

The background features a series of curved, overlapping bands that originate from the bottom right and fan out towards the top left. The colors transition from a bright green at the bottom left, through cyan and blue, to a dark purple at the top right. Each band is outlined with a thin black line.

100 random slices

June the 5th, 2018 — Vasilis van Gemert

Every day my webserver generates a new book, filled with sliced blobs of a random colour that turn into rectangles in ten steps. The blobs might have a border, and this border, if it exists, is either black or white. The ten steps follow a certain ratio. This ratio is one of the twelve so called excellent orthogons: The Quadrat, the Hemidiagon, the Trion, the Quadriagon, the Biauron, the Penton, the Diagon, the Bipenton, the Hemiolion, the Auron, the Hecton, and the Doppelquadrat.

Created for Vasilis van Gemert — and you — by his webserver.
