

The background is a light blue gradient with several black lines. A large, smooth curve starts from the left edge and arcs towards the top right. On the right side, there are several vertical lines that create a striped effect, with the color of the background darkening from light blue on the left to a dark blue/black on the right.

100 random slices

December the 31st, 2017 — Vasilis van Gemert

Every day my webserver generates a new book, filled with sliced blobs of a random colour that turn into rectangles in ten steps. The blobs might have a border, and this border, if it exists, is either black or white. The ten steps follow a certain ratio. This ratio is one of the twelve so called excellent orthogons: The Quadrat, the Hemidiagon, the Trion, the Quadriagon, the Biauron, the Penton, the Diagon, the Bipenton, the Hemiolion, the Auron, the Hecton, and the Doppelquadrat.

Created for Vasilis van Gemert — and you — by his webserver.
