

The background features a gradient from dark purple on the left to bright magenta on the right. Overlaid on this are several thin, white, curved lines that sweep across the frame from the bottom left towards the top right. A white rectangular box is positioned in the upper-middle section of the image, containing the title and author information.

100 random slices

September the 20th, 2018 — Vasilis van Gemert

Every day my webserver generates a new book, filled with sliced blobs of a random colour that turn into rectangles in ten steps. The blobs might have a border, and this border, if it exists, is either black or white. The ten steps follow a certain ratio. This ratio is one of the twelve so called excellent orthogons: The Quadrat, the Hemidiagon, the Trion, the Quadriagon, the Biauron, the Penton, the Diagon, the Bipenton, the Hemiolion, the Auron, the Hecton, and the Doppelquadrat.

Created for Vasilis van Gemert — and you — by his webserver.
