

The background features a large, abstract shape on the left side, composed of overlapping areas in shades of brown, tan, and olive green, separated by white outlines. On the right side, there is a vertical bar consisting of several parallel stripes in various shades of green, ranging from light to dark, with thin white lines separating them.

100 random slices

March the 10th, 2018 — Vasilis van Gemert

Every day my webserver generates a new book, filled with sliced blobs of a random colour that turn into rectangles in ten steps. The blobs might have a border, and this border, if it exists, is either black or white. The ten steps follow a certain ratio. This ratio is one of the twelve so called excellent orthogons: The Quadrat, the Hemidiagon, the Trion, the Quadriagon, the Biauron, the Penton, the Diagon, the Bipenton, the Hemiolion, the Auron, the Hecton, and the Doppelquadrat.

Created for Vasilis van Gemert — and you — by his webserver.
