

The background features a series of curved, overlapping lines in shades of green and teal, creating a sense of motion and depth. The lines are set against a gradient background that transitions from light green on the left to a darker blue on the right. A white rectangular box is positioned in the center-left of the image, containing the title and subtitle.

100 random slices

September the 11th, 2017 — Vasilis van Gemert

Every day my webserver generates a new book, filled with sliced blobs of a random colour that turn into rectangles in ten steps. The blobs might have a border, and this border, if it exists, is either black or white. The ten steps follow a certain ratio. This ratio is one of the twelve so called excellent orthogons: The Quadrat, the Hemidiagon, the Trion, the Quadriagon, the Biauron, the Penton, the Diagon, the Bipenton, the Hemiolion, the Auron, the Hecton, and the Doppelquadrat.

Created for Vasilis van Gemert — and you — by his webserver.
