

The background features a vertical gradient from light purple on the left to dark purple on the right. Overlaid on this are 100 black outlines of random slices, which are curved, vertical shapes of varying widths and positions, creating a layered, tunnel-like effect.

100 random slices

November the 30th, 2017 — Vasilis van Gemert

Every day my webserver generates a new book, filled with sliced blobs of a random colour that turn into rectangles in ten steps. The blobs might have a border, and this border, if it exists, is either black or white. The ten steps follow a certain ratio. This ratio is one of the twelve so called excellent orthogons: The Quadrat, the Hemidiagon, the Trion, the Quadriagon, the Biauron, the Penton, the Diagon, the Bipenton, the Hemiolion, the Auron, the Hecton, and the Doppelquadrat.

Created for Vasilis van Gemert — and you — by his webserver.
