

The background features a series of vertical stripes in shades of green and blue, transitioning from dark green on the left to light blue on the right. A large, dark brown curved shape is positioned on the left side, partially overlapping the stripes.

100 random slices

March the 18th, 2018 — Vasilis van Gemert

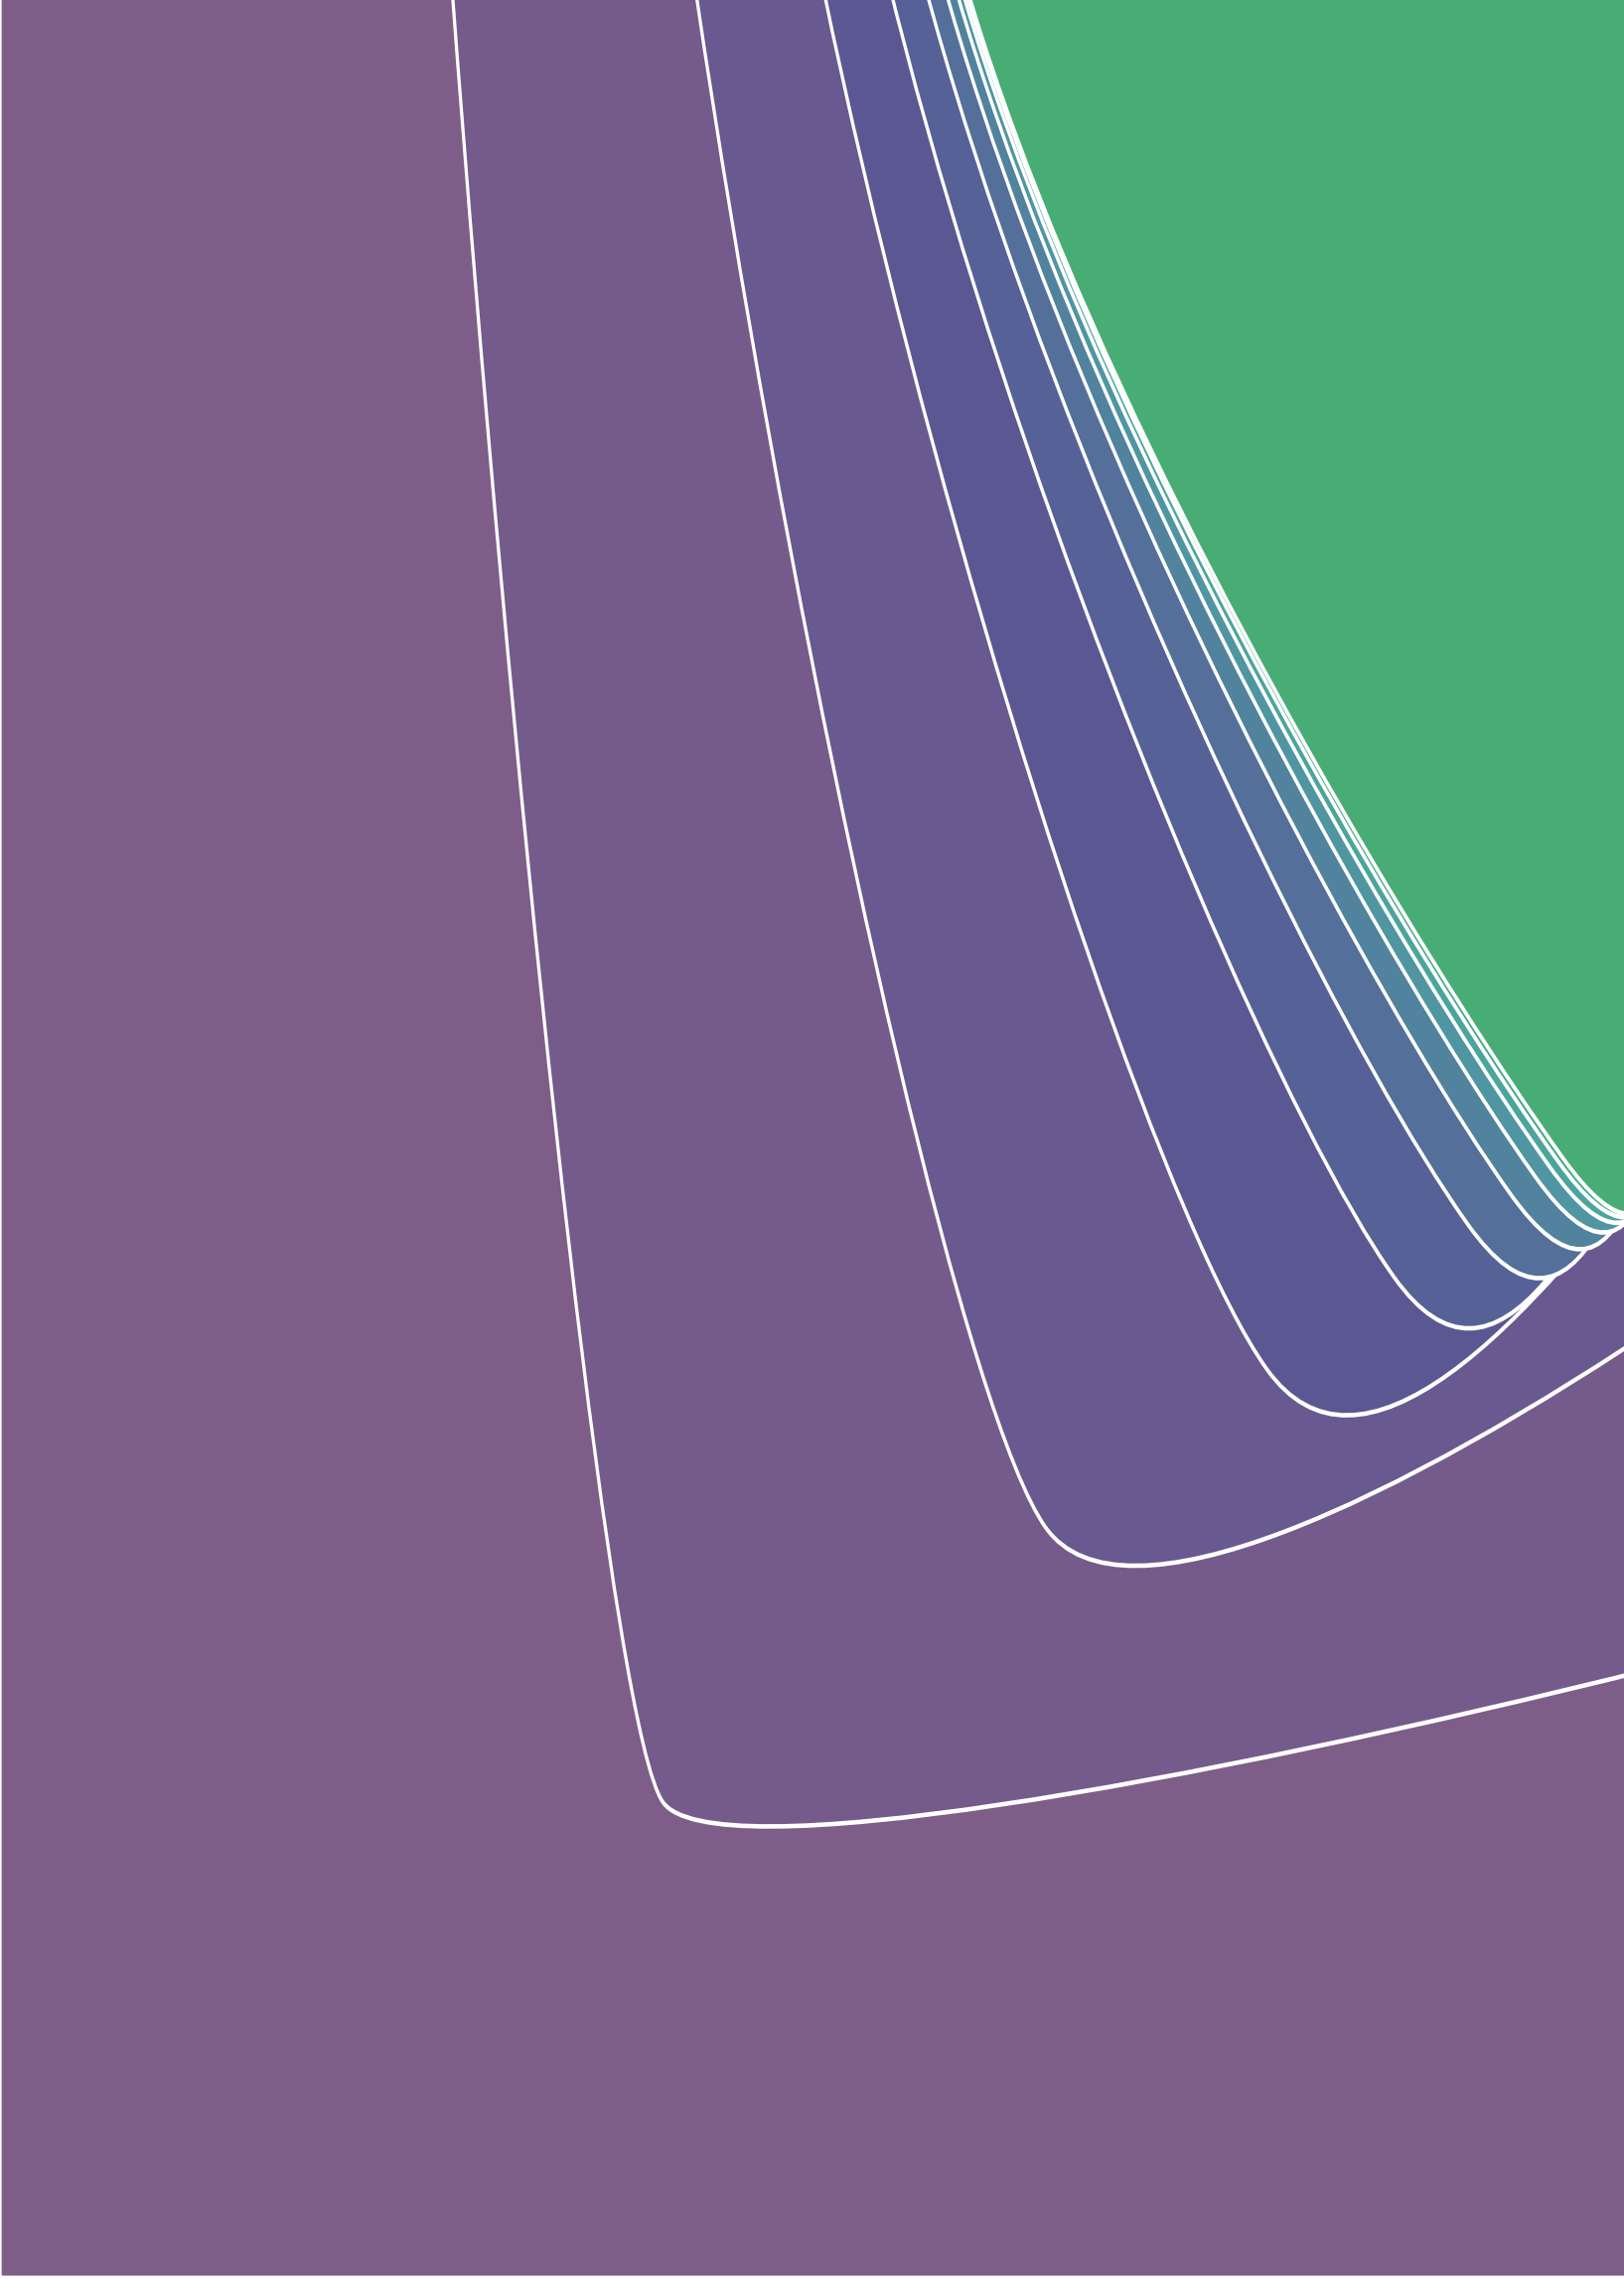

Every day my webserver generates a new book, filled with sliced blobs of a random colour that turn into rectangles in ten steps. The blobs might have a border, and this border, if it exists, is either black or white. The ten steps follow a certain ratio. This ratio is one of the twelve so called excellent orthogons: The Quadrat, the Hemidiagon, the Trion, the Quadriagon, the Biauron, the Penton, the Diagon, the Bipenton, the Hemiolion, the Auron, the Hecton, and the Doppelquadrat.

Created for Vasilis van Gemert — and you — by his webserver.
