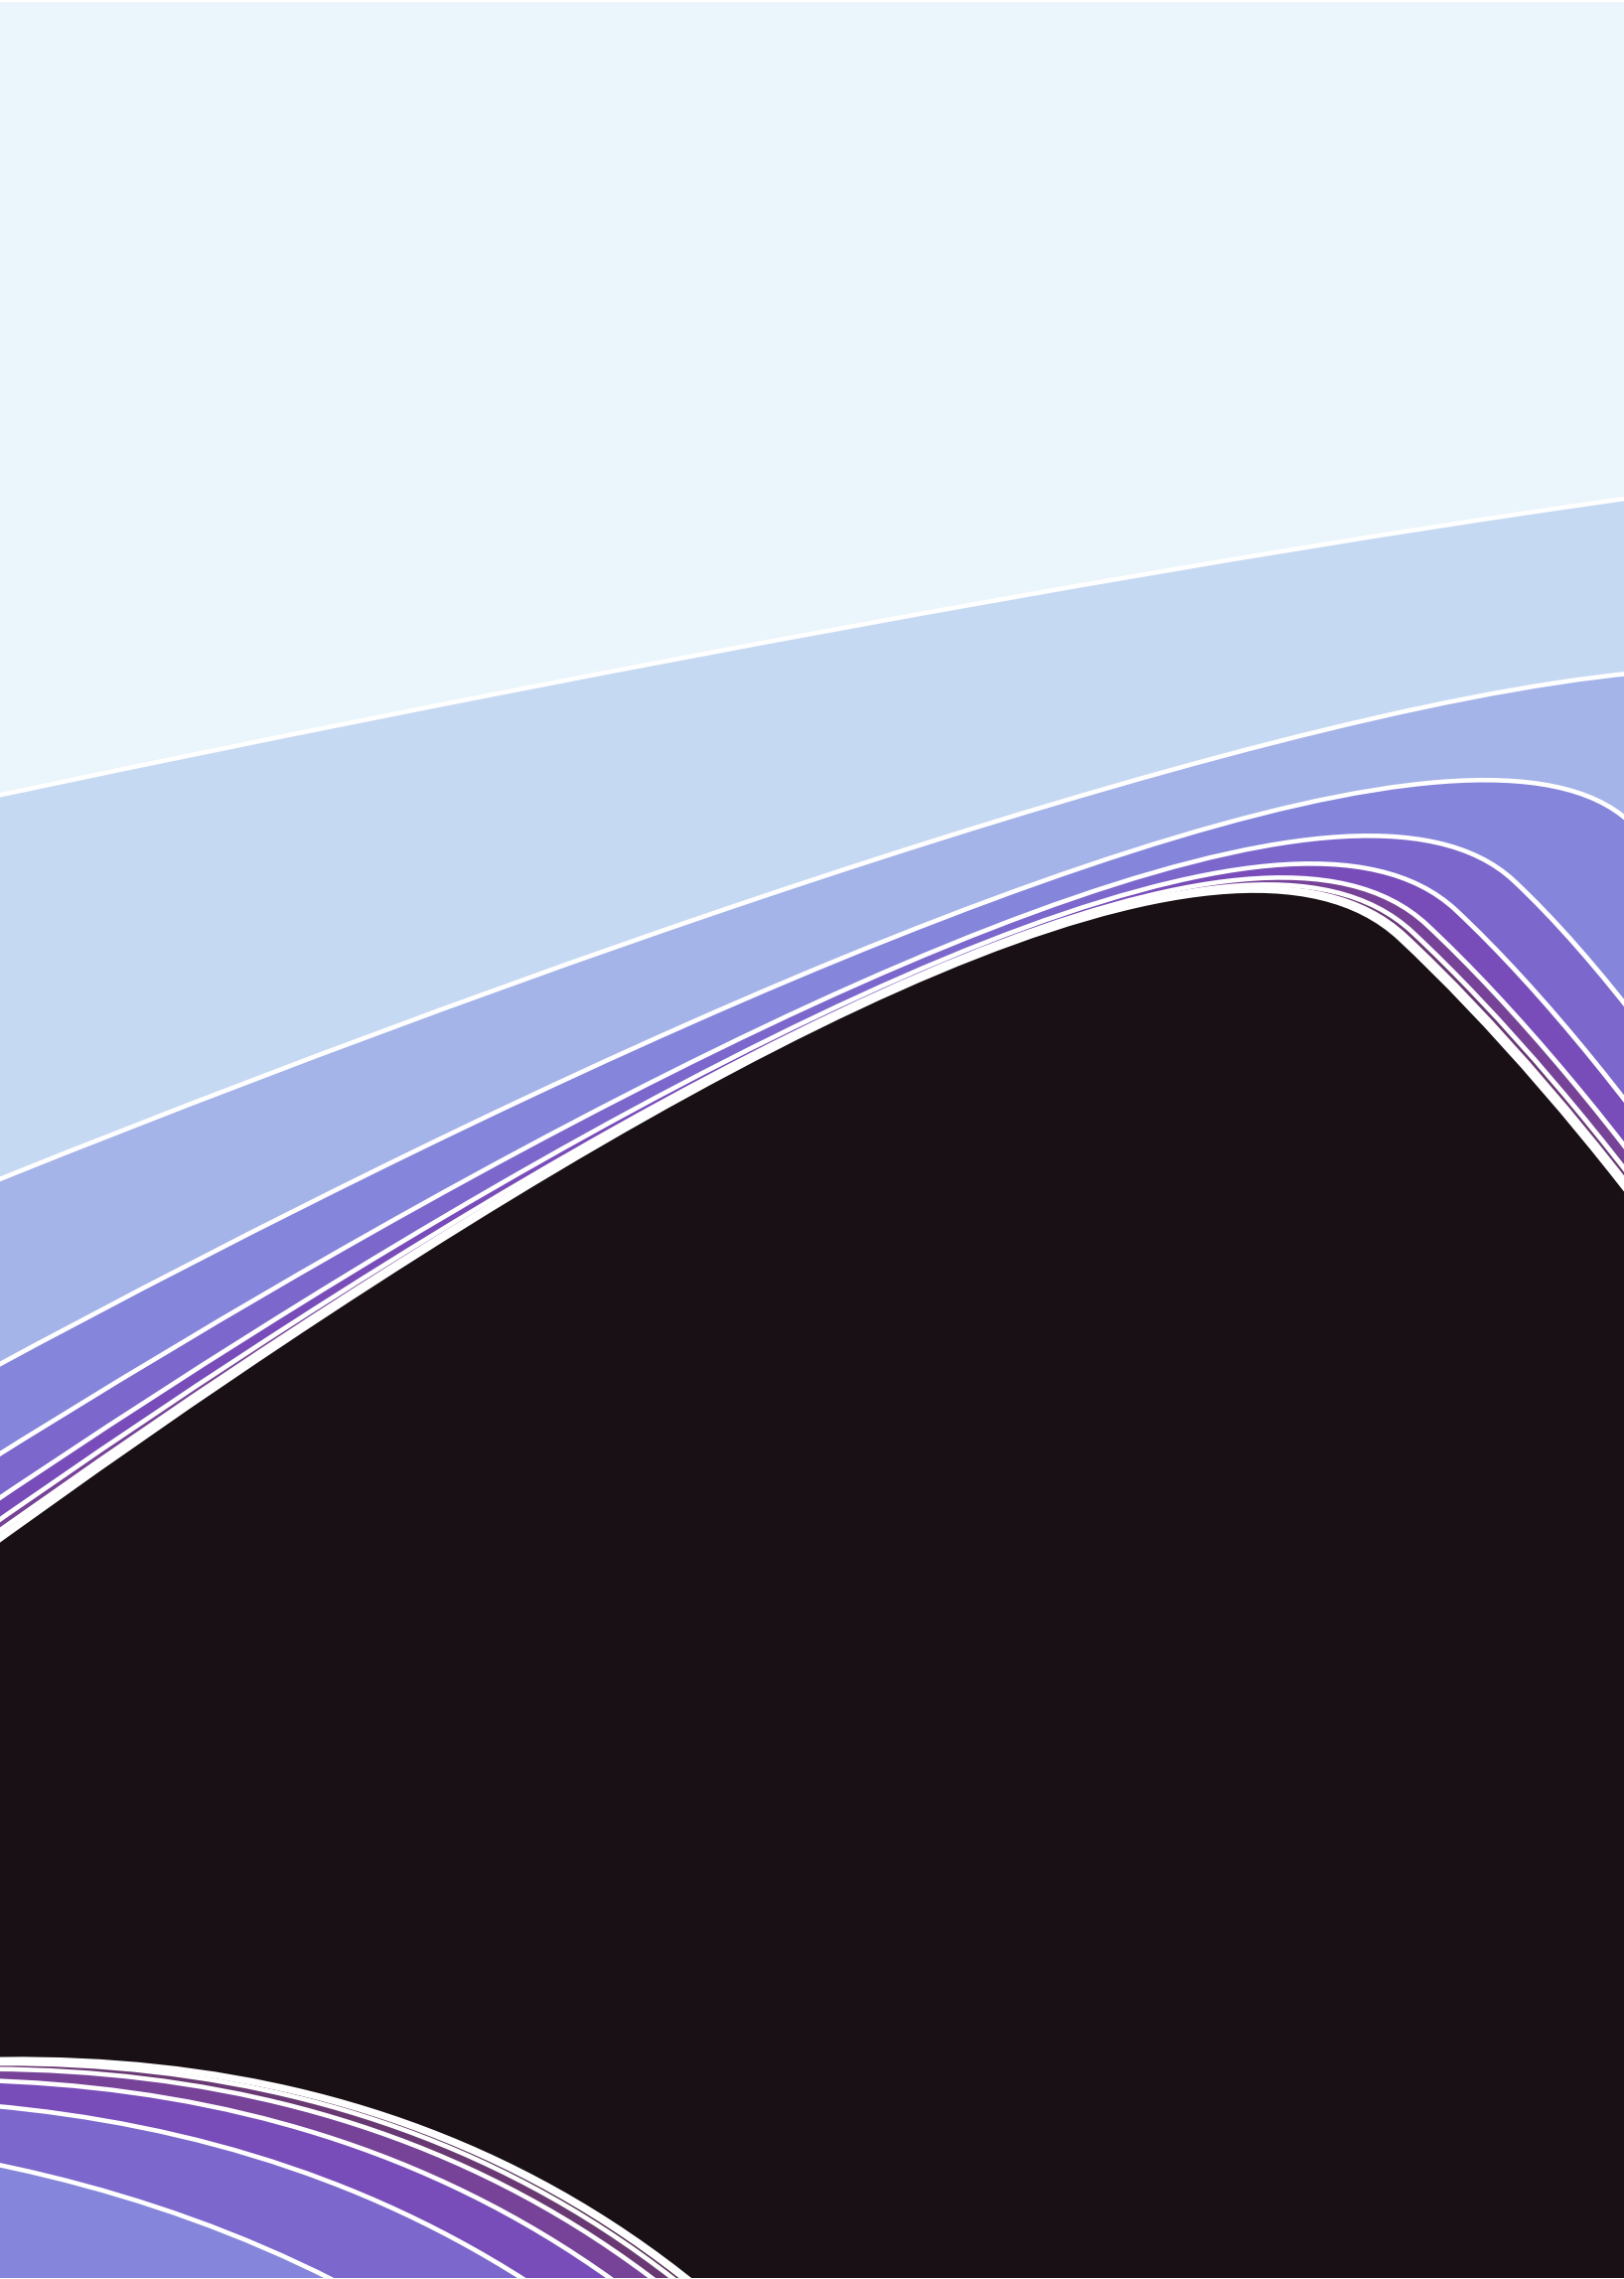

Every day my webserver generates a new book, filled with sliced blobs of a random colour that turn into rectangles in ten steps. The blobs might have a border, and this border, if it exists, is either black or white. The ten steps follow a certain ratio. This ratio is one of the twelve so called excellent orthogons: The Quadrat, the Hemidiagon, the Trion, the Quadriagon, the Biauron, the Penton, the Diagon, the Bipenton, the Hemiolion, the Auron, the Hecton, and the Doppelquadrat.

Created for Vasilis van Gemert — and you — by his webserver.
