

The background features a vertical gradient from light green on the left to blue on the right. A series of black lines, representing 100 random slices, are drawn across the image, starting from the top and bottom edges and converging towards the right side. These lines are contained within a white rectangular box.

# 100 random slices

December the 29th, 2017 — Vasilis van Gemert

Every day my webserver generates a new book, filled with sliced blobs of a random colour that turn into rectangles in ten steps. The blobs might have a border, and this border, if it exists, is either black or white. The ten steps follow a certain ratio. This ratio is one of the twelve so called excellent orthogons: The Quadrat, the Hemidiagon, the Trion, the Quadriagon, the Biauron, the Penton, the Diagon, the Bipenton, the Hemiolion, the Auron, the Hecton, and the Doppelquadrat.

Created for Vasilis van Gemert — and you — by his webserver.
