

The background features a series of wavy, horizontal lines in shades of green and blue, creating a layered, landscape-like effect. The colors transition from a bright green at the top to a deep blue at the bottom. A white rectangular box is centered in the upper half of the image, containing the title and author information.

100 random slices

June the 23rd, 2018 — Vasilis van Gemert

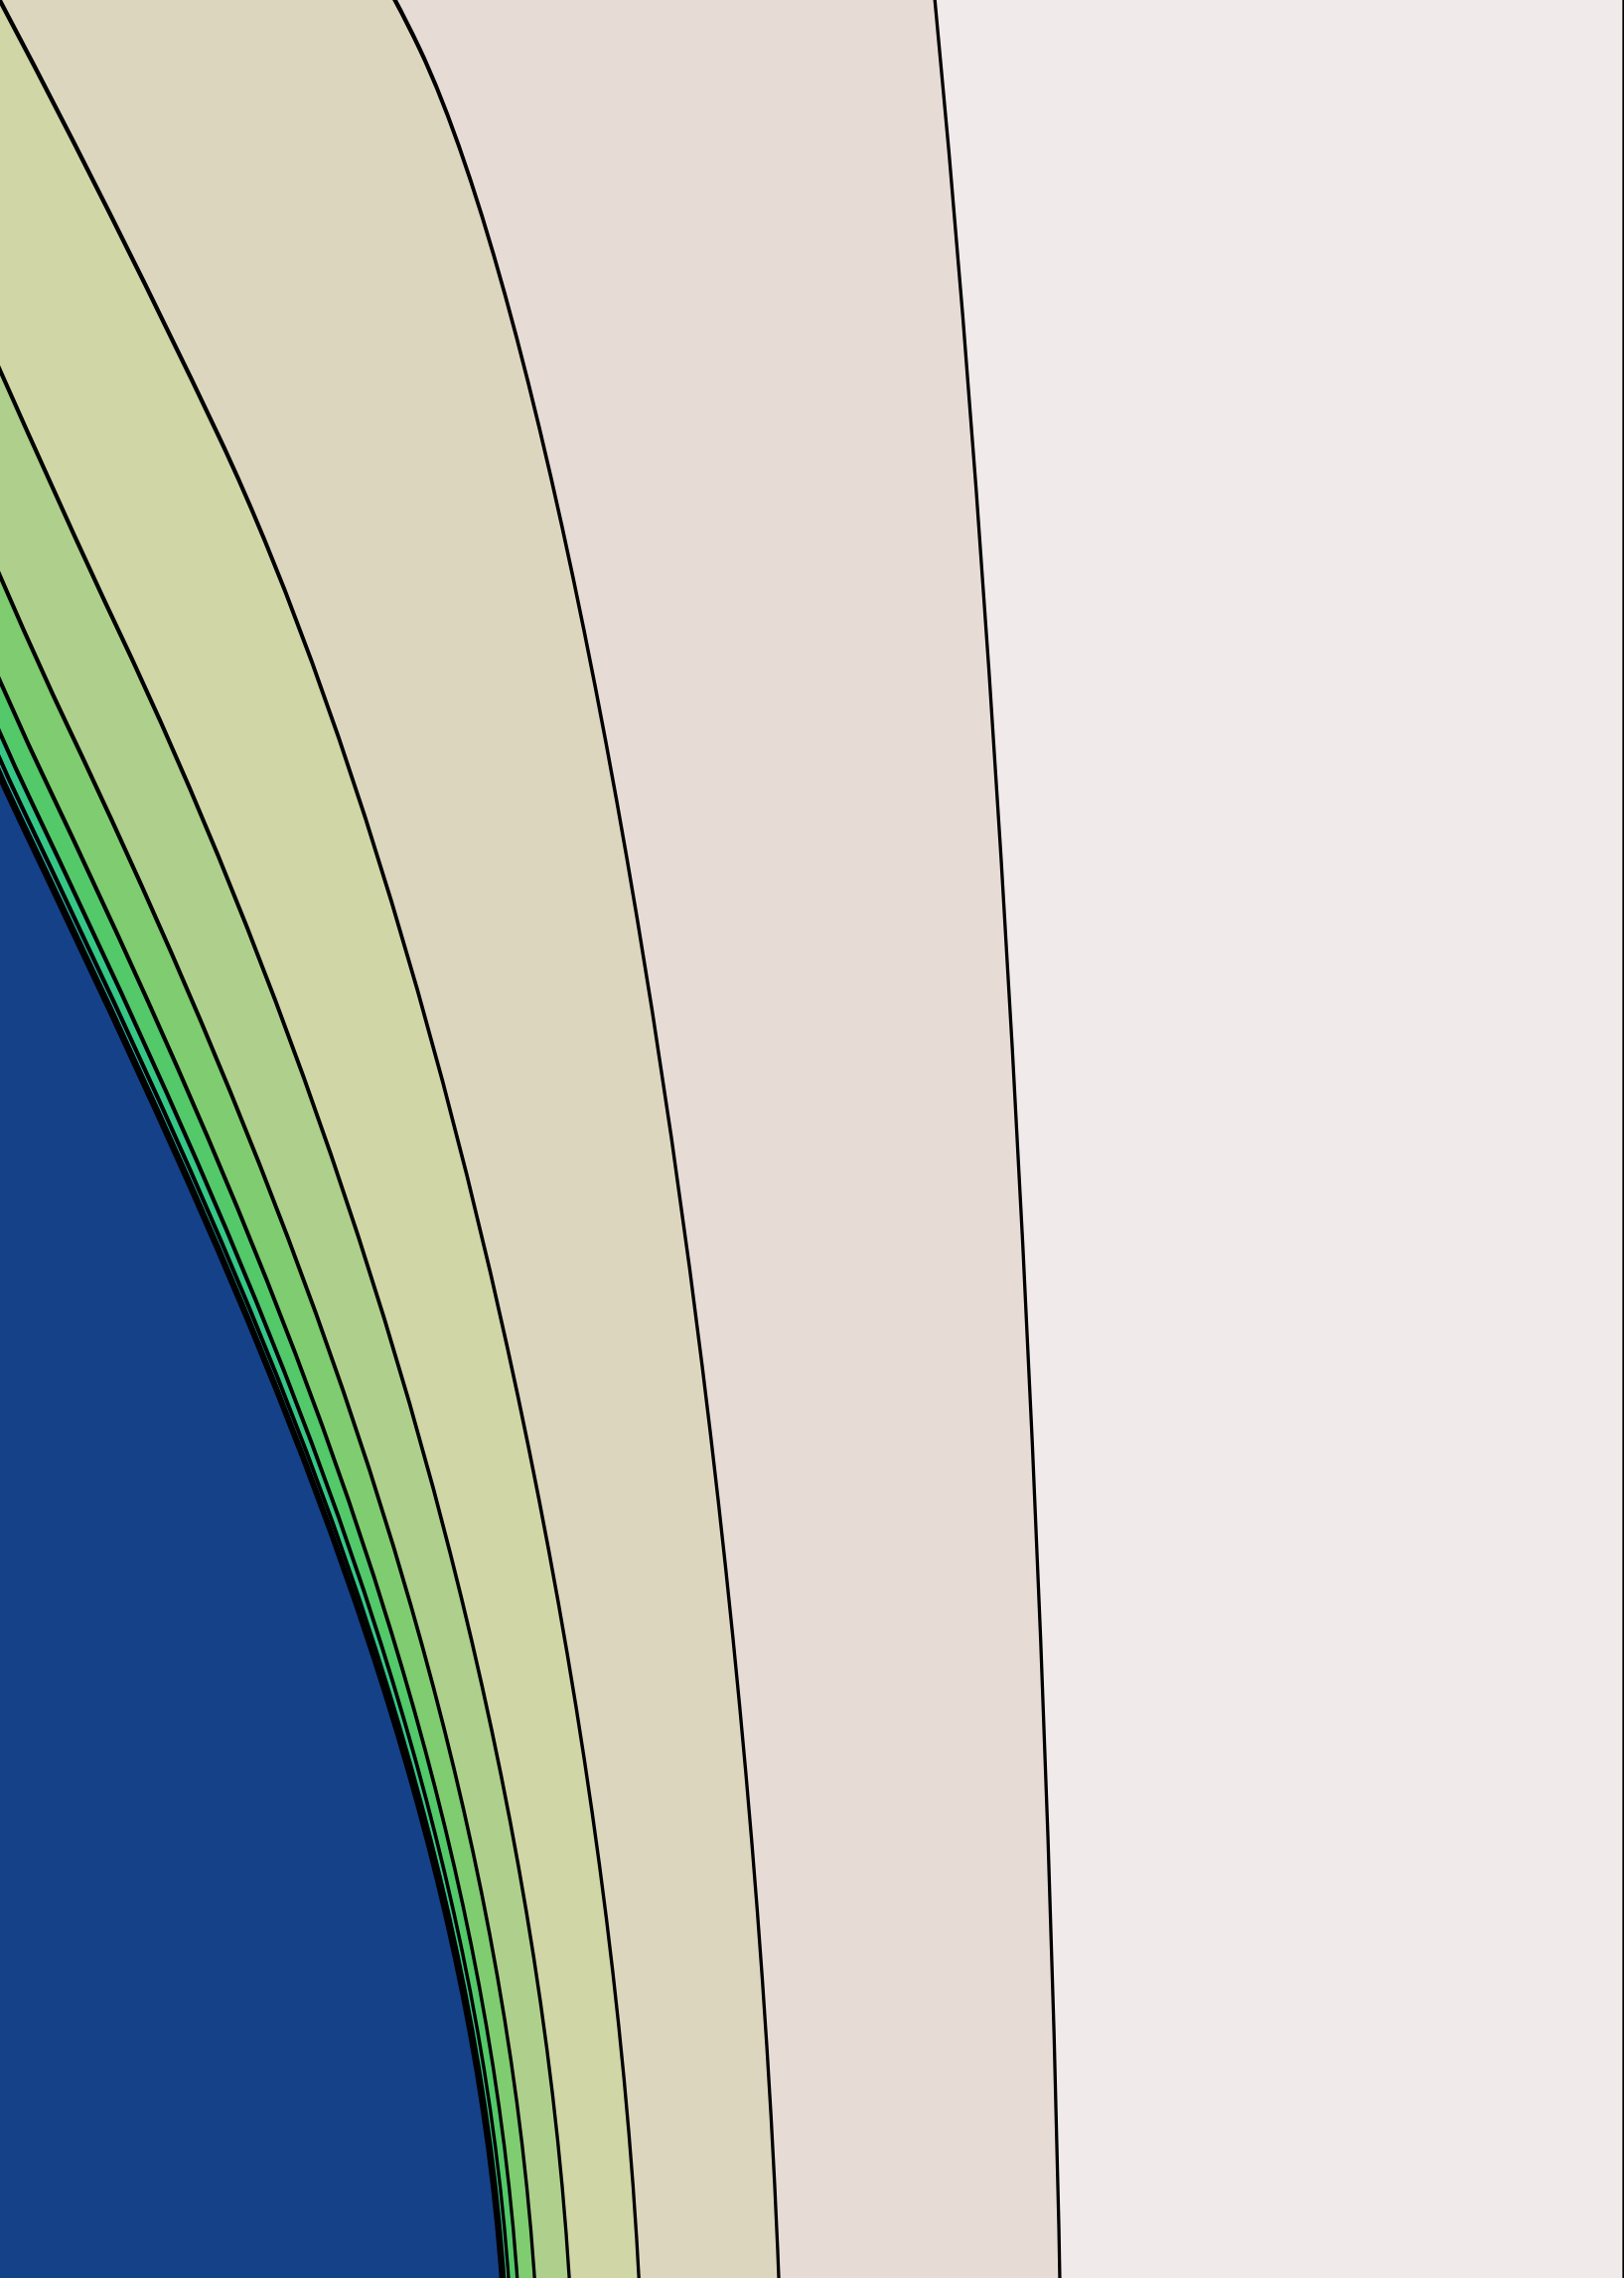

Every day my webserver generates a new book, filled with sliced blobs of a random colour that turn into rectangles in ten steps. The blobs might have a border, and this border, if it exists, is either black or white. The ten steps follow a certain ratio. This ratio is one of the twelve so called excellent orthogons: The Quadrat, the Hemidiagon, the Trion, the Quadriagon, the Biauron, the Penton, the Diagon, the Bipenton, the Hemiolion, the Auron, the Hecton, and the Doppelquadrat.

Created for Vasilis van Gemert — and you — by his webserver.
